*John G. Anderson*

Constitution Capital Management is an equity, fixed-income and balanced manager.

It offers two equity approaches. In the low p/e Valuepath approach, equities first are computer-ranked by fundamentals and then screened by professionals to avoid excessive risk. Buy/sell decisions are disciplined. The growth approach emphasizes growth stock and also is quantitative. Valuepath is run out of the Boston office; the growth approach, out of Hartford.

Its fixed-income approach emphasizes aggressive management of sector switches, yield curve positioning, security arbitrages and individual issue selection. Durations are close to the Shearson Lehman Government/Corporate bond index.

The asset mix Jan. 1 was 45% stocks, 35% bonds and 20% cash. It managed $15 million in dedicated or immunized portfolios.

The parent company is the Bank of New England Corp. Assets under management by the parent, subsidiaries and affiliates total $10 billion.

John G. Anderson, president, is chief investment officer. Ellsworth Davis is client contact in the Hartford office. Joyce Braude is the contact in the Boston office at 53 State St., Boston, Mass. 02109; (617) 722-4800.

Special leasing section: June 15.

| Tax-exempt assets managed | $1,900,000,000 |
| Real estate assets managed | $1,900,000,000 |
| Tax-exempt clients | 20 |
| Types of accounts managed | CEFG |

Corporate Property Investors, a real estate manager, concentrates investment in 30 super regional shopping centers and two major office buildings.

All assets Jan. 1 were in equity real estate.

Clients include AT&T, General Motors, Ford Foundation and Yale.

Hans Mautner, president, is chief investment officer. Warren Hamer, director-client relations, is client contact.

### County Investment Management Ltd.

*28 Throgmorton St., London, England EC2N 2AN; 011-441-638-6000*

| | |
|---|---|
| Total assets managed | $12,081,000,000 |
| Tax-exempt assets managed | $71,000,000 |
| International assets managed | $31,000,000 |
| Tax-exempt clients | 2 |
| Types of accounts managed | C |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 44 |
| Size of research staff | 17 |

County Investment Management Ltd. is an equity, fixed-income, balanced and international manager.

Its equity approach is quantitative, top-down and risk-controlled. It emphasizes active market allocation through passive stock selection using the firm's index funds. Stock index futures are used.

Its fixed-income approach is top-down, emphasizing market allocation, interest rate anticipation, yield curve analysis, currency allocation and high-quality instruments.

All assets were in stocks Jan. 1. There was $31 million in foreign stocks and $40 million in equity index funds.

The parent company is Natwest Investment Bank.

Margaret Waller, vice president-marketing, is the client contact at 100 Wall St., New York, N.Y. 10005; (212) 440-8300.

### The Crabbe-Huson Co.

*1211 S.W. Fifth, Suite 2900, Portland, Ore. 97204; (503) 295-0111*

| | |
|---|---|
| Total assets managed | $245,000,000 |
| Tax-exempt assets managed | $200,000,000 |
| Tax-exempt clients | 25 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 2 |

The Crabbe-Huson Co. is an equity, fixed-income and balanced manager.

Its equity approach is risk-averse and contrarian, focusing on large-cap stocks in concentrated portfolios.

Its fixed-income approach uses a contrarian approach to identify turning points in interest rates. Short to medium maturities are stressed. Arbitrage and sector swapping are used.

The asset mix Jan. 1 was 50% stocks, 25% bonds and 25% cash.

James E. Crabbe, president, is chief investment officer.

James C. Vogelzang is client contact at Vogelzang & Associates Inc., P.O. Box 890, Calistoga, Calif. 94515; (707) 942-4611.

### Cramblit & Carney Inc.

*523 W. Sixth St., Suite 723, Los Angeles, Calif. 90014; (213) 680-0562*

| | |
|---|---|
| Total assets managed | $521,000,000 |
| Tax-exempt assets managed | $391,000,000 |

| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 5 |

Cramblit & Carney Inc. is an equity, fixed-income and balanced manager.

Its equity approach seeks growth and low p/e stocks strategies.

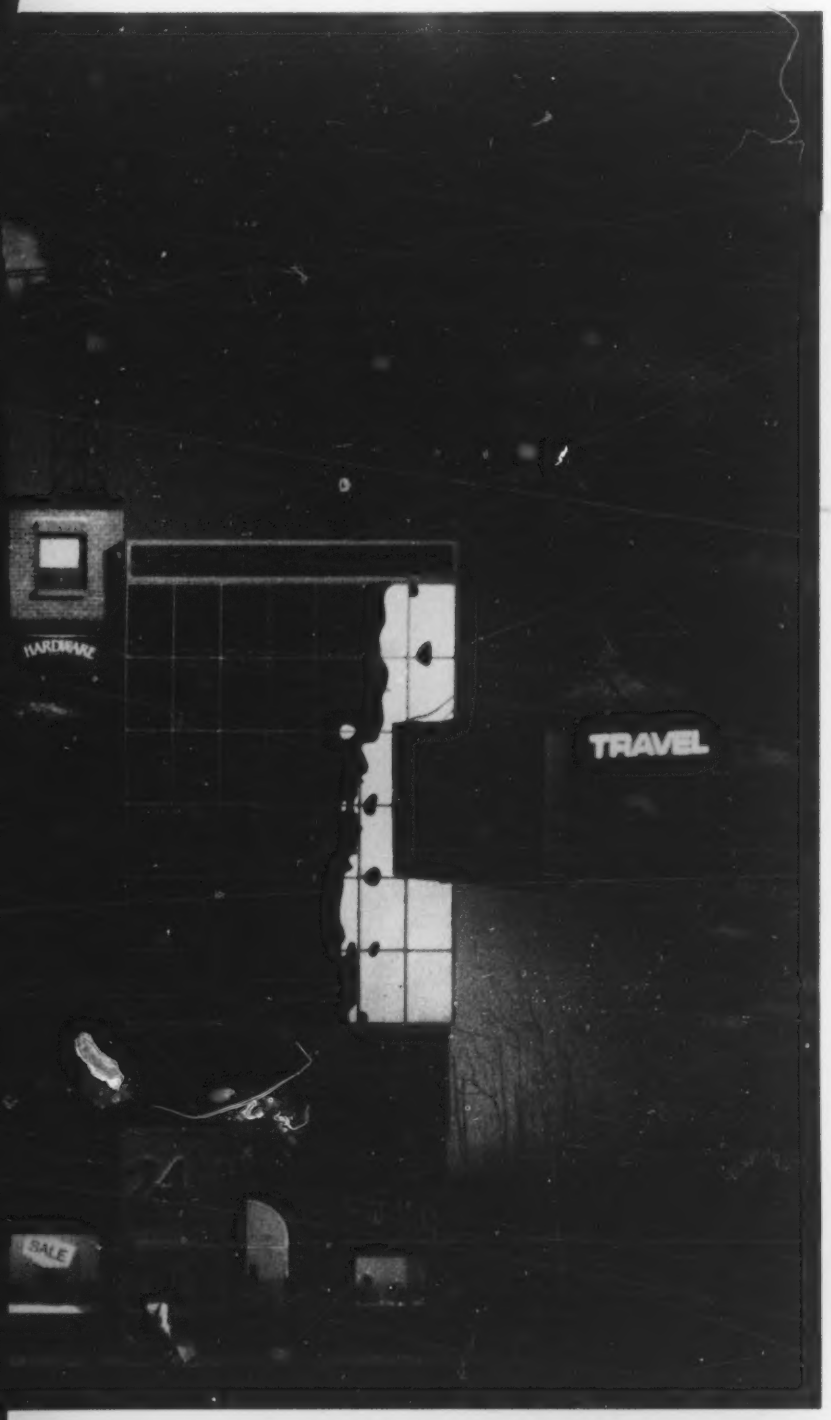
Its fixed-income approach uses sector analysis.

The asset mix Jan. 1 was 62% stocks, 25% bonds and 13% cash.

One hundred stocks are followed closely and 300, generally.

Clients include Southern California Butcher and Provision Workers, Claremont University Center, Screen Actors Guild and 20th Century-Fox.

Richard P. Carney is chief investment officer. Barry T. Seymour is client contact.



High-speed digital networks are the best way for business to send and receive data. But small businesses had a problem. They typically didn't send enough data to make digital network services economical.

Until now. Because our subsidiary, Southwestern Bell Telephone, has introduced a way to make digital communications practical for companies of all sizes.

It's called MicroLink™ II network service. And with it, our customers can send small amounts of data on lines shared with other customers.

It's ultra-efficient, economical and error-free. Perfect for applications like ticket sales, credit-card verifications, reservations and automated tellers. Or almost anywhere data needs to move quickly and reliably.

MicroLink II is another example of how we're putting advanced network technology to work. And over the next three years we expect this service to generate more than $17 million in new revenues.

How do you turn small business into smart business? All it takes is a big idea.

*Making the most of what we know best.*

Southwestern Bell Corporation

ness out of smaller ones.

## Cramer Rosenthal McGlynn

*707 Westchester Ave., White Plains, N.Y. 10604; (914) 681-4470*

| | |
|---|---|
| Total assets managed | $266,000,000 |
| Tax-exempt assets managed | $84,000,000 |
| Tax-exempt clients | 19 |

| Minimum separate account | $20,000,000 |
| No. of portfolio managers | 4 |

C-S Capital Advisors Inc., an equity manager, bases it approach on sector rotation and Graham & Dodd analysis of out-of-favor stocks.

An active options-writing program enforces its sell discipline.

The asset mix Jan. 1 was 78% stocks and 22% cash.

Two hundred stocks are followed closely and 250, generally.

Clients include Cincinnati, Kroger, National Rural Electric Cooperative and 3M.

Cliff Stahl is chief investment officer. Paul G. Chenault, chairman and chief executive officer, is client contact.

## C&S Investment Advisors

*P.O. Box 4114, Atlanta, Ga. 30342; (404) 897-3306*

| | |
|---|---|
| Total assets managed | $3,177,000,000 |
| Tax-exempt assets managed | $1,912,000,000 |
| Real estate assets managed | $27,000,000 |
| Mortgage-backed assets managed | $8,000,000 |
| Tax-exempt clients | 86 |
| Types of accounts managed | CEFG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 11 |
| Size of research staff | 7 |

C&S Investment Advisors Inc. is an equity, fixed-income, balanced and quantitative services manager.

It offers passive and value-oriented equity approaches. The value discipline focuses on low price-earnings multiples and strong earnings momentum.

Its fixed-income approach uses sector and technical analysis, selecting securities to preserve capital while obtaining a high rate of current income. Client needs are met through five types of fixed-income programs.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 69.9% stocks, 18.5% bonds, 1.4% mortgages, 0.4% mortgage-backed securities and 3.1% international and real estate; there was $13 million in equity index funds and $15 million in dedicated or immunized bond portfolios.

The parent company is C&S Corp. Total assets under management by the parent company, subsidiaries and affiliates are $18.76 billion.

James L. Kermes, president, is chief investment officer. K. David Wheeler, vice president-marketing and sales, is client contact.

## CT Investment Counsel Inc.

*110 Yonge St., Toronto, Ontario M5C 1T4; (416) 869-6320*

| | |
|---|---|
| Total assets managed | $2,750,000,000 |
| Tax-exempt assets managed | $2,081,000,000 |
| Tax-exempt clients | 465 |
| Types of accounts managed | CEPU |
| Minimum separate account | $3,500,000 |
| No. of portfolio managers | 9 |
| Size of research staff | 5 |

CT Investment Counsel Inc., a Canadian firm, is an equity, fixed-income and balanced manager.

Its equity approach uses growth and low p/e stock, sector rotation and quantitative methods. Primary emphasis is on security selection, and then on industry selection and market timing.

Its primary fixed-income approach is interest rate anticipation, with sector/credit trading adding incremental value when possible.

The asset mix Jan. 1 was 38% Canadian stocks, 49% bonds, 1% cash, 6% U.S. stocks and 6% international stocks. It managed $365 million in dedicated or immunized bond portfolios.

Seventy-five Canadian stocks are followed closely and 200, generally; 40% of research is generated internally.

The parent company is the Canada Trust Co. Assets under management by the parent, subsidiaries and affiliates total $20.5 billion.

W. James Blowers, president, is chief investment officer and client contact.

## CTT Investment Management Group

*111 W. Washington St., Sixth Floor, Chicago, Ill. 60602; (312) 630-2765*

| | |
|---|---|
| Total assets managed | $2,300,000,000 |
| Tax-exempt assets managed | $1,300,000,000 |
| 401(k) assets managed | $150,000,000 |
| Tax-exempt clients | 178 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 9 |
| Size of research staff | 5 |

CTT Investment Management Group is an equity, fixed-income, balanced and GIC manager.

Its equity approach is quantitative, emphasizing a bottom-up, long-term value stock selection. The firm concentrates on security analysis.

Its fixed-income approach emphasizes management toward a market reference point to enhance returns via security and sector swapping and credit analysis.

The asset mix Jan. 1 was 60% stocks and 40% bonds.

There are 100 401(k) clients.

One hundred twenty-five stocks are followed closely and 200, generally; 80% of the firm's research is generated internally.

Its parent company is Alleghaney Corp.

A. Vincent Agnew Jr. is chief investment officer. Andrew T. Merz, vice president-institutional marketing, is client contact.

## Cullen Center Bank & Trust

*P.O. Box 1315, Houston, Texas 77251; (713) 652-7600*

| | |
|---|---|
| Total assets managed | $175,000,000 |
| Tax-exempt assets managed | |
| Total | $82,000,000 |
| Commingled | $46,000,000 |
| Separate | $36,000,000 |
| 401(k) and 457 assets managed | $15,000,000 |
| Real estate assets managed | $4,000,000 |
| Mortgage-backed assets managed | $10,000,000 |
| Tax-exempt clients | |
| Commingled | 42 |
| Separate | 41 |
| Types of accounts managed | CEF |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 1 |
| Size of research staff | 1 |

Cullen Center Bank & Trust is an equity, fixed-income and balanced manager.

Its equity approach combines a composite of multiple relative valuation models with beta-adjusted price momentum and volume-adjusted historical price channels, all overlaid with economic and market cycle forecasts.

Its fixed-income approach uses relative value analysis of quality and industry sectors combined with economic and interest rate cycle forecasts.

## Cumberland Advisors Pty.

*614 Landis Ave., Vineland, N.J. 08360; (800) 257-7013 or (800) 232-6692 (N.J. only)*

| | |
|---|---|
| Total assets managed | $158,000,000 |
| Tax-exempt assets managed | $73,000,000 |
| 401(k) assets managed | $500,000 |
| International assets managed | $9,000,000 |
| Tax-exempt clients | 119 |
| Types of accounts managed | CEFJ |
| Minimum separate account | $100,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 2 |

Cumberland Advisors Pty. is an equity, fixed-income and balanced manager.

Cumberland uses Graham & Dodd analysis on low p/e stocks, together with sector rotation and market timing in its top-down equity approach. Its analysis has a monetarist bias.

Its top-down fixed-income approach integrates interest rate anticipation, sector analysis and duration.

Options are used.

The asset mix Jan. 1 was 45% stocks, 15% bonds and 40% cash. There was $5 million in foreign stocks and $4 million in foreign bonds.

Sheldon E. Goldberg and David R. Kotok are chief investment officers. Donald Sulam and Suzanne Greenberg are client contacts.

## John M. Cunningham Inc.

*150 Strafford Ave., Suite 208, Wayne, Pa. 19087; (215) 687-5060*

| | |
|---|---|
| Total assets managed | $16,000,000 |
| Tax-exempt assets managed | $9,000,000 |
| Tax-exempt clients | 35 |
| Types of accounts managed | C |
| Minimum separate account | $50,000 |
| No. of portfolio managers | 1 |

John M. Cunningham Inc. is an equity and balanced manager.

Its growth stock equity approach is based on Graham & Dodd principles and is combined with sector rotation, concentrating on industry analysis and buying dividend and earnings growth leaders.

The fixed-income approach uses interest rate anticipation. It follows the market fundamentally and technically, and attempts to add a performance factor.

The asset mix Jan. 1 was 10% stocks and 90% cash.

Fifty stocks are followed closely, and 2,000, generally; all research is generated internally.

John M. Cunningham is chief investment officer and client contact.

## Martin Currie Ltd.

*29 Charlotte Square, Edinburgh, Scotland EH2 4HA; 011-44-31-225-3811*

| | |
|---|---|
| Total assets managed | $2,610,000,000 |
| Tax-exempt assets managed | $245,000,000 |
| International assets managed | $209,000,000 |
| Tax-exempt clients | 4 |
| Types of accounts managed | C |
| Minimum separate account | $10,060,000 |
| No. of portfolio managers | 10 |
| Size of research staff | 6 |

Martin Currie Ltd. and subsidiaries is an equity and international manager.

Its equity approach emphasizes emerging growth and growth stock, focusing on long-term growth opportunities and using sector rotation. The approach varies according to the particular market in which assets are invested.

U.K. fixed-income securities are used only to fulfill requirements of endowment clients. Buys/sells are dictated by interest rate expectations.

The asset mix Jan. 1 was 92% stocks and 8% cash. There was $198 million in foreign stocks and $11 million in foreign cash.

D.L. Skinner, managing director of Martin Currie Ltd., is chief investment officer. W.M.C. Kennedy, president of Martin Currie Inc., is client contact.

## Cushman & Wakefield Realty Advisors Inc.

*1166 Avenue of the Americas, New York, N.Y. 10036; (212) 841-7750*

Dillon, Read Capital Inc. is an equity and balanced manager.

WHAT IF YOU COULD IMPROVE RETURN ON A $500 MILLION PORTFOLIO BY .3 PERCENT?

There is one system—just one—designed to help you realize that kind of potential by changing nothing but your people's access to information.

The system is ISA PRISM. Integrated, on-line, real-time, IBM mainframe-based—PRISM is designed to give financial professionals instant access to the information they need to achieve optimum return.

And it's from ISA—a United Telecom company—whose systems are already helping manage half a trillion dollars on three continents.

If your organization is managing securities without PRISM, you may be settling for a smaller return than you should. Have someone look into it. Call us at 1-800-554-1193. In Georgia, 404-587-6865.

MANAGING INFORMATION FOR ALL ITS WORTH.

ISA
INFORMATION SYSTEMS OF AMERICA

Its investment style emphasizes market timing and value, using a price-sensitive, bottom-up equity approach to find out-of-favor and undervalued stocks.

Its fixed-income approach is based on interest rate anticipation. Maturities are adjusted depending upon valuation and trends of liquidity.

The asset mix Jan. 1 was 77% stocks, 9% bonds and 14% cash.

There was $98 million in foreign stocks.

One hundred fifty stocks are followed closely and 300, generally; 75% of research is generated internally.

The parent company is Dillon, Read & Co. Inc., a subsidiary of The Travelers Corp.

Clients include Frank Russell Trust, Hughes Aircraft and Alcoa Foundation.

Timothy G. Dalton Jr. is chief investment officer. David A. Dewey, executive vice president, is client contact.

## Dimensional Fund Advisors

*1299 Ocean Ave., Suite 650, Santa Monica, Calif. 90401; (213) 395-8005*

| | |
|---|---|

*Joseph M. Fee*
*Dodge & Cox*

## Dodge & Cox

*1 Post St., 35th Floor, San Francisco, Calif. 94104; (415) 981-1710*

| | |
|---|---|
| Total assets managed | $4,535,000,000 |
| Tax-exempt assets managed | $3,690,000,000 |
| Tax-exempt clients | 86 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 7 |
| Size of research staff | 8 |

Dodge & Cox is an equity, fixed-income and balanced manager.

It takes a fundamental value, diversified approach to equities, investing in established companies managers believe have positive earnings prospects not reflected in current prices.

Its fixed-income approach focuses on identifying undervalued market sectors and securities to construct high-quality, diversified portfolios. Maturities are gradually adjusted within a range of nine to 15 years. Interest rate anticipation is used.

The asset mix Jan. 1 was 62% stocks, 36% bonds and 2% cash.

Two hundred stocks are followed closely and 500, generally; 75% of research is generated internally.

Joseph M. Fee, president and chief executive officer, is chief investment officer. Kenneth F. Olivier, vice president, is client contact.

## Dollins Symons Management Inc.

*1409 Terrace Drive, Pittsburgh, Pa. 15228; (412) 561-1945*

| | |
|---|---|
| Total assets managed | $2,000,000 |
| Tax-exempt assets managed | $1,000,000 |

| Separate | 80 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 6 |
| Size of research staff | 1 |

Dominion Trust Co. is an equity, fixed-income and balanced manager.

Its value-oriented equity approach emphasizes Graham & Dodd analysis and low p/e stocks.

Its fixed-income investment process uses interest rate anticipation and sector analysis in a value-oriented approach. Managers look for yield disparities among bond groups.

The asset mix Jan. 1 was 30% stocks, 60% bonds and 10% cash. There was $20 million in foreign stocks, $40 million in foreign bonds and $4 million in dedicated or immunized bond portfolios.

There are 25 401(k) and 457 plan clients.

The parent company is Dominion Bankshares Corp.

Peter Dawyot, senior vice president, is chief investment officer. David Camper and Peter Hartman, vice presidents, are client contacts.

## Douglas, Noyes & Co. Inc.

*50 Broad St., New York, N.Y. 10004; (212) 668-3043*

| | |
|---|---|
| Total assets managed | $99,000,000 |
| Tax-exempt assets managed | $22,000,000 |
| Tax-exempt clients | 9 |
| Types of accounts managed | CEF |
| Minimum separate account | $250,000 |
| No. of portfolio managers | 4 |

Douglas, Noyes & Co. Inc., an equity manager, makes heavy use of cash equivalents during periods of uncertainty. Commitments are based on projected total return and are concentrated on companies with high visibility, above-average growth rates in earnings and dividends, a leadership position in the industry and positive price action relative to the market.

The asset mix Jan. 1 was 73% stocks and 27% cash.

Thirty stocks are followed closely and 50, generally; 15% of research is generated internally.

James Douglas, president, is chief investment officer. Martha Kate Martin, associate director, is client contact.

## Dreman Value Management

*70 Pine St., New York, N.Y. 10270; (212) 785-0202*

| | |
|---|---|
| Total assets managed | $2,189,000,000 |
| Tax-exempt assets managed | $1,711,000,000 |
| Tax-exempt clients | 158 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 11 |
| Size of research staff | 3 |

Dreman Value Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach is to invest in undervalued low p/e stocks with high yields and solid fundamentals.

Its interest rate anticipation fixed-income approach focuses on safety of principal and yield.

The asset mix Jan. 1 was 93.1% stocks and 6.9% bonds.

One hundred stocks are followed closely and 500, generally; all research is generated internally.

Clients include American Airlines, Ford, City of Baltimore and United Mine Workers.

David N. Dreman, managing director, is chief investment officer. Murat H. Davidson Jr., managing director, is client contact.

## Drexel Burnham Lambert Investment Advisors

*3 Mellon Bank Center, 32nd Floor, Philadelphia, Pa. 19102; (215) 963-3500*

| | |
|---|---|
| Total assets managed | $2,689,000,000 |
| Tax-exempt assets managed | $1,374,000,000 |
| Mortgage-backed assets managed | $99,000,000 |
| Tax-exempt clients | 81 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 13 |

Drexel Burnham Lambert Investment Advisors is an equity, fixed-income and balanced manager.

Its disciplined equity approach concentrates portfolios in undervalued and out-of-favor securities based on relative p/e, yield and price to book.

Its fixed-income approach is active, taking advantage of credit and market inefficiencies and of cyclical and technical trends to add incremental value.

Options and fixed-income futures

| No. of portfolio managers | 3 |
| Size of research staff | 1 |

Farmer & Lang Inc. is an equity manager.

Its equity approach emphasizes Graham & Dodd analysis, low p/e stocks and market timing.

The asset mix Jan. 1 was 85% stocks and 15% cash.

Eighty stocks are followed closely and 1,000, generally; all the firm's research is generated internally.

Balcor Institutional Realty Advisors: Portfolio Strategies

Opportunity at Arborland

Pension investors are increasingly realizing that the real estate portion of their portfolios may be overweighted in the office market, but many are unsure where other opportunities lie.

Balcor pointed the way in early 1986 when it acquired a joint-venture interest in the Arborland Consumer Mall, located in the affluent Ann Arbor, Michigan market, for one of its pension portfolios.

The area's demographic diversity and historical ability to weather economic cycles was a key consideration in the decision to invest in this off-price shopping center. But there were other factors as well.

Our on-site analysis showed Arborland was not only strategically located in its immediate market, it also was the only significant off-price mall within 25 miles. We also found that the 400,000 gross square foot shopping center was well-leased and anchored by a major national tenant, and with the mall's recent renovation and re-tenanting, we anticipated strong performance for years to come.

Helping investors effectively diversify their real estate holdings is only one of the capabilities BIRA offers to pension investors nationwide.

For more information on how we can put our real estate investment expertise to work for your pension portfolio, call John West, Executive Vice President, at 312/676-6980.

| Types of accounts managed | C |
| Minimum separate account | $25,000 |
| No. of portfolio managers | 2 |

FASCO is an equity manager whose approach combines passive, growth, emerging growth and low p/e stocks. FASCO builds and manages portfolios consisting exclusively of no-load mutual funds for conservative, growth-oriented clients.

Stock index futures are used.

The asset mix Jan. 1 was 10% cash and 90% no-load mutual funds.

Three-fourths of research is generated internally.

The parent company is F.A. Spina & Co. Inc.

Alan J. Levinsohn, president, is chief investment officer and client contact.

## Favia Hill & Associates

*30 Rockefeller Plaza, New York, N.Y. 10112; (212) 621-2928*

| | |
|---|---|
| Total assets managed | $5,442,000,000 |
| Tax-exempt assets managed | $5,313,000,000 |
| Tax-exempt clients | 117 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 12 |
| Size of research staff | 4 |

Favia Hill & Associates is an equity, fixed-income, balanced and bond index manager.

Its equity approach adheres to a growth orientation positioned with a valuation screen and identifying major themes that may cross several market sectors.

Its fixed-income approach uses passive indexes that are offered with performance fees. The firm's active management reflects conservative approach with sector rotation emphasis.

The asset mix Jan. 1 was 29% stocks, 54% bonds and 17% cash.

Options are used.

It follows 150 stocks closely and 350, generally; half of the firm's research is internally generated.

The parent company is Chemical New York Corp. Total assets under management by the parent company, subsidiaries and affiliates are $16 billion.

Clients include Los Angeles City Employees, AT&T, Rutgers University, and Dallas Fire & Police.

Kenneth S. Rolland, chairman, is chief investment officer. Erich G. Weissenberger Jr., director of marketing, is client contact.

## Florence Fearrington Inc.

*90 Broad St., New York, N.Y. 10004; (212) 480-9020*

| | |
|---|---|
| Total assets managed | $60,000,000 |
| Tax-exempt assets managed | $11,000,000 |
| International assets managed | $2,000,000 |
| Tax-exempt clients | 7 |
| Types of accounts managed | CF |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 2 |

Florence Fearrington Inc., an equity manager, uses Graham & Dodd analysis with low p/e stocks in a value approach, purchasing only individual securities when they appear distinctly undervalued in relation to their intrinsic value.

The asset mix Jan. 1 was 70% stocks, 13% bonds and 17% cash; $2.2 million was in foreign stocks.

It follows 40 stocks closely and 100 generally; 25% of research is generated internally.

Florence Fearrington is chief investment officer and client contact.

## Federated Investment Counseling Inc.

*Federated Investors Tower, Pittsburgh, Pa. 15222-3779; (412) 288-6588*

| | |
|---|---|

Henry J. Gaillot, president, is chief investment officer. James H. O'Leary, vice president, is client contact.

## Ferguson & Wellman Inc.

*1001 S.W. Fifth Ave., Suite 1919, Portland, Ore. 97204; (503) 226-1444*

| | |
|---|---|
| Total assets managed | $510,000,000 |
| Tax-exempt assets managed | $448,000,000 |
| Tax-exempt clients | 90 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 6 |

Ferguson & Wellman Inc. is an equity, fixed-income and balanced manager.

Using Graham & Dodd principles, low p/e stocks and sector rotation, the firm takes a disciplined approach to equities, emphasizing value and seeking companies with a potential for earnings growth and subsequent dividend increases.

Its fixed-income approach uses interest rate anticipation and sector analysis, with portfolios structured to emphasize maturities, relative value between sectors and quality levels. Returns are maximized by changing the portfolio's structure in terms of quality, maturity/duration, average coupon and structure commitments.

The asset mix Jan. 1 was 42% stocks, 40% bonds and 18% cash.

H. Joseph Ferguson, president, and Norbert J. Wellman, chairman, are chief investment officers. James H. Rudd, executive vice president, is client contact.

## Ferris Investment Advisors

*1720 Eye St. N.W., Washington, D.C. 20006; (202) 429-3658*

| | |
|---|---|
| Total assets managed | $190,000,000 |
| Tax-exempt assets managed | $100,000,000 |
| Tax-exempt clients | 55 |
| Types of accounts managed | F |
| Minimum separate account | $250,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 1 |

Ferris Investment Advisors is an equity and balanced manager.

Its equity approach focuses on low p/e stocks. Its fixed-income approach is passive, investing to boost income and reduce risk in equity portfolios resulting in balance.

The asset mix Jan. 1 was 60% stocks, 30% bonds and 10% cash.

Clients include Sibley Hospital, Greater Southeast Hospital, Washington Hospital Center and Holton Arms School.

Anthony L. Suluetta is chief investment officer. David H. Cunningham is client contact.

## F.I.A. Associates

*1601 Response Road, Suite 300, Sacramento, Calif. 95815; (916) 920-4051*

| | |
|---|---|
| Total assets managed | $1,838,000,000 |
| Tax-exempt assets managed | $1,838,000,000 |
| Real estate assets managed | $1,838,000,000 |
| Tax-exempt clients | 5 |
| Types of accounts managed | G |
| Minimum separate account | $50,000,000 |

F.I.A. Associates, a division of MeraBank, is a real estate manager.

Its approach is conservative, favoring up-and-going properties and emphasizing return on investment; appreciation is secondary. Values are enhanced through intensive asset management.

The asset mix Jan. 1 was 46% equity real estate, 37.8% mortgages and 16.2% debt/equity.

There was $845 million in real estate equity, $696 million in mortgages and $297 million in debt/equity.

The parent company is MeraBank. Total assets managed by the parent company, subsidiaries and affiliates are $5.773 billion.

Clients include California Public Employees, Texas Teachers and Utah.

Norm LaMar, executive vice president-acquisitions, is chief investment officer. James L. Sublett, senior executive vice president, is client contact.

| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 9 |
| Size of research staff | 5 |

First Asset Management is an equity, fixed-income, balanced and real estate manager.

Its equity approach uses sector rotation and industry concentration with a value bias. Selection of industries and securities is based on its economic forecast, a return-on-equity model and a fair value model.

Its fixed-income strategy centers around fundamental interest rate forecasting within a framework for measuring and controlling both systematic and specific risk in the portfolio. Dedication/immunization strategies are used.

Options are used.

Its real estate approach is to select properties whose values can be enhanced through aggressive management and additional capital.

The asset mix Jan. 1 was 21.5% stocks, 35% bonds, 36.2% cash, 1.4% equity real estate and 5.9% GICs and oil and gas; there was $39 million in mortgage-backed securities is included

## A Selective Approach To International Investing

Rallies on every important foreign market have made picking the right stock seem less important than deciding to invest internationally in the first place. In today's markets, however, buying value clearly calls for a more selective approach.

CMI manages more than US$ 2 billion in international equities. A subsidiary of Deutsche Bank AG, one of the world's largest diversified financial institutions, CMI relies on the information resources of Deutsche Bank's global banking network to spot value on markets from Zurich to Hong Kong. And although past performance is no guarantee of future results, CMI's selections have helped it return an average of 60% to investors during the past two years.

For more information on how Capital Management International can help you take a more selective approach to international investing, call:

212-832-1630
Capital Management International GmbH
9 West 57th Street
New York, NY 10019

| Tax-exempt clients | 267 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 10 |
| Size of research staff | 90 |

First Chicago Investment Advisors is an equity, fixed-income, balanced, real estate, international, venture capital and multiple asset class manager.

Its equity approach is value-oriented, based on fundamental research. The firm identifies mispriced securities in shifting market environments, selecting stocks within the context of disciplined judgments on market timing, sector exposures and industry.

For fixed income, a portfolio's interest rate, yield curve, quality/sector and issue-specific exposures are managed to outperform a benchmark (reflecting clients' objectives and tolerances) during an interest rate cycle.

Options, stock index futures and fixed-income futures are used.

Its real estate approach is to build core portfolios of general-purpose properties in proven markets diversified by type and region.

The asset mix Jan. 1 was 16% stocks, 27% bonds, 22% cash, 10% equity real estate, 24% international and 1% venture capital; there was $567 million in foreign stocks, $1.59 billion in foreign bonds and $347 million in dedicated or immunized bond portfolios.

The parent company is First Chicago Corp. Assets under management by the parent, subsidiaries and affiliates total $13.08 billion.

Gary P. Brinson is president and chief investment officer. Diana M. Cohen, assistant vice president, is client contact.

| Size of research staff | 5 |

First Fidelity Bank, New Jersey, is an equity, fixed-income and balanced manager.

Its equity approach follows Graham & Dodd principles.

Managers look at stocks with the capability to exceed the S&P 500 index growth rate, but having low p/e ratios.

Its fixed-income approach uses sector analysis. Managers use active bond management to capture gains, minimize capital depreciation and reduce risk.

Options are used.

The asset mix Jan. 1 was 55% stocks, 35% bonds, 10% cash; $4 million was in dedicated or immunized bond portfolios.

There are 90 401(k) and 457 plan clients.

It follows 150 stocks closely and 80 to 100, generally; 80% of the research is generated internally.

Clients include Warner-Lambert, Foster Wheeler, Purolator Courier and Hoffman LaRoche.

John Walker, senior vice president, is chief investment officer. Edward F. Meidhof, assistant vice president, is client contact.

| Separate | 126 |
| Types of accounts managed | CEF |
| No. of portfolio managers | 3 |

First Interstate Trust Co. of Wisconsin is an equity, fixed-income and balanced manager.

Its equity approach is value-oriented and contrarian, being fully invested at all times in companies temporarily undervalued relative to their financial characteristics while producing consistent above-average returns.

Its fixed-income approach is passive, using short maturities and floating coupon rates to keep fund volatility at a minimum while producing above-average yields.

Options are used.

The asset mix Jan. 1 was 29% stocks, 60% bonds, 1% equity real estate, 3% mortgages and 7% money market funds; $250,000 was in foreign stocks.

The parent company is First Interstate Corp. of Wisconsin. Assets under management by the parent, subsidiaries and affiliates total $1.49 billion.

Michael Millhouse, vice president, is chief investment officer. Randall Sneller, vice president, is client contact.

## First Investment Management

*120 N. Robinson, Suite 860-West, Oklahoma City, Okla. 73102; (405) 272-4202*

| | |
|---|---|
| Total assets managed | $1,671,000,000 |
| Tax-exempt assets managed | $1,661,000,000 |
| 401(k) assets managed | $14,000,000 |
| Real estate assets managed | $16,000,000 |
| Mortgage-backed assets | $100,000,000 |
| Tax-exempt clients | 140 |
| Types of accounts managed | CEFG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 3 |

First Investment Management is an equity, fixed-income, balanced, GIC and convertibles manager.

Its equity approach uses quantitative techniques. Managers look for value using three components: a dividend discount model and relative p/e ratio; expectational earnings; and technical confirmation.

Its fixed-income approach uses a core portfolio of one- to 10-year laddered governments. The average maturity is modified from two to 10 years depending on interest rate forecasts, and quality, depending on sector spreads. Options are used.

The asset mix Jan. 1 was 33% stocks, 55% bonds, 4.05% cash, 0.63% equity real estate, 0.32% mortgages, 6% mortgage-backed securities and 1% GICs.

There are seven 401(k) clients.

The parent company is First Interstate Bancorp. Total assets under management by the parent, subsidiaries and affiliates are $17.753 billion.

C. Lee Liscom, vice president and senior portfolio manager, is chief investment officer. Richard H. Parry, vice president and senior portfolio manager, is client contact.

## First Jersey National Bank

*1 Gateway Center, Newark, N.J. 07102; (201) 648-8027*

| | |
|---|---|
| Total assets managed | $1,100,000,000 |
| Tax-exempt assets managed: | |
| Total | $325,000,000 |
| Commingled | $135,000,000 |
| Separate | $190,000,000 |
| 401(k) and 457 assets managed | $5,000,000 |
| Tax-exempt clients: | |
| Commingled | 170 |
| Separate | 230 |
| Types of accounts managed | CEFGJ |
| Minimum separate account | $200,000 |
| No. of portfolio managers | 8 |

First Jersey National Bank is an equity, fixed-income and balanced manager.

Its equity strategy emphasizes Graham & Dodd analysis of emerging growth, growth and low p/e stocks, and market timing in its top-down stock selection and value-oriented approach.

Its fixed-income approach is macroeconomic, using active management in maturity structure, quality distribution and sector selection.

The asset mix Jan. 1 was 57% stocks, 37% bonds and 6% cash.

There are 12 401(k) and 457 clients.

Clients include NL Industries, Flexi-Van and Teamsters 469 and 617.

John J. Saueracker, executive vice president, is chief investment officer. J. Thomas Chiolo is client contact.

## First Kentucky Co.

*101 S. Fifth St., Louisville, Ky. 40202; (502) 581-7668*

| | |
|---|---|
| Total assets managed | $1,900,000,000 |
| Tax-exempt assets managed | $1,700,000,000 |
| Tax-exempt clients | 38 |
| Types of accounts managed | CEFG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 5 |

First Kentucky Co. is an equity, fixed-income and balanced manager.

Its equity approach uses Graham & Dodd analysis to identify financially sound companies that are undervalued as measured by high-yield, low p/e and above-average growth in relation to price.

Its fixed-income approach uses sector analysis and follows interest rate trends, actively swapping for enhanced return while maintaining maturity just above or below the index.

The asset mix Jan. 1 was 31% stocks, 56% bonds and 13% cash; $14 million was in dedicated or immunized bond portfolios.

It follows 100 stocks closely and 500, generally; 75% of research is internally generated.

The parent company is First Kentucky National Corp. Assets under management by the parent, subsidiaries and affiliates total $5.2 billion.

Clients include Brown Forman Distillers, Louisville Firefighters, BellSouth and Sisters of Charity of Nazareth.

Irvin W. Quesenberry Jr., senior vice president, is chief investment officer. Barbara J. Brunner, vice president-marketing, is client contact.

## First Kentucky Trust Co.

|---|---|
| Tax-exempt clients | 200 |
| Types of accounts managed | CEFG |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 7 |
| Size of research staff | 3 |

First Maryland Asset Management is an equity, fixed-income and balanced manager.

Its equity approach uses Graham & Dodd analysis of emerging growth and low p/e stocks together with sector rotation and market timing strategies. Equity selection focuses on secular growth, change and valuation characteristics coupled with buy and sell disciplines regarding a specific issue.

Its fixed-income approach focuses on interest rate anticipation and market timing. Intermediate-term maturities form the portfolios' cores.

The asset mix Jan. 1 was 45% stocks, 40% bonds and 15% cash; $40 million in mortgage-backed securities is included in the bond allocation. In addition, there was $3 million in foreign bonds and $10 million in dedicated or immunized bond portfolios.

There are 10 401(k) clients.

The parent company is First National Bank of Maryland. Assets under management by the parent, subsidiaries and affiliates total $1.5 billion.

M. Elliott Randolph Jr., senior vice president, is chief investment officer. John A. Gilpin, vice president, is client contact.

### First National Bank of Omaha

*P.O. Box 3128, Omaha, Neb. 68103; (402) 341-0500*

| | |
|---|---|
| Total assets managed | $875,000,000 |
| Tax-exempt assets managed: | |
| Total | $425,000,000 |
| Commingled | $54,000,000 |
| Separate | $371,000,000 |
| Tax-exempt clients: | |
| Commingled | 250 |
| Separate | 35 |
| Types of accounts managed | CEFGJ |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 6 |

First National Bank of Omaha is an equity, fixed-income and balanced manager.

Its equity style uses Graham & Dodd analysis in a bottom-up, value-oriented, long-term investment approach dealing with larger, seasoned companies with sound fundamentals and selling at reasonable prices.

Its bond portfolios use a laddered approach, with about a 10% emphasis placed on the short or long portion based on the firm's economic outlook. This means portfolios have constantly maturing issues and can take advantage of interest rate increases. Minimum rating is A; maximum maturity is 25 years.

The asset mix Jan. 1 was 50% stocks, 40% bonds and 10% cash.

Clients include Omaha Public Power District and Omaha Civilian Employees.

Thomas W. Allen is chief investment officer. Milton E. Lackey is client contact.

### The First National Bank of Cincinnati

| Separate | $48,000,000 |
| 401(k) and 457 assets managed | $2,000,000 |
| Mortgage-backed assets managed | $15,000,000 |
| Tax-exempt clients: | |
| Commingled | 171 |
| Separate | 178 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 3 |
| Size of research staff | 3 |

First National Bank of Shreveport, Trust Division, is an equity, fixed-income, balanced and real estate manager.

Its equity approach is to invest in various sectors to meet or exceed the performance of the S&P 500. Weightings may vary slightly from S&P 500, but overall positions are similar. Purchases and sales are based on market timing and research on underlying companies.

Its fixed-income approach concentrates on quality-rated securities with a shorter than usual maturity due to expectations of interest rate changes.

Options are used.

The asset mix Jan. 1 was 45% stocks, 18% bonds, 5% cash and cash equivalents, 18% mortgage-backed securities and 14% money markets; $18 million was in equity index funds and $17 million in bond index funds.

There are two 401(k) and 457 plan clients.

The parent company is Louisiana Bancshares Inc. Assets under management by the parent, subsidiaries and affiliates total $3.3 billion.

David Murphy, trust investment officer, is chief investment officer. Alex Ivins, vice president and trust officer, is client contact.

### The First National Bank and Trust Co. of Tulsa

*P.O. Box 1, Tulsa, Okla. 74193; (918) 586-5661*

| | |
|---|---|
| Total assets managed | $1,100,000,000 |
| Tax-exempt assets managed: | |

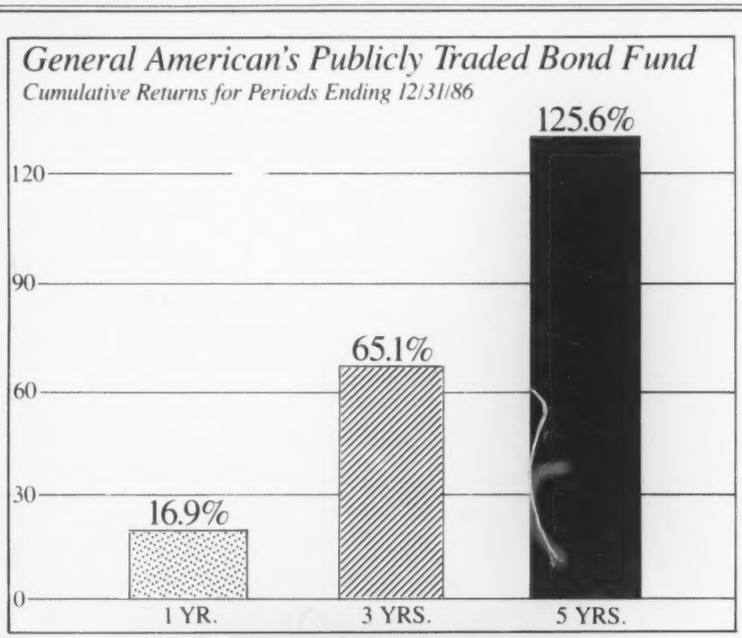
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 4 |

First Security National Bank & Trust Co. is an equity, fixed-income and balanced manager.

Its value-oriented stock selection is primarily based on an in-house valuation model modified by a subjective analysis of fundamental factors.

Its fixed-income approach uses interest rate anticipation with emphasis on maturities of 10 years or less to re-



QUALITY PERFORMANCE

**Over the five-year period ending on December 31, 1986, our Publicly Traded Bond Fund outperformed more than 70% of all the fixed income funds of banks and insurance companies included in the P.I.P.E.R. universe.**

Over the same time period, the Fund also produced results substantially in excess of Shearson-Lehman Government/Corporate Intermediate Term Bond Index.

This Fund has achieved remarkable performance while, at the same time, utilizing sound, conservative management techniques.

**Fund features**

- High Quality — Over 95% of the portfolio rated A or better.
- Intermediate Term — Avoids the fluctuations normally associated with long-term bonds.
- Duration Management — Designed to dampen downside volatility resulting from increasing interest rates.
- Complete Liquidity — Fund valued and available for transfer daily.

If your objective is the same as ours — outstanding performance from a quality investment — let's talk. **Call Ron Drury, Sales & Marketing Vice President-Group Pensions, at (314) 444-0778.**

General American

*The Investor's Choice*

First Union National Bank is an equity, fixed-income and balanced manager.

Its equity approach uses Graham & Dodd principles identifying low p/e stocks. It invests in companies that have average to above-average financial characteristics and that sell substantially below market valuation levels.

Its fixed-income approach is conservative and based on interest rate anticipation, aiming to provide consistently positive returns, attractive levels of current income and capital gains when interest rates decline.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 52% stocks, 32% bonds and 16% cash; $13 million was in equity index funds.

There are 58 401(k) and 457 clients.

The parent company is First Union Corp. Assets under management by the parent, subsidiaries and affiliates total $6 billion.

William R. Hackney III is chief investment officer. Debbie Tate Corson is client contact.

In *Pensions & Investment Age*'s annual survey of investment advisory firms, "tax-exempt assets" refers to U.S. institutional tax-exempt assets only and does not include individuals, IRAs or Keogh plans.

### First Variable Life Insurance

First Wachovia Corp., which includes The First National Bank of Atlanta and the Wachovia Bank & Trust Co., is an equity, fixed-income, real estate and timberland manager.

Its equity approach is quantitative, using Graham & Dodd analysis, growth stocks, sector rotation and market timing.

Its fixed-income approach is multidisciplined, weaving judgments about the interest rate environment with opportunities to add value through sector rotation, security swapping and credit analysis.

Its real estate approach is to acquire properties when demand is low and develop when demand is high.

The asset mix Jan. 1 was 20% stocks, 19% bonds, 43% cash and 18% equity real estate.

There was $750 million in real estate equity.

The parent company is First Wachovia Corp.

Michael Tierney, senior vice president, is chief investment officer. Nicholas L. Verano III, vice president, is client contact.

First Wisconsin Trust Co. is an equity, fixed-income, balanced, real estate, quantitative fixed income, equity index, GIC commingled and international manager.

Its equity approach emphasizes growth or capital appreciation. It has three collective equity approaches, distinguished by issue capitalization.

It uses active, passive and quantitative techniques in its fixed-income approach.

In real estate, it takes unleveraged equity positions in existing, leased commercial properties to develop a stable income stream and potential appreciation.

The asset mix Jan. 1 was 10% stocks, 61% bonds, 28.7% cash and 0.3% equity real estate; $18 million was in equity index funds, $170 million in bond index funds and $515 million in dedicated or immunized portfolios.

There are 32 401(k) and 457 plan clients.

The parent company is First Wisconsin Corp. Assets under management by the parent, subsidiaries and affiliates total $4.55 billion.

Jackson A. Kirk is first vice president and chief investment officer. Charles Groeschell, assistant vice president, is client contact.

### Fischer, Francis, Trees and Watts Inc.

*717 Fifth Ave., New York, N.Y. 10022; (212) 350-8050*

| | |
|---|---|
| Total assets managed | $9,900,000,000 |
| Tax-exempt assets managed | $9,100,000,000 |
| Mortgage-backed assets managed | $800,000,000 |
| Tax-exempt clients | 33 |
| Types of accounts managed | CEFG |
| Minimum separate account | $50,000,000 |
| No. of portfolio managers | 12 |

Fischer, Francis, Trees and Watts, Inc., a fixed-income manager, uses interest rate anticipation and sector analysis. It manages market risk and sector spread opportunities in prime quality issues with active trading. Hedged foreign securities are used, as are options and fixed-income futures.

All assets were in fixed income Jan. 1.

There was $800 million in mortgage-backed securities and $400 million in dedicated or immunized portfolios.

Clients include IBM, World Bank, Honeywell and New York City Retirement System.

Richard G. Fischer, president, is chief investment officer. Cecilia M. Murphy, vice president, is client contact.

### Fisher Investments Inc.

| Tax-exempt clients | 16 |
| Types of accounts managed | C |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 2 |

Fisher Investments Inc. is an equity, fixed-income and balanced manager.

Its equity approach is quantitative, using internally developed evaluation techniques to identify unpopular or neglected companies with strong balance sheets and good growth prospects.

Its fixed-income approach is primarily passive with the main emphasis on staggered maturities and credit risk. It uses government, corporate and convertible debentures.

The asset mix Jan. 1 was 85% stocks and 15% bonds.

There is one 401(k) client.

Kenneth L. Fisher, president, is chief investment officer. Joseph L. Toms, managing director, is client contact.

### Fiske Capital Management

*40 Grove St., P.O. Box 96; Wellesley, Mass. 02181; (617) 237-0010*

| | |
|---|---|
| Total assets managed | $95,000,000 |
| Tax-exempt assets managed | $79,000,000 |
| 401(k) assets managed | $4,000,000 |
| Tax-exempt clients | 118 |
| Types of accounts managed | CEF |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

Fiske Capital Management, an equity manager, uses cyclical asset allocation between equities and cash. In rising markets it emphasizes high upside beta issues. It doesn't predict market direction but coordinates with it based on internally developed quantitative research models.

All assets were in cash Jan. 1.

There are five 401(k) clients.

It follows 1,300 stocks closely; all research is generated internally.

Edwin F. Thrall Jr. is chief investment officer. Steven Vantine, director-portfolio operations, is client contact.

### Flagship Financial Inc.

*1 First National Plaza, No. 910, Dayton, Ohio 45402; (513) 461-0332*

| | |
|---|---|
| Total assets managed | $122,000,000 |
| Tax-exempt assets managed | $20,000,000 |
| Tax-exempt clients | 2 |
| Types of accounts managed | CF |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 5 |
| Size of research staff | 5 |

Flagship Financial Inc. is a fixed-income manager.

The asset mix Jan. 1 was 78% bonds and 22% cash.

It uses options and fixed-income futures.

Assets under management by Flagship Financial Inc., its subsidiaries and affiliates total $800 million.

Its clients include Mead Corp.

Richard P. Davis, president, is chief investment officer and client contact.

### Flippin, Bruce & Porter Inc.

*800 Main St., Suite 202, Lynchburg, Va. 24504; (804) 845-4900*

| | |
|---|---|
| Total assets managed | $173,000,000 |
| Tax-exempt assets managed | $105,000,000 |
| Tax-exempt clients | 6 |
| Types of accounts managed | CEF |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

Flippin, Bruce & Porter Inc. is an equity and balanced manager.

Its equity approach is contrarian. Managers look beyond current investor emotion, discounting Wall Street expectations and relating historical financial characteristics to current price.

A contrarian fixed-income manager, the firm constructs a "barbell of quality," with BAA securities on the short end and AAA governments on the long end, producing a shorter average maturity with a higher-than-average yield.

Options are used.

The asset mix Jan. 1 was 87% stocks, 7% bonds and 6% cash.

John M. Flippin, John T. Bruce and R. Gregory Porter, principals, are client contacts.

### FMI Capital Management Inc.

*4610 University Ave., Madison, Wis. 53705; (608) 231-1676*

| | |
|---|---|
| Total assets managed | $118,000,000 |
| Tax-exempt assets managed | $63,000,000 |
| Tax-exempt clients | 74 |
| Types of accounts managed | CEF |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 3 |

FMI Capital Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach involves buying midsize growth companies at or near S&P 500 p/e levels and holding them until the fundamentals weaken or until the p/e reaches an overvalued level.

Its fixed-income approach uses interest rate anticipation for longer-term trends.

The asset mix Jan. 1 was 60.4% stocks, 21.8% bonds and 17.8% cash.

Clients include Wisconsin Power & Light Foundation and Edgewood Clinic.

John W. Thompson, president, is chief investment officer and client contact.

### Foreign and Colonial Asset Management

*45 Wall St., New York, N.Y. 10005; (212) 806-4480*

| | |
|---|---|
| Total assets managed | $3,050,000,000 |
| Tax-exempt assets managed | $28,000,000 |
| 401(k) assets managed | $5,000,000 |
| International assets managed | $28,000,000 |
| Tax-exempt clients | 8 |
| Types of accounts managed | C |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 24 |

Foreign and Colonial Asset Management, an international manager, uses growth and low p/e stocks selected after Graham & Dodd analysis with sector rotation. The value-driven approach is top-down/bottom-up or bottom-up. Managers buy large-cap stocks in thinner markets and small-cap stocks in mature, more liquid markets. Sector analysis is emphasized in the Far East. Options, stock index futures and fixed-income futures are used.

All assets were in international equity Jan. 1.

There are 2 401(k) clients.

The parent companies are Foreign and Colonial Management Ltd. and U.S. Trust of New York. Assets under management by the parents, subsidiaries and affiliates total $15 billion.

Eric C. Elstob is chief investment officer. John K. Holland, vice president and marketing director, is client contact.

### Forest Investment Associates

*11 Piedmont Center, Suite 404, Atlanta, Ga. 30305; (404) 239-0986*

| | |
|---|---|
| Total assets managed | $10,000,000 |
| Tax-exempt assets managed | $10,000,000 |
| Real estate assets managed | $10,000,000 |
| Tax-exempt clients | 1 |
| Types of accounts managed | C |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 2 |

Forest Investment Associates, a timberland manager, acquires and manages equity interests in timber and timberland in the United States with the objective of preservation of capital and appreciation in real terms.

All assets were in timberland Jan. 1.

Half of the research is generated internally.

Charles M. Tarver, principal, is chief investment officer. David S. Graham, principal, is client contact.

### Forstmann-Leff Associates

*55 E. 52nd St., 33rd Floor, New York, N.Y. 10055; (212) 644-9888*

| | |

| Total assets managed | $4,228,000,000 |
| Tax-exempt assets managed | $4,179,000,000 |
| Tax-exempt clients | 66 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $20,000,000 |
| No. of portfolio managers | 7 |
| Size of research staff | 4 |

Forstmann-Leff Associates Inc. is an equity and balanced manager.

Its risk-averse, capital preservation-and asset allocation-driven equity approach uses sector rotation and market timing. Management of fixed income and cash equivalents, both used as equity substitutes, is keyed to interest rate forecasting and positioning on the yield curve. Stock index futures are used.

The asset mix Jan. 1 was 72% stocks, 6% bonds and 22% cash.

It follows 150 stocks closely and 250, generally; half of the research is generated internally.

The parent company is Guinness Peat Group PLC. Total assets under management by the parent company, subsidiaries and affiliates is $10 billion.

Clients include Lockheed, Amoco, Marriott and Hughes.

Joel B. Leff, J. Anthony Forstmann and William F. Harnisch, managing directors, are chief investment officers. Peter A. Lusk, director of marketing, is client contact.

### Fort Hill Investors Management Corp.

| Mortgage-backed assets managed | $5,000,000 |
| Tax-exempt clients: | |
| Commingled | 115 |
| Separate | 91 |
| Types of accounts managed | CF |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 2 |

Frost National Bank is an equity, fixed-income and balanced manager.

Its equity approach uses Graham & Dodd principles and proprietary valuation techniques to identify stocks undervalued in relation to the market.

Its fixed-income approach uses interest rate anticipation.

Options are used.

The asset mix Jan. 1 was 51% stocks, 24% bonds, 1% mortgages and 24% cash and equivalents. There also was $200,000 in real estate equity and $5 million in mortgage-backed securities.

There were eight 401(k) and 457 plan clients.

The parent company is Cullen/Frost Bankers Inc. Assets under management by the parent, subsidiaries and affiliates total $1.2 billion.

Vernon Torgerson, senior vice president, is chief investment officer. Andrew W. Behrends, vice president, is client contact.

### Furgueson Capital Management Inc.

*19 W. 44th St., New York, N.Y. 10036; (212) 840-1781*

| | |
|---|---|
| Total assets managed | $96,000,000 |
| Tax-exempt assets managed | $16,000,000 |
| Tax-exempt clients | 12 |
| Types of accounts managed | CE |
| Minimum separate account | $100,000 |
| No. of portfolio managers | 3 |

Furgueson Capital Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach emphasizes growth and emerging growth stocks analyzed through Graham & Dodd principles. The firm concentrates on balance sheet analysis, strength of management and industry position. Analysis considers worldwide economic and political developments.

Its fixed-income approach is passive. Bonds are used for income and balance. Maturities usually are laddered to reduce interest rate risk.

The asset mix Jan. 1 was 64% stocks, 10% bonds and 26% cash.

Cornelius Furgueson IV is chief investment officer. Mr. Furgueson and Stephen Orr are client contacts.

### Furman Selz Capital Management

*230 Park Ave., New York, N.Y. 10169; (212) 309-8422*

| | |
|---|---|
| Total assets managed | $425,000,000 |
| Tax-exempt assets managed | $375,000,000 |
| Tax-exempt clients | 26 |

| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 3 |

Gannett, Welsh & Kotler Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses quantitative and Graham & Dodd analysis with sector rotation. Its fixed-income approach uses interest rate anticipation. Options and stock index futures are used.

The asset mix Jan. 1 was 50% stocks, 38% bonds and 12% cash; $2 million was in foreign stocks.

The firm follows 30 stocks closely and 100, generally; 75% of research is generated internally.

Harold G. Kotler, president, is chief investment officer. Susan M. Ambrozavitch, vice president, is client contact.

### Ganucheau, Stupfel & Brumley Investment Counsel

*301 Commerce, No. 1001, Fort Worth, Texas 76102; (817) 332-9918*

| | |
|---|---|
| Total assets managed | $100,000,000 |
| Tax-exempt assets managed | $74,000,000 |
| Tax-exempt clients | 12 |
| Types of accounts managed | CF |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 2 |

Ganucheau, Stupfel & Brumley Investment Counsel is an equity and balanced manager.

Its equity approach uses Graham & Dodd analysis in its value approach seeking low p/e, low price-to-book and low price-to-cash flow stocks.

Its fixed-income approach is passive, using laddered maturity.

The asset mix March 9 was 60% stocks, 10% bonds and 30% cash.

Clients include American Airlines and Harbison Fischer.

Frank Ganucheau and Mark Stupfel, principals, are chief investment officers. Lyle Brumley, principal, is client contact.

### Ganz Associates Inc.

*P.O. Box 601053, Miami, Fla. 33160; (305) 949-2800*

| | |
|---|---|
| Total assets managed | $175,000,000 |
| Tax-exempt assets managed | $30,000,000 |
| Mortgage-backed assets managed | $9,000,000 |
| Tax-exempt clients | 40 |
| Types of accounts managed | C |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 3 |

Ganz Associates Inc. is an equity and fixed-income manager.

Its equity approach uses growth stocks and market timing.

Its fixed-income approach uses interest rate anticipation.

The asset mix Jan. 1 was 70% stocks and 30% mortgage-backed securities.

Fifty stocks are followed closely and 200, generally; 25% of the research is generated internally.

Charles B. Ganz is chief investment officer. Arnold M. Ganz is client contact.

### Gardner & Preston Moss Inc.

*1 Winthrop Square, Boston, Mass. 02110; (617) 482-6500*

| | |
|---|---|
| Total assets managed | $3,291,000,000 |
| Tax-exempt assets managed | $2,785,000,000 |
| Mortgage-backed assets managed | $684,000,000 |
| International assets managed | $279,000,000 |
| Tax-exempt clients | 454 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $400,000 |
| No. of portfolio managers | 20 |
| Size of research staff | 1 |

Gardner & Preston Moss Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses low p/e stocks with sector rotation and market-timing techniques. Managers vary asset mix based on economic, technical and valuation factors and use industry-specific key variables and relative valuation measures to vary sector weightings.

For fixed income, managers vary maturity based on interest rate outlook and yield curve valuation. They change sector and quality based on relative value.

Options and fixed-income futures are used.

The asset mix Jan. 1 was 40% stocks, 24% bonds, 11% cash and 25% mortgage-backed securities; $279 million was in foreign bonds and $25 million in dedicated or immunized bond portfolios.

The parent company is Britannia Arrow Holdings PLC. Assets under management by the parent, subsidiaries and affiliates total $20 billion.

G. Kinnear Pash, executive vice president, is chief investment officer. Sue-Ellen Whelan, manager-marketing administration, is client contact.

### Garrett Realty Advisors

*3100 Monticello, Suite 509, Dallas, Texas 75205; (214) 841-2040*

| | |
|---|---|
| Total assets managed | $20,000,000 |
| Tax-exempt assets managed | $20,000,000 |
| Real estate assets managed | $20,000,000 |
| Tax-exempt clients | 4 |
| Types of accounts managed | CJ |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 3 |

Garrett Realty Advisors, a real estate manager, concentrates on institutional-grade industrial retail properties. It offers closed-end pooled equity trusts, investing in existing net leased industrial properties and well-located, strongly anchored neighborhood shopping centers in major metropolitan areas nationwide.

All assets were in equity real estate Jan. 1.

The parent company is The Garrett Co. Assets under management by the parent, subsidiaries and affiliates total $45 million.

Joe Garrett is chief investment officer. Mr. Garrett and Dan Lawson are client contacts.

### Garrison, Keogh & Co.

*250 Park Ave., New York, N.Y. 10177; (212) 557-7440*

| | |
|---|---|
| Total assets managed | $254,000,000 |
| Tax-exempt assets managed | $169,000,000 |
| International assets managed | $10,000,000 |
| Tax-exempt clients | 19 |
| Types of accounts managed | CEFJ |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 3 |

Garrison, Keogh & Co. is an equity and balanced manager.

Its equity approach uses emerging growth and low p/e stocks. Proprietary valuation screens are applied to a closely followed list of stocks with high returns, strong finances and low institutional ownership. Cash reserves are actively used to preserve capital. Bonds are bought only when risk/reward is favorable. Convertibles and selected high-yield issues are often used.

The asset mix Jan. 1 was 62% stocks, 21% bonds and 17% cash; $5 million was in foreign stocks and $5 million in foreign bonds.

The principals are the chief investment officers. William Bradford III, vice president, is client contact.

### Gateway Investment Advisers Inc.

*400 TechneCenter Drive, Milford, Ohio 45150; (513) 248-2700*

| | |
|---|---|
| Total assets managed | $316,000,000 |
| Tax-exempt assets managed | $54,000,000 |
| International assets managed | $10,000,000 |
| Tax-exempt clients | 27 |
| Types of accounts managed | CEF |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 3 |

Gateway Investment Advisers Inc. is an equity, balanced and hedged index manager.

It has two equity approaches: value-oriented with low p/e selection or strict quantitative selection of price momentum equities.

Its fixed-income approach uses interest rate anticipation.

Options are used.

The asset mix Jan. 1 was 70% stocks, 20% bonds and 10% cash; $10 million was in foreign bonds and $45 million in equity index funds.

Walter G. Sall is chief investment officer. J. David Cummings, vice president-marketing, and K. Bruce Jones, vice president-national sales, are client contacts.

### Geewax, Terker & Co.

*99 Starr St., Phoenixville, Pa. 19460; (215) 935-3000*

| | |
|---|---|
| Total assets managed | $1,450,000,000 |
| Tax-exempt assets managed | $1,450,000,000 |
| Tax-exempt clients | 24 |
| Types of accounts managed | CEF |
| Minimum separate account | $50,000,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

Geewax, Terker & Co., an equity manager, uses growth stocks with sector rotation techniques.

The asset mix Jan. 1 was 98% stocks and 2% cash.

It follows 400 stocks closely and 1,200, generally; 95% of research is generated internally.

Clients include Bell Atlantic, University of Southern California, Alcoa and The Rockefeller Foundation.

John J. Geewax, partner, is chief investment officer and client contact.

### General American Investors

*330 Madison Ave., New York, N.Y. 10017; (212) 916-8408*

| | |
|---|---|
| Total assets managed | $1,860,000,000 |
| Tax-exempt assets managed | $1,553,000,000 |
| International assets managed | $142,000,000 |
| Tax-exempt clients | 23 |
| Types of accounts managed | CEFG |
| Minimum separate account | $20,000,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 7 |

General American Investors Co. Inc., an equity manager, is fundamental-research oriented and emphasizes growth stocks. It uses bottom-up stock selection and a three-year time frame with stocks having a 50% appreciation potential and minimum downside risk if potential isn't realized.

The asset mix Jan. 1 was 93% stocks and 7% cash; $142 million was in foreign stocks.

It follows 200 stocks closely and 400, generally; 90% of the research is generated internally.

Clients include GTE, New York State Teachers, Yale and Knight Foundation.

Malcolm B. Smith, president, is chief investment officer. James B. Book IV, director of marketing, is client contact.

### General American Life Insurance Co.

*P.O. Box 396, St. Louis, Mo. 63166; (314) 231-1700*

| | |
|---|---|
| Total assets managed | $1,209,000,000 |

| GICs | $471,000,000 |
| Other | $489,000,000 |
| 401(k) and 457 assets managed | $90,000,000 |
| Real estate assets managed | $159,000,000 |
| Tax-exempt clients | 217 |
| Types of accounts managed | CGJ |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 7 |
| Size of research staff | 3 |

General American Life Insurance Co. is an equity, fixed-income and balanced manager.

Its equity approach is passive, offering an S&P 500 fund and a fund that matches the return of the smallest 20% by capitalization of NYSE-listed companies.

It offers two fixed-income strategies: an actively managed public bond account and a passively managed private placement account.

Its real estate approach is to originate mortgages and purchase real estate in areas where demand is expected to remain strong.

The separate accounts asset mix Jan. 1 was 11% stocks, 15% bonds, 10% cash and 64% mortgages; $27 million was in equity index funds and $32 million was in bond index funds.

There are 80 401(k) and 457 plan clients.

Assets under management by General American Life Insurance Co., its subsidiaries and affiliates total $3.8 billion.

Leonard M. Rubenstein and Donald L. Smith are chief investment officers. Ronald O. Drury, vice president-sales and marketing, is client contact.

### Kenneth J. Gerbino & Co.

uity and balanced manager, emphasizes growth stocks. It takes a top-down approach, selecting medium- to large-cap stocks with good fundamentals, excellent management and good growth potential. Technical analysis helps determine entry, exit and stop-loss points.

The asset mix Jan. 1 was 78% stocks, 3% bonds and 19% cash; $1 million was in foreign stocks.

It follows 40 stocks closely and 70, generally; half of the research is generated internally.

Kenneth J. Gerbino is chief investment officer. David H. Kutner, vice president, is client contact.

### Gillespie, Robinson & Co.

*80 Field Point Road, Box 2220, Greenwich, Conn. 06836; (203) 629-2800*

| | |
|---|---|
| Total assets managed | $400,000,000 |
| Tax-exempt assets managed | $250,000,000 |

Gillespie, Robinson & Co.'s asset mix Jan. 1 was 50% stocks, 40% bonds and 10% cash.

Thomas H. Gillespie Jr. and Blake W. Robinson are principals.

### Gintel Equity Management

*Greenwich Office Park, No. 6, Greenwich, Conn. 06830; (203) 622-6400*

| | |
|---|---|
| Total assets managed | $230,000,000 |
| Tax-exempt assets managed | $93,000,000 |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 1 |
| Size of research staff | 4 |

Gintel Equity Management, an equity manager, emphasizes Graham & Dodd analysis to identify growth, emerging growth and overlooked low p/e stocks in non-diversified portfolios. If the investment environment appears unstable, assets are moved to short-term money market vehicles from equities.

The asset mix Jan. 1 was 86% stocks and 14% cash.

It follows 12 stocks closely and 20, generally; 85% of research is generated internally.

Robert Gintel, president, is chief investment officer. Alexander L. Robinson Jr., vice president, is client contact.

### Glass, Austin & Calvert Inc.

*InterFirst Plaza, Suite 1100, 300 Convent St., San Antonio, Texas 78205; (512) 224-8241*

| | |
|---|---|
| Total assets managed | $739,000,000 |
| Tax-exempt assets managed | $183,000,000 |
| Mortgage-backed assets managed | $700,000 |
| International assets managed | $5,000,000 |
| Tax-exempt clients | 34 |
| Types of accounts managed | CEFG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 2 |

Glass, Austin & Calvert Inc. is an equity, fixed-income and balanced manager.

Its equity approach is to identify securities undergoing a positive fundamental change that has been overlooked by the market. A combination of fundamental and technical analysis reveals the undervalued companies relative to their industry or the general market.

Its fixed-income approach uses interest rate anticipation and sector analysis. Investment decisions are primarily based on yield curve and spread analysis, with managers identifying longer-term trends instead of attempting to trade on short-term fluctuations.

The asset mix Jan. 1 was 71% stocks, 17% bonds and 12% cash; there was $700,000 in mortgage-backed securities and $5 million in foreign stocks.

Edward M. Glass, president, is chief investment officer and client contact.

### The Glenmede Trust Co.

*229 S. 18th St., Philadelphia, Pa. 19103; (215) 875-3200*

| | |
|---|---|
| Total assets managed | $3,900,000,000 |
| Tax-exempt assets managed | $3,400,000,000 |
| Mortgage-backed assets mngd | $1,020,000,000 |
| International assets managed | $60,000,000 |
| Tax-exempt clients | 25 |
| Types of accounts managed | CEFG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 6 |
| Size of research staff | 2 |

The Glenmede Trust Co. is an equity, fixed-income, balanced and international manager.

Its equity approach uses Graham & Dodd and quantitative analysis to identify low p/e stocks. It seeks equities with better-than-market financial characteristics with below-market multiples.

*John W. Church Jr.*

Its fixed-income approach uses sector analysis. It observes historic spreads to invest funds in maturities and sectors with most opportunity.

Its use of options is limited.

The asset mix Jan. 1 was 40% stocks, 18% bonds, 10% cash, 30% mortgage-backed securities and 2% foreign equity.

It follows 150 stocks closely and 1,000, generally; 20% of research is generated internally.

Clients include Pew Memorial Trust, Pennsylvania State Teachers, Elwin Institute and Grove City College.

John W. Church Jr., vice president, is chief investment officer. Philip Young is client contact.

### Glickenhaus & Co.

*6 E. 43rd St., New York, N.Y. 10017-4641; (212) 953-7800*

| | |
|---|---|
| Total assets managed | $1,800,000,000 |
| Tax-exempt assets managed | $1,300,000,000 |
| 401(k) assets managed | $5,000,000 |
| Tax-exempt clients | 79 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $4,000,000 |
| No. of portfolio managers | 13 |
| Size of research staff | 6 |

Glickenhaus & Co. is an equity, fixed-income and balanced manager.

Its equity selection approach is value-oriented and bottom-up, using low p/e stocks. Managers evaluate downside exposure vs. the opportunity for upside potential. When selecting individual securities, the risk-conscious philosophy is characterized by price sensitivity.

Its fixed-income approach uses interest rate anticipation. The risk-conscious philosophy dictates investment in high-quality issues. Managers analyze credit and maturity in relation to economic conditions and the firm's interest rate outlook.

The asset mix Jan. 1 was 85% stocks, 5% bonds and 10% cash.

There were five 401(k) clients.

It follows 100 stocks closely and 300, generally; 80% of the research is generated internally.

Clients include Philip Morris, New York State Teachers, New York Hospital and ILGWU.

Seth M. Glickenhaus is senior partner and chief investment officer. Connie J. Moak, partner, is client contact.

### Gofen & Glossberg Inc.

*401 N. Michigan Ave., Chicago, Ill. 60611; (312) 828-1100*

| | |
|---|---|
| Total assets managed | $3,500,000,000 |
| Tax-exempt assets managed | $410,000,000 |
| Tax-exempt clients | 185 |
| Types of accounts managed | CEFG |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 7 |
| Size of research staff | 4 |

Gofen & Glossberg Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses Graham & Dodd analysis of emerging growth stocks in a philosophy that stresses total return with valuation techniques emphasizing the relationship of the p/e ratio to anticipated growth rates.

# A third reason to consider Hutton Capital Management for investment portfolios in excess of $3 million:

3. Results have been consistently superior in both up and downmarkets. *Of course, past performance does not guarantee future results.

HCM

**For details, call or write:**
**Peter N. Smith, Hutton Capital Management**
**17 Battery Place, New York, New York 10004**
**(212) 742-6557**

Its fixed-income approach is driven by interest rate anticipation to pursue maximum rate of return consistent with minimal volatility of principal values.

The asset mix Jan. 1 was 55% stocks, 40% bonds and 5% cash.

It follows 100 stocks closely and 500, generally; 30% of research is generated internally.

Carl X. Elvove, president, is chief investment officer. Mark R. Goodman, assistant secretary and treasurer, is client contact.

## Golder, Thoma & Cressey

*120 S. LaSalle St., Suite 630, Chicago, Ill. 60603; (312) 853-3322*

| | |
|---|---|
| Total assets managed | $160,000,000 |
| Tax-exempt assets managed | $91,000,000 |
| Tax-exempt clients | 23 |

| Mortgage-backed assets managed | $8,000,000 |
| Tax-exempt clients | 1 |
| Types of accounts managed | C |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 8 |

Govaars & Associates, a fixed-income manager, uses interest rate anticipation and sector analysis. Short-term portfolios are shifted along a yield curve out to five years; mortgage-backed securities are shifted to take significant sector positions; and high-yield portfolios focus on creditworthiness and sector strength. Options and fixed-income futures are used.

The asset mix Jan. 1 was 65% mortgage-backed securities and 35% Treasury and agency notes.

There is one 401(k) client.

W.B. Govaars II, president, is chief investment officer. Sid McCausland, vice president/portfolio manager, is client contact.

## Gradison & Co. Inc.

| Tax-exempt assets managed | $1,085,000,000 |
| Tax-exempt clients | 114 |
| Types of accounts managed | CEF |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 7 |
| Size of research staff | 10 |

David J. Greene & Co., an equity manager, uses Graham & Dodd analysis to identify and invest in undervalued securities whose price does not reflect past or potential earning power, cash flow, book value and historical trading range.

The asset mix Jan. 1 was 75% stocks and 25% cash.

It follows 100 stocks closely and 300, generally; 97% of the research is generated internally.

Clients include U S WEST, Beatrice, Time and Federal-Mogul.

Alan I. Greene, managing partner, is chief investment officer. Erwin A. Zeuschner, partner-investment advisory services, is client contact.

## Greenleaf Capital Management

*803 Tower East, 20600 Chagrin Blvd., Shaker Heights, Ohio 44122; (216) 752-8900*

| | |
|---|---|
| Total assets managed | $375,000,000 |
| Tax-exempt assets managed | $285,000,000 |
| 401(k) assets managed | $100,000 |
| International assets managed | $36,000,000 |
| Tax-exempt clients | 70 |
| Types of accounts managed | CF |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 7 |

Greenleaf Capital Management is an equity, fixed-income, balanced, international and GIC manager.

Its equity approach emphasizes inefficiently priced emerging growth and low p/e stocks.

Its fixed-income approach is passive. Interest rate anticipation is used to seek investment in intermediate, high-quality bonds.

The asset mix Jan. 1 was 55% stocks. 35% bonds and 10% cash; $35 million was in foreign stocks and $1 million in foreign bonds.

There was one 401(k) client.

The firm follows 100 stocks closely and 50, generally.

Geofrey J. Greenleaf is chief investment officer and client contact.

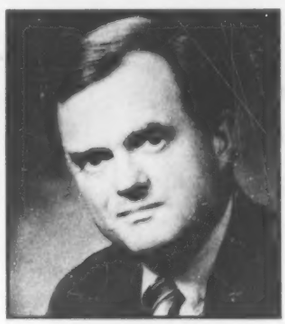
## Griffin Capital Corp.

*3811 Turtle Creek Blvd., Suite 1000, Dallas, Texas 75219; (214) 520-3777*

| | |
|---|---|
| Total assets managed | $36,000,000 |
| Tax-exempt assets managed | $0 |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 3 |

Griffin Capital Corp., a real estate manager, purchases corporate real estate assets on a sale-leaseback basis. Investment objectives are preservation of capital and creation of long-term passive high-yield income with escalation provisions. Coupon values are insulated through CPI provisions or lease clauses allowing direct participation in retail property sales growth through percent-of-sales rent provisions.

George Skakee III, managing partner and Robert M.T. Jutson Jr., managing director, are chief investment officers. Mr. Jutson is client contact.



*David R. Geis*
*The Griffin Group*

## The Griffin Group

*200 W. Madison St., Suite 2710, Chicago, Ill. 60606; (312) 407-6300*

| | |
|---|---|
| Total assets managed | $2,825,000,000 |
| Tax-exempt assets managed | $2,748,000,000 |
| Real estate assets managed | $4,000,000 |
| Tax-exempt clients | 66 |
| Types of accounts managed | CEF |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 8 |

The Griffin Group is an equity, fixed-income and balanced manager.

Its equity approach attempts to perceive the influence of internal or external change on the growth prospects for a company or industry soon enough to capitalize on future adjustments to market valuations.

In fixed income, it emphasizes interest rate anticipation, sector analysis and individual issue arbitrage. Its controlled risk approach quantifies investment objectives into a benchmark portfolio against which the firm manages.

The asset mix Jan. 1 was 35% stocks, 51% bonds and 14% cash.

Options are used.

The parent company is Northern Trust Corp. Total assets under management by the parent company, subsidiaries and affiliates are $26.529 billion.

Clients include AT&T, General Foods, Illinois Tool Works and Museum of Science & Industry.

David R. Geis is chief investment officer. Peter J. Stockslager is client contact.

## Growth Stock Outlook Inc.

*4405 East-West Highway, Bethesda, Md. 20814; (301) 654-5205*

| | |

| Minimum separate account | $175,000 |
| No. of portfolio managers | 1 |
| Size of research staff | 5 |

Growth Stock Outlook Inc., an equity and international manager, uses Graham & Dodd analysis to identify emerging growth, growth and low p/e stocks.

The asset mix Jan. 1 was 30% stocks and 70% cash; $5 million was in foreign stocks.

It follows 300 stocks closely and 300, generally; all research is generated internally.

Charles Allmon is chief investment officer and client contact.

## Grubb & Ellis Investment Advisors

*1 Montgomery — West Tower, San Francisco, Calif. 94104 (415) 956-1990*

| | |
|---|---|
| Total assets managed | $614,000,000 |
| Tax-exempt assets managed | $295,000,000 |
| Real estate assets managed | $295,000,000 |
| Tax-exempt clients | 4 |
| Types of accounts managed | CJG |
| Minimum separate account | $25,000,000 |
| No. of portfolio managers | 13 |
| Size of research staff | 2 |

Grubb & Ellis Investment Advisors is a real estate manager with a research-oriented approach.

The firm concentrates on markets that demonstrate above-average growth with sufficient market depth to ensure liquidity and business diversification to minimize exposure to single industries.

The firm focuses on development, redevelopment, renovation and releasing of undermanaged and underutilized properties.

The asset mix Jan. 1 was 91.4% equity real estate and 8.6% mortgages.

There was about $270 million in equity real estate and about $25 million in mortgages.

James R. Proud, president, is chief investment officer and client contact.

## Gryphon Investment Counsel Inc.

*2000 Peel St., Suite 710, Montreal, Quebec H3A 2W5; (514) 288-4122*

| | |
|---|---|
| Total assets managed | $1,438,000,000 |
| Tax-exempt assets managed: | |
| Total | $151,000,000 |
| For subsidiaries of U.S. firms | $85,000,000 |
| Tax-exempt clients: | |
| Total | 48 |
| U.S. subsidiaries | 5 |
| Types of accounts managed | CEFPU |
| Minimum separate account | $18,000,000 |
| No. of portfolio managers | 6 |
| Size of research staff | 2 |

Gryphon Investment Counsel Inc., a Canadian firm, is an equity, fixed-income and balanced manager.

Its equity approach uses sector rotation, market timing and fundamental analysis.

Stock selection within sectors is dependent on in-house research.

Its fixed-income approach emphasizes active interest rate timing, with goals of preservation and enhancement of capital. Concentration is in high-quality marketable bonds and cash, when appropriate.

The asset mix Jan. 1 was 50% Canadian stocks, 30% bonds, 10% cash and 10% U.S. stocks.

George B. Kiddell, president and managing partner, is chief investment officer. Ronald E.F. Kaulbach, managing partner, is client contact.

## G.T. Capital Management

*601 Montgomery St., Suite 1400, San Francisco, Calif. 94111; (415) 392-6181*

| | |
|---|---|
| Total assets managed | $1,020,000,000 |
| Tax-exempt assets managed | $650,000,000 |

| Minimum separate account | $15,000,000 |
| No. of portfolio managers | 30 |
| Size of research staff | 17 |

G.T. Capital Management Inc., an international equity manager, emphasizes a philosophy of global growth investing, combining a top-down approach to geographic asset allocation (growth economies) with a bottom-up approach to security selection (growth companies). Options and stock index futures are used.

The asset mix Jan. 1 was 96% stocks and 4% cash; $640 million was in foreign stocks.

The parent company is G.T. Management PLC. Assets under management by the parent, subsidiaries and affiliates total $5.6 billion.

Clients include Arco, GM, AT&T and IBM.

Benson H. Fung, executive vice president-international, and Wilford J. Lee, chief investment officer-U.S., are the chief investment officers. Mary Lou Bernhoft, vice president-marketing and client services, is client contact.

## Guaranty Trust Co. of Canada

*366 Bay St., Toronto, Ontario M4H 2W5; (416) 975-4966*

| | |
|---|---|
| Total assets managed | $1,093,000,000 |
| Tax-exempt assets managed: | |
| Total | $1,093,000,000 |
| For subsidiaries of U.S. firms | $0 |
| Real estate assets managed | $28,000,000 |
| Tax-exempt clients | 273 |
| Types of accounts managed | CEFPU |
| Minimum separate account | $3,600,000 |
| No. of portfolio managers | 5 |
| Size of research staff | 1 |

Guaranty Trust Co. of Canada is an equity, fixed-income, balanced, real estate and money market manager.

Its equity approach focuses on low p/e stocks, emphasizing sound security selection and diversification within industries and companies. Its approach is disciplined, stressing long-term values.

Its fixed-income approach is sector analysis. Portfolio durations approximate that of midterm indexes. Value is added through options and bond futures. Holdings are predominantly in federal and provincial issues.

Guaranty Realty Investments Ltd. participates in institutional, quality properties.

The asset mix Jan. 1 was 35% Canadian stocks, 55% bonds and 10% U.S. stocks; $2 million was in real estate equity and $26.2 million in mortgages.

The parent company is Traders Group Ltd. Assets under management by the parent, subsidiaries and affiliates total $1.517 billion.

Peter de Auer, vice president-investments, is chief investment officer. D.E. Wannamaker, vice president-pension services, is client contact.

## The Guaranty Trust Co. of Missouri

*7701 Forsyth, Suite 1200, St. Louis, Mo. 63105; (314) 725-9055*

| | |
|---|---|
| Total assets managed | $247,000,000 |
| Tax-exempt assets managed: | |
| Total | $76,000,000 |
| Separate | $76,000,000 |
| 401(k) and 457 assets managed | $1,000,000 |
| Tax-exempt clients | 66 |
| Types of accounts managed | CFG |
| Minimum separate account | $200,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

The Guaranty Trust Co. of Missouri is an equity, fixed-income and balanced manager.

Its equity approach is quantitative, using growth stocks, sector rotation and market timing in a value orientation. Its objective is to outperform market index and manager data bases by managing risk and volatility.

Its fixed-income approach is based on interest rate anticipation enhanced by yield curve and credit sector analysis.

The asset mix Jan. 1 was 42% stocks, 56% bonds and 2% cash.

There are two 401(k) and 457 plan clients.

The parent company is Central Bank Co. Assets under management by the parent, subsidiaries and affiliates exceed $400 million.

David Eckles, vice president, is chief investment officer. Terence A. Verzal, vice president-marketing, is client contact.

### Guardian Ruggles Crysdale

National FSI

IPS, the tool that shapes your investment strategies.

IPS, the smart Investment Performance System from National FSI, is an asset no investment manager should be without. Using sophisticated statistical analyses, IPS measures, monitors, reports and graphs any number of accounts — to keep your investment strategies on target.

This comprehensive system automatically interfaces with any accounting application. It summarizes all transactions into a complete database of performance information. And IPS provides both time-weighted and dollar-weighted rates of return for up to 20 years. With IPS, you can compare your assets against standard industry indices such as Standard & Poor's 500 and the Dow Jones Industrials.

IPS makes processing easy for you. It's menu-driven and features single keystroke processing to speed and simplify performance analysis. Plus, numerous edits and audit trails help to ensure your data integrity.

Like all FSI software, IPS is available installed on IBM or Wang hardware. FSI also provides remote communications to use IPS through timesharing. Or if you prefer, our service bureau offers a mail-in service to process your information.

Since 1971, National FSI has grown to become a leading software company specializing in employee benefit, pension, and investment systems. In addition to IPS, we offer:

EBAS, the standard of excellence in recordkeeping for employee defined contribution plans.

PLUS, a system for recurring and lump sum pension payments.

And PAS, a participant accounting system for *daily* shareholder recordkeeping.

Call or write Linda Hickman at National FSI to find out how IPS can shape your investment strategy to a precise fit.

Hahn, Holland & Grossman is an equity, fixed-income and balanced manager.

Its equity approach emphasizes conserving capital in falling markets. The firm uses a top-down method concentrating on evaluation of market direction, identification of attractive industries and large-cap, value-oriented stocks. Stock index futures are used.

Its fixed-income approach is passive, using interest rate forecasts to structure portfolios with long, intermediate or short obligations from government or AAA corporate securities depending on yield spreads.

The asset mix Jan. 1 was 80% stocks, 12% bonds and 8% cash.

It follows 50 stocks closely; 80% of research is generated internally.

Clients include Chicago Laborers, Morton Thiokol and Giant Foods.

Donald Hahn is chief investment officer. Kenneth Grossman is client contact.

Size of research staff ....29

John Hancock Financial Services is an equity, fixed-income, balanced, real estate, international, venture capital, timber, private placements and convertible manager.

Its equity approach, handled through Independence Investment Associates, is active quantitative, and combines fundamental research with investment technology in aggressive issue selection.

Its fixed-income approach is handled through IIA and relies on forecasts of interest rate levels and trends, risk management and systematic decision making.

Its real estate approach is offered through pooled and non-pooled accounts, joint ventures and direct investments in commercial and timber real estate.

The separate accounts asset mix Jan. 1 was 51% stocks, 19% bonds, 2% cash, 26% equity real estate and 2% mortgages.

There was $782 million in real estate equity, $59 million in mortgages, $42 million in foreign stocks, $209 million in foreign bonds and $195 million in foreign short-term investments.

Options and fixed-income futures are used.

The parent company is John Hancock Financial Services. Total assets managed by the parent company, subsidiaries and affiliates are $40.7 billion.

Foster L. Aborn, president-institutional investment and pension sector, is chief investment officer. Richard P. Troy, vice president-investment marketing, is client contact.

## Hanson Investment Management Co.

*4000 Civic Center Drive, Suite 200, San Rafael, Calif. 94903; (415) 499-1400*

Total assets managed ....$550,000,000
Tax-exempt assets managed ....$479,000,000
Tax-exempt clients ....21
Types of accounts managed ....CFJG
Minimum separate account ....$3,000,000
No. of portfolio managers ....5
Size of research staff ....1

Hanson Investment Management Co. is an equity and balanced manager.

It uses Graham & Dodd principles and emphasizes low p/e stocks in its value-oriented, bottom-up approach.

Its fixed-income approach uses interest rate anticipation.

The asset mix Jan. 1 was 75% stocks, 12% bonds and 13% cash.

It follows 35 stocks closely and 60, generally; half the research is generated internally.

Clients include Hawaii, Miami, Kellogg and City and County of San Francisco.

Herbert M. Hanson Jr. is chief investment officer and client contact.

## Harbor Capital Management

*265 Franklin St., Suite 1800, Boston, Mass. 02110; (617) 439-4500*

Total assets managed ....$1,362,000,000

Separate ....$5,933,000,000
401(k) and 457 assets managed ....$105,000,000
Real estate assets managed ....$22,000,000
Tax-exempt clients:
Commingled ....450
Separate ....231
Types of accounts managed ....CEFGJ
No. of portfolio managers ....12
Size of research staff ....8

Harris Trust & Savings Bank is an equity, fixed-income, balanced, real estate, convertible securities, stock index futures and options manager. It began offering international management April 1.

Its quantitative equity approach incorporates a model using low p/e, dividend discount, earnings acceleration, earnings estimate change and price momentum. Stocks are ranked by a process that weights each factor to its predictive power.

Its fixed-income approach is based on quantitative models that create bounded active exposures in duration, term structure and sector quality.

Options, stock index futures and fixed-income futures are used.

Its real estate approach is equity-oriented, investing in unleveraged industrial, retail and office properties of $1 million to $3 million. Substantial construction and lease-up risks are avoided in its open-end pooled funds.

The asset mix Jan. 1 was 32% stocks, 31% bonds, 36% cash and 1% equity real estate; $276 million was in equity index funds, $150 million in bond index funds and $510 million in dedicated or immunized bond portfolios.

There are 75 401(k) clients.

The parent company is Bank of Montreal.

John C. Kirscher is senior vice president and chief investment officer. Gary S. Klem, vice president, is client contact.

## Hartford Life Insurance Cos.

*P.O. Box 2999, Hartford, Conn. 06104-2999; (203) 683-8001*

Total assets managed ....$5,032,000,000
Tax-exempt assets managed:
Total ....$2,283,000,000
Pooled accounts ....$85,000,000
Separate accounts ....$401,000,000
GICs ....$826,000,000
Other ....$971,000,000

Real estate assets managed ....$20,000,000
Mortgage-backed assets managed ....$1,000,000
Tax-exempt clients ....385
Types of accounts managed ....CEFGJ
Minimum separate account ....$5,000,000
No. of portfolio managers ....4
Size of research staff ....12

Hartford Life Insurance Cos. is an equity, fixed-income, balanced and real estate manager.

Its equity approach emphasizes Graham & Dodd analysis, with optional portfolio structuring by sector and industry, with continuous recomposing, if necessary, to achieve return-risk objectives.

Its fixed-income approach anticipates the level and shape of the yield curve to offer clients a high return with principal value guaranteed.

Its real estate approach is to acquire properties that offer attractive yields and long-term appreciation. Emphasis is on site selection and asset and property management.

The separate accounts asset mix Jan. 1 was 94% stocks, 4% equity real estate, 0.2% mortgage-backed securities and 1.8% short-term money market; $19.3 million was in equity real estate and $29 million was in bond index funds.

The parent company is The Hartford Insurance Group. Assets under management by the parent, subsidiaries and affiliates total $21.242 billion.

Edward Bennett, senior vice president, is chief investment officer. Charles A. Clinton, vice president-asset management services, is client contact.

## Haven Capital Management

*605 Third Ave., 27th Floor, New York, N.Y. 10158; (212) 986-4086*

Total assets managed ....$646,000,000
Tax-exempt assets managed ....$431,000,000
Tax-exempt clients ....26
Types of accounts managed ....CEF
No. of portfolio managers ....5

Haven Capital Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach is growth at a reasonable price, based on individual issue selection of large and small businesses considered undervalued. Historical data is examined to identify attractively priced companies with above-average characteristics.

Its fixed-income approach is based on interest rate anticipation derived from economic cycle analysis. Maturity selection is followed by sector and quality judgments to produce consistent competitive returns with low volatility.

The asset mix Jan. 1 was 60% stocks, 30% bonds and 10% cash; $11 million was in dedicated or immunized bond portfolios.

Clients include Pennsylvania Power & Light, Cox Enterprises, Diebold and Dr. Scholl Foundation.

Denis M. Turko, managing director, is client contact.

## Hawaiian Trust Co. Ltd.

Separate ....10
Types of accounts managed ....CEFGJ
Minimum separate account ....$500,000
No. of portfolio managers ....10

Hawaiian Trust Co. Ltd. is an equity, fixed-income, balanced and real estate manager.

Its equity approach emphasizes growth stocks; earnings momentum/surprises are weighted.

In fixed income, it invests in Treasury bonds. Changes in maturity and duration are based on interest rate outlook.

The asset mix Jan. 1 was 60% stocks, 34% bonds, 5% cash and 1% equity real estate.

There was $8 million in real estate equity and $10 million in foreign stocks.

The parent company is Bancorp Hawaii. Total assets under management by the parent company, subsidiaries and affiliates are $4.1 billion.

William J. Barton, senior vice president, is chief investment officer. Reid Smith, investment officer, is client contact.

## Hayden, Tolzmann & Associates Inc.

*1 Regency Drive, P.O. Drawer 708, Bloomfield, Conn. 06002-0708; (203) 243-1481*

Total assets managed ....$36,000,000
Tax-exempt assets managed ....$36,000,000
Real estate assets managed ....$36,000,000
Tax-exempt clients ....1
Types of accounts managed ....G
Minimum separate account ....$10,000,000

Hayden, Tolzmann & Associates Inc., a real estate manager, stresses acquisition of existing, leased, income-producing real estate — leveraged and unleveraged — such as mixed-use, research and development, office, industrial and retail properties nationwide.

The asset mix Jan. 1 was 100% equity real estate.

The parent company is CentreBanc Financial Services Inc.

Client is New Hampshire Retirement System.

David C. Tolzmann, president, is chief investment officer and client contact.

## Heartland Capital Management Inc.

*36 S. Pennsylvania St., Suite 610, Indianapolis, Ind. 46204; (317) 633-4080*

| No. of portfolio managers | 7 |
| Size of research staff | 1 |

Hilliard Lyons Investment Management Group is an equity, fixed-income and balanced manager.

Its equity approach uses Graham & Dodd analysis to concentrate on growth stocks. Emphasis is placed on internally generated research aimed at long-term opportunities. Low turnover is a characteristic of its primarily bottom-up methodology.

Its fixed-income approach emphasizes low interest rate and credit risk, aiming for positive return in all periods.

The asset mix Jan. 1 was 65% stocks, 25% bonds and 10% cash.

The parent company is J.J.B. Hilliard, W.L. Lyons Inc.

Clients include Figgie International and Union College.

Donald F. Kohler, executive vice president, is chief investment officer. Gordon L. Ragan, vice president, is client contact.

*Financial Advisors:*

# "Improve your clients' total return – by cutting their commission costs in half!"

*Charles R. Schwab, Chairman*
*Charles Schwab & Co., Inc.*

## Save your clients 50%, 60%, even 76%.

When you place your clients' trades through Schwab, you can save them up to 76% on commissions compared to full-commission brokers' rates. After a half-dozen or so trades a year, you can save your clients hundreds, even thousands of dollars.

## Reinvest those savings for a greater total return.

Every dollar you save for your clients can be reinvested in their portfolios. The end result? A greater total return for your clients. And as your clients' assets grow, so will their satisfaction with you.

## Enjoy special services designed with you in mind.

When you're managing other people's money, you need all the advantages you can get. Here's how Schwab's Financial Advisors Services gives you the attention you need:

- ✔ You'll receive quick, professional service from your own brokers who are completely familiar with you and your accounts.
- ✔ You and your clients will receive duplicate trade confirmations and account statements.
- ✔ You can call in to place your orders 24 hours a day.
- ✔ You never need to worry about Schwab competing for your clients. We don't even offer investment advice.

## Choose the broker you can count on.

Charles Schwab has become America's largest discount brokerage firm by combining quality services with substantial commission discounts. You'll benefit from Schwab's professional approach—and your clients will enjoy the significant commission savings Schwab can deliver, trade after trade.

## Find out how to start cutting your clients' costs today!

| Minimum separate account | $2,000,000 |
| No. of portfolio managers | 1 |
| Size of research staff | 1 |

Hodges Capital Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach is low p/e, seeking promising low-multiple stocks off the beaten paths.

Its fixed-income approach is passive, purchasing a sequence of short-term maturities. The ladder has ascending maturities out to three years.

The asset mix Jan. 1 was 80% stocks, 5% bonds and 15% cash.

Clients are Christian Church and Everest & Jennings International.

Fletcher Hodges III is chief investment officer and client contact.

## Hodgson Roberton Laing

*390 Bay St., Suite 1608, Toronto, Ontario M5H 2Y2; (416) 869-3320*

| | |
|---|---|
| Total assets managed | $1,019,000,000 |
| Tax-exempt assets managed: | |
| Total | $437,000,000 |
| For subsidiaries of U.S. firms | $0 |
| Tax-exempt clients | 29 |
| Types of accounts managed | CEF |
| Minimum separate account | $3,600,000 |
| No. of portfolio managers | 5 |
| Size of research staff | 2 |

Hodgson Roberton Laing Ltd. is an equity, fixed-income and balanced manager.

Its equity approach uses sector rotation in a modified top-down approach. Fundamental long-term investments are emphasized, with attention given to the business cycle.

Fixed income is managed according to the interest rate outlook. Issues are concentrated in short and long maturities with no extreme positions and avoiding excessive trading.

The asset mix Jan. 1 was 55% Canadian stocks, 35% bonds and 10% U.S. stocks.

It follows 50 stocks closely and 200, generally; 80% of research is generated internally.

J. Warren Laing, president, is chief investment officer. Terry C. Buddin, senior vice president, is client contact.

## Hoisington Investment Management Co.

*950 Echo Lane, Suite 210, Houston, Texas 77024; (713) 467-7900*

| | |
|---|---|
| Total assets managed | $540,000,000 |
| Tax-exempt assets managed | $540,000,000 |
| Tax-exempt clients | 16 |
| Types of accounts managed | CFG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 2 |

Hoisington Investment Management Co., a fixed-income manager, uses a risk-averse, market-timing approach. Very short maturities are used during periods of high risk, while 30-year maturities capitalize on low-risk periods.

The asset mix Jan. 1 was 100% cash. However, for the majority of the year, the asset mix was 100% U.S. Treasury bonds.

Clients include Fluor, Copperweld, TRW, Sara Lee and Unocal.

The chief investment officer is Van R. Hoisington, president. The client contact is Janice Teague Green, senior vice president.

## Home Life Insurance Co.

| Tax-exempt assets managed | $237,000,000 |
| Tax-exempt clients | 132 |
| Types of accounts managed | C |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 5 |
| Size of research staff | 2 |

Janus Capital Corp., an equity manager, uses a top down, opportunistic and value-oriented approach. Its bias

is toward companies with low debt/equity ratios and high cash positions.

The asset mix Jan. 1 was 80% stocks, 15% bonds and 5% cash.

Janus follows 120 stocks closely; 45% of research is generated internally.

The parent company is Kansas City Southern Industries.

Thomas H. Bailey, president, is chief investment officer. B.E. "Ben" Niedermeyer, senior vice president, is client contact.

### Jarislowsky, Fraser & Co.

*65 Queen St. W., Suite 1501, Toronto, Ontario M5H 2M5; (416) 363-7417*

| | |
|---|---|
| Total assets managed | $5,000,000,000 |
| Tax-exempt assets managed: | |
| Total | $4,200,000,000 |
| For subsidiaries of U.S. firms | $600,000,000 |
| Tax-exempt clients: | |
| Total | 170 |
| U.S. subsidiaries | 25 |
| Types of accounts managed | CEFPU |
| Minimum separate account | $7,000,000 |
| No. of portfolio managers | 9 |

Jarislowsky, Fraser & Co. Ltd., a Canadian firm, is an equity, fixed-income and balanced manager.

Its equity approach is based on fundamental research using Graham & Dodd analysis. Emphasis is placed on value analysis, financial strength and management competence.

Its fixed-income approach uses interest rate anticipation and sector analysis. It maximizes yield primarily by investing in quality corporate bonds. Three criteria are used — safety of principal, average term and yield optimization.

The asset mix Jan. 1 was 32% Canadian stocks, 48% bonds, 8% cash and 12% U.S. stocks.

Sixty stocks are followed closely and 100, generally; all research is generated internally.

Clients include F.W. Woolworth, Weston, Xerox Canada and Abitibi.

Stephen Jarislowsky, president, is chief investment officer. Lorne T. Wickerson is client contact.

### JCB Asset Management

*330 Commerce St., Nashville, Tenn. 37201; (615) 748-9422*

| | |
|---|---|
| Total assets managed | $126,000,000 |
| Tax-exempt assets managed | $94,000,000 |
| Tax-exempt clients | 57 |
| Types of accounts managed | CEFG |
| Minimum separate account | $200,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 12 |

JCB Asset Management is an equity, fixed-income and balanced manager.

Its equity approach seeks companies with strong earnings, preferably accelerating earnings growth, that are outperforming the market in terms of price movement.

Its fixed-income approach is passive, using laddered short- to intermediate-term bonds.

The asset mix Jan. 1 was 70% stocks and 30% bonds.

The parent company is J.C. Bradford and Co.

Norris Nielsen, president, is the chief investment officer. Tom Pollock, vice president, is client contact.

### Jennison Associates Capital

*466 Lexington Ave. New York, N.Y. 10017; (212) 421-1000*

| | |

### Jurika & Voyles

*1970 Broadway, Suite 1250, Oakland, Calif. 94612; (415) 834-9740*

| | |
|---|---|
| Total assets managed | $100,000,000 |
| Tax-exempt assets managed | $50,000,000 |
| International assets managed | $3,000,000 |
| Tax-exempt clients | 22 |
| Types of accounts managed | CF |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 2 |

Jurika & Voyles is an equity and balanced manager.

Its equity approach uses Graham & Dodd analysis and low p/e stocks.

The firm approaches stocks as though it were to buy the whole company at present market value. Managers concentrate on cash flow and will not pay p/e multiples that are higher than the averages.

Its fixed-income approach uses interest rate anticipation. Managers use a momentum index consisting of eight interest rate indicators. When the index reverses they will lengthen or shorten maturities.

The asset mix Jan. 1 was 50% stocks, 45% bonds and 5% cash.

There was $3 million in foreign stocks.

It follows 60 stocks closely and 100, generally; half of the research is generated internally.

Clients include Robert Mondavi, Children's Hospital Foundation of the East Bay and Central Bank Pension.

William K. Jurika is chief investment officer and client contact.

Thomas D. Kienlen is chief investment officer and client contact.

### Luther King Capital Management

*401 Burk Burnett Building, 500 Main St., Fort Worth, Texas; 76102; (817) 332-3235*

| | |
|---|---|
| Total assets managed | $1,800,000,000 |
| Tax-exempt assets managed | $1,200,000,000 |
| International assets managed | $50,000,000 |
| Tax-exempt clients | 72 |
| Types of accounts managed | CEF |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 6 |

Luther King Capital Management is an equity, fixed-income and balanced manager.

It emphasizes companies exhibiting above-average growth characteristics with high return on shareholders' equity and low financial leverage, and companies with assets selling significantly below private-market value. Sector rotation also is used.

In fixed income, it uses interest rate anticipation in purchasing intermediate-term Treasury notes and corporate bonds. And it exploits market inefficiencies in thinly traded discount sinking fund corporate issues.

The asset mix Jan. 1 was 85% stocks, 5% bonds and 10% cash; $50 million was in foreign stocks.

The firm follows 150 stocks closely and 250, generally; 65% of research is generated internally.

Clients include Kimberly Clark, Smith College, University of Notre Dame and Noble Affiliates.

J. Luther King Jr., president, is chief investment officer. Emmett M. Murphy is client contact.

### Kingsley, Jennison, McNulty & Morse Inc.

*220 Sansome St., Suite 1100, San Francisco, Calif. 94104; (415) 433-5844*

| | |
|---|---|
| Total assets managed | $385,000,000 |
| Tax-exempt assets managed | $321,000,000 |
| 401(k) assets managed | $1,000,000 |
| Mortgage-backed assets managed | $42,000,000 |
| International assets managed | $11,000,000 |
| Tax-exempt clients | 19 |
| Types of accounts managed | CEFG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 5 |
| Size of research staff | 3 |

Kingsley, Jennison, McNulty & Morse Inc. is an equity, fixed-income and balanced manager.

Its equity approach is active, investing 80% of funds in quality demonstrated growth stocks and 20% in emerging growth stocks.

Its fixed-income approach uses interest anticipation and sector analysis. Portfolio duration and sector weightings are varied relative to client baseline index; futures and options hedging strategies are used to manage volatility.

The asset mix Jan. 1 was 49% stocks, 25% bonds, 15% cash and 11% mortgage-backed securities.

There was $11 million in foreign stocks. There is one 401(k) client.

Richard K. Kingsley is chief investment officer. Philip W. Jonckheer is client contact.

The asset mix Jan. 1 was 80% stocks, 11% bonds and 9% cash.

The parent company is Cyrus J. Lawrence Inc. Total assets under management by the parent company, subsidiaries and affiliates are $437 million.

E. William Smethurse Jr., managing director, is chief investment officer. Robert Q. Wyckoff Jr., managing director, is client contact.

### Lazard Freres Asset Management

*1 Rockefeller Plaza, New York, N.Y. 10020; (212) 489-6600*

| | |
|---|---|
| Total assets managed | $7,996,000,000 |
| Tax-exempt assets managed | $6,910,000,000 |
| International assets managed | $8,000,000 |
| Tax-exempt clients | 125 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 18 |
| Size of research staff | 5 |

Lazard Freres Asset Management is an equity, fixed-income, balanced and international manager.

Its equity approach uses proprietary research to discover and validate stocks where it received more (high return on equity and assets) than it paid for (price/book value).

Its fixed-income approach manages accounts with a total return orientation. Valuation techniques are used to restructure the coupon, sector and maturity of portfolios.

Strategy is implemented through risk-reward analysis.

The asset mix Jan. 1 was 70% stocks, 25% bonds and 5% cash.

There was $8 million in foreign stocks and $290 million in dedicated or immunized bond portfolios.

It generates 85% of research internally.

The parent company is Lazard Freres & Co.

Clients include New York State Electric & Gas Corp., Bakery & Confectionery Unions, New York City Carpenters and General Dynamics.

Herbert W. Gullquist, general partner, is chief investment officer. Mark W. Hamilton, Anthony J. Dote Jr. and Raye Dube are client contacts.

### R.M. Leary & Co. Inc.

*3300 E. 1st Ave., No. 380, Denver, Colo. 80206; (303) 320-1063*

| | |
|---|---|
| Total assets managed | $17,000,000 |
| Tax-exempt assets managed | $17,000,000 |

| Mortgage-backed assets managed | $50,000,000 |
| International assets managed | $25,000,000 |
| Tax-exempt clients | 125 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 7 |
| Size of research staff | 1 |

Lee, Robinson & Steine Inc. is an equity, fixed-income, balanced and GIC manager.

Its equity approach uses sector rotation, market timing and quantitative analyses.

Its fixed-income approach is based on interest rate anticipation.

The asset mix Jan. 1 was 45% stocks, 45% bonds, 5% cash and 5% mortgage-backed securities.

There was $25 million in foreign stocks.

There are 10 401(k) clients.

It follows 150 stocks closely and 400, generally; 10% of the research is generated internally.

The parent company is First American Trust Co. Total assets under management by the parent company, subsidiaries and affiliates are $2.5 billion.

Clients include Metro Nashville, David Lipscomb College Endowment, Tennessee Performing Arts Foundation and United Cities Gas.

Charles H. Robinson is chief investment officer and client contact.

## Legg Mason Capital Management Inc.

*7 E. Redwood St., Baltimore, Md. 21202; (301) 539-3400*

| | |
|---|---|
| Total assets managed | $226,000,000 |
| Tax-exempt assets managed | $142,000,000 |
| 401(k) assets managed | $3,000,000 |
| Tax-exempt clients | 148 |
| Types of accounts managed | CEF |
| Minimum separate account | $250,000 |
| No. of portfolio managers | 5 |
| Size of research staff | 18 |

Legg Mason Capital Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach is a value method that purchases securities that are undervalued in relation to long-term earning power or asset value.

Its fixed-income approach is driven by interest rate anticipation, sector analysis and security selection.

The asset mix Jan. 1 was 80% stocks, 10% bonds and 10% cash.

There are six 401(k) clients.

The parent company is Legg Mason Inc. Total assets under management by the parent company, subsidiaries and affiliates are $4.8 billion.

## Lehman Management Co.

*55 Water St., 34th Floor, New York, N.Y. 10041; (212) 668-5443*

| | |
|---|---|
| Total assets managed | $16,077,000,000 |
| Tax-exempt assets managed | $11,469,000,000 |
| Mortgage-backed assets managed | $900,000,000 |
| Tax-exempt clients | 210 |
| Types of accounts managed | CEFG |
| Minimum separate account | $25,000,000 |
| No. of portfolio managers | 20 |
| Size of research staff | 11 |

Lehman Management Co. Inc. is an equity, fixed-income and balanced manager.

Its equity approach for corporate funds is to purchase growth-oriented securities that sell at reasonable prices. For Taft-Hartley funds, the emphasis is on a contrarian, value-oriented approach.

For fixed income, it offers passive and active strategies. Its active approach is conservative, emphasizing high-quality intermediate securities and minimizing interest rate risk. The index products are customized, emphasizing controlled maturity movements while adding value through security selection and sector rotation.

The asset mix Jan. 1 was 35% stocks, 48.2% bonds, 9% cash and 7.8% in mortgage-backed securities; $1.5 billion was in bond index funds and $100 million in immunized bond portfolios.

The parent company is American Express Co. Assets under management by the parent, subsidiaries and affiliates total $140.02 billion.

C. Charles Hetzel and Coleman C. Brandt are the chief investment officers for corporate and Taft-Hartley funds respectively. H. Scott Higgins, executive vice president, is client contact.

## Lehndorff & Babson Real Estate Counsel

*2501 Cedar Springs, Suite 550, Dallas, Texas 75201; (214) 855-5800*

| | |
|---|---|
| Total assets managed | $1,500,000,000 |
| Tax-exempt assets managed | $670,000,000 |
| Real estate assets managed | $670,000,000 |
| Tax-exempt clients | 28 |
| Types of accounts managed | CJG |
| Minimum separate account | $25,000,000 |

Lehndorff & Babson Real Estate Counsel is a real estate manager.

It invests in larger office and retail properties chosen for the potential to create value through management during a five- to 15-year holding period.

All assets Jan. 1 were in equity real estate.

Clients include Atlantic Richfield, Dow Chemical, Dresser Industries and Eastman Kodak.

M. Thomas Lardner, chairman, is chief investment officer. James S. White, executive vice president, is client contact.

## Leith Wheeler Management

*Box 10365, Suite 1930, 609 Granville St., Vancouver, British Columbia V7Y 1G5; (604) 683-3391*

| | |
|---|---|
| Total assets managed | $185,000,000 |
| Tax-exempt assets managed | $127,000,000 |
| Tax-exempt clients | 18 |
| Types of accounts managed | CEFU |
| Minimum separate account | $550,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 1 |

Leith Wheeler Management Ltd., a Canadian firm, is an equity, fixed-income and balanced manager.

Its equity approach uses low p/e and Graham & Dodd principles in a value approach.

Its fixed-income approach is passive, using interest rate anticipation and sector analysis. Managers generally invest in short- and medium-term, high-quality, fixed-income securities.

The asset mix Jan. 1 was 35% Canadian stocks, 40% bonds, 15% cash and 10% U.S. stocks.

The parent company is Leith Wheeler Management. Total assets under management by the parent, subsidiaries and affiliates are $255 million.

Murray Leith, president, is chief investment officer. B. Scott, vice president, is client contact.

## Leland O'Brien Rubinstein Associates Inc.

*P.O. Box 71970, Los Angeles, Calif. 90071-0970; (213) 614-3173*

| | |
|---|---|
| Total assets managed* | $22,000,000,000 |
| Tax-exempt assets managed* | $22,000,000,000 |
| Tax-exempt clients | 66 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $25,000,000 |
| Size of research staff | 8 |

*P&I Age estimate

Leland O'Brien Rubinstein Associates Inc. is a portfolio insurance and hedged risk manager.

Options, stock index futures and fixed-income futures are used in its strategies.

Pensions & Investment Age estimates the firm handled $22 billion in portfolio insurance coverage as of Jan. 1.

All research is internally generated.

Clients include Gates, Hughes Aircraft, Manville and TWA.

Larry D. Edwards, president, is chief investment officer. John W. O'Brien, chairman and chief executive officer, is client contact.

## The Leonard Management Group

*407 W. Avon Road, Avon, Conn. 06001; (203) 673-3237*

| | |
|---|---|
| Total assets managed | $25,000,000 |
| Tax-exempt assets managed | $15,000,000 |
| Tax-exempt clients | 5 |
| Types of accounts managed | CEG |
| Minimum separate account | $250,000 |
| No. of portfolio managers | 1 |
| Size of research staff | 1 |

The Leonard Management Group is an equity, fixed-income and balanced manager.

The equity approach emphasizes Graham & Dodd analysis, low p/e stocks and market timing in a value discipline applied for security selection using a bottom-up methodology.

The fixed-income approach adjusts security maturities as the interest rate outlook and yield curve changes. The firm seeks overlooked bonds that produce the highest risk-adjusted rates of return.

The asset mix Jan. 1 was 60% stocks, 35% bonds and 5% cash. Options are used.

James P. Leonard is chief investment officer and client contact.

## Lerner Investment Management Inc.

*1410 Two Galleria Tower, No. 20, Dallas, Texas 75240; (214) 980-1800*

| | |
|---|---|
| Total assets managed | $100,000,000 |
| Tax-exempt assets managed | $100,000,000 |
| Types of accounts managed | C |
| Minimum separate account | $2,000,000 |
| No. of portfolio managers | 1 |

Lerner Investment Management Inc. is an equity manager.

Its equity approach emphasizes growth stock and market timing. The firm concentrates on earnings, revenues and backlog growth.

Julian A. Lerner is chief investment officer and client contact.

## Lesesne & Co. Inc.

*3414 Peachtree Road N.E., Suite 820, Atlanta, Ga. 30326; (404) 261-8200*

| | |
|---|---|
| Total assets managed | $50,000,000 |
| Tax-exempt assets managed | $43,000,000 |
| Tax-exempt clients | 45 |
| Types of accounts managed | CFJ |
| Minimum separate account | $250,000 |

Lesesne & Co. Inc. is a balanced manager.

Its equity approach emphasizes market timing; its fixed-income approach is driven by interest rate anticipation.

The asset mix Jan. 1 was 99% stocks and 1% bonds.

Brannon B. Lesesne Jr., president, is chief investment officer. Mr. Lesesne and Thomas N. Eddins Jr., executive vice president, are client contacts.

## Lexington Management

*Park 80 West, Plaza Two, Saddle Brook, N.J. 07662; (201) 845-7300*

| | |
|---|---|
| Total assets managed | $1,779,000,000 |
| Tax-exempt assets managed | $650,000,000 |
| 401(k) assets managed | $15,000,000 |
| Mortgage-backed assets managed | $35,000,000 |
| Tax-exempt clients | 41 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $3,000,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 10 |

Lexington Management Corp. is an equity, fixed-income and balanced manager.

Its equity approach stresses Graham & Dodd analysis. Seeking to preserve capital and earn a real rate of return, it will not own an equity unless it anticipates earning at least twice the risk-free rate.

Its fixed-income approach uses interest rate anticipation and duration to manage portfolios; its neutral position is very defensive.

The asset mix Jan. 1 was 49% stocks, 30% bonds and 21% cash.

Options are used.

Seventy-five stocks are followed closely and 200, generally; 85% of research is generated internally.

William S. Stack is chief investment officer. Joseph Barcic Jr., chief operating officer, is client contact.

## Leylegian Investment Management

*855 Oak Grove Ave., Menlo Park, Calif. 94025; (415) 325-1055*

| | |
|---|---|
| Total assets managed | $220,000,000 |
| Tax-exempt assets managed | $220,000,000 |
| Tax-exempt clients | 12 |
| Types of accounts managed | CEFJ |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 3 |

Leylegian Investment Management is an equity, fixed-income and balanced manager.

Its equity approach uses growth and low p/e stocks and sector rotation techniques. It uses a global top-down economic overview with heavy industry emphasis and utilizing a sell discipline.

Its fixed-income approach uses interest rate anticipation.

The asset mix Jan. 1 was 80% stocks and 20% cash.

Jack H. Leylegian II is chief investment officer and client contact.

Marine Investment Management Co. is an equity, fixed-income and balanced manager.

Its equity approach is contrarian, emphasizing Graham & Dodd analysis.

Using interest rate anticipation, its fixed-income approach is a Graham & Dodd carryover. Marine analyzes the economic environment to position maturities, and then actively manages investments within a sector to capitalize on abnormalities.

The asset mix Jan. 1 was 3% stocks, 62.2% bonds, 12.8% cash and 22% mortgage-backed securities.

The parent company is Marine Corp. Assets under management by the parent, subsidiaries and affiliates total $2.52 billion.

George R. Humm, executive vice president, is chief investment officer and client contact.

### Marinvest

*250 Park Ave., New York, N.Y. 10177; (212) 503-6815*

| | |
|---|---|
| Total assets managed | $2,776,000,000 |
| Tax-exempt assets managed | $923,000,000 |
| 401(k) assets managed | $79,000,000 |
| Tax-exempt clients | 13 |
| Types of accounts managed | CEF |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 7 |
| Size of research staff | sw06012 |

Marinvest is an equity, fixed-income, balanced and cash manager.

Its quantitative equity approach emphasizes total return and low-cap portfolios. Its Value-Plus process selects low p/e stocks that meet a combination of screening criteria.

Its fixed-income approach seeks to exceed market performance with market volatility or less. Sector diversification produces additional yield and hedges security risk. The maturity structure changes with interest rates.

The asset mix Jan. 1 was 29.8% stocks, 18.6% bonds and 51.6% cash.

There are three 401(k) clients.

The parent company is Marine Midland Holdings Inc.

Hiram F. Moody Jr. is chief investment officer. W. Denman Zirkle, managing director, is client contact.

Treasury management: Aug. 10

A GAIN
AGAIN

Another great year. Another winning season. In 1986 we were hired to manage more new assets than in any other year in our twelve year history. This recognition of our professional expertise in stock and bond management by our marketplace made the past year even more rewarding.

And 1986 was another positive year for investment results. A dozen successes in as many years makes for an excellent record.

1987 promises to be another terrific year. As consistent superior performance continues to be our commitment and our hallmark.

Call Susan Thomas at 317-267-3731. Find out how Merchants Investment Counseling delivers profitable results again and again and again.

## Maritime Asset Management

*1700 N.E. 26th St., Wilton Manors, Fla. 33305; (305) 563-6829*

| | |
|---|---|
| Total assets managed | $30,000,000 |
| Tax-exempt assets managed | $22,000,000 |
| Real estate assets managed | $1,000,000 |
| Tax-exempt clients | 1 |
| Types of accounts managed | C |
| Minimum separate account | $200,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 2 |

Maritime Asset Management Inc. is an equity and balanced manager.

Its equity approach is conservative, using Graham & Dodd analysis, market timing and the buy/sell habits of corporate insiders. For fixed income, it prefers utility stocks over bonds to secure increased dividends and retain value during rising interest rates.

Options are used.

It may place between 5% to 10% of assets into larger real estate limited partnerships or publicly traded REITs.

The asset mix Jan. 1 was 70% stocks, 25% cash and 5% equity real estate.

Barry L. Unterbrink, president, is chief investment officer and client contact.

## Markston International Inc.

*633 Third Ave., 17th Floor, New York, N.Y. 10017; (212) 972-3120*

| | |
|---|---|
| Total assets managed | $251,000,000 |
| Tax-exempt assets managed | $205,000,000 |
| 401(k) assets managed | $2,000,000 |
| Tax-exempt clients | 2 |
| Types of accounts managed | C |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 3 |

Markston International Inc., an equity manager, uses Graham & Dodd analysis with growth and low p/e stocks.

Its fixed-income approach is on a total return basis.

The asset mix Jan. 1 was 90.8% stocks and 9.2% cash.

There is one 401(k) client.

The parent company is Mutual Benefit Life Insurance Co. Assets under management by the parent, subsidiaries and affiliates total $9.8 billion.

John R. Stone, president, is chief investment officer and client contact.

## Marquette Capital Management Corp.

*520 Marquette Ave., Minneapolis, Minn. 55480; (612) 341-8428*

| | |
|---|---|
| Total assets managed | $425,000,000 |
| Tax-exempt assets managed | $250,000,000 |
| 401(k) assets managed | $15,000,000 |
| Mortgage-backed assets managed | $12,000,000 |
| Tax-exempt clients | 40 |
| Types of accounts managed | CF |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 5 |

Marquette Capital Management Corp. is an equity, fixed-income, balanced and GIC manager.

Its equity approach emphasizes low p/e stocks and Graham & Dodd analysis.

Its fixed-income approach is interdisciplinary, emphasizing inefficient sectors to enhance yield. Greater attention is paid to individual opportunities as opposed to relying on massive market timing-related repositioning.

The asset mix Jan. 1 was 20% stocks, 55% bonds, 10% cash, 5% mortgage-backed securities and 10% GICs.

There are 15 401(k) clients.

The parent company is Marquette Bank of Minneapolis. Assets under management by the parent, subsidiaries and affiliates total $800 million.

Clients include Duluth Clinic, MEI Diversified, Minnesota Laborers and Wall Drug.

Gregg S. Hannah, president, is chief investment officer and client contact.

## Marshall & Sullivan Inc.

*1001 Fourth Ave. Plaza, Suite 2717, Seattle, Wash. 98154; (206) 621-9014*

| | |
|---|---|
| Total assets managed | $191,000,000 |
| Tax-exempt assets managed | $90,000,000 |
| Tax-exempt clients | 83 |
| Types of accounts managed | CEFJ |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 2 |

Marshall & Sullivan Inc. is an equity, fixed-income and balanced manager.

Its equity approach is driven by the selection of stocks that have shown superior and consistent earnings-per-share growth backed by financials and a market position that are conducive to continued growth.

Its fixed-income investments are confined to U.S. government securities with short and intermediate maturities. Specific maturities are purchased to match cash flow requirements.

The asset mix Jan. 1 was 58% stocks, 37% bonds and 5% cash.

Ron Marshall, principal, is chief investment officer. William G. Frey and Ralph Purvis Jr., vice presidents, are client contacts.

## Maryland National Bank

*2 N. Charles St., P.O. Box 995, Baltimore, Md. 21203; (301) 244-1443*

| | |
|---|---|
| Total assets managed | $830,000,000 |
| Tax-exempt assets managed: | |
| Total | $202,000,000 |
| Commingled | $161,000,000 |
| Separate | $41,000,000 |
| Types of accounts managed | CEFJ |
| Minimum separate account | $2,000,000 |
| No. of portfolio managers | 6 |
| Size of research staff | 4 |

Maryland National Bank is an equity, fixed-income, balanced and cash manager.

Its equity approach is fundamental, diversified and value-oriented. The firm focuses on growth stocks. Asset allocation is used to match client objectives. Options are used.

Its fixed-income strategy is formed by the economic outlook, interest rate forecast and inflation.

The asset mix Jan. 1 was 50% stocks, 45% cash and 5% cash; $20 million was in equity index funds and $17 million in bond index funds.

Howard M. Weiss is vice president and chief investment officer. Gordon R. Boardway, senior trust officer, is client contact.

## Mason Hill Asset Management Inc.

*477 Madison Ave., 24th Floor, New York, N.Y. 10022; (212) 421-3100*

| | |
|---|---|
| Total assets managed | $20,000,000 |
| Tax-exempt assets managed | $5,000,000 |
| Mortgage-backed assets managed | $250,000 |
| Tax-exempt clients | 4 |
| Types of accounts managed | FJ |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 1 |

Mason Hill Asset Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses Graham & Dodd analysis; it seeks low p/e stocks. Its fixed-income approach is passive.

The asset mix Jan. 1 was 80% stocks, 5% bonds, 10% cash and 5% mortgage-backed securities.

It follows 200 stocks closely; all research is generated internally.

William W. Strong is chief investment officer and client contact.

*Donald F. Pitcher Jr.*
*Massachusetts Financial*

## Massachusetts Financial Services Co.

*200 Berkeley St., Boston, Mass. 02116; (617) 423-3500*

| | |
|---|---|
| Total assets managed | $14,689,000,000 |
| Tax-exempt assets managed | $3,058,000,000 |
| Mortgage-backed assets managed | $151,000,000 |
| International assets managed | $43,000,000 |
| Tax-exempt clients | 21 |
| Types of accounts managed | CFG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 26 |
| Size of research staff | 17 |

Massachusetts Financial Services Co. is an equity, fixed-income, balanced and international manager.

Its equity approach capitalizes on return differentials between industry groups, rotating sectors and industries where relative price momentum and prospective earnings potential look best.

Its fixed-income strategy is based on yield curve and interest rate analysis.

Options and fixed-income futures are used.

The asset mix Jan. 1 was 31.9% stocks, 55% bonds, 8.1% cash and 5% mortgage-backed securities; $43 million was in foreign bonds.

The parent company is Sun Life Assurance Co. of Canada. Assets under management by the parent, subsidiaries and affiliates total $27.8 billion.

Clients include Alcoa, Los Angeles County Employees, NYNEX and Virginia Supplemental.

Donald F. Pitcher Jr., senior vice president and director-investment counsel division, is chief investment officer. William H. Lynch, vice president and assistant director-investment counsel division, is client contact.

## Mass Mutual Life Insurance

*1295 State St., Springfield, Mass. 01111; (413) 788-8411*

| | |
|---|---|
| Total assets managed | $18,000,000,000 |
| Tax-exempt assets managed: | |
| Total | $8,100,000,000 |
| Pooled accounts | $1,030,000,000 |
| Separate accounts | $221,000,000 |

| Types of accounts managed | CEFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 7 |
| Size of research staff | 23 |

Mass Mutual Life Insurance Co. is an equity, fixed-income, balanced and real estate manager.

Its equity approach emphasizes low p/e stocks and yield, identifying financially strong companies with a history of dividend growth purchased at discounted valuation levels.

Options, stock index futures and fixed-income futures are used.

Its fixed-income approach is based on sector analysis.

It manages current coupon intermediate portfolios structured to provide a positive return in any interest rate environment.

Its real estate approach emphasizes well-diversified portfolios with a balance between cash and price appreciation.

The separate accounts asset mix Jan. 1 was 75% stocks, 10% bonds, 10% cash, 5% equity real estate.

There are 615 401(k) and 457 plan clients.

Richard G. Dooley, executive vice president, is chief investment officer. Peter J. Vogian, senior vice president, is client contact.

## Mathers & Co. Inc.

*125 S. Wacker Drive, Chicago, Ill. 60606; (312) 236-8215*

| | |
|---|---|
| Total assets managed | $616,000,000 |
| Tax-exempt assets managed | $135,000,000 |

| Types of accounts managed | CJG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 4 |

Matrix Capital Management Inc. is an equity and balanced manager.

Its equity approach is quantitative, emphasizing sector rotation.

The asset mix Jan. 1 was 99.7% stocks and 0.3% cash.

Matrix follows 1,000 stocks closely and 2,000, generally.

Its parent is Prudential Asset Management Co. Inc., a unit of Prudential Insurance Co. Assets under management by the parent, subsidiaries and affiliates total $177.5 billion.

Michael A. Petrino, senior managing director, is chief investment officer. Lynn Edelman, vice president, is client contact.

## Mawer & Associates Investment Counsel

*Suite 600, 603 Seventh Ave. S.W., Calgary, Alberta T2P 2T5; (403) 262-4673*

| | |
|---|---|
| Total assets managed | $110,000,000 |
| Tax-exempt assets managed: | |
| Total | $40,000,000 |
| For subsidiaries of U.S. firms | $14,000,000 |
| Tax-exempt clients: | |
| Total | 17 |
| U.S. subsidiaries | 5 |
| Types of accounts managed | CEF |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 5 |

Mawer & Associates Investment Counsel, a Canadian firm, is an equity, fixed-income and balanced manager.

Its equity approach emphasizes low p/e stocks and Graham & Dodd analysis. Value takes precedence over diversification, and securities must meet minimum criteria such as the price paid for earnings, cash flow, assets, book value and sales.

Its fixed approach uses sector analysis and interest rate anticipation.

The asset mix Jan. 1 was 20% Canadian stocks, 60% bonds, 10% cash, 5% U.S. stocks and 5% foreign stocks.

Leighton F. Pullen, partner, is chief investment officer. Donald T. Ferris, associate, is client contact.

| Tax-exempt assets managed | $542,000,000 |
| 401(k) assets managed | $4,000,000 |
| Tax-exempt clients | 32 |
| Types of accounts managed | CEF |
| Minimum separate account | $20,000,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 2 |

McConnell & Miller Inc., an equity manager, focuses on stocks with low absolute and relative p/e ratios. It seeks financially sound, out-of-favor companies.

Its asset mix Jan. 1 was 85% stocks, 2% bonds and 13% cash.

There is one 401(k) client.

The firm follows 40 to 50 stocks closely and 150, generally; 50% of research is generated internally.

Clients include Echlin, Figgie International, Harvey Mudd College and The Stanley Works.

Richard E. McConnell, executive vice president, is client contact.

## McCowan Associates Inc.

*70 Pine St., New York, N.Y. 10270; (212) 480-8711*

| | |
|---|---|
| Total assets managed | $1,543,000,000 |
| Tax-exempt assets managed | $1,312,000,000 |
| International assets managed | $20,000,000 |
| Tax-exempt clients | 31 |
| Types of accounts managed | CEFJ |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 3 |

McCowan Associates Inc. is an equity, fixed-income and balanced manager.

Its equity approach emphasizes investment in businesses with prospects for superior, sustainable growth.

For fixed income, the interest rate forecast determines maturity term structure. Sector analysis also is used. The firm seeks consistent positive returns and limited risk.

The asset mix Jan. 1 was 84% stocks, 6% bonds and 10% cash; $20 million was in foreign stocks.

The firm follows 75 stocks closely and 150, generally; 60% of research is generated internally.

Clients include NYNEX, Texaco, Pacific Gas & Electric and Michigan State University.

Bruce J. McCowan, principal and chairman, is chief investment officer. Paul F. Pfeiffer, principal, is client contact.

## McCullough, Andrews & Cappiello Inc.

*101 California St., Suite 4250, San Francisco, Calif. 94111; (415) 956-8700*

| | |
|---|---|
| Total assets managed | $750,000,000 |
| Tax-exempt assets managed | $525,000,000 |
| Tax-exempt clients | 66 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 6 |
| Size of research staff | 1 |

McCullough, Andrews & Cappiello Inc. is an equity, fixed-income and balanced manager.

Its equity approach is based on maintenance of buying power through growth of earnings and dividends on relatively low p/e values purchased on a timely basis at the lower end of their relative trading ranges.

Its fixed-income approach is based on the interest rate outlook nearer term with liquidity and quality given top considerations.

The asset mix Jan. 1 was 65% stocks, 25% bonds and 10% cash.

The firm follows 75 stocks closely and 100, generally; 50% of research is

generated internally.

Clients include University of Santa Clara Endowment, Oakland Police & Fire and the Pacific Stock Exchange.

Robert F. McCullough, chairman and chief investment officer, is also the client contact.

### McGlinn Capital Management Inc.

*850 N. Wyomissing Blvd., P.O. Box 6158, Wyomissing, Pa. 19610-0158; (215) 374-5125*

| | |
|---|---|
| Total assets managed | $2,000,000,000 |
| Tax-exempt assets managed | $1,500,000,000 |
| Tax-exempt clients | 50 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 7 |

McGlinn Capital Management Inc. is an equity, fixed-income and balanced manager.

Its top-down equity approach combines Graham & Dodd analysis, low p/e stocks, sector rotation, market timing and quantitative analysis.

Its fixed-income approach focuses on interest rate direction and the posture of the Federal Reserve Board. Portfolios are concentrated in intermediate-term government and high-quality corporate issues.

Options, stock index futures and bond index futures are used in limited private investment partnerships.

The asset mix Jan. 1 was 43% stocks, 46% bonds and 11% cash; $600 million was in dedicated or immunized bond portfolios.

McGlinn follows 300 stocks closely and 500, generally; 25% of research is generated internally.

# Most Master Trust teams are connected by telephone. Not ours.

It's pretty obvious that a Master Trust team can only run at peak efficiency when everyone on the team knows what everyone else is doing.

However, of all major money center banks, only The Bank of New York seems to have figured out that the way to achieve this is not via telephone tag.

It's by having each Master Trust team work together–not just figuratively, but literally. Desk to desk. Terminal to terminal.

So your administrative officer can literally turn to your investment specialist or your accountant to get your questions answered and your requests acted upon immediately. For that matter, you can call any one of them directly.

What's just as important, The Bank of New York has committed its resources to supporting the teams with one of the most extensive and highly sophisticated "back office" complexes anywhere, featuring timely, accurate, audited reports, cash management services, advanced on-line technology and performance measurement.

To learn more about our team approach to Master Trust, call Robert S. Darbee, Vice President, at 212-530-1351. Or write him at The Bank of New York, 19 Rector Street, New York, New York 10015.

THE BANK OF NEW YORK
MASTER TRUST

© 1987 THE BANK OF NEW YORK MEMBER FDIC

Ltd., a Canadian firm, is an equity, fixed-income and balanced manager.

Its equity approach relies on growth stock and its fixed-income approach is passive.

Cheryl K. Gruetzmacher, managing director and director of institutional marketing and sales, is client contact.

## MLP Capital Formation

*P.O. Box 2297, Orinda, Calif. 94563; (415) 253-1282*

| | |
|---|---|
| Total assets managed | $20,000,000 |
| Tax-exempt assets managed | $13,000,000 |
| Real estate assets managed | $3,000,000 |
| Mortgage-backed assets managed | $2,000,000 |
| International assets managed | $400,000 |
| Tax-exempt clients | 16 |
| Types of accounts managed | CJ |
| Minimum separate account | $100,000 |
| No. of portfolio managers | 1 |
| Size of research staff | 2 |

MLP Capital Formation is an equity, fixed-income, real estate, international and asset allocation manager.

Its equity approach is based on Graham & Dodd and quantitative analysis, focusing on under-researched, undervalued medium-size companies.

In fixed income, it uses GNMAs.

In real estate it looks at apartments, commercial/industrial land and limited partnerships for resale. A proprietary model is used for evaluation.

The asset mix Jan. 1 was 45% stocks, 2% bonds, 10% cash, 18% equity real estate, 4% mortgages, 18% mortgage-backed securities and 3% international equity.

The parent company is MLP Capital Formation, formerly Gershen Perlman Financial.

Michael Perlman, co-general partner, is chief investment officer and client contact.

## Montag & Caldwell Inc.

*2 Piedmont Center, Suite 500, Atlanta, Ga. 30363; (404) 262-3480*

| | |
|---|---|
| Total assets managed | $540,000,000 |
| Tax-exempt assets managed | $351,000,000 |
| Tax-exempt clients | 81 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 3 |

Montag & Caldwell Inc. is an equity, fixed-income and balanced manager.

For equity investment, it takes a bottom-up valuation approach that interrelates earnings momentum.

Its fixed-income approach is based on duration management, maximizing the probability of outperforming the market within an expected range of rate movement by adjusting maturity, coupon and issuer.

The asset Jan. 1 was 65% stocks, 28% bonds and 7% cash; there was $23 million in dedicated or immunized bond portfolios.

It follows 300 stocks closely and 800 generally; 60% of research is generated internally.

Clients include Multimedia, Cone Mills and GoldKist.

Ronald E. Canakaris, president, is chief investment officer. Homer W. Whitman Jr., vice president-director of client services, is client contact.

## Montrusco Associates Inc.

*1000 Sherbrooke St. W., Suite 2300, Montreal, Quebec H3A 3G4; (514) 842-5464*

| | |
|---|---|
| Total assets managed | $875,000,000 |
| Tax-exempt assets managed | $540,000,000 |

**When Ameritech needed a Master Trust who did they dial for information?**

They were born a giant in the telecommunications field. But that didn't make it any easier to manage the eighth largest pension fund in the country. So Ameritech called up Harris Bank.

That's because the Harris approach to Master Trust planning is a flexible one. Rather than a preset service package, we offered Ameritech a custom-tailored plan to meet their specific needs. A plan that can be further adapted, as their needs grow and change.

This kind of cooperative planning means we do more than respond to requests. We initiate ideas. And offer expert help, not just from one source person, but from various levels of our Master Trust department.

For Ameritech, the Harris brand of flexible teamwork made the best Master Trust connection. See what we can do for you. Call our Marketing Representative, Mr. Walter J. Kowalczyk, at (312) 461-7625.

*C. Nicholas Potter*

balanced, real estate, international, convertible, immunized fixed-income and oil and gas management.

Its equity approach is a focused internal analytical effort combined with disciplined valuation and portfolio construction. Stock selection is the most important element.

Its fixed-income approach is based on interest rate anticipation, with sector and yield spread analysis providing incremental return and lowering volatility.

Options, stock index futures and fixed-income futures are used.

Its real estate approach is to make direct investments in special-situation projects that provide high current income, cash flow growth potential and high residual property appreciation.

The asset mix Jan. 1 was 40% stocks, 32% bonds, 5% cash, 3% equity real estate, 2% mortgages, 6% mortgage-backed securities, 3% convertibles, 2% international bonds and 7% international equities; there was $1.28 billion in equity real estate, $1.06 billion in mortgages, $3.52 billion in foreign stocks, $716 million in foreign bonds and $6.29 billion in immunized bond portfolios.

The parent company is J.P. Morgan Co. Assets under management by the parent, subsidiaries and affiliates total $61.71 billion.

C. Nicholas Potter is chief investment officer. Martin Dowd, Douglas Fleming, Clay Myers and George Peterson, vice presidents, are client contacts.

## Morgan Grenfell Investment Services Ltd.

| No. of portfolio managers | 7 |
| Size of research staff | 14 |

Morgan Grenfell Investment Services Ltd. is an equity, fixed-income and international manager.

It is an active global equity manager, using growth and low p/e stocks and market timing. Equal emphasis is placed on market and stock selection. No investments are made without considering the currency impact.

Its fixed-income approach combines active management of currencies, bond markets and maturities. Currency and bond market exposure decisions are separated through currency hedging.

The asset mix Jan. 1 was 95% stocks, 1% bonds and 4% cash.

Morgan Grenfell follows 600 stocks closely and 3,000, generally; 60% of research is generated internally.

The parent company is Morgan Grenfell Asset Management Ltd. Assets under management by the parent, subsidiaries and affiliates total $21.3 billion.

Clients include Exxon, Rockefeller Foundation, Allied-Signal and PacTel.

Michael Bullock is director and chief investment officer. Client contacts are Graham Bamping and Alison Ramsdale, vice presidents, at Morgan Grenfell Capital Management Inc., 520 Madison Ave., New York, N.Y. 10022.

## Morgan Stanley Asset Management Inc.

*1633 Broadway, New York, N.Y. 10019; (212) 703-2702*

| | |
|---|---|
| Total assets managed | $10,281,000,000 |
| Tax-exempt assets managed | $8,752,000,000 |
| Mortgage-backed assets managed | $3,330,000,000 |
| International assets managed | $35,000,000 |
| Tax-exempt clients | 164 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 21 |
| Size of research staff | 4 |

Morgan Stanley Asset Management Inc. is an equity, fixed-income, balanced, international and high-yield bond manager.

Its top-down/bottom-up equity approach combines market sector allocation with a growth- and value-oriented selection process.

Its fixed-income approach emphasizes active maturity shifting. Short- and intermediate-term holdings constitute the core of the portfolios with long-term bonds used opportunistically.

The asset mix Jan. 1 was 38% stocks, 19% bonds, 5% cash and 38% mortgage-backed securities; there was $35 million in foreign stocks and $434 million in dedicated or immunized bond portfolios.

The parent company is Morgan Stanley Group Inc. Assets under management by the parent, subsidiaries and affiliates total $10.56 billion.

Clients include GM, Amherst College and Kresge Foundation.

Barton M. Biggs is chairman and chief investment officer. Gail Hunt Reeke, vice president, and Perry E. Hall II, principal, are client contacts.

## Morgan Stanley Asset Management/The Chicago Group

*1 Financial Place, 440 S. LaSalle St., Chicago, Ill. 60605; (312) 765-6035*

| | |
|---|---|
| Total assets managed | $273,000,000 |
| Tax-exempt assets managed | $101,000,000 |
| Tax-exempt clients | 19 |
| Types of accounts managed | CEF |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 1 |

Morgan Stanley Asset Management/The Chicago Group is an equity and balanced manager.

It takes a classical value approach to equities. Portfolios always have lower-than-market p/e ratio and price-to-book ratio with higher-than-market yield.

Its fixed-income approach for balanced accounts emphasizes high-quality liquid bonds and takes advantage of anomalies in the one- to seven-year maturity range of the yield curve.

The asset mix Jan. 1 was 38% stocks, 61% bonds and 1% cash.

The parent company is Morgan Stanley Group Inc. Assets under management by the parent, subsidiaries and affiliates total $10.56 billion.

Thomas S. White is chief investment officer. Michael A. Crowe, vice president, is client contact.

## Morguard Investments Ltd.

*6 Crescent Road, Toronto, Ontario M4W 3K9; (416) 967-0880*

| | |
|---|---|
| Total assets managed | $3,100,000,000 |
| Tax-exempt assets managed: | |
| Total | $2,386,000,000 |
| For subsidiaries of U.S. firms | $0 |

| Tax-exempt clients | 400 |
| Types of accounts managed | CEFPU |
| No. of portfolio managers | 20 |
| Size of research staff | 65 |

Morguard Investments Ltd., a Canadian firm, is a fixed-income, real estate and oil and gas manager.

Its fixed-income approach is to design specific mortgage investments to meet clients' long and short-term requirements. It emphasizes yield and security as well as diversity through syndication.

Its real estate approach is to acquire, develop and manage commercial, industrial and retail properties in major Canadian cities.

The asset mix Jan. 1 was 39% equity real estate, 57% mortgages and 4% oil and gas.

The parent company is Metropolitan Life & Affiliated Cos.-Canadian Operations. Assets under management by the parent, subsidiaries and affiliates total $7.26 billion.

Clients include Air Canada, Alberta Government Telephones, Ontario Hydro and Bimcor.

D.D. Weiss and A.K. Stephens, executive vice presidents, are investment officers. Andrews F. Ross, vice president-business development, is client contact.

## Morison Asset Management

*1201 Marquette, Minneapolis, Minn. 55403; (612) 332-1588*

| | |
|---|---|
| Total assets managed | $274,000,000 |
| Tax-exempt assets managed | $191,000,000 |
| 401(k) assets managed | $645,000 |
| International assets managed | $40,000,000 |
| Tax-exempt clients | 105 |
| Types of accounts managed | CEF |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 6 |
| Size of research staff | 1 |

Morison Asset Management is an equity, fixed-income, balanced and international manager.

Its equity approach puts primary emphasis on asset allocation over business and interest rate cycles based on absolute potential/risk analysis. Asset allocation is driven by availability of quality issues using a core stock list of fast growth companies.

Its fixed-income approach takes advantage of yield curve analysis to increase yield and to control maturity and duration of the portfolio.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 60% stocks, 30% bonds and 10% cash; $40 million was in foreign stocks.

There is one 401(k) client.

The parent company is Morison International.

Tom Morison is chief investment officer. Ronald Halverson, vice president, is client contact.

| No. of portfolio managers | 2 |

NBD Ann Arbor is an equity, fixed-income and balanced manager.

Its equity approach uses sector rotation and market timing with growth stocks.

Its fixed-income approach uses interest rate anticipation.

The asset mix Jan. 1 was 35% stocks, 49% bonds, 15% cash and 1% mortgages.

The parent company is NBD Bancorp. Assets under management by the parent, subsidiaries and affiliates total $10 billion.

Theodore Libby, vice president, is chief investment officer.

Steve Hoffman, vice president, is client contact.

### NCM Capital Management Group Inc.

*2 Mutual Plaza, 501 Willard St., Durham, N.C. 27701-3642; (919) 688-0620*

| | |
|---|---|
| Total assets managed | $7,000,000 |
| Tax-exempt assets managed | $7,000,000 |
| Tax-exempt clients | 1 |
| Types of accounts managed | C |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 2 |

NCM Capital Management Group Inc. is an equity, fixed-income and balanced manager.

Its equity approach screens a large universe for low p/e stocks with earnings momentum, earnings surprise and quality to identify potential purchases.

In fixed income, it uses interest rate anticipation, sector shifts based on spreads and duration shifts based on expected changes in the yield curve.

All assets were in cash Jan. 1.

The parent company is North Carolina Mutual Life. Assets under management by the parent, subsidiaries and affiliates total $200 million.

M.K. Sloan, president and chief executive officer, is chief investment officer. John B. Mickle, vice president-marketing, is client contact.

### NCNB National Bank

*1 NCNB Plaza T09-1, Charlotte, N.C. 28255; (704) 374-8405*

| | |
|---|---|
| Total assets managed | $7,248,000,000 |
| Tax-exempt assets managed: | |
| Total | $3,479,000,000 |
| Commingled | $1,497,000,000 |
| Separate | $1,982,000,000 |
| Real estate assets managed | $575,000,000 |
| Mortgage-backed assets managed | $59,000,000 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 33 |
| Size of research staff | 8 |

NCNB National Bank is an equity, fixed-income, balanced and real estate manager.

Its equity approach uses Graham & Dodd analysis and sector rotation as it seeks value within stages of the economic cycle, emphasizing cash flow analysis in reorganization opportunities.

Its fixed-income approach focuses on duration relative to the Shearson index with value added by sector swaps and interest rate anticipation.

For real estate, it invests in commercial and industrial properties in the Southeast, with an emphasis on office and business parks leased to quality tenants.

The asset mix Jan. 1 was 28% stocks, 43% bonds, 10% cash, 17% equity real estate and 2% mortgage-backed securities.

Clients include Shell Oil, World Bank, Black & Decker and National Geographic.

Don Berdine, senior vice president, is chief investment officer. Mark S. Coltrin, vice president, is client contact.

### [illegible]son, Benson & Zellmer

*[illegible] Sherman St., Suite 100, Denver, Colo. 80203; (303) 778-6800*

| | |
|---|---|
| Total assets managed | $401,000,000 |
| Tax-exempt assets managed | $270,000,000 |
| Tax-exempt clients | 29 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 4 |

Nelson, Benson & Zellmer Inc. is an equity, fixed-income and balanced manager.

A bottom-up, growth stock manager, the firm stresses three elements of fundamental financial analysis: growth of earnings; return on equity; and quality of management.

Its fixed-income approach is passive, focusing on high quality and intermediate maturity.

The asset mix Jan. 1 was 80% stocks, 15% bonds and 5% cash.

W. Peterson Nelson, president, is chief investment officer. John A. Benson, executive vice president, is client contact.

### Nelson Capital Management

*525 University Ave., Suite 810, Palo Alto, Calif. 94306; (415) 326-0200*

| | |
|---|---|
| Total assets managed | $101,000,000 |
| Tax-exempt assets managed | $28,000,000 |
| 401(k) assets managed | $14,000,000 |
| Tax-exempt clients | 29 |
| Types of accounts managed | C |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 2 |

Nelson Capital Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach is top-down, using sector rotation and Graham & Dodd analysis.

Its fixed-income approach uses interest rate projections and emphasizes U.S. government securities.

Options are used.

The asset mix Jan. 1 was 40% stocks, 40% bonds and 20% cash.

There are four 401(k) clients.

Philip S. Nelson, president, is chief investment officer. Suanne M. Ramar, principal, is client contact.

### Neuberger and Berman

*522 Fifth Ave., New York, N.Y. 10036; (212) 790-9669*

| | |
|---|---|
| Total assets managed | $11,547,000,000 |
| Tax-exempt assets managed | $5,538,000,000 |
| Tax-exempt clients | 230 |
| Types of accounts managed | CEFG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 34 |
| Size of research staff | 12 |

Neuberger and Berman is an equity, fixed-income and balanced manager.

Its equity approach uses Graham & Dodd analysis, low p/e stocks, and sector rotation. It takes high cash positions in falling and indecisive markets, and high equity positions in rising markets.

It uses a zero to five-year maturity "market-oriented" fixed-income approach.

The asset mix Jan. 1 was 57.2% stocks, 24.4% bonds and 18.4% cash.

It follows 300 stocks closely and 800, generally; 80% of research is generated internally.

Clients include Baby Togs, Henry J. Kaiser Foundation, Price Waterhouse and United Technologies.

Richard A. Cantor, president, is chief investment officer. Robert R. McComsey, chief operating officer, is client contact.

### Newbold's Asset Management

*1500 Walnut St., Philadelphia, Pa. 19102; (215) 893-8167*

| Tax-exempt assets managed | |
| Total | $5,385,000,000 |
| Pooled accounts | $228,000,000 |
| Separate accounts | $21,000,000 |
| GICs | $2,457,000,000 |
| Annuities | $75,000,000 |
| Other | $2,604,000,000 |
| Real estate assets managed | $151,000,000 |
| Tax-exempt clients | 375 |
| Types of accounts managed | CEJG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 40 |
| Size of research staff | 60 |

The New England is an equity, fixed-income, balanced and real estate manager.

Its equity approach is characterized by sector rotation; a search for companies with the greatest potential for earnings surge; and a strong sell discipline. Usually, 20 to 30 issues are held.

Its fixed-income approach is based on interest rate anticipation and sector and credit analyses.

Options and fixed-income futures are used.

Real estate investments are handled by its affiliate, Copley Real Estate Advisors.

The separate accounts asset mix Jan. 1 was 31% stocks, 9% bonds, 7% cash and 3% mortgages.

Assets under management by The New England, its subsidiaries and affiliates total $37.27 billion.

Clients include Union Pacific, Pillsbury, Coca-Cola and Virginia.

Ralph F. Verni, executive vice president-finance, is chief investment officer. Kathleen R. Sammis, second vice president, is client contact.

### Newhard, Cook Advisory Services Inc.

*720 S. Colorado Blvd., Suite 170, Denver, Colo. 80222; (303) 753-9400 or (800) 852-0066*

### New York Life Insurance Co.

*51 Madison Ave., New York, N.Y. 10010; (212) 576-7416*

| | |
|---|---|
| Total assets managed | $29,035,000,000 |
| Tax-exempt assets managed: | |
| Total | $10,648,000,000 |
| Pooled accounts | $220,000,000 |
| GICs | $5,062,000,000 |
| Annuities | $1,372,000,000 |
| Other | $3,994,000,000 |
| Real estate assets managed | $32,000,000 |
| Tax-exempt clients | 529 |
| Types of accounts managed | CGJ |
| Minimum separate account | $5,000,000 |
| Size of research staff | 35 |

New York Life Insurance Co. is an equity, fixed-income, real estate, convertibles and money market manager.

Its equity approach primarily focuses on companies with earnings growth rates substantially above S&P 500. The firm searches for value equity in companies whose value is not reflected in stock price.

Its fixed-income approach combines partial market timing and an actively managed core to provide competitive returns that consistently exceed inflation. Buy/sell disciplines are heavily emphasized; sector analysis is employed.

Its real estate approach seeks capital appreciation and strong yield through a diversified portfolio.

The separate accounts asset mix Jan. 1 was 35.7% stocks, 28.7% bonds, 20.9% cash and 14.7% equity real estate.

There was $35 million in bond index funds. A total of $622 million in pooled separate accounts is managed by MacKay-Shields.

The parent company is New York Life. Total assets managed by the parent company, subsidiaries and affiliates are $33.3 billion.

William E. Keiter, executive vice president, is chief investment officer. Linda Livornese, assistant vice president, is client contact.

### Nicholas Co. Inc.

*700 N. Water St., Milwaukee, Wis. 53202; (414) 272-4650*

| | |

| Size of research staff | 4 |

Steven A. Noroian & Associates Inc. is an equity, fixed-income and balanced manager.

Its equity approach analyzes growth stocks with Graham & Dodd and employs market timing.

Its fixed-income approach uses interest rate anticipation and sector analysis, emphasizing maturity structure and quality ratings.

The asset mix Jan. 1 was 90% stocks, 5% bonds and 5% cash.

Steven A. Noroian, chairman, is chief investment officer. John R. Deller, senior vice president, is client contact.

### Norstar Investment Advisory Services Inc.

*45 East Ave., Rochester, N.Y. 14604; (716) 423-1900*

| | |
|---|---|
| Total assets managed | $1,600,000,000 |
| Tax-exempt assets managed: | |
| Total | $937,000,000 |
| Commingled | $180,000,000 |
| Separate | $757,000,000 |
| 401(k) and 457 assets managed | $60,000,000 |
| Tax-exempt clients: | |
| Commingled | 200 |
| Separate | 80 |
| Types of accounts managed | CEFJ |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 10 |
| Size of research staff | 1 |

Norstar Investment Advisory Services Inc. is an equity, fixed-income and balanced manager.

Its equity approach is to invest in quality companies whose stocks are temporarily out of favor. It looks for an advantage in these situations to include above-average yield, low p/e, low price to cash flow and low price to book.

Using interest rate anticipation, its fixed-income approach seeks advantages within sectors and between maturity ranges. It invests in sinking fund bonds, depressed convertibles, upgrade credit candidates, bonds of temporarily troubled nuclear utilities, extendible notes and floating-rate notes. It invests defensively.

The asset mix Jan. 1 was 60% stocks, 30% bonds and 10% cash.

There are four 401(k) clients.

The parent company is Norstar Bancorp Inc. Assets under management by the parent, subsidiaries and affiliates total $6.6 billion.

James A. Knauf Jr., president and chief executive officer, is chief investment officer and client contact.

### Norstar Trust Co.

*45 East Ave., Rochester, N.Y. 14604; (716) 546-9085*

AAT (Asset Allocation Tools) is a Lotus 1-2-3® based portfolio optimizing package. A complete analysis within AAT involves the following steps:

1. Select proxy asset classes (over 150 databases include monthly returns from January 1980 through December 1986, updates issued quarterly).
2. AAT computes historic statistics on risks, returns, and correlations and also determines the optimal portfolios for a variety of risk tolerances. Figure 1 displays positions on efficient frontier for various portfolios.
3. Review the Inputs (historic statistics). Revise the Inputs to better reflect future risks, returns, and correlations--and add information on investment objectives, contraints, transaction costs, and holdings. Review the Outputs (optimization results). Reprocess as needed.
4. New projection feature allows user to project results out to any horizon and compare to any target values. Figure 2 displays one of the projection graphs.

Its equity approach is based on growth stocks; its fixed-income approach, on sector analysis.

The asset mix Jan. 1 was 75% stocks, 18% bonds and 7% cash; $10 million was in foreign stocks.

There are 21 401(k) clients.

The bank follows 150 stocks closely and 400, generally.

BALCOR INSTITUTIONAL REALTY ADVISORS, INC.

BIRA on: Screening for Real Estate Investment Managers

When conducting your next search for a real estate investment manager, we suggest you ask your consultant to screen its data base for managers whose organizations...

...have generated a seven-year, since-inception annualized total return that beats the return of the FRC Property Index by at least 300 basis points per year.*

...manage total assets of more than $5 billion.

...manage a tax-exempt portfolio in excess of $1.5 billion.

...have been in business for at least 14 years.

...have a property management company dedicated to adding value.

...are experienced at buying, managing, and selling all types of property, including apartment communities.

...know when to make equity acquisitions and when to make mortgage investments with equity-participation features.

...have current investments in at least 39 states.

The list of managers who survive the screening process won't be long. But you'll find Balcor at the top.

For more information on Balcor Institutional Realty Advisors, Inc., and how we may be able to help you implement your real estate investment policy guidelines, call John West, Executive Vice President, at 312/676-6980.

Smart Thinking in Real Estate

*Information concerning the real estate achievements of The Balcor Company's investment programs that are primarily designed for pension funds can be obtained from Balcor Institutional Realty Advisors, Inc.

Balcor
An American Express company

Balcor Institutional Realty Advisors, Inc.
4849 Golf Road
Skokie, Illinois 60077

The parent company is Norwest Corp. Assets under management by the parent, subsidiaries and affiliates total $6.56 billion.

Clients include Meredith, Winnebago Industries, Metz Baking and Des Moines Teachers.

Al Ostebee, director of marketing, is client contact.

### Norwest Capital Resources

*8th and Marquette Avenue, Minneapolis, Minn. 55479; (612) 372-9493*

| | |
|---|---|
| Total assets managed | $4,060,000,000 |
| Tax-exempt assets managed: | |
| Total | $2,039,000,000 |
| Commingled | $761,000,000 |
| Separate | $1,278,000,000 |
| 401(k) and 457 assets managed | $700,000,000 |
| International assets managed | $11,000,000 |
| Tax-exempt clients: | |
| Commingled | 900 |
| Separate | 300 |
| Types of accounts managed | CEFJG |

| No. of portfolio managers | 11 |

Norwest Capital Resources is an equity, fixed-income and balanced manager.

Its equity approach is diversified with an emphasis on valuation. Quantitative analysis is used to identify growth and emerging growth stocks.

The fixed-income approach combines sector analysis with interest rate anticipation; high-quality issues are used.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 55% stocks and 45% bonds; $50 million was in equity index funds.

There are 460 401(k) and 457 clients.

The parent company is Norwest Corp. Assets under management by the parent, subsidiaries and affiliates total $6.56 billion.

John Caswell, president Norwest Investment Management Inc., is chief investment officer. David Bodine, vice president, is client contact.

### NSR Asset Management

*605 Third Ave., New York, N.Y. 10158; (212) 687-2200*

| | |
|---|---|
| Total assets managed | $159,000,000 |
| Tax-exempt assets managed | $159,000,000 |
| Mortgage-backed assets managed | $17,000,000 |
| Tax-exempt clients | 11 |
| Types of accounts managed | CE |
| Minimum separate account | $2,500,000 |
| No. of portfolio managers | 3 |

NSR Asset Management Corp. is an equity, fixed-income and balanced manager.

Its quantitative, low p/e equity approach uses Graham & Dodd analysis.

Its fixed-income approach uses sector analysis. Portfolio duration variation is modest — plus or minus 20% from the applicable index; sector weighting is up to two times the index. There is an orientation toward yield.

The asset mix Jan. 1 was 61.5% stocks, 16.7% bonds and 21.8% cash.

National Securities & Research Corp. is the parent. Assets under management by the parent, subsidiaries and affiliates total $3 billion.

William R. Sadler, president, is chief investment officer and client contact.

### NWQ Investment Management Co.

*606 S. Olive St., Suite 1410, Los Angeles, Calif. 90014; (213) 613-1053*

| | |
|---|---|
| Total assets managed | $814,000,000 |
| Tax-exempt assets managed | $671,000,000 |
| Tax-exempt clients | 122 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $2,000,000 |
| No. of portfolio managers | 6 |
| Size of research staff | 1 |

NWQ Investment Management Co. is an equity and balanced manager.

Its equity approach combines market timing with low p/e stocks with and above-average yield. Fixed-income instruments are used as equity substitutes when it is believed the risk/reward relationships are attractive and a meaningful opportunity to earn a return well above the coupon rate exists. Interest rate anticipation is used.

The asset mix Jan. 1 was 70% stocks, 15% bonds and 15% cash.

NWQ follows 100 stocks closely and 500, generally; 10% of research is generated internally.

Clients include Directors Guild of America, Unisys and the National Bulk Carriers.

David A. Polak, president and chief investment strategist, is chief investment officer. James P. Owen, executive vice president, is client contact.

## O

### Oakwood Counselors Inc.

*888 Seventh Ave., New York, N.Y. 10106; (212) 757-6495*

| | |
|---|---|
| Total assets managed | $56,000,000 |
| Tax-exempt assets managed | $16,000,000 |
| Tax-exempt clients | 25 |
| Types of accounts managed | F |
| Minimum separate account | $250,000 |
| No. of portfolio managers | 4 |

Oakwood Counselors Inc. is a balanced manager.

Its equity approach uses conceptual investing. It invests in the beneficiaries of secular trends taking place.

Its fixed-income approach anticipates credit spreads and interest rate curves to achieve greatest possible return within risk parameters.

The asset mix Jan. 1 was 52% stocks, 35% bonds and 13% cash.

Options and stock index futures are used.

Paul J. Sherman, president, is chief investment officer. Kenneth H. Mantel, vice president, and Ronda Brandes, treasurer, are client contacts.

### J.W. O'Connor & Co. Inc.

*200 Park Ave., New York, N.Y. 10166; (212) 687-7420*

| | |
|---|---|
| Total assets managed | $620,000,000 |
| Tax-exempt assets managed | $620,000,000 |
| Real estate assets managed | $254,000,000 |
| Tax-exempt clients | 11 |
| Types of accounts managed | CFG |
| Minimum separate account | $100,000,000 |

J.W. O'Connor & Co. Inc. is a real estate manager that invests in larger transactions with franchise characteristics, such as center city office buildings and regional shopping centers. It seeks intrinsic value in investments and focuses on physical quality, location, purchase price vs. replacement cost, current vs. market rents, cash-on-cash returns — and whether the potential exists to upgrade the property.

All assets were committed to equity real estate Jan. 1; $254 million was invested.

The parent company is J.W. O'Connor & Co. Inc. Total assets under management by the parent company, subsidiaries and affiliates are $1.2 billion.

Clients include AT&T, Kansas Employees, New York State Common Retirement Fund and Burlington Northern.

Jeremiah W. O'Connor Jr. is chief investment officer. B.G. Gifford, vice president, is client contact.

### Oechsle International Advisors

*260 Franklin St., Boston, Mass. 02110; (617) 439-6270*

| | |
|---|---|
| Total assets managed | $400,000,000 |
| Tax-exempt assets managed | $383,000,000 |
| International assets managed | $383,000,000 |
| Tax-exempt clients | 9 |
| Types of accounts managed | CEJG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 4 |

Oechsle International Advisors is an international manager.

Its equity approach emphasizes bottom-up stock selection, aggressive top-down country allocation and value orientation. The investment horizon is 18 to 24 months; portfolios are constructed with a limited number of holdings; and investments are managed in a minimum of eight and a maximum of 12 country markets.

The asset mix Jan. 1 was 95% international equities and 5% cash.

A total of 300 stocks are followed closely and 800, generally; 90% of research is generated internally.

Clients include U S WEST, San Francisco City & County Employees, International Paper and North American Philips.

Walter Oechsle, managing partner, is chief investment officer. Stephen P. Langer, partner, is client contact.

### O'Herron & Co. Inc.

*1300 St. Mary's St., Suite 210, Raleigh, N.C. 27605; (919) 834-9224*

| | |
|---|---|
| Total assets managed | $60,000,000 |
| Tax-exempt assets managed | $39,000,000 |
| Tax-exempt clients | 44 |
| Types of accounts managed | CEF |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

O'Herron & Co. Inc. is an equity and balanced manager.

Its equity approach uses Graham & Dodd analysis and focuses on value-oriented investments with relatively low p/e ratios and strong balance sheets. About 50% of equity investments are in companies in North and South Carolina.

Its fixed-income approach uses convertible bonds primarily, plus government securities of five years or less maturity.

The asset mix Jan. 1 was 70% stocks, 12% bonds and 18% cash.

Options are used.

The parent company is Foundation Investment Group.

James J. Green, president, is chief investment officer and client contact.

### Michael B. O'Higgins & Co.

*327 State St., Albany, N.Y. 12210; (518) 436-9731*

| | |
|---|---|
| Total assets managed | $136,000,000 |
| Tax-exempt assets managed | $124,000,000 |
| Tax-exempt clients | 80 |
| Types of accounts managed | CEF |
| Minimum separate account | $250,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 2 |

Michael B. O'Higgins & Co. is an equity manager.

Its equity approach uses sector rotation, combining low risk and high returns by using a group of large-cap stocks. It constantly compares these stocks to one another on a relative-strength basis to identify investment opportunities.

The asset mix Jan. 1 was 80% stocks and 20% cash.

Clients include Navistar, Skidmore College, American Subcontractors and Camp Dudley YMCA Endowment.

Michael B. O'Higgins is chief investment officer. George B. Chelius III, partner-marketing, is client contact.

### The Ohio Co.

*155 E. Broad St., Columbus, Ohio 43215; (614) 464-5548*

| | |
|---|---|
| Total assets managed | $365,000,000 |
| Tax-exempt assets managed | $311,000,000 |
| Tax-exempt clients | 68 |
| Types of accounts managed | CEFJ |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 5 |
| Size of research staff | 4 |

The Ohio Co. is an equity, fixed-income and balanced manager.

Its equity approach buys stock with long-term track records of earnings and dividend growth, superior return-on-equity trends, priced at a 15% to 20% discount to the S&P 500 multiple.

Its fixed-income approach uses interest rate anticipation. Managers are defensive, buying only AAA-rated, government or government-backed securities with average maturities of five to seven years.

The asset mix Jan. 1 was 60% stocks, 30% bonds and 10% cash.

The parent company is The Ohio Co. Total assets under management by the parent company, subsidiaries and affiliates exceed $1 billion.

C.A. Peterson, executive vice president, is chief investment officer. Sam J. Vogel, business development officer, is client contact.

### Old Kent Bank and Trust

*1 Vandenberg Center, Grand Rapids, Mich. 49503; (616) 774-5893*

| | |
|---|---|
| Total assets managed | $3,615,000,000 |
| Tax-exempt assets managed: | |
| Total | $1,266,000,000 |
| Commingled | $565,000,000 |
| Separate | $701,000,000 |
| 401(k) and 457 assets managed | $20,000,000 |

| Commingled | 824 |
| Separate | 39 |
| Types of accounts managed | CEFG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 7 |
| Size of research staff | 7 |

Old Kent Bank and Trust Co. is an equity, fixed-income, balanced and real estate manager.

Its equity approach uses a fundamentalist, quality and value-oriented, bottom-up method.

Its fixed-income approach uses interest rate anticipation and sector analysis, emphasizing quality and the use of intermediate bonds to capture the bulk of long yields while avoiding the volatility of long bonds.

In real estate, it selects open-end portfolios managed by others with an emphasis on equity investment in properties outside the Midwest.

The asset mix Jan. 1 was 23% stocks, 65% bonds, 10% cash and 2% equity real estate.

There are 15 401(k) and 457 clients.

The parent company is Old Kent Financial Corp. Total assets managed by the parent company, subsidiaries and affiliates are $4.4 billion.

Mark Johnson, vice president, is chief investment officer. Gary L. Church, vice president, is client contact.

### Olympic Capital Management Inc.

*3008 Rainier Tower, Seattle, Wash. 98101; (206) 447-9399*

| | |
|---|---|
| Total assets managed | $1,700,000,000 |
| Tax-exempt assets managed | $1,640,000,000 |
| Tax-exempt clients | 62 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $20,000,000 |
| No. of portfolio managers | 5 |

Olympic Capital Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses sector rotation and Graham & Dodd analysis.

Its fixed-income approach uses interest rate anticipation and sector analysis.

The asset mix Jan. 1 was 42% stocks, 42% bonds and 16% cash.

Options are used.

It follows 200 stocks closely and 1,000, generally; 20% of research is generated internally.

The parent company is United Asset Management. The total assets managed by the parent company, subsidiaries and affiliates are $17.824 billion.

Clients include Boeing, Pacific Gas & Electric, Oregon and United Methodist Church.

John S. Crowl, principal, is chief investment officer. Burton K. Carr III, principal, is client contact.

### One Federal Asset Management Inc.

*1 Federal St., Boston, Mass. 02211; (617) 292-3886*

| | |
|---|---|
| Total assets managed | $1,566,000,000 |
| Tax-exempt assets managed | $1,000,000,000 |
| Tax-exempt clients | 20 |
| Types of accounts managed | CFJG |
| Minimum separate account | $3,000,000 |
| No. of portfolio managers | 9 |
| Size of research staff | 2 |

One Federal Asset Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses a bottom-up, fundamental stock selection process.

Its fixed-income approach uses risk-controlled active bond management to establish a benchmark to meet client objectives. Portfolios are actively managed around the benchmark.

The asset mix Jan. 1 was 26% stocks, 38% bonds and 36% cash.

It follows 110 stocks closely.

The parent company is Shawmut Corp. The assets under management by the parent company, subsidiaries and affiliates are $4.176 billion.

Thomas B. Brown is chief investment officer. Thomas J. O'Donnell, Albert R. Vandam and George M. Trefeison, vice presidents, are client contacts.

### Oppenheimer Capital Corp.

*Oppenheimer Tower, World Financial Center, New York, N.Y. 10281; (212) 667-7512*

| | |
|---|---|
| Total assets managed | $10,241,000,000 |
| Tax-exempt assets managed | $9,865,000,000 |
| 401(k) assets managed | $4,000,000 |
| Mortgage-backed assets managed | $150,000,000 |
| International assets managed | $145,000,000 |
| Tax-exempt clients | 269 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 18 |
| Size of research staff | 5 |

Oppenheimer Capital Corp. is an equity, fixed-income and balanced manager.

Its equity approach analyzes elements of value that include business segments, undedicated cash flow and hidden assets. Asset allocation is determined by analyzing financial liquidity and levels of market valuation.

Its fixed-income approach is to identify relative value as it applies to sectors of the bond market and maturity structure.

The asset mix Jan. 1 was 63% stocks, 12% bonds, 13% cash and 12% options and futures.

There was $145 million in foreign stocks and $125 million in dedicated or immunized bond portfolios.

There are two 401(k) clients. Options and stock index futures are used.

The parent company is Oppenheimer Financial Corp. The parent, subsidiaries and affiliates had a total of $10.241 billion under management.

George A. Long is chief investment officer. Frank P.L. Minard, managing director, is client contact.

### The Options Group

Pacific Financial Cos. is an equity, fixed-income, balanced and real estate manager.

Its equity approach offers a selection of active and passive equity styles to provide clients with options suitable for a broad spectrum of investment needs.

Its fixed-income approach is active, emphasizing high-yield, low-grade securities and interest rate anticipation. Performance objectives and guidelines are tailored to client specifications.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 28% stocks, 32% bonds, 25% cash, 13% mortgage-backed securities and .2% venture capital; $4 million was in foreign stocks, $5 million in foreign bonds and $19 million in equity index funds.

The parent company is Pacific Mutual Life Insurance Co. Assets under management by the parent, subsidiaries and affiliates total $18.49 billion.

William Cvengros, executive vice president, is chief investment officer. Robert E. Southard, managing director of PM Capital Advisors, is client contact.

## Pacific Financial Research

*9601 Wilshire Blvd., Suite 828, Beverly Hills, Calif. 90210; (213) 278-4461*

| | |
|---|---|
| Total assets managed | $1,597,000,000 |
| Tax-exempt assets managed | $1,363,000,000 |
| Tax-exempt clients | 47 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $25,000,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 3 |

Pacific Financial Research is an equity, fixed-income, balanced and South Africa-free manager.

Its equity approach uses Graham & Dodd analysis with low p/e securities in a value-oriented approach with a contrarian bent.

Its fixed-income approach views bonds as equity substitutes and buys them when bonds are cheaper than stocks. Portfolios are structured to capture the value gap between stocks and bonds.

The asset mix Jan. 1 was 49% stocks, 29% bonds and 22% cash.

It follows 700 stocks closely and 2,000, generally; 95% of the research is generated internally.

Clients include Litton, FMC, Lockheed and Grinnell College.

James H. Gipson, president, is chief investment officer and client contact.

## Pacific Investment Management Co.

*840 Newport Center Drive, Suite 360, Newport Beach, Calif. 92660; (714) 640-3031*

| | |
|---|---|
| Total assets managed | $12,349,000,000 |
| Tax-exempt assets managed | $12,277,000,000 |
| Mortgage-backed assets managed | $2,470,000,000 |
| Tax-exempt clients | 82 |
| Types of accounts managed | CEFJG |
| No. of portfolio managers | 7 |
| Size of research staff | 1 |

Pacific Investment Management Co. is an equity, fixed-income and balanced manager.

Its equity approach is contrarian, using quantitative techniques and large-cap growth stocks. It focuses, through its valuation methodology, on seasoned, high-quality companies with consistent above-average earnings growth.

In fixed income, it is an active manager seeking value across the entire bond market by incorporating a secular and cyclical outlook in executing strategies.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 3% stocks, 56% bonds, 21% cash and 20% mortgage-backed securities.

The parent company is Pacific Financial Cos., a unit of Pacific Mutual Life Insurance. Assets under management by the parent, subsidiaries and affiliates total $18.49 billion.

Clients include AT&T, 3M, Illinois Teachers and Southern California Retail Clerks.

James F. Muzzy, managing director, is client contact.

## Palley-Needelman Asset Management Inc.

*1501 Quail St., Suite 110, Newport Beach, Calif. 92660; (714) 752-2233*

| | |
|---|---|
| Total assets managed | $105,000,000 |
| Tax-exempt assets managed | $47,000,000 |
| Tax-exempt clients | 42 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 1 |

Palley-Needelman Asset Management Inc. is an equity and balanced manager.

Its equity approach is to purchase low p/e, high-yield, low-beta, strong balance sheet issues with positive free cash flow and stable industry characteristics. It uses bottom-up security selection and top-down asset allocation.

In fixed income it is a duration manager, using short to intermediate government and high-grade corporate securities clustered around a target maturity date.

The asset mix Jan. 1 was 60% stocks, 35% bonds and 5% cash.

Roger B. Palley, president, is chief investment officer. Steven M. Borowski, director of investment services/marketing, is client contact.

## Palm Beach Capital Management Inc.

*151 Royal Palm Way, Palm Beach, Fla. 33480; (305) 820-1066*

| | |
|---|---|
| Total assets managed | $322,000,000 |
| Tax-exempt assets managed | $14,000,000 |

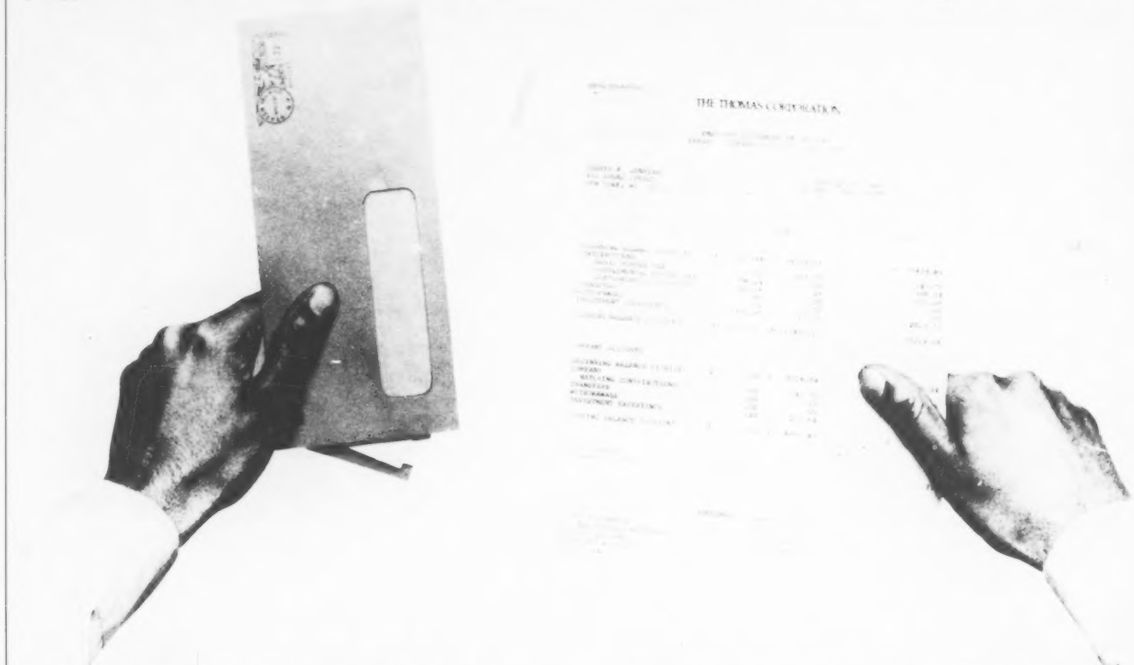
| Tax-exempt clients | 10 |
| Types of accounts managed | CEG |
| Minimum separate account | $1,000,000 |

*ImpleFacts—The Defined Contribution Administration System*

# Tax reform. Two major plans. 20,000 participants. But Joe Jenkins still gets his statement on time, every time.



Joe Jenkins has no idea how difficult it is to administer defined contribution plans. He doesn't worry about tax reform, or legal and regulatory changes that complicate an already complex problem. All he knows is that he always gets his statement on time.

Joe works for a large company that uses ImpleFacts to administer a defined contribution program with two major plans and 20,000 participants. Even the far-reaching effects of the new tax laws were taken in stride by this comprehensive software system from Erisco.

Not only do all 20,000 participants get checks and statements on time. Thanks to ImpleFacts' custom output generator, management quickly gets what's needed, with no special programming. This unique feature merges information from many sources, such as payroll, benefits, plan rules and participant accounts. Administrators can format and generate ad hoc reports, group summaries for example, by defining criteria online. They can amend plan changes online, or create reminders such as upcoming fund elections to be included as payroll stuffers. And they can design inquiry screens to simplify and speed responses to participants' questions.

With a unique option named FactsLine, participants can get routine account information via Touch-tone phone almost any time. It can cut administrative time and costs while improving service.

Since its introduction in 1972, the long-term benefits of ImpleFacts have been amply proved. The system's adaptability lets us make revisions and add enhancements when necessary. Its flexibility enables ImpleFacts to handle requirements ranging from 401(k)s, ESOPs and savings plans to loan recordkeeping and tax reporting.

Are you a large organization with a defined contribution plan? If so, we'd like to show you how ImpleFacts' timely, accurate recordkeeping can help you respond more quickly to participants, make payments faster and manage your plans more effectively.

To learn more about ImpleFacts or other Erisco benefits software, call or write the Sales Department at Erisco, 1700 Broadway, NY, NY 10019, (212) 765-8500.

IMPLEFACTS

*Erisco—The benefits of information*

Erisco

a company of The Dun & Bradstreet Corporation

The Palmieri Co. is a real estate manager.

Its real estate approach is active management of turnaround situations.

The asset mix Jan. 1 was 33% cash, 37% equity real estate and 30% mortgages.

There was $110 million in equity real estate and $90 million in mortgages.

John A. Koskinen, president, is chief investment officer and client contact.

| Minimum separate account | $250,000 |
| No. of portfolio managers | 1 |

Platner & Associates is an equity and balanced manager.

Its equity approach uses emerging growth and growth stocks and sector rotation. Fundamental analysis underscores stock selection, with an emphasis on asset allocation into various sectors as market conditions and attitudes change.

Its fixed-income approach uses interest rate anticipation, emphasizing high-quality and diversified securities with maturities in the intermediate range.

Options are used.

The asset mix Jan. 1 was 60% stocks, 25% bonds, 10% cash, 2% equity real estate and 3% international.

Robert F. Platner is chief investment officer and client contact.

## Plexus Group

*606 Wilshire Blvd, Suite 200, Santa Monica, Calif. 90401; (213) 451-5075*

| | |
|---|---|
| Total assets managed | $0 |
| Tax-exempt assets managed | $0 |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 2 |

Plexus Group is an equity, fixed-income, balanced and international manager.

It uses quantitative and mechanical processes to create customized passive and active portfolios in equity and fixed-income management.

Active equity approaches include low p/e stocks, some growth and emerging growth stocks, and some use of Graham & Dodd analysis. It provides risk-control portfolios and originated the Transitional Manager to reduce the cost of moving large portfolios during manager and other changes. Stock index futures and fixed-income futures are used.

Wayne H. Wagner is partner and chief investment officer. Edward C. Story, partner-client communications, is client contact.

## PM Portfolio Management

*Friedrichstrasse 9, 8000 Munich 40, West Germany; (89) 30-20-36*

The Principal is an equity, fixed-income, balanced and real estate manager.

Its top-down, value-oriented equity approach is determined by relating current price to estimated future return on net worth.

Its fixed-income approach is fundamental, using both public and private markets and focusing on interest rates, credit risk, maturities and terms.

Its real estate approach emphasizes newly constructed, fully leased buildings of less than $15 million. It focuses on low leverage with national diversification.

The separate accounts asset mix Jan. 1 was 75% stocks, 16% cash, 2% equity real estate, 4% mortgages and 3% private placements.

There are 2,304 401(k) and 457 plan clients.

It follows 500 stocks closely and 3,000, generally; 98% of research is generated internally.

The parent company is Principal Mutual Life Insurance Co. Assets under management by the parent, subsidiaries and affiliates total $17.89 billion.

Clients include Federal Mogul, Lubrizol and Boehringer-Ingleheim.

Roy Ehrle, executive vice president, is chief investment officer. F. Doug Rasmussen, director-pension investment services, is client contact.

### Professional Investment Counsel Inc.

*310 N. Mesa No. 200, El Paso, Texas 79901; (915) 532-3987*

| | |
|---|---|
| Total assets managed | $92,000,000 |
| Tax-exempt assets managed | $40,000,000 |
| 401(k) assets managed | $2,000,000 |
| Tax-exempt clients | 38 |
| Types of accounts managed | cCEFG |
| Minimum separate account | $50,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 3 |

Professional Investment Counsel Inc. is an equity, fixed-income and balanced manager.

Its equity approach is quantitative, using market timing and sector rotation, buying growth stocks with a lower than average p/e. Inflation determines money movement and sector/industry allocation.

In its fixed-income approach, inflation mostly determines interest rates.

The asset mix Jan. 1 was 60% stocks, 30% bonds, 10%O?cash.

There are 2 401(k) clients.

Harry J. Stone, president is chief investment officer and client contact.

### Property Capital Associates

*200 Clarendon St., 47th Floor, Boston, Mass. 02116; (617) 536-8600*

| | |
|---|---|
| Total assets managed | $625,000,000 |
| Tax-exempt assets managed | $535,000,000 |
| Real estate assets managed | $535,000,000 |
| Tax-exempt clients | 50 |
| Types of accounts managed | CEFG |
| Minimum separate account | $1,000,000 |

Property Capital Associates is a real estate manager.

Its real estate approach is investing selectively in major income-producing properties nationwide. It seeks relatively high yields and inflation protection through increases in current returns and long-term capital values.

All assets Jan. 1 were in real estate equity.

Clients include Allied-Signal, Eastman Kodak, Harvard University and Maine State Retirement.

Anthony D. Fox, senior vice president, is chief investment officer. Thomas J. Mizo, vice president, is client contact.

### The Providence Group Investment Advisory Co.

*500 Turks Head Building, Providence, R.I. 02903; (401) 331-6250*

| | |
|---|---|
| Total assets managed | $180,000,000 |
| Tax-exempt assets managed | $54,000,000 |
| Tax-exempt clients | 80 |
| Types of accounts managed | C |
| Minimum separate account | $200,000 |
| No. of portfolio managers | 4 |

The Providence Group Investment Advisory Co. is a balanced manager.

Its equity approach stresses growth stocks of companies that dominate their industry or are gaining market share.

Its fixed-income approach uses interest rate anticipation and sector analysis. Its selects bonds for minimum volatility and risk, while providing a high level of stable income. This approach leads to high-quality short to intermediate bonds.

The asset mix Jan. 1 was 35% stocks, 60% bonds and 5% cash.

Robert F. Hall and Robert E. Washburn, principals, are chief investment officers. Edwin W. Johnson, vice president, is client contact.

No. of portfolio managers ..... 38
Size of research staff ..... 37

The Putnam Cos. is an equity, fixed-income, balanced, international, GIC and convertible manager.

Its equity approach uses Graham & Dodd analysis with growth, emerging growth and low p/e stocks. It offers three strategies: quality growth focuses on large-cap stocks with dividend and earning growth superior to future market trends; specialty equity concentrates on medium-cap companies with rapid earnings growth; basic value seeks undervalued companies with earnings and dividend growth rates equal to the market and an above-market yield.

Its fixed-income approach is passive, emphasizing interest rate anticipation and sector analysis. Its disciplines are structured bonds, traditional rate anticipation, high yield and tax exempt.

The asset mix Jan. 1 was 38.6% stocks, 47.8% bonds, 8.6% cash and 5% mortgage-backed securities.

There was $375 million in foreign stocks, $54 million in bond index funds and $2.134 billion in dedicated/immunized bond portfolios.

Options, stock index futures and fixed-income futures are used.

Chief investment officers are Francis H.M. Kelly, equities; Alan J. Bankart, fixed income; and Anthony W. Regan, international. Elliott M. Gartner, senior managing director, is client contact.

# One reason we're $3 billion strong.

Managing investments for endowed chairs and other university funds is something we do extremely well. It's one of the reasons why Trusco Capital Management now manages more than $3 billion in assets for a diversity of clients. Not only educational institutions, but corporate pension and profit-sharing plans, foundations and insurance companies as well.

As a core investment manager, we meet our clients' equity, fixed income, or balanced portfolio needs through our disciplined investment process. And we offer continuity. Our senior investment professionals have worked together for an average of 18 years.

Add up these qualifications, and you'll be quick to see why we manage money for a lot of chairmen. Write for our brochure or call Bob Farmer, Vice President, at 404-581-1757.

| Types of accounts managed | CEF |
| Minimum separate account | $20,000,000 |
| No. of portfolio managers | 5 |

Reich & Tang Inc. is an equity and money market mutual fund manager.

Its equity approach emphasizes growth and low p/e stocks, looking for companies with a discount valuation and above-average prospective growth.

The asset mix Jan. 1 was 84% stocks, 1% bonds and 15% cash.

It follows 75 stocks closely and 150, generally; all research is generated internally.

Clients include RJR Nabisco, General Mills and the Henry J. Kaiser Foundation.

Robert R. Hoerle is chief investment officer.

### Reimer and Koger Associates Inc.

*8500 W. 63rd St., Suite 105, Shawnee Mission, Kan. 66202; (913) 236-6700*

| | |
|---|---|
| Total assets managed | $886,000,000 |
| Tax-exempt assets managed | $764,000,000 |
| Tax-exempt clients | 35 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 6 |

Reimer and Koger Associates Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses growth and emerging growth stocks, sector rotation and market timing, rotating by themes developed along perceived economic changes.

Issues are selected for purchase and sale by quantitatively screening 100 issues.

Its fixed-income approach uses interest rate anticipation, utilizing a duration-based discipline that seeks higher-than-market returns with market risk or less.

The asset mix Jan. 1 was 36% stocks, 43% bonds and 21% cash.

Options, stock index futures and fixed-income futures are used.

Ronald C. Reimer, managing director, is chief investment officer. Thomas J. Bash, managing director, is client contact.

### Reiser-Builder Inc.

*7 Piedmont Center, Suite 721, Atlanta, Ga. 30305; (404) 876-2840*

| | |
|---|---|
| Total assets managed | $68,000,000 |
| Tax-exempt assets managed | $40,000,000 |
| Tax-exempt clients | 29 |
| Types of accounts managed | CEJ |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 2 |

Reiser-Builder Inc. is an equity, balanced and options manager.

Its equity approach focuses on companies with a high return on capital and positive earnings momentum. Its fixed-income approach is passive. Options and fixed-income futures are used.

The asset mix Jan. 1 was 55% stocks, 32% bonds and 13% cash.

It follows 225 stocks closely and 400 to 500, generally; all research in generated internally.

Clients include Daniel International, South Carolina Fireman's Association, Equifax and Powell Goldstein.

Robert E. Reiser is chief investment officer. Frank W. Draper is client contact.

### N. Reitenbach & Co. Inc.

*485 Fifth Ave., Suite 1042, New York, N.Y. 10017; (212) 661-2400*

|---|---|
| Total assets managed | $10,000,000 |
| Total tax-exempt assets | $0 |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 2 |

N. Reitenbach & Co. Inc. is an international manager.

Its equity approach is to invest in unique and rapidly growing companies in overseas markets. Moderate to low p/e ratios are selected.

Its fixed-income approach utilizes interest rate anticipation and currency trends.

It follows 50 stocks closely and 250, generally; half the research is generated internally.

Nicholas Reitenbach is chief investment officer and client contact.

### Renaissance Investment Management Inc.

*3006 Vernon Place, Cincinnati, Ohio 45219; (513) 281-9800*

| | |
|---|---|
| Total assets managed | $950,000,000 |
| Tax-exempt assets managed | $796,000,000 |
| 401(k) assets managed | $3,000,000 |
| Tax-exempt clients | 123 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 8 |
| Size of research staff | 1 |

Renaissance Investment Management Inc. is an equity, fixed-income and balanced manager.

The firm employs a proprietary computer-based asset allocation decision-making model to objectively determine the relative attractiveness of cash equivalents, bonds and equities. Large capitalization, readily marketable securities are stressed.

Its fixed-income approach is disciplined and quantitative, focusing on moving average analysis and spread relationships. Managers adjust portfolio allocation between government bonds and Treasury bills.

The asset mix Jan. 1 was 90% stocks, 7% bonds and 3% cash.

Clients include J.M. Smucker, Kroger and Taft Broadcasting.

Frank W. Terrizzi, managing director, is chief investment officer and client contact.

### Daniel H. Renberg and Associates Inc.

*8383 Wilshire Blvd., Suite 926, Beverly Hills, Calif. 90211; (213) 852-0800*

| | |
|---|---|
| Total assets managed | $158,000,000 |
| Tax-exempt assets managed | $82,000,000 |
| International assets managed | $11,000,000 |
| Tax-exempt clients | 39 |
| Types of accounts managed | CEF |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 1 |

Daniel H. Renberg and Associates Inc. is an equity and balanced manager. The equity approach emphasizes growth, emerging growth and low p/e stocks, and special situations. The firm specializes in relative value equity; the approach is long-term fundamentally oriented. Convertible securities are used.

The asset mix Jan. 1 was 87% stocks, 8% bonds and 5% cash.

There was $11 million in foreign stocks. Options are used.

Daniel H. Renberg, president, is chief investment officer. Clay J. Stratton, vice president, is client contact.

*H. Edward Anderson*

### RepublicBank Dallas

*P.O. Box 241, Dallas, Texas 75221; (214) 922-6506*

| | |
|---|---|
| Total assets managed | $8,554,000,000 |
| Tax-exempt assets managed: | |
| Total | $5,719,000,000 |
| Commingled | $666,000,000 |
| Separate | $5,053,000,000 |
| Real estate assets managed | $41,000,000 |
| International assets managed | $24,000,000 |
| Tax-exempt clients | 2,210 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $3,000,000 |
| No. of portfolio managers | 15 |
| Size of research staff | 5 |

RepublicBank Dallas offers equity, fixed-income, balanced, real estate, international, index, venture capital, energy and aggressive cash management.

Its equity approach seeks inefficiently priced growth-potential stocks by using systematic research identifying companies with low p/e, lower-than-market price-to-book value and higher-than-market current yields.

Its fixed-income approach uses sector analysis and high yield, taking advantage of market inefficiencies and using yield bonds sector selection. It is an active manager, using credit research and swapping to provide incremental return vs. a selected market standard index.

Its real estate approach is active, concentrating on properties with long-term growth and stability to achieve diversification.

The asset mix Jan. 1 was 51% stocks, 47% bonds, 0.9% cash, 0.7% equity real estate and 0.4% international stocks.

There was $41 million in equity real estate, $24 million in foreign stocks, $410 million in equity index funds and $50 million in bond index funds.

Options, stock index futures and fixed-income futures are used.

H. Edward Anderson, senior vice president, is chief investment officer. David J. Pittman, senior vice president and director-trust corporate marketing, is client contact.

### Resource Capital Advisers

*222 E. Mason St., Milwaukee, Wis. 53202; (414) 271-8008*

| | |
|---|---|
| Total assets managed | $260,000,000 |
| Tax-exempt assets managed | $240,000,000 |
| Tax-exempt clients | 60 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $1,500,000 |
| No. of portfolio managers | 4 |

Resource Capital Advisers Inc. is an equity, fixed-income, and balanced manager.

Its equity approach employs Graham & Dodd analysis, believing stock selection and price sensitivity — low relative p/es — are the principal factors in above-average long-term investment performance. Expertise is in value stock selection through a bottom up approach.

The asset mix Jan. 1 was 90% stocks and 10% cash.

William E. Fritz, president, is chief investment officer. Gary G. Wagner, executive vice president, is client contact.

## Retirement System for Savings Institutions

*41 E. 42nd St., New York, N.Y. 10017; (212) 867-8950*

| | |
|---|---|
| Total assets managed | $555,000,000 |
| Tax-exempt assets managed | $555,000,000 |
| 401(k) assets managed | $6,000,000 |
| Real estate assets managed | $1,000,000 |
| Mortgage-backed assets managed | $50,000,000 |
| International assets managed | $26,000,000 |
| Tax-exempt clients | 102 |
| No. of portfolio managers | 9 |
| Size of research staff | 4 |

Retirement System for Savings Institutions is an equity, fixed-income, balanced and international manager.

Its equity approach uses Graham & Dodd analysis with emerging growth and low p/e stocks, sector rotation and market timing, taking a multifaceted and diversified approach to equities.

Its fixed-income approach concentrates on credit review to anticipate changes in quality rating and diversification. Mortgage-backed securities are used when spreads are attractive.

The asset mix Jan. 1 was 40.9% stocks, 30.1% bonds, 18.2% cash, 0.1% mortgages, 8.9% mortgage-backed securities and 1.8% other assets and liabilities.

James P. Coughlin, senior vice president, is chief investment officer. Diane H. Dudzinski, first vice president, is client contact.

## Rice, Hall, James & Associates

*1200 Third Ave. No. 1600, San Diego, Calif. 92101; (619) 239-9005*

| | |
|---|---|
| Total assets managed | $650,000,000 |
| Tax-exempt assets managed | $490,000,000 |
| Tax-exempt clients | 55 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 7 |
| Size of research staff | 3 |

Rice, Hall, James & Associates is an equity, fixed-income and balanced manager.

Its equity approach attempts to identify unrecognized values with high-quality earnings and strong balance sheets. It emphasizes long-term fundamental value and good potential for earnings and dividend growth.

Its fixed-income approach is protective and emphasizes the use of short and intermediate Treasuries.

The asset mix Jan. 1 was 75% stocks, 15% bonds and 10% cash.

It follows 100 stocks closely and 200, generally; 25% of research is generated internally.

Louis E. Rice, president, is chief investment officer. Walter H. Beck, senior vice president, is client contact.

## T.W. Richardson & Co.

*100 Pine St., Suite 1275, San Francisco, Calif. 94111; (415) 391-2880*

| | |
|---|---|
| Total assets managed | $5,000,000 |
| Tax-exempt assets managed | $0 |
| Minimum separate account | $5,000,000 |

T.W. Richardson & Co. is a real estate manager.

It does industrial and office land development and building management for its accounts and for controlled partnerships. It also does development consulting for corporate and tax-exempt accounts.

Thomas W. Richardson is chief investment officer and client contact.

## The Riggs National Bank of Washington, D.C.

*808 17th St. N.W., Washington, D.C. 20006; (202) 835-6000*

| | |
|---|---|
| Total assets managed | $2,000,000,000 |
| Tax-exempt assets managed: | |
| Total | $800,000,000 |
| Commingled | $150,000,000 |
| Separate | $650,000,000 |
| 401(k) and 457 assets managed | $6,000,000 |
| Tax-exempt clients: | |
| Commingled | 700 |
| Separate | 3,000 |
| Types of accounts managed | CEFGJ |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 18 |
| Size of research staff | 3 |

The Riggs National Bank of Washington, D.C., is an equity, fixed-income and balanced manager.

Its equity approach emphasizes low p/e equities with an above-average dividend yield. Rotation depends upon business cycle; a nearly fully invested position is maintained.

Its fixed-income approach maintains a core position in intermediate bonds, with emphasis on short or long end depending upon expectation for interest rate movement.

The asset mix Jan. 1 was 40% stocks, 50% bonds and 10% cash.

There are 10 401(k) and 457 savings plans clients.

The parent company is Riggs National Corp. Total assets under management by the parent company, subsidiaries and affiliates are $2 billion.

Charles S. Plumb is chief investment officer and client contact.

## Rittenhouse Financial Services Inc.

*225 S. 18th St., Philadelphia, Pa. 19103; (215) 735-1225*

| | |
|---|---|
| Total assets managed | $350,000,000 |
| Tax-exempt assets managed | $158,000,000 |
| 401(k) assets managed | $5,000,000 |
| Tax-exempt clients | 72 |
| Types of accounts managed | CEF |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 6 |

Rittenhouse Financial Services Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses Graham & Dodd principles. The firm tries to find value in high-quality, large-cap stocks. Stocks are held two to five years until an overvaluation occurs.

Its fixed-income approach is passive, using an interest rate hedge. The firm buys maturities out to 10 years only and staggers maturities.

The asset mix Jan. 1 was 70% stocks, 25% bonds and 5% cash.

The parent company is Rittenhouse Financial Services Inc.

James S. Morgan is chief investment officer. Bernard A. Francis is client contact.

## RNC Capital Management

*11601 Wilshire Blvd., 25th Floor, Los Angeles, Calif. 90025; (213) 477-6543*

| Minimum separate account | $3,000,000 |
| No. of portfolio managers | 4 |

Roanoke Asset Management is an equity and balanced manager.

Its equity approach uses opportunistic growth and Graham & Dodd principles. The firm is a bottom-up stock selector focusing on companies and/or industries undergoing a positive fundamental change or improvement.

The asset mix Jan. 1 was 90% stocks and 10% cash.

It follows 45 stocks closely; 65% to 70% of research is generated internally.

Clients include Florida Power & Light, Connecticut, Blue Cross/Blue Shield and Boeing.

Edwin Vroom, president, is chief investment officer. Martin W. Lynn, prin-

# We don't react at the drop of an interest rate.

Successful investing depends a lot more upon how well you react to market changes than upon how quickly.

This is not to say that we don't change as conditions change. We do. We just don't believe that something as important as your retirement fund portfolio should be altered by short term factors.

Our goal is to deliver long term growth through equity investments and prudent portfolio balance through sound fixed-income management. We believe we're uniquely qualified to meet these objectives.

Because at David L. Babson & Company, we have a very simple philosophy: the best way to achieve investment success is to start with the best people. And then give them the resources and the power to make decisions. Informed decisions.

How do we attract and keep the best people? By giving them the opportunity to literally be a part of the company. Our company is owned by the active members of the professional staff, none of whom own as much as 15% of the stock.

The result of having top-quality people is being able to create top-quality, low-risk, growth investments and fixed-income portfolios.

For example, we offer real estate investments that are an excellent way to diversify your retirement fund portfolio. Choose from a closed-end pooled fund or from separate investments. In either case, the goal is low-risk growth.

We also offer separately managed portfolios (similar to the Babson Enterprise Fund) of companies with small market capitalizations. These are companies that fill a niche in their particular industry. Companies in which management holds a large stake. Companies that we believe can help you meet your investment goals because we have thoroughly researched them in house.

So if you're looking for sound investments with limited risk for your retirement fund portfolio, consider David L. Babson. Because good performance depends on good planning. And you can't develop a plan without solid investment decisions.

For more information about what we can do for you, call Peter Thompson, President, at (617) 723-7540. Or write: David L. Babson & Company, Inc., One Boston Place, Boston, MA 02108.

### Robshaw & Cheskin Associates Inc.

*6245 Sheridan Drive, Suite 218, Amherst, N.Y. 14221; (716) 633-6555*

| | |
|---|---|
| Total assets managed | $74,000,000 |
| Tax-exempt assets managed | $41,000,000 |
| Tax-exempt clients | 35 |
| Types of accounts managed | CEFJ |
| Minimum separate account | $300,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 3 |

Robshaw & Cheskin Associates Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses Graham & Dodd principles to screen growth and emerging growth stocks, making a fundamental search for superior long-term appreciation potential among investment alternatives.

Its fixed-income approach is based on analysis of sectors, ratings and maturities, using the yield curve and anticipating shifts in the curve.

The asset mix Jan. 1 was 75% stocks, 15% bonds and 10% cash.

Stephen R. Robshaw and Alan E. Cheskin are chief investment officers. Mr. Cheskin is client contact.

### Edward C. Rorer & Co. Inc.

*2 Mellon Bank Center, Suite 1800, Philadelphia, Pa. 19102; (215) 568-2126*

| | |
|---|---|
| Total assets managed | $35,000,000 |
| Tax-exempt assets managed | $12,000,000 |
| Tax-exempt clients | 9 |
| Types of accounts managed | CEF |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 1 |

Edward C. Rorer & Co. Inc. is an equity, fixed-income and balanced manager.

Its equity approach employs a proprietary computer model to evaluate investment prospects on a relative valuation basis. Relative p/e, relative price/book and relative yield are emphasized.

Its fixed-income approach uses interest rate anticipation.

The asset mix Jan. 1 was 82% stocks, 5% bonds and 13% cash.

Edward C. Rorer, chairman, is chief investment officer and client contact.

### Rosenberg Institutional Equity Management

*4 Orinda Way, Suite 200E, Orinda, Calif. 94563; (415) 254-6404*

| | |
|---|---|
| Total assets managed | $1,037,000,000 |
| Tax-exempt assets managed | $1,037,000,000 |
| Tax-exempt clients | 10 |
| Types of accounts managed | CFG |
| Minimum separate account | $25,000,000 |
| No. of portfolio managers | 1 |
| Size of research staff | 2 |

Rosenberg Institutional Equity Management is an equity manager.

Its equity approach is quantitative. Managers analyze fundamental data on 3,500 stocks, then identify the moderately undervalued companies in every sector and construct efficient portfolios of such stocks.

All assets Jan. 1 were in stocks.

Clients include Alcoa, GTE, Bell Atlantic and The Rockefeller Foundation.

Barr Rosenberg, managing general partner, is chief investment officer. Marlis S. Fritz, partner and director of marketing, is client contact.

### Ross and Roll Asset Management

*43 Cadwalader Court, Gwynedd, Pa. 19436; (215) 628-8896*

| | |
|---|---|
| Total assets managed | $213,000,000 |
| Tax-exempt assets managed | $213,000,000 |
| Tax-exempt clients | 2 |
| Types of accounts managed | CG |
| Minimum separate account | $10,090,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 2 |

Ross and Roll Asset Management is an equity, fixed-income and international manager.

Its equity approach is quantitative. An arbitrage pricing theory, which is a multifactor risk measurement technique, is applied to portfolio management.

The asset mix Jan. 1 was 99% stocks and 1% cash.

The parent company is Ross and Roll Associates. Assets under management by the parent, subsidiaries and affiliates total $750 million.

Stephen Ross is chief investment officer. Alan Yuhas is client contact.

### The Rothschild Co.

*32 South St., Baltimore, Md. 21202; (301) 539-4660*

| | |
|---|---|
| Total assets managed | $900,000,000 |
| Tax-exempt assets managed | $420,000,000 |
| International assets managed | $50,000,000 |
| Tax-exempt clients | 67 |
| Types of accounts managed | CEF |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

The Rothschild Co. is an equity and balanced manager.

Its equity approach is value-oriented with a bias toward growth. Graham & Dodd principles are used.

Its fixed-income approach uses interest rate anticipation.

The asset mix Jan. 1 was 40% stocks, 20% cash and 40% convertible securities.

There was $50 million in foreign stocks.

It follows 200 stocks closely and 300, generally; 50% of research is generated internally.

The parent company is United Asset Management. Total assets under management by the parent company, subsidiaries and affiliates are $17.824 billion.

Clients include NADA, Johns Hopkins Applied Physics Lab and Alton Jones Foundation.

Stanford Z. Rothschild Jr., president, is chief investment officer and client contact.

### Rothschild Asset Management Inc.

*1 Rockefeller Plaza, New York, N.Y. 10020; (212) 757-6000*

| | |
|---|---|
| Total assets managed | $661,000,000 |
| Tax-exempt assets managed | $452,000,000 |
| Tax-exempt clients | 35 |
| Types of accounts managed | CFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 6 |

Rothschild Asset Management Inc. is an equity and balanced manager.

Its equity approach is "growth at the right price." Its objective is building portfolios of stocks with earnings per share that will grow faster than the market, yet can be purchased at reasonable valuations.

Its fixed-income approach is to vary maturities as a function of interest rate anticipation.

The asset mix Jan. 1 was 85% stocks, 5% bonds and 10% cash.

It follows 200 stocks closely.

The parent company is Rothschild Inc. Total assets under management by the parent company, subsidiaries and affiliates are $900 million.

Clients include Liberty All Star Fund, Continental Telecom, state of Illinois and Grand Union.

Robert H. Buckles, president, is chief investment officer. Lewis W. Parker, senior vice president, is client contact.

### N.M. Rothschild International Asset Management Ltd.

*New Court, St. Swithins Lane, London EC4P 4DU England; (212) 757-6000*

| | |
|---|---|
| Total assets managed | $2,300,000,000 |
| Tax-exempt assets managed | $1,020,000,000 |
| International assets managed | $1,020,000,000 |
| Tax-exempt clients | 10 |
| Types of accounts managed | CG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 15 |

N.M. Rothschild International Asset Management Ltd. is an international manager.

Its equity approach aims at added value in market, stock and currency selection. Through a process of fundamental economic analysis they are a concentrated and active asset allocator and market selector.

Its fixed-income approach uses interest rate anticipation, aiming at added value through maturity, currency and instrument management as well as through the identifications of market anomalies.

The asset mix Jan. 1 was 57% stocks and 43% bonds.

There was $435 million in foreign stocks and $585 million in foreign bonds.

The parent company is N.M. Rothschild Asset Management (Holdings) Ltd. Total assets under management by the parent company, subsidiaries and affiliates are $15.45 billion.

Clients include Pacific Telesis, American Airlines, GM and Delaware.

James Heyworth-Dunne is chief investment officer. Christopher Wyke is client contact.

### Rothschild Securities Corp.

*33 W. Monroe St., Chicago, Ill. 60603; (312) 781-8900*

| | |
|---|---|
| Total assets managed | $142,000,000 |
| Tax-exempt assets managed | $70,000,000 |
| 401(k) assets managed | $1,000,000 |
| Tax-exempt clients | 82 |
| Types of accounts managed | C |
| Minimum separate account | $250,000 |
| No. of portfolio managers | 5 |

Rothschild Securities Corp. is an equity, fixed-income and balanced manager.

Its equity approach identifies growth companies with special attributes not fully valued in the marketplace.

Its fixed-income approach structures short- to intermediate-term laddered-maturity portfolios composed of investment-grade companies. It diversifies by industry, company, sector and special features.

The asset mix Jan. 1 was 40% stocks, 52% bonds and 8% cash.

Richard F. Karger, president, is chief investment officer. Edward J. Malysiak Jr., vice president, is client contact.

### Roulston & Co. Inc.

*4000 Chester Ave., Cleveland, Ohio 44103; (216) 431-3000*

| | |
|---|---|
| Total assets managed | $500,000,000 |
| Tax-exempt assets managed | $200,000,000 |
| 401(k) assets managed | $20,000,000 |
| Tax-exempt clients | 260 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $100,000 |
| No. of portfolio managers | 7 |

Roulston & Co. Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses fundamental research to purchase growth, emerging growth and low p/e stocks.

Its fixed-income approach uses interest rate anticipation.

The asset mix Jan. 1 was 75% stocks, 20% bonds and 5% cash.

Clients include Centerior Energy, Ohio Edison and Sunar Hauserman.

Jerry Dombcik is chief investment officer. Thomas H. Roulston is client contact.

### Round Hill Asset Management Inc.

*477 Madison Ave., 24th Floor, New York, N.Y. 10022; (212) 421-3143*

| | |
|---|---|
| Total assets managed | $5,000,000 |
| Tax-exempt assets managed | $2,000,000 |

| Types of accounts managed | CFJ |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 1 |
| Size of research staff | 1 |

Round Hill Asset Management Inc. is an equity manager.

Its equity approach uses Graham & Dodd principles. Research focuses on determining the intrinsic value of a company; investment opportunities are sought where a security can be purchased at a large discount from its intrinsic value.

All assets Jan. 1 were in stocks.

Channing T. Lushbough, president, is chief investment officer and client contact.

### Rowe Price-Fleming International Inc.

*100 E. Pratt St., Baltimore, Md. 21202; (301) 547-2141*

| | |
|---|---|
| Total assets managed | $2,220,000,000 |
| Tax-exempt assets managed | $1,790,000,000 |
| International assets managed | $1,790,000,000 |
| Tax-exempt clients | 19 |
| Types of accounts managed | CEFG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 11 |
| Size of research staff | 71 |

Rowe Price-Fleming International Inc. is an international manager.

Its equity approach uses top-down/bottom-up methods and country selection as key components of its overall investment strategy.

Its fixed-income approach applies an analysis of interest and exchange rate movements over a short and intermediate range to obtain a balance between income and capital appreciation.

The asset mix Jan. 1 was 94% stocks, 2.5% bonds and 3.5% cash.

There was $1,684 million in foreign stocks, $44 million in foreign bonds and $62 million in foreign cash.

The firm follows 1,500 stocks closely and 2,500, generally; 95% of research is generated internally.

Parent companies are T. Rowe Price Associates and the Fleming Group. Total assets under management by the parents, subsidiaries and affiliates are $50 billion.

Clients include General Motors, GTE, The Common Fund and Oregon.

Martin G. Wade, president, is chief investment officer. George A. Murnaghan, vice president, is client contact.

### The RREEF Funds

*650 California St., Suite 1800, San Francisco, Calif. 94108; (415) 781-3300*

| | |
|---|---|
| Total assets managed | $3,017,000,000 |
| Tax-exempt assets managed | $3,017,000,000 |
| Real estate assets managed | $3,017,000,000 |
| Tax-exempt clients | 83 |
| Types of accounts managed | CG |
| Minimum separate account | $100,000,000 |

The RREEF Funds is a real estate manager.

Its real estate approach involves purchasing office, retail and industrial properties nationwide through its three series of non-competing closed-end funds. All investment decisions are made by RREEF's principals.

All assets Jan. 1 were in equity real estate.

Clients include IBM, AT&T, Connecticut and New York State Common Retirement System.

Paul Sack and Stanislaw Maliszewski, principals, are client contacts.

### Ruane, Cunniff & Co. Inc.

*1370 Avenue of the Americas, New York, N.Y. 10019; (212) 245-4500*

| | |
|---|---|

| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 1 |

Sasco Capital Inc. is an equity manager.

Managers seek financial underachievers where they anticipate significant corporate decisions that will enhance shareholder values. Options are used.

All tax-exempt assets Jan. 1 were in stocks.

The firm follows 30 stocks closely and 400, generally; all research is generated internally.

IBM and General Dynamics are clients.

Lee C. Garcia, managing director, is chief investment officer. Daniel Sullivan, managing director, is client contact.

# It's Time To Recognize The Standard In Portfolio Management Systems

It's become a lot easier to choose a portfolio management system. That's because there's a product that hundreds of portfolio managers have made the standard choice in portfolio management software. They chose *The Professional Portfolio* program because it provides the performance and reliability they demand.

*The Professional Portfolio* is a microcomputer accounting and reporting system that reliably provides the information you need—when you need it. And when compared with timesharing or larger computers, the difference in savings and convenience is dramatic.

The investment professionals at Advent Software developed *The Professional Portfolio* program to serve the needs of professional money managers, account executives, investment partnerships, trust departments, corporate investment departments, and active individual investors.

Designed to take full advantage of the IBM PC, *The Professional Portfolio* program quickly provides you with the information and essential reports you need to manage significant portfolios and meet the requests of your clients.

*The Professional Portfolio* program maintains a complete record of each client's portfolio transactions, provides the ability to cross-reference account information, connects automatically with the major pricing services—Interactive Data, Warner and Dow Jones—and produces complete professional reports in minutes.

It's being used by portfolio managers who have the same complex needs as you—registered investment advisors with managed assets from $6 million to over $500 million, financial institutions such as Bank of America and Bank of New England, non-profits such as Stanford University and the Winthrop Rockefeller Foundation, and investment firms such as Dean Witter Reynolds, Hambrecht & Quist, and Robertson, Colman & Stephens.

In fact, over $30 billion in assets are being managed through the use of *The Professional Portfolio* program. And that amount continues to grow.

If you're looking for better performance, greater convenience and lower cost in a portfolio management system, it's time to recognize the standard in portfolio management software, *The Professional Portfolio*.

For more information, call Advent Software today at **(415) 543-7696** (in the New York area call our office at **(212) 481-1100**) or mail the coupon below.

| U.S. subsidiaries | 23 |
| Types of accounts managed | CEFPU |
| Minimum separate account | $18,000,000 |
| No. of portfolio managers | 10 |

Sceptre Investment Counsel Ltd., a Canadian firm, is an equity, fixed-income, balanced and individual retirement accounts manager.

Its equity approach uses Graham & Dodd analysis to identify growth, emerging growth and low p/e stocks. Sector analysis is used.

The asset mix Jan. 1 was 34% Canadian stocks, 42% bonds, 2% mortgages, 10% cash and 12% U.S. stocks.

There was $40 million in mortgages.

It follows 350 stocks closely and 450, generally; half the research is generated internally.

J. Douglas Grant, chairman, is chief investment officer. George B. Turnbull, vice president, is client contact.

## Schaenen Wood & Associates Inc.

*654 Madison Ave., New York, N.Y. 10021; (212) 319-3666*

| | |
|---|---|
| Total assets managed | $190,000,000 |
| Tax-exempt assets managed | $120,000,000 |
| Tax-exempt clients | 34 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 3 |

Schaenen Wood & Associates Inc. is an equity, fixed-income, balanced and convertible securities manager.

Its equity approach is capital preservation, stressing value and sell disciplines.

Selection is by proprietary computer screening techniques. Convertible bonds are used extensively.

Its fixed-income approach uses interest rate anticipation and sector analysis. Where appropriate, some convertible securities are used.

The asset mix Jan. 1 was 62% stocks, 30% bonds and 8% cash.

Options are used.

Gary W. Wood, president, is chief investment officer and client contact.

## Scheetz, Smith & Co.

*500 Grant St., Suite 2734, Pittsburgh, Pa. 15219; (412) 765-3361*

| | |
|---|---|
| Total assets managed | $162,000,000 |
| Tax-exempt assets managed | $130,000,000 |
| 401(k) assets managed | $1,000,000 |
| Tax-exempt clients | 31 |
| Types of accounts managed | CEF |
| Minimum separate account | $1,000,000 |
| Size of research staff | 2 |

Scheetz, Smith & Co., a convertible security manager, uses the securities to participate in rising markets and provide downside protection in weak markets.

All assets were in convertibles Jan. 1.

It follows 50 stocks closely and 150 to 1,500, generally; 50% of research is generated internally.

Clients include Baptist Foreign Mission Board, Cincinnati Gas & Electric, National Intergroup (Weirton) and Alcoa Foundation.

Neil Y. Van Horn is chief investment officer. Donald D. Wolff Jr. is client contact.

## Schield Management Co. Timing Service

*390 Union Blvd., Suite 410, Denver, Colo. 80228; (303) 985-9999*

| | |
|---|---|
| Total assets managed | $56,000,000 |
| Tax-exempt assets managed | $20,000,000 |
| 401(k) assets managed | $15,000,000 |
| Tax-exempt clients | 50 |
| Types of accounts managed | CEJ |
| Minimum separate account | $10,000 |
| No. of portfolio managers | 1 |

Schield Management Co. Timing Service is an equity and balanced manager.

Its equity approach is a timing service designed to reduce the risk of owning a mutual fund by preserving gains that may deteriorate in a declining market. It provides the strategy and implements the move from equity positions to cash equivalents as needed.

The asset mix Jan. 1 was 100% stocks.

There are 12 401(k) clients.

It follows 4,000 stocks generally; all research is generated internally.

The parent company is Schield Management Co. Assets under management by the parent, subsidiaries and affiliates total $85 million.

Clients include Midwest City Memorial Hospital, Rocky Mountain Association, South Community Hospital and Community Health Centers.

Marshall L. Schield, president, is chief investment officer.

## Schield Portfolios Series

*390 Union Blvd., Suite 410, Denver, Colo. 80228; (303) 985-9999*

| | |
|---|---|
| Total assets managed | $9,000,000 |
| Tax-exempt assets managed | $2,000,000 |
| 401(k) assets managed | $114,000 |
| Tax-exempt clients | 17 |
| Types of accounts managed | CE |
| No. of portfolio managers | 4 |

Schield Portfolios Series is an equity, fixed-income, balanced and systematic risk manager.

Its equity approach uses market timing based on an ongoing analysis of stock market trends so portfolios can be fully or partially invested in or divested of equities and, for hedging purposes, may purchase options and engage in futures transactions relating to stock indices and purchase call options and purchase put options.

Its fixed-income approach uses interest rate timing strategies and may hedge investments through the use of interest rate futures and options on interest rate futures.

The asset mix Jan. 1 was 91% stocks and 9% cash.

There are 20 401(k) clients.

The parent company is Schield Management Co. Total assets under management by the parent company, subsidiaries and affiliates are $85 million.

Marshall L. Schield, president, is chief investment officer. NIF Management Cos., Denver, are client contacts.

## A.R. Schmeidler & Co. Inc.

*555 Fifth Ave., New York, N.Y. 10017; (212) 687-9800*

| | |
|---|---|
| Total assets managed | $240,000,000 |
| Tax-exempt assets managed | $61,000,000 |
| Tax-exempt clients | 71 |
| Types of accounts managed | CFJ |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 7 |
| Size of research staff | 2 |

A.R. Schmeidler & Co. Inc. is an equity, fixed-income and balanced manager.

Its equity approach combines Graham & Dodd analysis, growth, emerging growth and low p/e stock and sector rotation. Its fixed-income approach uses interest rate anticipation.

The asset mix Jan. 1 was 65% stocks, 15% bonds and 20% cash.

It follows 125 stocks closely and 250, generally; 90% of research is generated internally.

Arnold R. Schmeidler, president, is chief investment officer. Mr. Schmeidler and Howard R. Cuozzi, executive vice president, are client contacts.

## Schroder Capital Management International

*1 State St., New York, N.Y. 10004; (212) 269-6500*

| | |
|---|---|
| Total assets managed | $1,891,000,000 |
| Tax-exempt assets managed | $1,392,000,000 |
| International assets managed | $1,364,000,000 |
| Tax-exempt clients | 23 |
| Types of accounts managed | CEFG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 6 |
| Size of research staff | 50 |

Schroder Capital Management International Inc., an international manager, has an equity bias. Its approach begins with country allocation based on two-year economic projections. Within each country, the focus then is on emerging growth stocks. Fixed-income is used as a limited tactical alternative.

The asset mix Jan. 1 was 98% stocks and 2% cash.

The firm follows 250 stocks closely and 800, generally; 80% of research is generated internally.

The parent company is Schroders PLC. Assets under management by the parent, subsidiaries and affiliates total $22 billion.

Clients include GM, 3M, United Technologies and Cornell University.

Peter Sedgwick, chief executive, is chief investment officer. Sharon L. Haugh, first vice president-director of international marketing, is client contact.

## Schroder Real Estate Associates

*437 Madison Ave., New York, N.Y. 10022; (212) 486-9800*

| | |
|---|---|
| Total assets managed | $1,014,000,000 |
| Tax-exempt assets managed | $50,000,000 |
| Real estate assets managed | $50,000,000 |
| Tax-exempt clients | 3 |
| Types of accounts managed | CJG |
| Minimum separate account | $50,000,000 |
| No. of portfolio managers | 3 |

Schroder Real Estate Associates is a real estate manager.

It acquires underperforming or underused properties that will respond to its direct, intense property and construction management. Properties are sold upon the creation of their optimum incremental value.

All tax-exempt assets Jan. 1 were in equity real estate.

Ohio Police & Fireman's fund is a client.

Norman L. Peck, managing partner, is chief investment officer. John E. Emmanuel, senior vice president, is client contact.

## Schupf, Woltman & Co. Inc.

*P.O. Box 179, Hamilton, N.Y. 13346; (315) 824-1333*

| | |
|---|---|
| Total assets managed | $190,000,000 |
| Tax-exempt assets managed | $150,000,000 |
| Tax-exempt clients | 6 |
| Types of accounts managed | CJ |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 1 |
| Size of research staff | 2 |

Schupf, Woltman & Co. Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses growth and emerging growth stocks, emphasizing disciplined research and fundamental analysis. Its fixed-income approach is passive.

The asset mix Jan. 1 was 75% stocks, 20% bonds and 5% cash.

It follows 300 stocks closely and 1,000, generally; half of the research is generated internally.

Clients include Agway, Warnaco, Upstate New York Teamsters and Brentwood Associates.

Paul J. Schupf, president, is chief investment officer. Lee Woltman, vice president, is client contact.

## SCNC Advisory Corp.

*101 Greystone Blvd., Columbia, S.C. 29226; (803) 765-3727*

| | |
|---|---|
| Total assets managed | $1,609,000,000 |
| Tax-exempt assets managed: | |
| Total | $428,000,000 |
| Commingled | $106,000,000 |
| Separate | $322,000,000 |

| Real estate assets managed | $380,000,000 |
| Tax-exempt clients | 12 |
| Types of accounts managed | CJG |
| Minimum separate account | $200,000 |
| No. of portfolio managers | 5 |

Scudder Realty Advisors Inc. is a real estate manager whose investments range from mortgages to equities.

The asset mix Jan. 1 was 10% equity real estate and 90% mortgages.

The parent company is Scudder, Stevens & Clark Ltd. Total assets managed by the parent company are $36 billion.

Clients include Sacramento County Employees, Ventura County Employees and Carpenters Pension Trust for Southern California.

Christopher B. Davis, senior vice president, is chief investment officer and client contact.

## Scudder, Stevens & Clark

*345 Park Ave., New York, N.Y. 10154; (212) 350-8200*

| | |
|---|---|
| Total assets managed | $36,079,000,000 |
| Tax-exempt assets managed | $11,300,000,000 |
| 401(k) assets managed | $170,000,000 |
| Real estate assets managed | $177,000,000 |
| Mortgage-backed assets managed | $1,776,000,000 |
| International assets managed | $532,000,000 |
| Tax-exempt clients | 650 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 98 |
| Size of research staff | 49 |

Scudder, Stevens & Clark is an equity, fixed-income, balanced, real estate, international, options and mutual funds manager.

Its equity approach emphasizes growth, emerging growth, value and yield, using independent research to identify stocks.

Its fixed-income approach emphasizes interest rate projections and sector analysis. Opportunity/risk profiles are critical.

Options, stock index futures and fixed-income futures are used.

In its real estate approach, direct equity commitments are arranged for clients, both individually and in partnerships.

The asset mix Jan. 1 was 22.9% stocks, 48.5% bonds, 11.3% cash, 0.4% real estate, 1.2% mortgages and 15.7% mortgage-backed securities; there was $216 million in foreign stocks, $307 million in foreign bonds, $9 million in foreign cash and $392 million in dedicated or immunized bond portfolios.

There are 140 401(k) clients.

Scudder follows 500 stocks closely and 1,000, generally; 98% of the research is generated internally.

George S. Johnston, managing director and president, is chief investment officer. Victoria J. Herget, principal, is client contact.

## Seaboard Investment Advisers Inc.

*100 Seaboard Center, 235 Plume St., Norfolk, Va. 23510; (804) 622-0121*

| | |
|---|---|
| Total assets managed | $120,000,000 |
| Tax-exempt assets managed | $65,000,000 |
| Tax-exempt clients | 29 |
| Types of accounts managed | CFJ |
| Minimum separate account | $400,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 1 |

Seaboard Investment Advisers Inc. is an equity, fixed-income balanced and international manager.

Its equity approach uses Graham & Dodd and some quantitative (MPT) analysis, growth stock and market timing. There is fair reliance upon options strategies at times.

Its fixed-income approach blends debt and debt equivalents (utility shares) in analyzing interest rate spreads and in timing sector switches.

The asset mix Jan. 1 was 45% stocks, 45% bonds and 10% cash.

Eugene W. Hansen, president, is chief investment officer. Bower R. Patrick III, senior portfolio manager, is client contact.

### Seattle Trust

*1000 Second Ave., 11th Floor, Seattle, Wash. 98104; (206) 684-6139*

| | |
|---|---|
| Total assets managed | $225,000,000 |
| Tax-exempt assets managed: | |
| Total | $87,000,000 |
| Commingled | $32,000,000 |
| Separate | $55,000,000 |
| 401(k) and 457 assets managed | $10,000,000 |
| Tax-exempt clients: | |
| Commingled | 130 |
| Separate | 30 |
| Types of accounts managed | CEFJ |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 2 |

Seattle Trust is an equity, fixed-income and balanced manager.

Its equity approach offers lower than stock market risk, emphasizing common stocks and money market instruments. Selection is based on historical p/e multiples and earnings outlook. Graham & Dodd analysis is used.

Its fixed-income approach uses laddered maturities using interest rate forecasting to lengthen or shorten average portfolio maturity. Maximum average maturity is 10 years.

The asset mix Jan. 1 was 47% stocks, 31% bonds and 22% cash.

There were 15 401(k) and 457 plan clients.

Richard A. Klauber, vice president, is chief investment officer. Steve Smith, assistant vice president and business development officer, is client contact.

### Second National Bank of Richmond

*P.O. Box 818, Richmond, Ind. 47375; (317) 983-2395*

| | |
|---|---|
| Total assets managed | $200,000,000 |
| Tax-exempt assets managed: | |
| Total | $35,000,000 |
| Separate | $35,000,000 |
| 401(k) and 457 assets managed | $1,000,000 |
| Tax-exempt clients | 140 |
| Types of accounts managed | CEF |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

Second National Bank of Richmond is an equity, fixed-income and balanced manager.

Its value-oriented, Graham & Dodd equity approach concentrates on historic ranges for stock prices based upon sales and cash-flow ratios.

Its fixed-income approach uses interest rate anticipation.

The asset mix Jan. 1 was 45% stocks, 50% bonds and 5% cash.

There are five 401(k) and 457 plan clients.

The parent company is First National Cincinnati Corp. Total assets under management by the parent company, subsidiaries and affiliates is $6.1 billion.

Eric D. Martz, assistant vice president and trust investment officer, is chief investment officer. Carroll D. Lawson, employee benefits officer, is the client contact.

### Securities Counsel Inc.

*5052 Sprinkle Road, Kalamazoo, Mich. 49003; (616) 383-9200*

| | |
|---|---|
| Total assets managed | $1,468,000,000 |

| No. of portfolio managers | 11 |
| Size of research staff | 3 |

Security Pacific Investment Managers Inc. is an equity, fixed-income, balanced, real estate, options, preferred stock and high-income investment manager.

Its equity approach uses sector rotation. Through identification of the business cycle, optimal cash level, sector emphasis and stock characteristics can be established to take advantage of the effects of the attributes of the economic financial environment on capital markets.

Its fixed-income approach uses interest rate forecasting to identify the liquification and deliquification phases of the credit cycle. The strategy group then develops a target duration and duration range and specific maturity, quality and sector guidelines.

In real estate it actively manages an open-end commingled fund that uses high-quality real estate debt-related instruments to generate incremental returns.

The asset mix Jan.1 was 29.1% stocks, 36.3% bonds, 20.1% cash, 4% mortgages and 10.5% mortgage-backed securities.

There was $184.6 million in mortgages, $482.7 million in mortgage-backed securities, $300,000 in foreign stocks and $371.8 million in dedicated or immunized bond portfolios.

There are four 401(k) clients.

Options, stock index futures and fixed-income futures are used.

The parent company is Security Pacific Corp.

Lloyd McAdams, president and chief executive officer, is chief investment officer. Heather U. Baines, senior vice president-director of marketing and client services, is client contact.

## The Alan G. Seidner Co.

*P.O. Box 60510, Pasadena, Calif. 91106; (818) 795-2251*

| | |
|---|---|
| Total assets managed | $600,000,000 |
| Tax-exempt assets managed | $219,000,000 |
| Mortgage-backed assets managed | $30,000,000 |
| Tax-exempt clients | 12 |
| Types of accounts managed | CF |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 3 |

The Alan G. Seidner Co., a fixed-income manager, seeks the best relative values based on yield spread and yield curve analysis.

All tax-exempt assets were in bonds on Jan. 1; $30 million was in dedicated or immunized bond portfolios.

Ninety percent of the firm's research is generated internally.

Clients include Presbyterian Intercommunity Hospital, Campus Crusade for Christ International, Episcopal Church of Our Saviour and Hemet Valley Hospital District.

Alan G. Seidner, president, is chief investment officer. Sandee Sheek is client contact.

## J & W Seligman & Co. Inc.

*1 Bankers Trust Plaza, New York, N.Y. 10006; (212) 488-0212*

| | |
|---|---|
| Total assets managed | $7,102,000,000 |
| Tax-exempt assets managed | $2,357,000,000 |
| Tax-exempt clients | 84 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 19 |
| Size of research staff | 10 |

J & W Seligman & Co. Inc. is an equity, fixed-income, balanced and high-yield bond manager.

Its equity approach focuses on growth stock, investing primarily for capital appreciation in midsize companies that are fundamentally strong.

Its fixed-income approach is conservative, following an interest rate anticipation model and an equity-oriented high-yield approach.

The asset mix Jan. 1 was 70% stocks, 18% bonds and 12% cash.

The firm follows 150 stocks closely and 300, generally; 70% of research is generated internally.

Clients include New York State Common Retirement Fund, University of Oklahoma, Control Data and Brooklyn Union Gas.

John D. Lynch is chief investment officer. Michael J. Del Priore is client contact.

## Shaw Management Co. Inc.

*851 S.W. Sixth Ave., Portland, Ore. 97204; (503) 228-4884*

| | |
|---|---|
| Total assets managed | $90,000,000 |
| Tax-exempt assets managed | $30,000,000 |
| Tax-exempt clients | 5 |
| Types of accounts managed | CE |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 1 |

Shaw Management Co. Inc., an equity manager, uses Graham & Dodd analysis, emerging growth and low p/e stocks.

The asset mix Jan. 1 was 90% stocks, 5% bonds and 5% cash.

The firm follows 50 stocks closely; 25% to 50% of research is generated internally.

Ralph R. Shaw is chief investment officer and client contact.

## Shawmut Banks

*1 Federal St., Boston, Mass. 02211; (617) 292-3886*

| | |
|---|---|
| Total assets managed | $2,610,000,000 |
| Tax-exempt assets managed | $426,000,000 |
| Types of accounts managed | CFJG |
| No. of portfolio managers | 14 |

Shawmut Banks is an equity, fixed-income and balanced manager.

Its equity approach follows a bottom-up, fundamental stock selection process.

Its fixed-income approach uses risk-controlled active bond management to establish a benchmark to meet client objectives. The portfolio is actively managed around the benchmark.

The asset mix Jan. 1 was 26% stocks, 38% bonds and 36% cash.

It follows 110 stocks closely.

The parent company is Shawmut Corp. Assets under management by the parent, subsidiaries and affiliates total $4.18 billion.

Thomas B. Brown is chief investment officer. Peter A. Wilson is client contact.

## Shearson Asset Management Inc.

*2 World Trade Center, New York, N.Y. 10048; (212) 321-5313*

| | |
|---|---|
| Total assets managed | $6,737,000,000 |
| Tax-exempt assets managed | $1,497,000,000 |
| Tax-exempt clients | 696 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $200,000 |
| No. of portfolio managers | 17 |

Shearson Asset Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach uses fundamental analysis to assess earnings momentum, unrecognized value and the quality of management. Stocks should benefit from competitive advantage and dominant industry and economic trends. It focuses on well-capitalized companies with good relative value and price.

Its fixed-income approach is to invest in high-quality securities in issues or sectors that are undervalued on a relative basis.

The asset mix Jan. 1 was 50% stocks, 40% bonds and 10% cash.

It follows 100 stocks closely and 300, generally; 5% of research is generated internally.

The parent company is Shearson Lehman Brothers, a unit of American Express Co. Assets under management by the parent, subsidiaries and affiliates total $140.02 billion.

Clients include New York State Common Retirement Fund, Sundstrand, Continental Telecom and United Merchants & Manufacturers.

Thomas L. Pulling, chairman and chief executive officer, is chief investment officer. Warren Bender, executive vice president, is client contact.

## Shearson Equity Management

*2 World Trade Center, New York, N.Y. 10048; (212) 321-4920*

| | |
|---|---|
| Total assets managed | $800,000,000 |
| Tax-exempt assets managed | $280,000,000 |
| Tax-exempt clients | 2,400 |
| Types of accounts managed | CJ |
| Minimum separate account | $50,000 |
| No. of portfolio managers | 3 |

Shearson Equity Management, an equity manager, uses a fundamental approach with a bias toward quality growth stocks.

The asset mix Jan. 1 was 95% stocks and 5% cash.

The firm follows 100 stocks closely and 1,000, generally; 30% of research is generated internally.

The parent company is Shearson Lehman Brothers, a unit of American Express Co. Assets under management by the parent company, subsidiaries and affiliates total $140.02 billion.

Barry Berlin, president, is chief investment officer. John Hochstrasser, vice president, is client contact.

## Shearson Management Inc.

*521 Fifth Ave., Suite 1401, New York, N.Y. 10175; (212) 759-8932*

| | |
|---|---|
| Total assets managed | $244,000,000 |
| Tax-exempt assets managed | $103,000,000 |
| Tax-exempt clients | 116 |
| Types of accounts managed | CEG |
| Minimum separate account | $200,000 |
| No. of portfolio managers | 3 |

Shearson Management Inc., an equity manager, looks for "niche" growth companies with proven track records. Accounts usually are diversified in 10 positions. Its fixed-income approach is passive.

The asset mix Jan. 1 was 81% stocks, 8% bonds and 11% cash.

It follows 20 stocks closely and 40, generally; all research is generated internally.

The parent company is Shearson Lehman Brothers, a unit of American Express Co. Assets under management by the parent, subsidiaries and affiliates total $140.02 billion.

Leslie M. Pollack is chief investment officer. William E. Lauer Jr., vice president, is client contact.

## Sheffield & Co. Inc.

*900 Circle 75 Parkway, Suite 750, Atlanta, Ga. 30339; (404) 953-1597*

| | |
|---|---|
| Total assets managed | $16,000,000 |
| Tax-exempt assets managed | $13,000,000 |
| International assets managed | $500,000 |
| Tax-exempt clients | 40 |
| Types of accounts managed | C |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 1 |

Sheffield & Co. Inc. is an equity, fixed-income and balanced manager.

Its equity approach is low p/e, using screens to locate stocks selling at or below book value and having earnings growth potential of 20% annually.

Bonds are acquired to enhance cash flow and reduce volatility. Maturities are held to three to six years.

Options and stock index futures are used.

The asset mix Jan. 1 was 45% stocks, 45% bonds and 10% cash; $500,000 was in foreign bonds.

It follows 40 stocks closely and 100, generally; 75% of the research is generated internally.

Roger Sheffield is chief investment officer and client contact.

## Shields Asset Management

*701 Westchester Ave., White Plains, N.Y. 10604; (914) 684-6900*

| | |
|---|---|
| Total assets managed | $3,005,000,000 |
| Tax-exempt assets managed | $3,005,000,000 |
| Mortgage-backed assets managed | $200,000,000 |
| Tax-exempt clients | 93 |
| Types of accounts managed | CJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 6 |
| Size of research staff | 4 |

Shields Asset Management Inc. is an equity, fixed-income, balanced and dedicated bond manager.

Its equity approach uses economic and financial analysis and risk/reward assessments to determine sector concentration and industry/company selection. Portfolios are diversified among generally large, high-quality companies.

Its fixed-income approach is to make maturity and duration judgments based on anticipated interest rate changes and to capitalize on sector opportunities and shifts of yield curves and quality spreads.

The asset mix Jan. 1 was 40% stocks, 48.3% bonds, 5% cash and 6.7% mortgage-backed securities; there was $120 million in dedicated or immunized bond portfolios.

It follows 350 stocks closely and 1,500, generally; 75% of research is generated internally.

Kenneth Safian, director of investment strategy, is chief investment officer. John R. Larkin, vice president, is client contact.

## Siebel Capital Management

*80 E. Sir Francis Drake Blvd., Larkspur, Calif. 94939; (415) 461-3850*

| | |
|---|---|
| Total assets managed | $1,828,000,000 |
| Tax-exempt assets managed | $1,480,000,000 |
| 401(k) assets managed | $1,000,000 |
| Tax-exempt clients | 75 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 8 |
| Size of research staff | 2 |

Siebel Capital Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach is value-oriented, emphasizing low p/e stocks.

Its fixed-income approach uses interest rate anticipation.

The asset mix Jan. 1 was 90% stocks, 4% bonds and 6% cash.

There is one 401(k) client.

It follows 70 stocks closely and 700, generally; 60% of research is generated internally.

The parent company is Equitec Financial Group Inc. Assets under management by the parent, subsidiaries and affiliates are $3.5 billion.

Clients include Ohio State University, Xerox, Connecticut and Oklahoma State Teachers.

Kenneth F. Siebel Jr., president, is chief investment officer. Lawrence A. Mitchell, executive vice president, is client contact.

International advisers: June 29.

## Signet Bank/Maryland

*P.O. Box 17034, Baltimore, Md. 21203; (301) 332-5877*

| | |
|---|---|
| Total assets managed | $640,000,000 |
| Tax-exempt assets managed: | |
| Total | $278,000,000 |
| Commingled | $10,000,000 |
| Separate | $268,000,000 |
| 401(k) and 457 assets managed | $3,000,000 |
| Real estate assets managed | $1,000,000 |
| Tax-exempt clients: | |
| Commingled | 40 |
| Separate | 200 |
| Types of accounts managed | CEFG |
| Minimum separate account | $500,000 |
| No. of portfolio managers | 7 |

Signet Bank/Maryland, formerly Union Trust Co. of Maryland, is an equity, fixed-income, balanced and real estate manager.

Its equity approach utilizes sector rotation and Graham & Dodd principles. Its top-down analysis combines quantitative stock valuation and qualitative computer modeling techniques.

Its fixed-income approach uses interest rate anticipation and sector analysis. High quality and maturities averaging less than 10 years are primary guides.

The asset mix Jan. 1 was 50% stocks, 44.7% bonds, 5% cash and 0.3% equity real estate.

Signet Banking Corp. is the parent company. Total assets managed by the parent company, subsidiaries and affiliates are $1.64 billion.

John Pretko is chief investment officer. Jay M. Neale II, vice president, is client contact.

## Signet Trust Co.

*P.O. Box 26311, Richmond, Va. 23260; (804) 771-7154*

| | |
|---|---|
| Total assets managed | $1,000,000,000 |
| Tax-exempt assets managed: | |
| Total | $575,000,000 |
| Commingled | $250,000,000 |
| Separate | $325,000,000 |
| 401(k) and 457 assets managed | $15,000,000 |
| Tax-exempt clients: | |
| Commingled | 300 |
| Separate | 40 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $2,000,000 |
| No. of portfolio managers | 6 |
| Size of research staff | 1 |

Signet Trust Co., formerly Bank of Virginia Trust Co., is an equity, fixed-income, balanced and commingled GIC fund manager.

Its equity approach is risk-averse, incorporating a value-driven style that involves a continual and concurrent process of top-down economic analysis and quantitative stock valuation.

Its fixed-income approach is passive, with short- and intermediate-term bonds used in balanced accounts to provide stability.

The asset mix Jan. 1 was 57% stocks, 38% bonds and 5% cash.

There are 20 401(k) and 457 plan savings plans.

The parent company is Signet Banking Corp. Assets under management by the parent, subsidiaries and affiliates total $1.64 billion.

W. Guy Williams Jr., executive vice president, is chief investment officer. Frank N. Pipino, vice president, is client contact.

## Simms Capital Management

*7 E. 76th St., New York, N.Y. 10021; (212) 861-2830*

| | |
|---|---|
| Total assets managed | $308,000,000 |
| Tax-exempt assets managed | $30,000,000 |
| International assets managed | $8,000,000 |
| Tax-exempt clients | 3 |
| Types of accounts managed | CF |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 5 |
| Size of research staff | 2 |

Simms Capital Management Ltd. is an equity, fixed-income, balanced and international manager.

Its equity approach uses analysis of world economic trends to seek companies with a catalyst for providing earnings momentum or realization of asset values.

Its fixed-income approach begins with a capitalization-weighted portfolio. Managers diverge from that based on local market economics, yield curve dynamics and prospective currency movements.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 93%

stocks, 2% bonds and 5% cash; $7.1 million was in foreign stocks and $500,000 in foreign bonds.

Arthur Williams III, managing director, is client contact.

### Simpson Capital Management Co.

*1205 PSFS Building, Philadelphia, Pa. 19107; (215) 629-0162*

| | |
|---|---|
| Total assets managed | $40,000,000 |
| Tax-exempt assets managed | $10,000,000 |
| International assets managed | $100,000 |
| Tax-exempt clients | 2 |
| Types of accounts managed | C |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 1 |

Simpson Capital Management Co. is an equity, fixed-income and balanced manager.

Its equity approach is contrarian, using Graham & Dodd analysis, growth, emerging growth and low p/e stocks, sector rotation and market timing.

Its fixed-income approach predominantly uses Treasuries in a process that combines maturity management with interest rate anticipation.

The asset mix Jan. 1 was 70% stocks, 15% bonds and 15% cash; $100,000 was in foreign stocks.

Allen J. Simpson, president, is chief investment officer and client contact.

### Sirach/Flinn, Elvins Capital Management

*3323 One Union Square, Seattle, Wash. 98101; (206) 624-3800*

| | |
|---|---|
| Total assets managed | $469,000,000 |
| Tax-exempt assets managed | $443,000,000 |
| 401(k) assets managed | $13,000,000 |
| Tax-exempt clients | 32 |
| Types of accounts managed | CEFJ |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 5 |
| Size of research staff | 2 |

Sirach/Flinn, Elvins Capital Management is an equity, fixed-income, balanced and GIC manager.

Its equity approach emphasizes growth stocks at a reasonable price. It uses active asset allocation of large- and medium-cap stocks to vary risk levels.

Its fixed-income approach is one of controlled active management based on interest rate forecasting. Duration determines risk level and will be plus or minus one year around the benchmark. Portfolios hold 15 to 20 issues rated BAA or higher.

The asset mix Jan. 1 was 50% stocks, 40% bonds and 10% cash.

There are 11 401(k) clients.

Clients include Boeing and University of Puget Sound.

George B. Kauffman, principal, is chief investment officer.

Kenneth E. Carlson, principal, is client contact.

### Sit Investment Associates

*1714 First Bank Place W., Minneapolis, Minn. 55402; (612) 332-3223*

| | |
|---|---|
| Total assets managed | $2,030,000,000 |
| Tax-exempt assets managed | $1,808,000,000 |
| Mortgage-backed assets managed | $16,000,000 |
| International assets managed | $34,000,000 |
| Tax-exempt clients | 24 |
| Types of accounts managed | CEG |
| Minimum separate account | $15,000,000 |
| No. of portfolio managers | 5 |
| Size of research staff | 3 |

Sit Investment Associates Inc. is an equity, fixed-income and balanced manager.

Its equity approach combines sector rotation with at least a 10% to 15% position in smaller and midsize growth companies.

It uses an interest rate anticipation, rotational style for fixed-income. The firm specializes in developing customized portfolio strategies (using futures and options).

The asset mix Jan. 1 was 89% stocks, 1% bonds, 9% cash and 1% mortgage-backed securities; $34 million was in foreign stocks.

The firm follows 200 stocks closely and 500 generally; 60% of research is generated internally.

Eugene C. Sit, president and chief executive officer, is chief investment officer.

Peter L. Mitchelson, executive vice president, is client contact.

### Skye Investment Advisors

*20370 Town Center Lane, Suite 255, Cupertino, Calif. 95014; (408) 446-4471*

| | |
|---|---|
| Total assets managed | $1,228,000,000 |
| Tax-exempt assets managed | $647,000,000 |
| Tax-exempt clients | 10 |
| Types of accounts managed | CF |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 2 |

Skye Investment Advisors Inc. is an equity and fixed-income manager.

It specializes in risk management and portfolio insurance strategies, using computerized methods to protect portfolios against price decline. Option pricing and optimization theory are used to achieve specified downside protection goals. Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 54% stocks and 46% bonds.

All research is generated internally.

Clients include Equity Guard Stock Fund, Union Bank, RepublicBank and Imco.

Paul L. McEntire, president, is chief investment officer. Pete Thomas, vice president, is client contact.

### Smith Affiliated Capital

*1221 Avenue of the Americas, New York, N.Y. 10020; (212) 382-1680*

| | |
|---|---|

~~4:00 p.m. Thursday~~ 11:00 a.m. Friday

# More timely.

Beginning with the April 6th issue, *Pensions & Investment Age* became more timely, more compelling and more essential than ever.

That's because *P&I Age*'s editorial deadline has been extended until 11:00 a.m. Friday before issue date, making it possible for reporters to file important, late-breaking news later than before. The copy of *P&I Age* you read on Monday morning includes news from the previous business day.

Which means that *P&I Age*'s readers will be better served.

And so will our advertisers.

Which makes sense. Because, when you buy advertising, you buy the probability that your advertising will be exposed to and read by *P&I Age*'s audience. Each step *P&I Age* takes in improving readership translates to improved advertising exposure for you. And, it follows that the better we serve our readers, the better we serve you, our advertisers.

Keeping readers ahead editorially is the major reason that *P&I Age* continues to carry more investment management advertising than any other publication.

Because advertisers depend on *P&I Age* to deliver more readership, more frequency and more impact.

To learn more about how *P&I Age* can help you, please contact the sales office nearest you.

Pensions & Investment Age

New York (212) 210-0114

Chicago (312) 649-5280

Stein Roe & Farnham is an equity, fixed-income and balanced manager.

Its equity approach seeks growth, emerging growth and low p/e stocks through quantitative analysis. It has a large-cap, income orientation and uses a 6,500-stock data base to manage portfolios with different investment objectives and styles.

Its fixed-income approach employs multiple disciplines (maturity optimization, sector rotation and credit selection) with a bias toward capital preservation in bear markets. It is a risk manager.

The asset mix Jan. 1 was 43% stocks, 44% bonds, 8% cash and 5% mortgage-backed securities.

There was $400 million in immunized bond portfolios and $150 million in dedicated bond portfolios.

It follows 600 stocks closely and 6,500, generally; 90% of the research is generated internally.

Liberty Mutual Insurance owns 80% of Stein Roe & Farnham.

A. Kugel is chief investment officer. R.L. Ford is client contact.

| Minimum separate account | $250,000 |
| No. of portfolio managers | 1 |

T&L Advisors Inc. of Virginia is an equity and balanced manager.

It offers two types of equity management: capital appreciation, where it focuses on medium-size growth companies; income and capital appreciation, where it uses convertible securities, master limited partnerships and dividend growth stocks. Technical analysis is used to determine equity exposure.

The asset mix Jan. 1 was 85% stocks, 10% bonds and 5% cash.

Options and stock index futures are used.

Theodore E. Loud is chief investment officer and client contact.

## Todd Investment Advisors

*3160 First National Tower, Louisville, Ky. 40202; (502) 585-3121*

| | |
|---|---|
| Total assets managed | $2,301,000,000 |
| Tax-exempt assets managed | $2,249,000,000 |
| Mortgage-backed assets managed | $92,000,000 |
| Tax-exempt clients | 32 |
| Types of accounts managed | CEFG |
| Minimum separate account | $3,000,000 |
| No. of portfolio managers | 4 |

Todd Investment Advisors Inc. is an equity, fixed-income and balanced manager.

Its equity approach is conservative with a strong capital-preservation bent, focusing on low-beta, large-cap and high-yield stocks. It uses aggressive shifts between sectors and industry groups. Valuation studies determine asset allocation, while quantitative measures control buying and selling.

Its fixed-income approach is based on interest rate anticipation. High-quality securities are used with aggressive shifts in average maturity.

Options, stock index futures and fixed-income futures are used.

The asset mix Jan. 1 was 27% stocks, 54% bonds, 15% cash and 4% mortgage-backed securities; there was $150 million in dedicated or immunized portfolios.

It follows 70 stocks closely and 425, generally; 60% of research is generated internally.

Clients include Kentucky Teachers, Memphis, Louisville Gas & Electric and Ohio Casualty Insurance.

Bosworth M. Todd Jr. is chief investment officer. Robert M. Calvert, executive vice president, is client contact.

### Trust Company of the West

*400 S. Hope St., Los Angeles, Calif. 90071; (213) 683-4000*

| | |
|---|---|
| Total assets managed | $10,735,000,000 |
| Tax-exempt assets managed: | |
| Total | $10,173,000,000 |
| Commingled | $2,634,000,000 |
| Separate | $7,539,000,000 |
| Real estate assets managed | $1,098,000,000 |
| Tax-exempt clients | 174 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $20,000,000 |
| No. of portfolio managers | 17 |
| Size of research staff | 9 |

Trust Company of the West offers equity, fixed-income, balanced, real estate, global, oil and gas, private placements, convertible and high-yield bond management.

Its equity approach employs sector rotation, using top-down analysis with the goal of identifying changes before they are generally perceived and shifting between asset categories and industries to take advantage of change.

Its fixed-income approach uses interest rate anticipation and is top-down with a goal to catch cyclical shifts in interest rates.

Its real estate equity investments are in existing properties, forward commitments and convertible mortgages in office, industrial and shopping centers in 44 major metropolitan areas.

The asset mix Jan. 1 was 62% stocks, 21% bonds, 1% cash, 11% equity real estate and 5% oil and gas and private placements.

There was $1.09 billion in equity real estate. Options are used.

Ernest O. Ellison, president, is chief investment officer. Thomas E. Larkin Jr., managing director, is client contact.

### TSA Capital Management

*700 Wilshire Blvd., Los Angeles, Calif. 90017; (213) 614-7225*

| | |
|---|---|
| Total assets managed | $1,013,000,000 |
| Tax-exempt assets managed | $1,013,000,000 |
| Tax-exempt clients | 16 |
| Types of accounts managed | CEFG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 6 |
| Size of research staff | 2 |

TSA Capital Management is an equity, fixed-income and balanced manager.

Its equity approach is disciplined and pragmatic. A number of proprietary quantitative disciplines are used for security valuation and for measurement of risk levels.

Its fixed-income approach uses sector analysis, exploiting market opportunities through an on-going analysis of maturity structure, sector spreads and quality spreads.

The asset mix Jan. 1 was 80% stocks, 15% bonds and 5% cash.

Options, stock index futures and fixed-income futures are used.

It follows 800 stocks closely and 1,400, generally.

The parent company is TSA (Trust Services of America). Total asset under management by the parent company, subsidiaries and affiliates are $4.4 billion.

Roger G. Clarke, managing director, is chief investment officer. Richard Boling, managing director, is client contact.

| Minimum separate account | $500,000 |
| No. of portfolio managers | 3 |
| Size of research staff | 4 |

Unified Management Corp. is an equity, fixed-income and balanced manager.

Its equity approach emphasizes growth and low p/e stocks. Its fixed-income approach is based on interest rate anticipation. Options are used.

The asset mix Jan. 1 was 80% stocks, 10% bonds and 10% cash.

Unified follows 200 stocks closely and 4,000, generally; 75% of research is generated internally.

Nicholas F. Kaiser is chief investment officer. Ronald L. Keller is client contact.

### Union Labor Life Insurance

*111 Massachusetts Ave. N.W., Washington, D.C. 20001; (202) 682-0900*

| | |
|---|---|
| Total assets managed | $1,633,000,000 |
| Tax-exempt assets managed | |
| Total | $1,329,000,000 |
| Pooled accounts | $452,000,000 |
| GICs | $393,000,000 |
| Annuities/other | $484,000,000 |
| Real estate assets managed | $263,000,000 |
| Mortgage-backed assets managed | $47,000,000 |
| Tax-exempt clients | 460 |
| Types of accounts managed | CJG |
| Minimum separate account | $2,000,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 7 |

Union Labor Life Insurance Co. is an equity, fixed-income and GIC manager.

Its equity approach uses Graham & Dodd analysis to identify low-beta, out-of-favor and special situation stocks.

It is a contrarian, value-oriented and total return manager; risk is controlled to provide investment returns substantially independent of overall market conditions.

Its fixed-income approach uses interest rate anticipation on 25% of assets. The remainder is actively managed by swapping between intermediate and longer maturities as market opportunities arise.

Its real estate Separate Account J invests in long-term first mortgages. About 23% of the portfolio has some form of participation in rent in addition to the coupon rate of interest.

The separate account asset mix Jan. 1 was 18% stocks, 1% bonds, 7% cash, 58% mortgages, 11% mortgage-backed securities and 5% other.

Herbert Canapary, vice president, is the chief investment officer. John Stephan and Robert C. Cassin, directors-group pension sales, are the client contacts.

| No. of portfolio managers | 6 |

United Bank is an equity, fixed-income and balanced manager.

Its equity approach uses Graham & Dodd analysis. Its fixed-income approach is driven by interest rate anticipation.

The asset mix Jan. 1 was 70% stocks, 20% bonds and 10% cash.

The bank follows 120 stocks closely and 100, generally.

The parent company is Fleet Financial Corp. Assets under management by the parent, subsidiaries and affiliates total $6 billion.

William V. Crosswaite, vice president, is chief investment officer. Thomas J. Henry Jr., vice president, is client contact.

### United Capital Management

*United Bank Center, 1700 Broadway, Suite 1300, Denver, Colo. 80274; (303) 831-9474*

| | |
|---|---|
| Total assets managed | $2,514,000,000 |
| Tax-exempt assets managed | $2,345,000,000 |
| Tax-exempt clients | 30 |
| Types of accounts managed | CFJG |
| Minimum separate account | $25,000,000 |
| No. of portfolio managers | 4 |
| Size of research staff | 2 |

United Capital Management is an equity, fixed-income and balanced manager.

Its equity approach is to buy depressed, out-of-favor stocks with major rebound potential within a three-year period. A strict sell discipline is integral to the process.

*W. Lon Schreur*

Its fixed-income approach uses a business cycle analysis to evaluate the direction of interest rates. Portfolio structure is determined by spread analysis.

It follows 80 stocks closely and 130, generally; all research is internally generated.

Clients include Washington state, General Public Utilities, Greyhound and AT&T.

W. Lon Schreur, president, is chief investment officer. Denise Bryant, vice president, is client contact.

### United Missouri Investment Counsel Service

*P.O. Box 226, Kansas City, Mo. 64141; (816) 556-7340*

| | |
|---|---|
| Total assets managed | $3,000,000,000 |

| Types of accounts managed | CEFG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 46 |
| Size of research staff | 9 |

United States Trust Co. is an equity, fixed-income, balanced, real estate and international manager.

Its equity approach is to buy and hold assets that have demonstrated value in terms of underlying resources and assets or earnings potential, and are favorably priced.

Economic analysis, both domestic and international, is the most critical factor in its fixed-income approach. Yield curve analysis plays a vital role in selection and maturity. Credit analysis and changing yield spread relationships affect quality and sector distribution decisions.

Options are used.

Its real estate approach consists of buying predevelopment land for cash. The holding period averages five years.

The asset mix Jan. 1 was 37% stocks, 61% bonds, 1% cash and 1% equity real estate; there was $25 million in real estate equity, $3 million in mortgages, $26.6 million in foreign stocks and $250 million in dedicated or immunized portfolios.

The parent company is U.S. Trust Corp. of New York. Total assets under management by the parent, subsidiaries and affiliates is $13.561 billion.

Frederick B. Taylor, chairman-investment policy, is chief investment officer. Angelina M. Painter, vice president, is client contact.

### United States Trust Co. (Boston)

*30 Court St., Boston, Mass. 02108; (617) 726-7250*

| | |
|---|---|
| Total assets managed | $800,000,000 |
| Tax-exempt assets managed | |
| Total | $533,000,000 |
| Commingled | $158,000,000 |
| Separate | $375,000,000 |
| Tax-exempt clients | |
| Commingled | 90 |
| Separate | 87 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 9 |

United States Trust Co. (Boston) is an equity, fixed-income and balanced manager. It also manages socially screened portfolios.

Its equity philosophy combines a top-down approach to sector allocation and a value-oriented approach to individual stock selection. Market timing is used.

Its fixed-income approach is driven by interest rate anticipation based on 12-month economic scenario forecasts. Yield spreads are evaluated on issue quality and risk and liquidity differentials.

The asset mix Jan. 1 was 75% stocks, 20% bonds and 5% cash.

The parent company is UST Corp. Total assets under management by the parent company, subsidiaries and affiliates are $1.05 billion.

Domenic Colasacco is chief investment officer. Robert Lincoln is client contact.

### United Trust Fund

*4770 Biscayne Blvd., Miami, Fla. 33137; (305) 576-7711*

| | |
|---|---|
| Total assets managed | $180,000,000 |
| Tax-exempt assets managed | $0 |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 7 |
| Size of research staff | 3 |

United Trust Fund is a fixed-income and real estate manager.

Its fixed-income approach is passive, taking long-term, fixed-rate securities or other credit instruments and making continuous investment without regard to market timing in a flat rate interest market, and in an escalating market, go short and roll.

Its real estate approach is guaranteed return through credit leases.

James Nolan is chief investment officer and client contact.

### Unity Management Inc.

*2001 Marcus Ave., Lake Success, N.Y. 11042; (516) 437-2200*

| | |
|---|---|
| Total assets managed | $550,000,000 |
| Tax-exempt assets managed | $550,000,000 |
| Mortgage-backed assets managed | $36,000,000 |
| Tax-exempt clients | 65 |
| Types of accounts managed | CJG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 7 |
| Size of research staff | 3 |

Unity Management Inc. is an equity, fixed-income and balanced manager.

Its equity approach combines growth stock, low p/e stock and market timing. In-house computer systems and traditional research sources are used for fundamental and technical analysis.

Its fixed-income approach is established through conventional and computer-generated interest rate forecasts. Bond swapping and immunization programs are used for restructuring asset allocations.

The asset mix Jan. 1 was 30% stocks, 60% bonds and 10% cash; $36 million in mortgage-backed securities is included in the bond allocation.

It follows 150 stocks closely and 1,000, generally; 75% of research is generated internally.

Irving Decter is chief investment officer and client contact.

### UNUM Life Insurance

| Tax-exempt clients | |
| Separate | 301 |
| Types of accounts managed | CJG |
| No. of portfolio managers | 15 |
| Size of research staff | 3 |

Valley National Bank of Arizona is an equity, fixed-income, balanced and real estate manager.

Its equity approach is toward growth companies positioned to benefit from long-term trends. In-house researchers analyze company fundamentals using systematic relative valuation methods.

Its fixed-income approach uses interest rate anticipation as the primary determinant; sector selection adds incremental return.

Its real estate approach concentrates on Arizona-based commercial mortgages with interest rate and call provisions and offers an open-end equity real estate fund.

The asset mix Jan. 1 was 20% stocks, 20% bonds, 17% cash and 43% mortgages.

There is $242 million in mortgages. There are 29 401(k)/457 clients. Options are used.

The parent company is Valley National Corp. Total assets managed by the parent company, subsidiaries and affiliates are $10.715 billion.

Lyle D. Wurtz, vice president and manager-trust investments, is chief investment officer. Paul Knowles, vice president and manager-trust employee benefits, is client contact.

### Value Investors Inc.

*601 Locust, Suite 1150, Des Moines, Iowa 50309; (515) 247-6582*

| | |
|---|---|
| Total assets managed | $2,800,000,000 |
| Tax-exempt assets managed | $1,900,000,000 |
| Tax-exempt clients | 7 |
| Types of accounts managed | CFG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 6 |

Value Investors Inc., an equity manager, develops investment themes and then selects stocks based on their forecasted long-term future cash flows. Sector rotation is used.

The asset mix Jan. 1 was 100% stocks.

The firm generates 95% of its research internally.

The parent firm is Principal Financial Group Inc. Assets under management by the parent, subsidiaries and affiliates total $15 billion.

Clients include Nebraska, U.S. Olympic Foundation and Iowa Public Employees.

S. Ralph Kosmicke, president, is chief investment officer. Kenneth E. Fridrich, vice president and director-client services, is client contact.

### Value Line Asset Management

*711 Third Ave., New York, N.Y. 10017; (212) 687-3965*

| | |
|---|---|
| Total assets managed | $1,500,000,000 |
| Tax-exempt assets managed | $1,325,000,000 |
| Tax-exempt clients | 31 |
| Types of accounts managed | CEFG |
| Minimum separate account | $3,000,000 |
| No. of portfolio managers | 6 |
| Size of research staff | 2 |

Value Line Asset Management is an equity and balanced manager.

Its equity approach uses a quantitative discipline based on the firm's ranking system to identify stocks with above-average earnings growth and attractive valuations relative to the market and each stock's own history. Sector rotation is employed.

The asset mix Jan. 1 was 75% stocks, 2% bonds and 23% cash.

The firm follows 1,700 stocks closely and 3,000, generally; 95% of research is generated internally.

The parent company is Value Line Inc. Assets under management by the parent, subsidiaries and affiliates total $3.61 billion.

Clients include Eastman Kodak, GM, Singer and Ohio Police & Firemen.

Mark Tavel, president, is chief investment officer. Victor Ugolyn, director of marketing, is client contact.

### Vanbrit Investment Management

## W

### Waddell & Reed Asset Management Co.

*2400 Pershing Road, Kansas City, Mo. 64108; (816) 283-4150*

| | |
|---|---|
| Total assets managed | $1,546,000,000 |
| Tax-exempt assets managed | $864,000,000 |
| Tax-exempt clients | 39 |
| Types of accounts managed | CEFG |
| Minimum separate account | $3,000,000 |
| No. of portfolio managers | 14 |
| Size of research staff | 18 |

Waddell & Reed Asset Management Co. is an equity, fixed-income, balanced, international and GIC manager.

Its equity approach uses market timing that is oriented to major market cycle changes. The degree of market participation is based on an analysis of price vs. intrinsic value relationships and the business cycle.

Its fixed-income approach uses interest rate anticipation to actively manage portfolios. Its primary bond technique is to alter duration based on the outlook for interest rates within a duration range of one to 6.5 years.

Options and fixed-income futures are used.

The asset mix Jan. 1 was 47% stocks, 37% bonds and 16% cash.

The firm is a wholly owned subsidiary of Waddell & Reed Investment Management Co., which is owned by Torchmark Corp. Assets under management by the parent, subsidiaries and affiliates total $7.04 billion.

Herbert P. Evert is chief investment officer. Robert T. Hunter, senior vice president, is client contact.

### Maury Wade & Co.

| Minimum separate account | $100,000 |
| No. of portfolio managers | 1 |

Maury Wade & Co. is an equity, fixed-income and balanced manager.

Its equity approach uses Graham & Dodd analysis and market timing in pursuit of growth stocks.

Its fixed-income approach is passive.

Fifty stocks are followed closely and 200, generally.

Maury Wade is chief investment officer and client contact.

### Wagstaff, Lodefink & Associates

*136 E. South Temple, Suite 1740, Salt Lake City, Utah 84111; (801) 532-2777*

| | |
|---|---|
| Total assets managed | $15,000,000 |
| Tax-exempt assets managed | $12,000,000 |
| Tax-exempt clients | 32 |
| Types of accounts managed | CEFG |
| Minimum separate account | $250,000 |
| No. of portfolio managers | 2 |
| Size of research staff | 2 |

Wagstaff, Lodefink & Associates is an equity, fixed-income and balanced manager.

The firm takes a bottom-up, value-oriented, growth-stock approach to equities that stresses a total return concept. It uses low p/e, yield and risk-adjusted total rate of return screens.

Its fixed-income approach is based on interest rate anticipation.

The asset mix Jan. 1 was 80% stocks, 15% bonds and 5% cash.

We are pleased to announce that

| Tax-exempt assets managed | $8,000,000 |
| Tax-exempt clients | 14 |
| Types of accounts managed | C |
| Minimum separate account | $300,000 |
| No. of portfolio managers | 2 |

Weiser Investment Management Ltd. is an equity and balanced manager.

The firm uses a flexible Graham & Dodd approach with emphasis on earnings and sales growth, financial condition and book value.

In fixed income, it invests almost solely in convertible securities.

The asset mix Jan. 1 was 66% stocks, 14% convertible bonds and 20% cash.

Morris Weiser, president, is chief investment officer. Mr. Weiser and Michael Herst, vice president, are client contacts.

## Weiss, Peck & Greer

*1 New York Plaza, 30th Floor, New York, N.Y. 10004; (212) 908-9565*

| | |
|---|---|
| Total assets managed | $3,428,000,000 |
| Tax-exempt assets managed | $2,704,000,000 |
| Tax-exempt clients | 92 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $20,000,000 |
| No. of portfolio managers | 9 |
| Size of research staff | 4 |

Weiss, Peck & Greer is an equity, fixed-income and balanced manager.

Its equity approach uses emerging growth and low p/e stocks.

Its fixed-income approach stresses high-quality portfolios to earn significant excess returns over bond indexes. Management is systematic, based on holding a constant level of portfolio risk and produces the excess returns consistently. The methodology is an alternative to indexation and market timing.

The asset mix Jan. 1 was 78% stocks, 15% bonds and 7% cash.

Options, stock index futures and fixed-income futures are used.

It follows 200 stocks closely and 500, generally; 95% of the research is generated internally.

Clients include American Can, General Motors, Cooper Tire & Rubber and GTE.

Stephen H. Weiss, managing partner, is chief investment officer.

Vincent E. Teti, partner/director of marketing and client servicing, is client contact.

## Wellington Management Co./Thorndike, Doran, Paine & Lewis

*28 State St., Boston, Mass. 02109; (617) 227-9500*

| | |
|---|---|
| Total assets managed | $28,976,000,000 |
| Tax-exempt assets managed | $9,076,000,000 |

## Wentworth Hauser & Violich

*333 Sacramento St., San Francisco, Calif. 94111; (415) 981-6911*

| | |
|---|---|
| Total assets managed | $2,140,000,000 |
| Tax-exempt assets managed | $1,935,000,000 |
| Tax-exempt clients | 89 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $1,000,000 |
| No. of portfolio managers | 6 |
| Size of research staff | 3 |

Wentworth Hauser & Violich is an equity, fixed-income and balanced manager.

Equity portfolio characteristics are p/es less than the S&P, 10-year dividend growth rates double the S&P, implied returns (yield plus plow back) 30% greater than the S&P.

Its fixed-income approach structures portfolios to take advantage of cyclical behavior of interest rates. Average maturity is less than five years.

The asset mix Jan. 1 was 28% stocks, 67% bonds and 5% cash.

It follows 120 stocks closely and 200, generally; 80% of research is generated internally.

Clients include Air Products, New Mexico Public Employees, Southern California Edison and Gates Rubber.

W.K. Hauser is chief investment officer. Bradford Hall is client contact.

## Wertheim Asset Management Services Inc.

*230 Park Ave., New York, N.Y. 10169-0105; (212) 370-6140*

| | |
|---|---|
| Total assets managed | $1,402,000,000 |
| Tax-exempt assets managed | $1,402,000,000 |
| Mortgage-backed assets managed | $372,000,000 |
| Tax-exempt clients | 32 |
| Types of accounts managed | CFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 5 |
| Size of research staff | 2 |

Wertheim Asset Management Services Inc. is an equity, fixed-income, balanced, real estate, international and GIC manager.

Its equity approach is bottom-up, emphasizing relative value by selecting individual securities selling at reasonable p/e multiples relative to projected earnings growth.

Its fixed-income approach emphasizes total return through active management. It uses interest rate anticipation, followed by sector rotation based on yield spread analysis. Cash equivalents are used.

The asset mix Jan. 1 was 37% stocks, 24% bonds, 12% cash and 27% mortgage pass-through and mortgage-backed securities.

The parent company is Wertheim Schroder & Co. Inc. The total assets under management by the parent company, subsidiaries and affiliates are $1.4 billion.

Clients include UTX, Michigan, Carpenter Technology and ILGWU.

Ernest Mysogland, president, is chief investment officer. Steven W. Golann, vice president, is client contact.

## Wertheim-Philippe International

*230 Park Ave., New York, N.Y. 10169; (212) 370-6140*

| | |
|---|---|
| Total assets managed | $507,000,000 |
| Tax-exempt assets managed | $96,000,000 |

| Tax-exempt clients | 2 |
| Types of accounts managed | CG |
| Minimum separate account | $10,000,000 |
| No. of portfolio managers | 6 |
| Size of research staff | 6 |

Wertheim-Philippe International is an international manager.

Its equity approach incorporates both a top-down and bottom-up methodology. Equal weight is placed on country, sector and stock decisions. Minimal use is made of cash equivalents. Portfolios are diversified with about 100 securities; a third are small-cap issues.

The asset mix Jan. 1 was 84% stocks, 1% bonds and 15% cash.

The firm is a joint venture of Wertheim Asset Management and the Philippe Group. Total assets under management by the parent companies, subsidiaries and affiliates are $1.909 billion.

Beatrice Philippe, managing director, is chief investment officer. Steven W. Golann, managing director, is client contact.

## Western Asset Management

*707 Wilshire Blvd., Los Angeles, Calif. 90017; (213) 614-2619*

| | |
|---|---|
| Total assets managed | $3,778,000,000 |
| Tax-exempt assets managed | $2,729,000,000 |
| 401(k) assets managed | $20,000,000 |
| Mortgage-backed assets managed | $873,000,000 |
| Tax-exempt clients | 27 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $25,000,000 |
| No. of portfolio managers | 7 |
| Size of research staff | 3 |

Western Asset Management Co. is a fixed-income manager.

Its fixed-income approach is passive and uses interest rate anticipation and sector analysis for structured products that combine conservative investment techniques with progressive quantitative analysis to add value.

The asset mix Jan. 1 was 45% bonds, 23% cash and 32% mortgage-backed securities.

There was $65 million in bond index funds. There is one 401(k) client.

Options and fixed-income futures are used. Half of the research is generated internally.

The parent company is Legg Mason Inc. Total assets under management by the parent company, subsidiaries and affiliates are $4.8 billion.

Clients include AT&T, Minnesota, International Ladies Garment Workers Union and NYNEX.

W. Curtis Livingston, managing director and chief executive officer, is chief investment officer. Randolph L. Kohn, vice president and director of marketing, is client contact.

## Wheat Investment Advisors

*707 E. Main St., Richmond, Va. 23219; (804) 649-2311*

| | |
|---|---|
| Total assets managed | $538,000,000 |
| Tax-exempt assets managed | $328,000,000 |
| Tax-exempt clients | 57 |
| Types of accounts managed | CEFJG |
| Minimum separate account | $5,000,000 |
| No. of portfolio managers | 7 |
| Size of research staff | 2 |

Wheat Investment Advisors Inc. is an equity and balanced manager.

Its equity approach emphasizes growth stocks. The firm targets companies demonstrating superior current earnings momentum relative to others; earnings are considered a prime determinant of stock price over time.

Its fixed-income approach, used in balanced accounts, is passive, emphasizing sector analysis. The firm invests in quality issues, mainly government related, with a short- to intermediate-term average maturity.

The asset mix Jan. 1 was 70% stocks, 20% bonds and 10% cash.

Clients include James River, International Longshoremen and District of Columbia.

A. Gordon Goodykoontz, president, is chief investment officer. Thomas T. Rankin, vice president, is client contact.

## Wilkens & Nanovic Associates

*35 Mason St., Greenwich, Conn. 06830; (203) 622-1040*

| | |
|---|---|
| Total assets managed | $466,000,000 |
| Tax-exempt assets managed | $466,000,000 |
| Tax-exempt clients | 4 |
| Types of accounts managed | C |
| Minimum separate account | $15,000,000 |
| No. of portfolio managers | 2 |

Wilkens & Nanovic Associates is a risk-averse core equity manager focusing on identifying fundamental changes within companies whose stocks at purchase exhibit limited downside risk. Portfolios are diversified; cash reserves may reach 50%.

All assets Jan. 1 were in stocks.

It follows 90 stocks closely and 400, generally; 10% of research is generated internally.

Clients are GenCorp, RJR-Nabisco, Sea-Land and Inco.

Frank Wilkens is chief investment officer. Ruth Koolsbergen is client contact.

## Wilmington Capital Management Inc.

*1 Rodney Square, Suite 807, Wilmington, Del. 19801; (302) 656-8241*

| | |
|---|---|
| Total assets managed | $978,000,000 |
| Tax-exempt assets managed | $906,000,000 |
| Tax-exempt clients | 19 |

Yield Management Group, a Canadian firm, is an equity, fixed-income, and balanced manager that also specializes in cash, futures and options.

Its equity approach screens stocks for specific historic characteristics — low price-to-book, high return on equity. Graham & Dodd analysis is used; an optimization model is also used.

Its passive fixed-income approach ranges from immunization to return optimization under various interest rate scenarios. Sector analysis is used.

The asset mix Jan. 1 was 20% Canadian stocks, 30% bonds and 50% cash.

There was $50 million in dedicated or immunized bond portfolios.

Eric Innes, partner, is chief investment officer and client contact.

### Zavanelli Portfolio Research

*729 S. Prospect, Park Ridge, Ill. 60068; (312) 823-6718*

| | |
|---|---|
| Total assets managed | $6,000,000 |
| Tax-exempt assets managed | $5,000,000 |
| Tax-exempt clients | 15 |
| Types of accounts managed | CF |
| Minimum separate account | $100,000 |
| No. of portfolio managers | 1 |
| Size of research staff | 4 |

Zavanelli Portfolio Research is an equity manager whose approach is to isolate market inefficiencies by using computerized research techniques in conjunction with theories of investor behavior. It has developed a system claimed to be a significant expansion of modern portfolio theory and efficient market theory.

Assets Jan. 1 were all in stocks.

Options are used.

Clients include Tatham-Laird & Kudner, Frankel Furniture and Aluminum Design.

Max Zavanelli, president, is chief investment officer. Cecil Suter, executive vice president, is client contact.

# Passive . . .

*Continued from page 2*

10 bond index fund managers are banks or bank subsidiaries.

The total assets passively managed by insurance companies as of Jan. 1 was $257.5 billion, or 16.9% of the total tax-exempt assets in *P&I Age*'s survey. In the survey a year earlier, insurance companies reported passively managing $210.3 billion or 17.3% of the total tax-exempt assets at that time.

Passive assets managed by insurers as of Jan. 1 include $32.5 billion in bullet guaranteed investment contracts, which are contracts purchased with a single payment, and $42.86 billion in window GICs, which are contracts that can be purchased in installments. (Those figures do not include $26.5 billion in GICs reported by three insurance companies that didn't give a breakdown between window and bullet investments.)

The insurance companies also reported $106.912 billion in other passively managed general account products, which include immediate participation guarantee contracts.

Annuity assets managed by Prudential Asset Management Inc., Newark, N.J. dropped to $8.219 billion as of Jan. 1, from $11.237 billion a year earlier.

Sue O'Brien, manager of marketing, said the decline was partly due to excluding annuities purchased for one company's terminated plans.

Last summer, Prudential agreed to guarantee payment of liabilities for a $2.8 billion pension plan terminated by Union Carbide Corp., Danbury, Conn. But the contract was listed as part of general (non-passive) business because it isn't a traditional annuity arrangement. Carbide has retained full discretion over investment management of the assets backing the liabilities.

Banks managed $118.3 billion in total passive assets as of Jan. 1, of which $81.6 billion was in equity index funds, $17.7 billion in bond index funds and $18.9 billion in dedicated or immunized portfolios.

Investment counseling firms managed $36.6 billion in total passive assets as of Jan. 1, of which $16.9 billion was in equity index funds, $6.3 billion in bond index funds and $13.4 billion in dedicated or immunized portfolios. ■

# Gold, growth stocks lead

## Both give top managers edge in 1st-quarter returns

**By Fred Williams**

SILVER SPRING, Md. — Gold stocks and small- to medium-growth stocks helped the top-performing equity managers in the first quarter and for the 12 months ended March 31, according to the most recent report by CDA Investment Technologies Inc.

Pension Management Co., Houston, finished at the top of the list for both the three- and 12-month periods ended March 31. Pension Management returned 53.1% for the quarter and 53.9% for the 12 months, according to CDA.

The Standard & Poor's 500 stock index returned 21.3% for the quarter ended March 31 and 31.7% for the 12 months ended March 31.

National Investment Services of America, Milwaukee, finished No. 2 for the 12 months with a return of 42.1%.

NISA was the top-performing equity manager for the three-year period ended March 31 with a compound annual return of 40.7%.

Ruane Cunniff & Co., New York, topped the list for the five year period with an annualized 32.3%.

Pension Management, with $32 million under management, $30 million of which is tax-exempt, rode the wave to the top aboard a portfolio containing only nine stocks, but heavily weighted with gold stocks.

John Lee, chief investment officer, said Pension Management relies heavily on investment research and usually owns between six and 24 stocks.

"We are aggressive within the listed securities we follow. We put in an inordinately large amount of research to select a very few stocks," he said.

The nine stocks in the $2 million Pension Management equity portfolio were **Freeport-McMoran Gold Co., Newmont Mining Corp., Echo Bay Mines, Battle Mountain Gold Co., Sunshine Mining Co., Benguet Co., Imperial Corp. of America, Allis-Chalmers Corp.** and **International Bank Note**.

Pension Management started moving into gold stocks during the second half of 1986 and plans to stay with gold issues.

"We look for gold to move to $700 an ounce over the next few years (from about $430 now); gold is in a long-term secular upturn," he said.

NISA, with about $250 million in equities under management, stuck with growth stocks to compile the best three-year record and next to the top for the one year period.

"We are growth managers and look for small- to medium-capitalization, growth-type stocks," said Cathy Morgan, vice president and portfolio manager.

"We haven't done a lot of portfolio manipulating, we stuck with solid growth companies over these periods, but we did pick up some computer and technology issues prior to year-end 1986 and they did very well for us."

Some of the longer-term issues in the NISA portfolio include **The Limited Inc., Liz Claiborne Inc., Cray Research Inc., Rent-a-Center Inc., Oshkosh B'Gosh Inc. and Computer Associates Inc.**

Added to the list in the first quarter were **Reebok International Ltd.** and **Digital Equipment Corp.**

Tower Capital Management Inc., Avon, Conn., finished in the third position among the top 20 equity managers for the one-year period with a 40.9% return and seventh for the quarter with 37.1%.

Tower also invests in small-capitalization, high-growth companies.

"Investors' appetite for these stocks has lagged for the last three years," said Roy McKay, managing director at Tower Capital.

"That was rekindled in the last quarter. We think it started in the fourth quarter of 1986 but was masked by year-end tax selling. When tax selling stopped, it then became apparent.

"It is also part of a massive secular shift from primary inflation-sensitive areas between 1983 and 1986 to investors now focusing on earnings growth.

"During the fourth quarter, there was a shift toward technology stocks, those cyclical in nature.

"We doubled our exposure to the semiconductor companies. That helped us a lot in the first quarter. We also doubled our exposure to the semiconductor capital-equipment makers."

**KLA Instruments** and **Intel Corp.** were among the semiconductor companies owned by Tower, and **Digital Communications Inc., 3-Com Corp.** and **Novell Co.** were among its semiconductor capital-equipment holdings.

California First Capital Management, La Jolla, finished the quarter in third position with a return of 46.4% and fourth for the year with 39.5%.

California First also invests in aggressive growth, small-cap companies using a bottom-up, stock-picking approach, said John French, vice president.

"It was a good year for us," said Mr. French.

"We earned a great deal of money from consumer stocks, specialty retailers.

"Late in the year we observed analysts increasing earnings estimates for technology stocks and we began positioning ourselves in these stocks. We went from 10% in technology to over 30% by year end.

"Our consumer and technology stocks have performed very well."

Among the issues owned by California First were **Computer Factories Inc., Microsoft Corp., Seagate Technologies, Gap Inc., Safecard Inc.** and **Telecredit Corp.**

Portfolio size for the top 20 investment managers in the CDA list for the 12 months ended March 31 ranged from $2 million at Pension Management Co. to $3.8 billion at Investors Research Corp., Kansas City, Mo.

The CDA report is based on the 13(f) filings of all investment managers.

Only common equity assets are covered and cash holdings are not reflected in the results.

The portfolios are "frozen" at the beginning of the quarter and valued at the end of the quarter, with no allowance made for intraquarter transactions. ■

# RCB . . .

*Continued from page 4*

and cash. Mr. Barksdale declined to name them.

The Wells Fargo factored tilt fund, launched July 1, was added to the RCB fund.

The Wells fund had $234 million in assets March 31, said Michael J. Henman, vice president at Wells Fargo. Its return for the quarter ended March 31 was 20.95%, and for the six months ended Dec. 31, −1.76%.

The S&P 500 index for the quarter ended March 31 returned 21.4% and for the six months ended Dec. 31, −1.8%, according to Rogers, Casey & Barksdale.

The Wells Fargo fund invests in the S&P 500 index, but its weighting is tilted regularly to obtain optimum performance and maintain a beta of 1.

Factors determining its tilt are capitalization rates, yields and price-to-earnings and price-to-book ratios, Mr. Henman said.

The addition of indexing to multimanager programs is welcomed by the investing industry. Paul Erlendson, a consultant with Callan Associates Inc., San Francisco, said, "We expect this to grow particularly as plan sponsors continue having trouble beating indexes."

Evaluation Associates Inc., Westport, Conn., recently applied to the Securities and Exchange Commission to add an indexing component to a multimanager pool Evaluation Associates operates for banks.

The Wells Fargo indexed product has been added to the RCB fund's core equity component, which now has three active managers.

Other components of the Fund for Employee Benefit Trusts are defensive equity, small-capitalization equity, core fixed income, special fixed income and cash. ■

# Competitive . . .

*Continued from page 2*

1970s.

Staff was pared back sharply, and new managers were hired to bring an entrepreneurial quality to the firm. "We basically took a fairly large firm . . . and turned it sideways," said Stephen E. Canter, who has served as president and chief investment officer since 1980.

In addition, in early 1981, Chase implemented a compensation scheme that tied incentive payments to the profitability of both a manager's specialized shop and the firm's overall success.

In the late 1970s, many banks started developing heavily quantitative fixed-income products, such as dedicated and immunized bond portfolios. With interest rates soaring, pension money flowed.

Shortly thereafter, spinoffs of bank trust departments freed numerous investment shops from restrictive bank compensation practices and, probably to a lesser extent, bank bureaucratic tendencies. The gap between compensation at the biggest banks and money management firms closed dramatically, with some now claiming the biggest banks are competitive with money managers.

"The most aggressive organizations . . . are getting closer and closer," said Al van den Broek, managing director of management consultants McLagan Partners Inc., Stamford, Conn. "But if you take the bank group as a whole, they are still struggling."

Before the banks set up investment subsidiaries, compensation typically was a base salary plus a bonus of 20% to 30%, using a standard bank formula such as management by objective, said Robert Greenberg, a compensation consultant for Towers, Perrin, Forster & Crosby, New York.

Now, compensation packages at major banks approximate partnership interests, providing short-term bonuses based on investment performance relative to a benchmark, plus long-term incentives based on profitability, he said.

A typical chief of equities in a major bank earns a base salary of $200,000 or more plus 60% to 70% of the base in annual bonus and a long-term incentive, Mr. Greenberg said. "That whole package could compare with any individual investment firm," he said, although it obviously wouldn't better the $1 million packages available at the wealthiest independents, where equity interests are involved.

Compensation at middle-tier banks still lags sharply. A recent study by Mercer-Meidinger-Hansen found department heads at independent firms with $1 billion to $5 billion in assets under management average $171,700 a year, more than twice the $79,100 paid their counterparts at comparably sized banks.

"No longer are the banks at a serious disadvantage," said Craig Uhlrich, a compensation consultant at Mercer-Meidinger-Hansen in New York. But they still can't compete in providing an equity stake, he said.

While compensation has narrowed, changes in the bureaucratic environment have come less easily.

"What you had was a fairly shocking cultural change," said Gary Brinson, president and chief investment officer of First Chicago Investment Advisors, which was spun off from First National Bank of Chicago in 1983.

The single biggest change at his shop was assembling a team with the right attitude and work ethic, Mr. Brinson said.

Even with spinoffs, the right atmosphere wasn't always created. And there still were defections. For example, the entire investment staff of Merchants Investment Counseling Inc., a wholly owned unit started from scratch by Merchants National Corp., Indianapolis, left in 1984 to form Heartland Capital Management Inc. in Indianapolis.

"The basic, fundamental reason (for leaving) was that we were unable to have any ownership interest in that company," explained Barry Ebert, Heartland's president and chief investment officer.

At some banks, executives decided to develop products built on banks' traditional strengths.

Lawrence Davanzo, senior vice president at Wilshire Associates, Santa Monica, Calif., said the strongest banks have developed "hybrid" products, often with a quantitative base, that "don't require any star status."

Such products don't need "any genius investment guy," but rather a "very good technical guy," Mr. Davanzo explained.

J.P. Morgan Investment Management Inc., New York, a subsidiary of J.P. Morgan and Co., was cited by several observers as one of the major success stories in recent years, building strengths in a variety of product lines.

Morgan has become "a powerhouse in the fixed-income area," said William Petty III, executive vice president of Estabrook Capital Management, New York.

About 20% of Morgan's $48 billion in tax-exempt assets are in products that didn't exist eight years ago, said William Cobb Jr., a managing director at Morgan. The bank subsidiary is the leading manager of dedicated and immunized bond funds, with $6.3 billion under management as of Jan. 1. In addition, it ran dynamic hedging overlays on $4.2 billion in assets.

And, of course, banks have carved out major niches for themselves in indexed assets, with Wells Fargo Investment Advisors, San Francisco, being the clear leader; it alone runs $34.3 billion in equity index funds. Wells, along with American National Bank, Chicago, and Batterymarch Financial Management, Boston, an independent firm that later withdrew from indexing, led the way since the mid-1970s.

Michael Henman, vice president and manager of client service and business development for Wells Fargo, said both the spinoff of the trust unit and development of heavily computer-driven processes spurred the unit's growth.

Now, those banks and others lead the indexation field. Of the $128.9 billion in indexed stock and bond assets reported by money managers as of Jan. 1, banks ran $81.62 billion, or 63.3%.

Banks are particularly strong at this type of business because they have the money to purchase computer hardware and software. In addition, the banks run more than $18.7 billion in dedicated or immunized bond portfolios, another heavily quantitative technique.

Even in the traditional equity area, banks have closed the gap in performance between them and the independent firms.

In fact, for the three- and five-year period ended Dec. 31, banks outperformed independent advisers, according to SEI Corp., Wayne, Pa. For the five-year period, banks returned 18.6% vs. 18.3% for the independents, and for three years, banks returned 16.5%, compared with 16.4% for the independents. ■

# Manager . . .

*Continued from page 4*

tely busy to get into alternative investments. Manager of managers has a limited appetite."

Collins Associates has about $140 million under management from six discretionary manager-of-manager clients, including Dravo Corp., Pittsburgh; Goulds Pumps, Inc., Seneca Falls, N.Y.; and Pacific Power & Light Co., Portland, Ore. Under the arrangement, Collins takes full responsibility for hiring, evaluating and firing managers.

Fredric D. Reed, senior vice president of Pacific Power & Light, said using the manager-of-manager approach has helped the fund achieve diversification and other services such as asset allocation and manager selection. Collins manages less than 5% of Pacific Power's $235 million in total pension fund assets.

Glenn Kent, a director of Abel/Noser, has a little more than $40 million under management from two clients, a large national union and the pension fund of a big Canadian bank. Abel/Noser offers an equity-oriented fund managed by six managers. "It is designed strictly for the smaller firms that don't have the resources to do this themselves and want to delegate it to me," Mr. Kent said.

Paul Berg, president of Berg Fiduciary, has five manager-of-manager clients and $75 million in assets under management.

The clients include the American Society of Civil Engineers, New York, the Sheet Metal Workers Union Local 85, Atlanta, and Insilco Corp., Meriden, Conn.

"It's the smallest part of our business but the quickest growing. We picked up five clients in one year," Mr. Berg said. ■

# Strategic asset allocation

## Strategy may ease pressure to find 'best' manager

**Feature**

By Michael E. Schroer

Asset allocation, as everyone knows, is the primary determinant of investment returns. Yet, until recently, thinking of asset allocation in the strategic sense has taken a back seat to selecting specialty equity and fixed-income managers for many plan executives.

In terms of time and effort spent evaluating and choosing various investment managers, many plan executives spend an inordinate amount of time trying to select the best equity manager among equity managers, or the best fixed-income manager among fixed-income managers. Improved portfolio results, in many instances, could be achieved more readily through the addition of a strategic asset allocation manager to influence overall plan allocation.

Table 1 shows the results of the median (50th percentile) equity and fixed-income managers from SEI Corp.'s data base for the calendar years 1981 through 1985. In addition, the returns from cash equivalents (Treasury bills) are also displayed in the table. Assuming a reasonably common allocation for a typical pension fund of 55% stocks, 30% bonds and 15% cash equivalents, a plan executive would achieve a compound rate of return for the total portfolio of 13.4% in the five-year period.

Now consider the results this executive would have achieved if he had been able to select superior equity and bond fund managers. Specifically, let's assume this executive selected the 25th percentile managers from the SEI equity fund and bond fund universes every single year from 1981 to 1985. Admittedly, the possibility of doing this for every calendar year is exceedingly slim, but the results in Table 2 should designate a "best case" result for the strategy of selecting superior equity and bond managers.

By successfully selecting superior equity and fixed-income managers in every year, the executive was able to achieve a return of 16.9% for the five-year period.

While this incremental return of 300 basis points is significant, keep in mind the difficulties of selecting a top 25th percentile manager (both equity and bond) every single year.

Now consider the results if the executive were able to implement a strategic asset allocation policy for the plan. The term strategic refers to a deviation from the plan's long-term asset allocation guidelines in order to take advantage of temporary mispricings of various asset classes.

In this case, assume a deviation of plus or minus 10% is allowed from the plan's long-term guidelines and that the strategic asset allocation process was able to determine the best and worst alternatives in any given year. For the years 1981 through 1985, the best and worst alternatives varied, as shown in Table 3.

The implementation of a strategic asset allocation process would result in the allocation to the best-performing asset class being increased 10%, and the worst-performing asset class being decreased a like amount in any given year. The annual allocation for this particular plan is detailed in Table 4.

Note the five-year average allocation to stocks, bonds and cash equivalents is virtually identical to the plan's long-term guidelines. However, the asset allocation is "tilted" toward particular asset classes in different years in order to take advantage of intramarket inefficiencies.

What would the results be if the plan executive implemented an effective strategic asset allocation policy using median equity and fixed-income managers? The results are found in Table 5.

The compound rate of return for the five-year period would have been 15.6%, an incremental return of 220 basis points over a static asset allocation strategy using median managers. This incremental return from strategic asset allocation using 25th percentile managers is 57% of the incremental return achieved through static asset allocation using median managers. Importantly, the long-term asset allocation of the fund would be affected very little by periodic strategic shifts.

This is not to imply plan executives should give up looking for superior equity and fixed-income managers, but simply points out strategic asset allocation can achieve most of the benefit from the selection of superior managers, even assuming a "best case" scenario.

Assuming a plan executive has the ability to select superior managers, and employs an effective strategic asset allocation policy, the potential returns for the plan rise even further. The figures in Table 6 show the results of a successful strategic asset allocation policy using top-quartile equity and fixed-income managers.

The incremental return from this example is 460 basis points more than the first example of static asset allocation using median managers.

The examples discussed above admittedly are simplistic, but do serve to point out the significant incremental returns achievable through a program of strategic asset allocation. It is worth noting that all of these examples assume a rebalancing of asset allocation commitments only every calendar year (how many equity and fixed-income managers rebalance their portfolios only on Jan. 1?). Even so, our hypothetical executive achieved superior results without significantly altering his long-term asset allocation guidelines.

An approach emphasizing active asset allocation combined with the use of superior equity and fixed-income managers can add even more in the way of incremental return.

As executives consider investment options for their plans, they should first focus on the possibility of incorporating a strategic asset allocation process into their management structure.

Such a process is achievable and will carry more impact on investment results than almost any other decision an executive may make. ■

*Michael E. Schroer is vice president at Renaissance Investment Management Inc., Cincinnati.*

# Assets of top 100 . . .

*Continued from page 1*

money managers in this year's survey are Miller, Anderson and Sherrerd, with tax-exempt assets of $11.5 billion, up from fifth place last year; Lehman Management Co., $11.48 billion, which didn't rank among the top 25 last year; Scudder, Stevens & Clark, $11.3 billion, down from the No. 2 spot; Delaware Investment Advisers, $11.1 billion, dropping from third place; and Boston Co., $10.36 billion, up from 14th last year.

The 25 largest banks and trust companies and their subsidiaries reported a dramatic 33% increase in tax-exempt assets under management in the year ended Jan. 1. The top 25 reported $405.1 billion in tax-exempt assets as of Jan. 1, compared with $303.8 billion the previous year.

The five banks and trust companies and subsidiaries reporting the most in tax-exempt assets under management as of Jan. 1 are Wells Fargo & Co., with $53.9 billion, up from third place last year; J.P. Morgan Investment Management Inc., retaining second place with $48.2 billion; Bankers Trust — Investment Management Group, $46.9 billion, which ranked first last year; Mellon Bank, retaining fourth place with $35.9 billion; and State Street Bank and Trust, up from ninth place, with $23.6 billion.

Four of the top five are prominent in the management of index funds, an investment approach favored by pension funds last year.

The 25 largest insurance companies and subsidiaries reported $399.5 billion in tax-exempt assets under management as of Jan. 1, a 14.2% increase from the previous year's total of $349.7 billion.

The five largest insurers and their subsidiaries are Prudential Insurance Co., retaining its top spot with $76.2 billion in tax-exempt assets under management as of Jan. 1; Metropolitan Life Insurance, $51.5 billion, up from third place; Aetna Life & Casualty Co., $38.9 billion, up from fourth; Equitable Life Assurance Society, $37.5 billion, dropping from second; and The New England, $26.3 billion, which ranked 26th last year.

A look at the average asset mix of tax-exempt assets shows, once again, that the smaller manager continues to invest most heavily in equities. That's largely because smaller managers tend to specialize in one investment medium, such as stocks, while larger managers often offer a full range of investment vehicles.

The average asset mix of the tax-exempt assets of the top 200 money managers showed only slight changes. The composite asset mix as of Jan. 1 (with percentages for a year earlier in parentheses) for the top 200 was: stocks, 48% (49%); bonds, 30% (29%); cash, 10% (9%); equity real estate, 6% (7%); mortgages, 1% (2%); mortgage-backed securities, 2% (unchanged); and other asset classes, 3% (2%).

Among all managers (except Canadians) surveyed, the average asset mix as of Jan. 1 (with last year's in parentheses) was: stocks, 54% (55%); bonds, 23% (24%); cash, 10% (unchanged); equity real estate, 6% (5%); mortgages, 1% (2%); mortgage-backed securities, 2% (1%); and other classes, 4% (3%).

The composite asset mixes by adviser category were as follows:

- Independent investment advisers: stocks, 57% (56%); bonds, 20% (22%); cash, 10% (unchanged); equity real estate, 6% (5%); mortgages, 1% (2%); mortgage-backed securities, 2% (1%); and other, 4% (unchanged).
- Insurance company separate accounts and their subsidiaries: stocks, 52% (46%); bonds, 22% (21%); cash, 11% (12%); equity real estate, 7% (9%); mortgages, 3% (6%); mortgage-backed securities, 1% (2%); and other, 4% (unchanged).
- Banks, trust companies and their subsidiaries: stocks, 45% (48%); bonds, 34% (36%); cash, 11% (unchanged); equity real estate, 4% (1%); mortgages, 1% (unchanged); mortgage-backed securities, 2% (unchanged); and other, 3% (1%).

The composite tax-exempt asset mix among Canadian managers showed an increase in Canadian equities but a slight decline in U.S. stocks: Canadian equities, 36% (33%); bonds, 36% (38%); cash, 8% (11%); equity real estate, 4% (unchanged); mortgages, 3% (unchanged); U.S. equities, 8% (10%); and other, 5% (1%).

The Canadian investment managers surveyed this year reported $48.08 billion in total tax-exempt assets under management. The five leaders were Jarislowsky, Fraser & Co., with $4.2 billion; Toronto Investment Management, $3.7 billion; Confed Investment Counselling Ltd., $2.72 billion; Beutel Goodman & Co. Ltd., $2.4 billion; and Morguard Investments Ltd., $2.39 billion. ■

# Execs . . .

*Continued from page 6*

salaries and bonuses.

- Limits on a person's salary exist in 15% of the firms.
- About 93% of the firms pay annual incentive compensation or bonuses to investment personnel. The "vast majority" base bonuses on profitability of the firm.
- About 25% of the firms have formal employment contracts for key personnel.
- Equity ownership is offered to employees in nearly 45% of the organizations responding to the survey.
- About 10% of the firms have gone public or plan to within the next year.
- Firms responding to the survey said they experienced an average 52% increase in tax-exempt assets under management in 1986.
- The respondents had an average of 12 male and nine female employees in investment management positions. An average of eight male and three female key employees were in essential investment and marketing personnel positions. ■

# California fights Standard buy-out

**By Marcia Parker**

SACRAMENTO, Calif. — The $37.7 billion California Public Employees' Retirement System, a large stockholder in Standard Oil Co., is considering legal action that could derail British Petroleum Co.'s $7.7 billion bid for Standard Oil.

Greta Marshall, investment manager for the California employees fund, Sacramento, opposes London-based BP's final $71.50-per-share plus warrants offer for Standard Oil. She has written to Robert P. Horton, Standard's chairman, and to the members of the special committee of outside directors who examined and recommended the BP offer, urging them to reconsider.

She is also trying to stir support among other large public pension funds that are big stakeholders in the Cleveland company.

So far, Ms. Marshall's letter-writing campaign has generated no support from the outside directors. All declined to talk to California's General Counsel Richard H. Koppes, or his staff, or *Pensions & Investment Age*. The directors referred all calls to the special committee's counsel, Sam Butler of Cravath Swaine & Moore in New York, and George Dunn, Standard Oil vice president and general counsel. Both declined comment.

The outside directors are Elizabeth Bailey, dean of the Graduate School of Industrial Administration, Carnegie-Mellon University, Pittsburgh; Douglas Danforth, chairman, Westinghouse Electric Corp., Pittsburgh; Joseph Gorman, president, TRW Inc., Cleveland; and Charles Knight, Emerson Electric Co., St. Louis.

Ms. Marshall hasn't won substantial support from the other major public pension funds. Most of the public funds that received copies of the letter to the outside directors have sold their Standard Oil stock, reaping large profits.

The funds that have sold their holdings include the $13.2 billion Teacher Retirement System of Texas, Austin, which owned 951,900 shares; the $20.2 billion New York State Teachers' Retirement System, Albany, which owned 862,300 shares; and the Public Employees' Retirement Association of Colorado, Denver, which owned 463,900 shares.

"We made a $21 million profit. We sold most of it on the open market and tendered the rest. We felt satisfied with the offer," said Joseph Perrone, chief investment officer of the Texas fund.

But the lack of support has not stopped Ms. Marshall.

"We intend to see if we can

# Pension/inventory link may raise funding cost

**By Joel Chernoff**

NEW YORK — Companies must allocate a portion of their pension costs to inventory costs under a little-noted provision in last year's tax law.

This means the pension costs will be capitalized during the period it takes to sell off the manufactured items.

The change in treatment of pension costs may result in short-term increases in taxes and deferral of pension deductions for numerous companies, particularly manufacturers and retailers, in effect boosting their pension costs.

The 1986 Tax Reform Act requires companies to include normal pension costs in inventory as an indirect cost, among a host of similar changes in the uniform capitalization rules enacted by Congress last year. The changes, however, do not affect pension costs for past service liabilities.

In a revenue-raising move, Congress required companies to revalue their inventories for tax years beginning Jan. 1. Companies are allowed, however, to spread out the effect of that change over four years.

Because of that revaluation requirement, the Treasury Department will reap a "one-shot" gain where those changes boost the value of inventories, said Ethan Kra, principal and actuary at William M. Mercer-Meidinger-Hansen Inc., New York.

Inventories will be boosted by the amount of the includable pension costs. Because gross income equals net sales plus changes in inventory, companies with expanding inventories will face rising tax bills in the next several years.

The uniform capitalization rules are expected to raise $4.1 billion in new revenue this year; $7 billion in 1988; $7.4 billion in 1989; $7.7 billion in 1990; and $6 billion in 1991. A breakdown of how much revenue the pension provisions will raise was not available.

Before the passage of last year's tax law, employers had been required to include in inventory costs all direct production costs, such as materials and labor costs. While inclusion of some indirect costs also was required, pension contributions were not.

# 5% tax on plans aired

**By Nicky Robertshaw**

WASHINGTON — Congress should consider placing a 5% federal tax on investment income earned by pension plans, and further reduce the amounts employers can contribute to such plans, according to a study by the Congressional Budget Office.

The study said such actions could help finance other pension law changes that would broaden the distribution of pension benefits to lower-income employees, frequent job changers and the elderly poor.

But the study also said such changes could be used to "achieve non-retirement objectives such as a lower deficit, a further lowering of tax rates or increases in other spending programs."

In addition, the study suggested requiring employers to index deferred annuities in defined benefit plans for inflation, and requiring employers to adopt 401(k) salary reduction plans.

The study found tax incentives now are skewed toward high-income and long-term workers. Social Security combined with private retirement benefits enables lower-income workers to achieve roughly the same proportion of pre-retirement income as better-paid employees. The retirement benefits of a worker who fails to achieve 20 years under a single pension plan are only 25% to 50% as large as those of the worker who stays 20 years or more.

The study was made at the request nearly four years ago of Sen. Robert Dole, R-Kan., when he served as chairman of the Senate Finance Committee. Sen. Dole now serves as Senate minority leader.

The study was designed to take a broader look at the effects of recent legislative changes. Specifically, it was to explore who gains the most from current tax benefits, how much saving is boosted by tax incentives, the relative advantages of defined benefit and defined contribution plans, and

# NYC divests stocks of 9 companies

By Trudy Ring

NEW YORK — The $12.5 billion New York City Employees' Retirement System has sold about $86 million worth of stock in nine companies that violate the city's guidelines for companies operating in South Africa.

The action brings the total sale of stock under the system's divestiture program to $178.9 million in 26 companies.

In the most recent sale, stock of six of the companies was divested because the companies violated Phase I of the anti-apartheid program by selling goods to the South African government, military, police or quasi-governmental agencies. The stock of the other three companies was sold because those companies violated Phase II of the program by failing to submit to independent monitoring of their activities in South Africa.

In announcing the sale, Comptroller Harrison J. Goldin said these companies' activities made them poor investment risks as well as socially undesirable.

"I am disappointed that more American companies have not on their own realized what we investors have: short-term profits in the South African slave market ill serve long-term stability and economic growth," he said.

Stocks sold under Phase I were **American Cyanamid Co.**, 36,300 shares at $7.8 million; **Dresser Industries Inc.**, 162,700 shares at $4.3 million; **Joy Manufacturing Co.**, 48,050 shares at $1.7 million; **Monsanto Co.**, 151,100 shares at $11.9 million; **Royal Dutch Petroleum Co.**, 303,700 shares at $36.5 million; and **Schlumberger Ltd.**, 404,268 shares at $17.1 million.

Royal Dutch sells to the South African police and military and Schlumberger to the government, while the others sell to quasi-governmental energy commissions, said Jon Lukomnik, a spokesman for the comptroller's office.

The sale of Royal Dutch means the system loses votes at a time when Mr. Goldin and other institutional investors are trying to rally shareholder support for a special meeting on Royal Dutch's South African operations. Mr. Lukomnik said some institutions were not happy with New York's action, but it was necessary to keep the system's divestiture program on schedule.

Other New York City pension funds, which have a similar divestiture program, are somewhat behind this schedule and still hold at least 355,000 shares of Royal Dutch. They have pledged their support in the call for the special meeting.

The $11.7 billion New York City Teachers' Retirement System and the $825 million Ministers and Missionaries Benefit Board of the American Baptist Churches took the lead in issuing the call, but other New York City pension funds supported it (*Pensions & Investment Age*, April 6).

To call the special meeting, holders of 10% of Royal Dutch's stock, or about 4.8 million shares, must pledge their support. Mr. Lukomnik said close to half that amount has been pledged. There is no deadline.

Sold under Phase II were **Air Express International Corp.**, 36,300 shares at $568,565; **Echlin Inc.**, 134,800 shares at $3 million; and **Timken Co.**, 58,600 shares at $3.1 million. These companies have not endorsed the Sullivan Principles, a code of non-discriminatory conduct for business operations in South Africa, Mr. Lukomnik said.

The fund realized a gain of $32.4 million on the sales. The sales complete the first two phases of the system's divestiture, begun in 1984. Fund officials hope to complete Phases III and IV by the end of this year.

Under the third phase, companies' stock

# Fund diversion is alleged

## U.S. says 3 converted $681,000 for own use

By Trudy Ring

CHICAGO — The U.S. attorney's office in Chicago has charged three men with ERISA violations and other crimes after the three allegedly diverted $681,000 of DuPage Boiler Works' profit-sharing assets to their own use.

The three are Morton Scherl, who had been chairman of the DuPage Boiler Works, Naperville, Ill., and sole trustee of the fund; William B. Goodstein, former secretary of the company; and Jack Eberwein, former vice president. The boiler works, which once employed 50 people, went bankrupt and closed in 1986.

The Department of Labor also has filed a civil suit against Messrs. Scherl and Goodstein, charging they violated the Employee Retirement Income Security Act's prohibited transaction and conflict of interests provisions.

The criminal indictment, returned against the men May 20 as a result of the investigation by the U.S. attorney's office and other agencies, charges Messrs. Scherl and Goodstein mutually committed bankruptcy fraud when Mr. Scherl, using the name Robert Caldwell, bought an interest in The Paine Co., a Chicago-based fastener company, in which Mr. Goodstein also held an interest.

At the time of the purchase, September 1983, Paine was being reorganized under bankruptcy laws and allegedly owed $300,000 to Foothill Capital Corp., Des Plaines. Paine was liquidated in December 1985.

The indictment alleges after Mr. Scherl bought DuPage Boiler Works, he and Mr. Goodstein entered agreements to repay Paine's debt to Foothill. At the time, the boiler works had about $741,000 in profit-sharing assets.

Through a series of letters, telephone calls and wire transfers, Messrs. Scherl, Goodstein and Eberwein converted $681,000 to their own use, in violation of ERISA, the indictment alleges. Mr. Scherl is charged with converting $681,000, Mr. Goodstein, $299,000 and Mr. Eberwein, $1,000. While Mr. Scherl is charged with converting the entire amount, Messrs. Goodstein and Eberwein are charged with involvement in the conversions of those portions of the total.

A large part of Paine's debt to Foothill allegedly was paid with DuPage profit-sharing assets.

The indictment also alleges the three men caused about $50,000 in discounts and penalties to be imposed on the profit-sharing fund in its transfer to Illinois banks from Union Mutual Life Insurance Co. (now UNUM Corp.), Portland, Maine. The assets were in a guaranteed annuity contract.

Mr. Goodstein also allegedly borrowed money from an escrow account under his control and replaced it with profit-sharing assets while trying to keep Foothill from foreclosing Paine's debt.

The boiler works had no other retirement plan, so the beneficiaries are receiving nothing now, said Joan Bainbridge Safford, one of the assistant U.S. attorneys who coordinated the investigation.

Mr. Scherl is charged with two counts of bankruptcy fraud, 17 counts of mail fraud, eight counts of wire fraud, one count of ERISA fraud, two counts of obstruction of justice and one count of escape. He has been missing since Oct. 9.

Mr. Goodstein is charged with 16 counts of mail fraud, seven counts of wire fraud, one count of ERISA fraud and two counts of bankruptcy fraud.

Mr. Eberwein is charged with one count of wire fraud and one count of ERISA fraud.

Each count carries a maximum penalty of five years in jail and a $250,000 fine, plus restitution.

The Labor Department's suit, filed May 22 in U.S. District Court in Chicago, makes much the same allegations concerning the activities of Messrs. Scherl and Goodstein. It does not name Mr. Eberwein as a defendant.

It does call for the appointment of an interim trustee to investigate other possible improprieties in relation to the profit-sharing plan and to administer the plan.

The Labor Department seeks reimbursement for the plan's losses and indemnification against further losses. It also seeks to bar Messrs. Scherl and Goodstein from being fiduciaries of any ERISA plan. ■

# Real Estate

## Co-investing provides alternative

By John Covaleski

Disillusioned by the lack of investor control provided by traditional commingled real estate funds, but lacking the assets to acquire prime property themselves, some pension funds are turning to co-investing with other institutional investors.

Like commingled funds, co-investments combine investors' assets to acquire major properties and spread risk. But unlike the pools, co-investing allows pension funds to select specific investment properties and partners.

Pension officials generally combine fund assets with those of other pension funds or insurance companies and, occasionally, with trusts or commingled pools operated by asset managers.

Thomas D. Rollinger, assistant treasurer at Pacific Lighting Corp., Los Angeles, said, "In co-investing you have control in picking properties; in commingled funds, you have a small piece in a large number of properties and the fund is run the way the fund (manager) wants to run it."

Paul Saylor, principal at Institutional Property Consultants Inc., Atlanta, said, "Co-investing gives pension funds the security of investing side by side with other investors much like themselves, and at the same time, they are not giving up so much discretion to managers. There's a whole lot of interest in it now."

Investment managers bring pension funds together in co-investments, but it is the pension funds that decide in which properties to invest.

Managers of pooled funds collect investment assets and buy properties themselves.

Among the leading users of real estate co-investing is the $9.1 billion Alaska Permanent Fund Corp., Juneau, whose $363 million invested in real estate consists of $244 million in co-investments.

The fund's real estate investment return for the 12 months ended Sept. 30 was 14.5%, compared with 10.5% for its overall investment portfolio during the same period.

(Real estate returns for the year ended Dec. 31 will be released following a reappraisal of the fund's property holdings.)

Richard E. Alexander, investment officer at the Alaska fund, credits the performance of its co-investment holdings for the higher real estate return, adding co-investing has helped diversify the fund into property types it couldn't hold otherwise.

State law in Alaska prohibits the Alaska Permanent fund from owning more than 40% of any property. But through co-investing, the fund can own a bigger investment share in properties and thereby realize a bigger portion of the properties' returns.

Some major co-investments, all funded since 1984, include:

- The $970 million Pacific Lighting pension fund, Alaska Permanent, Real Estate Fund II managed by Heitman Advisory Corp., Chicago, and some undisclosed foreign groups hold 50% of the equity interest in the $174 million St. Louis Center retail and office project. Melvin Simon & Associates, an Indianapolis real estate company, and May Department Stores, St. Louis, own the other 50%.
- Pacific Lighting and Alaska Permanent last year became co-owners of the $39.4 million Villa Marina Shopping Center in Marina Del Rey, Calif.
- The $6.3 billion Southwestern Bell Corp. pension fund, St. Louis, the $26 billion American Telephone & Telegraph Co. pension fund, New York, and several undisclosed investors are co-owners of a $50 million Pittsburgh shopping center.
- The $18 billion Wisconsin State Board of Investment, Madison, the $15 billion Teacher Retirement System of Texas, Austin, and Alaska Permanent last year provided a $99 million take-out mortgage to the Rouse Co., Columbia, Md., for construction of the Owings Mill (Md.) Town Center shopping complex.
- The Wisconsin fund and Equitable Life Assurance Society of the United States, New York, last year became co-owners of the equity interests in the $63 million Berkshire Mall, Reading, Pa., and a $43 million office project in Minnetonka, Minn.
- The $2.2 billion Atlantic Richfield Co. pension fund, Los Angeles; Alaska Permanent; the British Gas PLC pension fund and undisclosed investors own Tysons Corner shopping mall in McLean, Va.

The mall was acquired in 1985 for $168 million.

- The $40 billion California Public Employees' Retirement System, Sacramento,

## Year-end returns reflect volatility

By Steve Hemmerick

Some pooled real estate funds beat the Standard & Poor's 500 stock index during calendar 1986, while others slipped as much as nine percentage points below the return for Treasury bills, considered a riskless investment, according to Pensions & Investments' Performance Evaluation Report for the periods ended Dec. 31.

"I think the spread on real estate returns is the widest it has ever been," said Warren Hamer, director of sales for New York-based Corporate Property Investors real estate investment trust, one of the best-performing funds with a 20.5% return for the year.

Besides the CPI fund, those that beat the S&P 500 return of 18.7% for 1986 included Citicorp Investment Management, New York, real estate fund with a 19.1% return; LaSalle Advisors Inc., Chicago, Fund II with 20.6% and Metropolitan Life, New York, Fund II with 18.8%.

The returns are considered particularly high by investors because real estate was slumping, while the stock market continued to be bullish in 1986.

Other pooled real estate returns, however, gave investors negative annual returns or at least returns below the 6.12% T-bill rate.

The gap in fund performance underscored the diversity of returns for different property types and different geographic areas. In general, the best returns came from pooled funds holding large properties in the Northeast.

PIPER figures showed open-end funds in the fifth decile had returns in the 9.3% to 9.8% range for 1986; closed-end funds ranked in the fifth decile returned 9.3% to 10.1%.

Considering inflation for the year was 1.1%, a return of about 9% for real estate was "outstanding," said Alan Emkin, a consultant with Wilshire Associates, Santa Monica, Calif. He said pension funds typically expect a return of 3% above the inflation rate, and about half the real estate funds returned twice that.

The $2.2 billion Corporate Property fund return of 20.5% was the highest one-year return for all open-end funds and is calculated after deduction of fees.

According to the FRC Property Index, the highest returns for real estate have been coming from large mall properties and properties generally in the Northeast.

The Corporate Property fund is invested 81% in superregional malls, and 40% of its assets are invested in the Northeast, said Mr. Hamer. The fund's properties are between 95% and 100% occupied, and the average price paid for a property was $70 million.

Large malls are in such demand, said Mr. Hamer, they are being auctioned. Malls generally aren't built on speculation, he said, as are some smaller retail shopping and convenience centers, which are overbuilt.

For closed-end funds, the highest return scored was 20.6% by LaSalle Advisors' Fund II, which is heavily invested in large office buildings in the Northeast.

Other closed-end funds with high returns were Los Angeles-based TCW Realty Advisors Fund II, with a 17% return, just behind Metropolitan Life and LaSalle. Its Fund I, with a 13.2% return, fell into the second decile.

The TCW funds are generally considered to be low risk because almost all cash is paid for existing buildings, avoiding leverage and development risks.

High returns were scored for TCW's $220 million Fund II, said Vince Martin, managing partner, partly by buying substantial industrial properties in three unidentified cities where a shortage of space was expected to raise rental rates.

Rates did rise, said Mr. Martin, but he calls the market for indus-

## Building on bigger gains

### 11 investors enter Copley development fund

By John Covaleski

BOSTON — Commitments of $330 million from 11 investors in a closed-end fund that will invest 75% in developmental projects demonstrates a growing interest in diversifying investments as well as a willingness to take added risk for potentially higher returns.

Among those participating in the fund, managed by Copley Real Estate Advisors, Boston, are: the $5 billion Allied-Signal Inc. pension fund, Morristown, N.J., which committed $35 million; the $1.7 billion Rockefeller Foundation, New York, $10 million; the $1.5 billion Stanford University endowment fund, Palo Alto, Calif., $10 million; the $8 billion Oregon Public Employes Retirement System, Salem, $10 million; and the $290 million Commonwealth Fund, New York, $5 million. The $5.4 billion State of Connecticut Trust Funds, Hartford and the $556.5 million Dartmouth College endowment, Hanover, N.H. also committed to the fund, but the size of their investments isn't known.

The minimum investment for foundations and endowments is $5 million.

The Copley Institutional Investors Fund, which is now closed to investments, will be invested 75% in developmental projects, with an emphasis on developing warehouse-distribution, or light industrial sites, and 25% in existing properties.

Consultants said the developmental allocation is the highest among real estate funds.

Consultants and pension fund executives, who traditionally have preferred investing in existing properties, said the main concerns about developmental projects are the uncertainty of a project's success and the lack of liquidity because of the time required for developmental properties to be built, occupied and provide returns.

The Copley fund requires 15-year investment commitments, about five years longer than commitments of most other closed-end funds.

Edward T. Tokar, vice president-investments at Allied-Signal, said investing in the developmental projects "balances out our participation in more traditional forms of real estate investing." The Allied-Signal fund has about 6% of its assets in real estate, most of it in existing properties.

Mr. Tokar said the longer commitment and the added risk of untested developments are justified by higher projected return rates. John D. Phillips, a Copley principal, said the fund will return 20% on annualized basis.

The Frank Russell Co. Property Index for the five years ended Sept. 30 returned 11%.

Terry Canby, real estate investment officer for the Oregon Employes, said the Copley fund will provide diversification. He noted the Oregon fund has about 8% of its assets in real estate, of which 90% is in offices.

*Continued on page 25*

# Returns show . . .

*Continued from page 21*

trial properties throughout the nation "spotty."

For the $200 million TCW Fund I, he said, the strategy was to agree to buy office buildings in 1982 while the buildings were in the construction stage even though TCW's partners thought office building rents would take a dive.

The strategy included buying buildings where the final price to TCW would be based on effective rental rates when the buildings were occupied. When the buildings were completed, the lower-than-expected rental rates drove down the price of the buildings.

The lowest fund returns generally came after sharp reappraisals from funds with significant office properties in oil-economy states or with industrial properties in high-technology areas, according to real estate fund advisers.

Open-end funds with the lowest returns for 1986 were those of Seafirst Bank, Seattle, −3.8%; InterFirst Bank Dallas, −3.7%; John Hancock Financial Services, Boston, Equity Real Estate Account, −2%; and RepublicBank Dallas, −0.1%.

Seafirst Bank's Mel Brady, manager of real estate services, said he thinks the −3.8% return will be the "bottom" return for the $10 million fund. He said the low return results from excessively high vacancies at some properties.

The $550 million Hancock fund also may have hit bottom, said Kevin McGuire, president of John Hancock Property Investors Corp., Boston, which manages the Hancock fund.

He said the fund's decline came partly as a result of lessened year-end interest in real estate because of tax reform and because of the decline in oil prices, worsening the effect of overbuilding in energy belt cities.

Mr. McGuire added he couldn't say returns wouldn't drop further if the economy became depressed or if there was a lowering of interest rates.

He also said fund officials are determining ways of providing investors with liquidity for some of the assets while also increasing the return on the fund. He said plans could involve adding debt to the fund.

For closed-end funds, Coldwell Banker's Institutional Fund VII, Los Angeles, had in 1986 a −2.6% return and its Fund II had a −1.2% return, putting both Coldwell funds in the lowest decile.

Coldwell Banker Institutional Fund V with a 3.1% return finished in the ninth decile.

The low returns are a result of a downward valuation, according to Scott Tracy, a vice president with Coldwell Banker Capital Management Services, Los Angeles.

A few of the properties in the $54 million Fund VII did not lease as quickly as expected, but the properties are high quality, he said, and returns should bounce back.

Coldwell Fund II is almost liquidated, having only three properties left with a total value of about $12 million. For 10 years ended December 1986, Fund II had a return of 18.2% return, making it one of the highest-performing commingled funds.

Coldwell's Fund V, with $80 million in assets, "took a big hit" because a Houston property fell in value after reappraisal. Mr. Tracy said he expects the funds' returns to increase following the reappraisals. ■

# At NCNB, We Follow The Philosophy Of The Pharaohs.

They knew two things were critical to solid real estate investments. Quality construction and teamwork. Given the enduring results of that way of thinking, NCNB insists on it too.

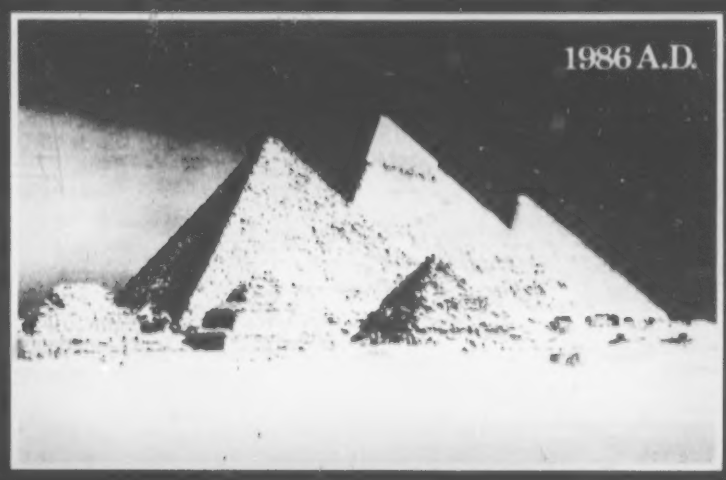
Our experienced team of development, architectural, construction, and property management specialists work exclusively with high-quality properties, located primarily in the Southeast. And our dedication to quality and teamwork has paid substantial dividends.

With consistently high returns, the NCNB Real Estate Fund has climbed to the peak of the industry in recent years. We've cemented our place at the top of the open-end fund universe with an average annual return of 16.4%* over the last five years. Our ten-year average is just as impressive.

Many real estate investments may look good in the short run, but The NCNB Real Estate Fund has passed the ultimate test...the test of time. Call Mark Coltrin, NCNB Trust Group Vice-President for details at (704) 374-8405.

*As reported by CDA Investment Technologies, Inc. for the period ending 12/31/85.

NCNB



NCNB REAL ESTATE FUND

## Wrap-up

### New allocations eyed

SAN MATEO, Calif. — It's time to begin rebuilding real estate portfolios, according to analysts with Bailard Biehl & Kaiser, San Mateo, a money management firm that provides asset allocation services.

In its "Economic Analysis and Investment Outlook" letter, firm officials said they have increased the asset allocation recommendation for real estate to 14% of assets from 8% six months ago and 5% one year ago.

Analysts recommended increasing investment in real estate because, they said, property prices are lower now than they were a year ago, levels of construction have been significantly reduced, and income yields for all cash purchases of real estate have been rising.

Also, the letter reported, mortgage rates are lower, permitting lower debt costs, and investment deals are being structured more conservatively, which is lowering risk.

### Ellis names manager

SAN FRANCISCO — Christopher J.B. Ellis has been appointed to the position of manager of the San Francisco regional office of Richard Ellis Inc., New York, a real estate investment advisory firm.

Mr. Ellis, who is not related to the company's founder, is a senior vice president, succeeding Gerald N. Parkes, a director, who has opened an Ellis office in Los Angeles.

**PIPER**

PIPER is compiled by Rogers, Casey & Barksdale Inc., Stamford, Conn.*

# Stock concentration, turnover pay off

**By Chuck Paustian**

RepublicBank Dallas' Ben Fischer appears to have the Midas touch.

The bank's $10 million Select Equity Fund, run by Mr. Fischer, finished first for the year ended March 31 in Pensions & Investments' Performance Evaluation Report with a return of 108.9%. The bank also took top honors for the quarter, posting a 55.8% return.

Mr. Fischer, vice president and manager of the institutional asset management group at RepublicBank Dallas, attributed the strong performance to the fund's highly concentrated stock positions and rapid turnover.

"When you buy a stock and it goes up 15%, then buy another stock and it goes up 15% and so on, pretty soon that starts to add up," he said.

Significant weightings in the technology and consumer-service sectors along with some good, old-fashioned stock picking helped boost the returns for some of the other special equity commingled funds in the PIPER universe.

The technology and consumer-service sectors appeared to be the favorites of some of the portfolio managers, with the combined weighting of those two sectors representing as much as 75% of the total portfolio in some cases.

Once the sector bets were in place, portfolio managers used the stock-selection process to further enhance their funds' performance.

The performance of the median fund in the PIPER universe, however, lagged the return of the Standard & Poor's 500 stock index in all measurement periods except the 10-year period.

Performance figures in each of the five evaluation periods were as of March 31. Returns for the three-, five- and 10-year periods are compound annualized.

In addition to RepublicBank Dallas, other top performers for the quarter ended March 31, and their performance, were: California First Bank, San Diego, 50.2%; Security Pacific National Bank, Los Angeles, 43.5%; Texas Commerce Bank, Houston, 37.6%; and Norwest Bank, Minneapolis, 37.3%.

For the quarter, the median fund returned 20.8%, while the S&P 500 advanced 21.4%.

Following RepublicBank Dallas in the one-year period were Security Pacific, 52.1%; California First, 44.9%; E.F. Hutton Trust Co., Wilmington, Del., Growth Fund B, 42.9%; and E.F. Hutton's Emerging Growth Fund B, 41%.

The PIPER median fund advanced 17.7% during the one-year period, while the S&P 500 returned 26.2%.

Mr. Fischer said the Select Equity Fund follows a value-oriented approach, and invests in stocks with low price-to-earnings ratios and high yields.

"We didn't get a lot of high yield this time, but we did get a lot of value," he said.

"The fund is an undiversified portfolio. It's never had . . . more than six or seven or eight names in it. But, while I don't have many stocks in the portfolio at any one time, there may be quite a bit of turnover," said Mr. Fischer, adding the portfolio's annual turnover during the past three years has been between 200% and 300%.

Mr. Fischer said the fund's beta normally is between 1.2 and 1.3, while the R-squared hovers around 0.23. He said the portfolio's typical alpha was not readily available, adding, "I just know it's very positive."

As of March 31, the portfolio had a beta of 0.8, an R-squared of 0.21 and an alpha of 18.1.

Beta refers to a portfolio's level of volatility relative to the broad stock market, which has a beta of 1. The R-squared shows the correlation of the portfolio to the general market, with an exact correlation being 1. Alpha is the risk-adjusted rate of return of the portfolio.

One of the fund's better investments was **IBM Corp**. The stock was bought in late 1986 for $119 to $120 per share and sold during February and March for around $145 per share.

"You can see I'm not really hitting these," at the lows and highs, Mr. Fischer said, noting the stock later climbed to more than $160 per share. "But for the period of time I hold them, there were some good percentage gains."

Other investments include: **Comdisco Inc.**, which was bought at $26 per share and sold one month later for $30 per share; and **British Airways PLC**, bought for between $16 and $19.50 per share and sold about two months later for between $22.50 and $23 per share.

E.F. Hutton Trust captured the top two spots for the three-year period, with Growth Fund B's compound annual return of 46.8% and Emerging Growth Fund B's annualized return of 45.4%.

The other top funds for the three-year period, and their returns, were: RepublicBank Dallas, 45.3%; Security Pacific, 34.3%; and Chase Manhattan Bank, New York, Intermediate Capitalization Growth Fund, 33.5%.

The PIPER median fund's performance was 21.8%, while the S&P 500 posted a 27.4% for the three-year period.

For five years, Security Pacific grabbed the No. 1 spot with a compound annual return of 43.4%. It was followed by Citicorp, New York, Real Estate Stock Fund, 33.4%; California First, 32.5%; Norwest Bank, 30.4%; and Chase Manhattan's intermediate capitalization fund, 30.2%.

The median fund in the PIPER universe posted an annualized 22.8% for the five-year period,

# International funds stay light on Japan

**By Marlene Givant**

Top-performing international equity funds in the Pensions & Investments' Performance Evaluation Report are boosting exposure to Spain and small Pacific Basin markets while staying underweighted in Japan and overweighted in the United Kingdom.

Bank of America's $42 million International Employee Benefit Equity Fund, the top-ranked PIPER fund for the three-month and three-year periods ended March 31, has a mammoth 20% weighting in Spain, vs. the Morgan Stanley Capital International Europe Australia Far East index's 1% weighting.

The fund returned 26.6% for the quarter and a compound annualized 52.4% for the three years, compared with the index's 23.4% and 45.4%, respectively.

Marine Midland Bank's $34 million International Equity Fund, which ranked fourth for the year and third for the three years ended March 31 with returns of 62.8% and 41.1%, respectively — overweights Spain, Finland and Singapore/Malaysia, investing roughly 4% in each. The index has no weighting in Finland, and 0.9% in Singapore/Malaysia.

The outlook on West Germany and continental Europe as a whole varies widely, as does exposure to Japan.

The top-ranked fund for the one-year period — the $33 million International Low P/E Equity Fund of Provident National Bank, Philadelphia — has a heavy weighting in Japan, although it is underweighted relative to the index. The fund, managed by Provident Capital Management Inc., had 35% of assets in Japan, compared with the index's 57%, and returned 73.8% for the period, vs. the EAFE's 61.3%.

In contrast, Bank of America's equity fund had only a 3% exposure to Japan, yet chalked up a 72.4% return, placing second for the year.

Other top-ranked funds for the 12 months, and their returns, are the EAFE index-linked $35 million International Equity Fund of American National Bank & Trust Co. of Chicago, 68.5%, and the $1.2 billion International Index Fund of State Street Bank & Trust Co., Boston, 62.4%.

Provident National's international low p/e fund lightened its Japan weighting to 35% from 42% at year end, shifting the assets into the United Kingdom, Germany and France.

The firm's Japanese holdings include **Morozoff**, a food company, and **Nippon Gakki Co. Ltd.**, which makes Yamaha musical equipment. In the United Kingdom, it owns **Barclay's Bank**, **Sears Holdings PLC**, a retail company, and **Jaguar**.

American National's index fund beat the EAFE by more than seven percentage points by keeping transactions to a minimum.

"We don't do a lot of transacting and rebalancing and consequently we have some savings somehow. We don't buy and sell — we sort of hold and that's what happens," explained Kristen Jackson, investment officer.

For the first quarter, Bank of America's 26.6% return was followed by American National's 24.1% and State Street's 23.3%, a tad below the EAFE's 23.4%.

For the three-year period, Bank of America's fund returned a compound annualized 52.4%; American National's, 45.9%; and Marine Midland's, an annualized 41.1%. The EAFE returned 45.4% in the period.

Officials at BA Investment Management International Ltd., London, which manages the Bank of America fund, see consumer-oriented industries as the only global area worth pursuing. "The consumer is the only area of potential growth in the world economy," said Alison Edmonds, investment manager-international equities.

Government spending and the unwinding of the U.S. trade deficit won't play a key role in driving economic growth and private corporate expenditures won't be strong, said Ms. Edmonds.

The fund's portfolio is biased toward consumer goods, services and financial stocks, which are benefiting from the fall in interest rates last year and last quarter and financial deregulation worldwide, she said.

BA has been underweighted in Japan longer than most managers. Exposure to Japan is 3%, sharply down from 20% at the end of the first quarter of 1986, and vastly underweighted compared with the EAFE's

**CD/INTERNATIONAL™— For the first time, worldwide financial information in a compatible format.**

This new compact disc database provides timely company fundamental data on the world's 4,000 leading corporations. Hundreds of financial variables for each company are format adjusted for consistency and to ease comparison across countries—enabling you to take advantage of investment opportunities in today's global market.

**CD/INTERNATIONAL— Financial data you can rely on.**

This powerful information source is based on the Worldscope™ database assembled by two authorities on money management and international accounting standards—*Wright Investors' Service (WIS)* and the *Center for International Financial Analysis and Research (CIFAR)*.

With its monthly updates, you can be sure of getting current, accurate information that will help guide your investment decisions.

**CD/INTERNATIONAL— On the easy-to-use DATEXT system.**

Utilizing the latest CD-ROM technology and DATEXT's advanced search and retrieval software, CD/INTERNATIONAL provides the most practical database ever. Used with your IBM or compatible personal computer, it offers built-in analysis, standard and custom reports, and global screening capabilities. Reports can be transferred to popular spreadsheet or word processing programs for further manipulation. And, unlike on-line services, CD/INTERNATIONAL is available for a fixed, predictable f

**CD/INTERNATIONAL— A strategic investment tool.**

Now you can make informed global decisions without leaving your desk. In fact, we'll demonstrate how, right at your desk. Just call **1-800-521-6667** today.

# Stock concentration . . .

*Continued from page 37*

while the S&P 500 increased 26.6%.

Performance figures for the 10-year period show California First on top, with a compound annual return of 30.2%, followed by MTrust, Dallas, 27.5%; Equitable Bank, Baltimore, 25.7%; Northern Central Bank, Williamsport, Pa., 25%; and Norwest Bank, 24.1%.

The 10-year period was the only period in which the PIPER median fund outperformed the market index. The median fund posted 20.5%, while the S&P 500 increased 17%.

Hilton Hemphill, president of MSecurities, Dallas, which runs the $26 million Growth Fund, as well as other commingled funds, for MTrust, said, "Most of the success of the portfolio over the last several months has been from technology." The fund returned 23.5% for the quarter and 13.5% for the one-year period.

Mr. Hemphill said the consumer-service sector also represents a significant portion of the portfolio's holdings. Between 25% and 30% of the fund's assets are invested in each sector, he said.

The fund is invested in small-capitalization, growth companies following a bottom-up approach. "The emphasis in the portfolio reflects the sector we're making in the larger-capitalization portfolios," Mr. Hemphill said.

Some of the better performing stock holdings in the fund include **Microsoft Corp.**, a software company bought at $49 per share and recently selling for $119 per share, and **Intermedics Inc.**, a medical supply company bought at $14 per share and now selling around $23 per share.

Norwest Bank's $94 million Special Situation Fund also benefited from its exposure to technology and consumer-service stocks, according to Robert B. Mersky, president and portfolio manager at Peregrine Capital Management Inc., Minneapolis, which runs the portfolio for the bank.

Mr. Mersky said the two sectors represented about 75% of the fund's total assets. The stock-selection process, however, plays a dominant role in the portfolio's strategy, he said.

"We uncover information gaps. We want to know something that most other investors are not yet aware of," said Mr. Mersky. "With so many stocks out there that are publicly traded, it's not surprising so many get little attention from brokers."

Among the top-performing stocks in the portfolio were **Chiron Corp.**, a biotechnology company the fund bought at $17 per share and which was recently selling for around $35 per share; **Scimed Life Systems Inc.**, a medical technology firm, bought at $14 per share and now priced around $22 per share; and **Chambers Development Co. Inc.**, a waste disposal company, which the fund bought around $7 per share and which recently was selling for $29 per share.

Some of the funds performed strongly based on the merits of the manager's stock-picking ability.

"Our whole orientation is one of analyzing change and associating that change with specific investment targets," said Neal Miller, managing director of Chase Investors Management Corp., New York, the money management arm of Chase Manhattan Bank.

"My experience over the years has allowed me to separate the wheat from the chaff," he said.

Mr. Miller is the portfolio manager for the $350 million Intermediate Capitalization Growth Fund. He said an example of the type of change he looks for is when the Federal Communications Commission decided to allow companies to own 11 broadcasting stations, rather than seven. "Within a two-year time span we've had a complete reorganization of that industry."

Some of the portfolio's holdings include **Laidlaw Transportation Ltd.**, a Canadian company involved with providing services that had been handled by the government, bought at $7 per share and recently selling around $15.50 per share; and **Ocean Drilling & Exploration Co.**, with one of the largest off-shore drilling fleets, bought at $14 per share and recently selling around $23.

Another fund that relied heavily on stock selection was Citicorp's $35 million Real Estate Stock Fund. The fund is managed by Citicorp Investment Management Inc., New York.

Kenneth Statz, a vice president at Citicorp Investment Management and portfolio manager for the fund, said he doesn't let bleak outlooks for the general real estate market deter him. "We try to pick the real estate that is providing the cash flow," he said.

Mr. Statz said the fund invests in the stock of companies that manage or develop various properties. "Basically we try to provide the return provided by developing and managing real estate, but we do it through a stock vehicle so we have liquidity."

The portfolio's stock holdings include **Federal Realty Investment Trust**, bought at a blended price of $8 per share and recently priced at $23 per share; **Newhall Land and Farming Co.**, which was purchased at a blended price of $4 per share and recently selling for $34 per share; and **Cousins Properties Inc.**, bought at a blended price of $4.50 per share and now selling around $21. ■

### Upcoming events

*Pensions & Investment Age*'s Datebook has expanded its coverage, and now includes listings of more upcoming events.

If you are sponsoring a conference or meeting and wish it included in Datebook, send information to Arlise Larson, *Pensions & Investment Age*, 740 N. Rush St., Chicago, Ill. 60611; (312) 649-5407.

When investing in foreign countries, you need a secret agent.

An agent who knows the ins and outs of foreign financial centers. And who knows how to accomplish your global custody aims; quietly, swiftly, surely.

A secret agent called The Mitsubishi Bank of California. As part of the world's fourth largest bank, with assets in excess of $210 billion, we get the job done for your trust/custodial accounts handling security settlements and transfers, foreign exchange, income collection, and tax reclamations, without calling attention to ourselves or what's being accomplished for you.

And, Mitsubishi Bank brings you two additional security measures as well. There are no double agents. Your clients remain your clients. And, Mitsubishi Bank headquarters are in Los Angeles; the most advantageous time zone for seizing European and Pacific basin opportunities within a single business day.

How secret is Mitsubishi Bank? It ranks third, behind Chase and State Street, in global custody assignments. And how many people know that?

Call Gearey Johnstone at (213) 621-1305 for more information on how many ways your global custody needs can be met by having a secret agent. And how many ways your institution can profit from having the surveillance and protection of secret service.

The best kept secret in global custody.

# Xerox executive named 'best'

Robert R. Evans, director-employee benefit assets at Xerox Corp., Stamford, Conn., is the nation's "best and brightest" corporate pension executive, a *Pensions & Investment Age* survey shows.

Mr. Evans was named most often by money managers and investment management consultants who responded to a survey asking them to name the three pension executives they considered "the best and the brightest."

Robert E. Shultz, vice president-pension asset management at RJR Nabisco Inc., Winston-Salem, N.C., received the second largest number of nominations.

Myra R. Drucker, director-trust investments at International Paper Co., New York; W. Allen Reed, staff vice president-investments at Hughes Aircraft Co., El Segundo, Calif.; and George C. Weintz, investment counsel at Lockheed Corp., Calabasas, Calif., tied for third.

Tied for fourth were John B. Carroll, president GTE Investment Management Corp., Stamford, and Edward T. Tokar Jr., vice president-investments at Allied-Signal Inc., Morristown, N.J.

Douglas A. Love, director of research at BEA Associates and a former pension fund consultant, said the people selected "have enough experience to blend an appropriate amount of skepticism with a good grasp of fairly technical issues."

The respondents named 120 different pension executives as among the "best and brightest."

The survey, mailed to a carefully selected group of experienced money managers and pension consultants, asked them to nominate the best corporate pension executives with whom they

# States moving on takeover laws

**By Nicky Robertshaw**

WASHINGTON — The aftershock of the U.S. Supreme Court ruling upholding an Indiana anti-takeover law is starting to be felt, with Delaware and California moving toward consideration of takeover bills and other states contemplating similar action.

And even though a recent study by the Securities and Exchange Commission staff suggests such legislation decreases shareholder wealth, Senate Banking Committee Chairman William Proxmire, D-Wis., has introduced legislation that would affirm state takeover statutes, giving such laws a further boost. (*See related story, Page 4.*)

With Delaware, where some 43% of all New York Stock Exchange companies are incorporated, expected to consider this type of legislation by the end of the month, the issue of state anti-takeover laws becomes an important one.

Under the Indiana law, shareholders were given 50 calendar days to consider a tender offer; federal law requires a minimum of 20 business days. The Indiana law also requires shareholder approval before a bidder holding a certain amount of stock can exercise voting rights on the stock.

While similar in concept to the Indiana statute, the Delaware bill would be based solely on where a company is incorporated. Among other things, the Delaware law would increase the tender offer period, set at a minimum of 20 business days by federal law, to 50 calendar days.

California state Sen. Dan McCorquodale last week proposed a far-reaching takeover law modeled after the Indiana statute. The law has some key differences — it requires an affirmative vote from shareholders to make it effective and applies to California corporations with more than 100 shareholders.

The bill is part of a package of corporate governance legislation, which also includes a bill that would make "greenmail" harder to pay. That second bill requires the approval of the board of directors and shareholders when more than 5% of a corporation's stock is purchased for more than fair market value.

"Delaware is trying to protect its biggest industry," said T. Boone Pickens, general partner of Mesa Limited Partnership, Amarillo, Texas, and founder of the United Shareholders Association.

"They're trying to be competitive with the other states that are passing these laws," he said, adding managements probably would move their companies' incorporations to other states offering more protection from takeovers.

Mr. Pickens said he believes the laws are bad for shareholders because they make it harder to unseat current management whose practices might be keeping stock values down.

Mr. Pickens' views are supported by the results of a study by the SEC chief economist's office, which examined the effects of a November 1986 Ohio statute on shareholder wealth. The office found of 37 Ohio corporations examined, share prices decreased "roughly 2%" while the Legislature considered laws designed to stop the attempted takeover of Akron-based Goodyear Tire & Rubber Co. by Sir James

# BCI bondholders balk at proposal for spinoff

**By Marci Baker**

CHICAGO — BCI Holding Corp.'s plan to spin off its consumer products and specialty food businesses into a separate company is running into head winds.

Before the deal can go through, BCI must gain approval from its bondholders to relax certain restrictive covenants of existing BCI bonds. Many of the bondholders are fuming over the terms of the waiver and are refusing to sign.

"I told them this thing doesn't border on an outrage. It really *is*," said one disgruntled pension fund adviser who holds the bonds.

"There's no way we're sending our waiver in," said a high-yield specialist. "It's an insult. They can't think we're that stupid to approve the changes on the current terms."

The waiver seeks to relax covenants in the bond indentures restricting the payment of dividends and other payments to equity investors. It also would soften the terms for repaying existing indebtedness, the degree to which BCI and subsidiaries can take on additional debt, and permit BCI to enter into service agreements with E-II Holdings, the name of the proposed spinoff.

In exchange for their consent to the amendments, bondholders would receive $2.50 per bond held.

BCI must gain waivers on 50% of each of the four tranches of bonds issued in the buy-out of Beatrice Cos. last year to approve the amendments and complete the spinoff.

BCI is seeking the changes to make some asset distributions to equity investors and give the company more operating flexibility, according to the consent solicitation statement circulated to bondholders.

Despite the sentiments of bondholders, expectations are BCI will get the necessary votes to put the amendments in force. But BCI likely will have to sweeten the terms of the waiver before it can reach the 50% threshold.

Kohlberg Kravis Roberts & Co., New York, took Beatrice private in April 1986 with $6.2 billion in financing from banks, equity partnerships and the placement of $2.5 billion of junk bonds.

Drexel Burnham Lambert Inc. placed the high-yield issues, which consisted of 11% 10-year senior notes, 12½% 12-year senior subordinated debentures, 12¾% 15-year subordinated debentures and 15-year floating-rate junior subordinated debentures.

The waiver documentation was mailed to bondholders June 5; the deadline for obtaining the waivers is June 19.

A BCI spokesman said it is too early to comment on any response to bondholders.

Dean Kehler, managing director at Drexel, which is adviser to BCI on the waiver, said it's too early in the process to determine what kind of approval rate the company is getting to the amendments.

"Legally, we couldn't talk to the bondholders until the appropriate documentation was out. We're just in the process now of talking to the bondholders to find out what they think and what they want."

BCI's management continues to show a willingness to listen to concerns by investors, Mr. Kehler said. He declined to say, however, whether the terms of the waiver ultimately would be changed.

# Market jitters may aid contrarians

**By Fred Williams**

Contrarian investment managers, after two years of lagging the market, are poised for a rebound and current market jitters may be just what they need to return to favor.

For the few acknowledged contrarians, who suffered through one of their worst years in 1986, the change for the better may be under way, according to consultants and plan executives who stuck with them through the bad times.

One reason for the rebound is the stocks toward which they lean — out-of-favor stocks, usually in financially troubled industries such as energy, oil field services, steel, metals and machinery — are finally making moves in the market after languishing for several quarters, or even years.

Investment strategists also claim contrarians hold their own better in down markets.

One of the problems, however, is in determining who is a contrarian and how many contrarians there are. Experts agree there are only eight to 10 major contrarian firms and some others camouflaged as value managers.

Among those most frequently mentioned as contrarians are Batterymarch Financial Management, Boston; Fraser Management Associates Inc., Burlington, Vt.; Meridian Management Co., Little Rock, Ark.; Robert E. Torray & Co., Bethesda, Md.; and Birmingham Capital Management, Birmingham, Ala.

Others sometimes included are Sanford C. Bernstein & Co. Inc., New York; United Capital Management, Denver; Donald Smith & Co. Inc., Paramus, N.J.; and Dreman Value Management Inc., New York.

The recovery among contrarians is still in the early stages, said Dennis Stattman, vice president-equities at Meridian, which had $279 million under management in tax-exempt assets as of Jan. 1.

"We're seeing a rotation in market leadership . . . metals, oil-field service companies, energy, steel, forest products, chemicals — these were areas a year ago that were totally out of favor and unpopular. Now, investors are starting to bid them up.

"Last year, the market leaders were disinflationary stocks which benefited from lower interest rates and inflation. Contrarians have a style that benefits from this type of shift," said Mr. Stattman.

For example, he said, oil-field service companies have been helped by rising oil prices and increased interest in drilling. Cost-cutting since 1982 has put most of these companies in a "survival strategy" that will result in "much higher profits as the industry rebounds."

Steel companies, too, have been through hard times, but a few are showing increased profits after several years of cost-cutting, modernization, payroll cuts and elimination of excess capacity.

These steps have resulted in "a much leaner industry . . . benefiting from higher levels of economic activity and reduced foreign competition because of the drop in the dollar. These companies are starting to make money again this year," said Mr. Stattman.

Among Meridian's holdings are **International Paper Co., Halliburton Co., General Motors Corp. and USX Corp.**

For 1986, Meridian returned 6.1%, compared with 18.7% for the Standard & Poor's 500 stock index. For the three years ended Dec. 31, it returned a compound annual 5.6% vs. the S&P's 18.5%, and for the five years, Meridian returned an annualized 18.9% vs. 19.9%. For the first quarter of 1987, Meridian returned 21.1% and the S&P, 21.4%.

Plan executives who deal with long-term investments claim it is unfair to judge contrarians on the short-term basis prevalent in some parts of the industry.

"I agree their time has come," said H.H. MacPherson, manager-investment and fi-

*Continued on page 41*

# 3 at pension-related posts take new positions; 1 retires

Three executives with a say in multibillion-dollar pension funds have taken new jobs, two of them moving to investment management firms, and a fourth has retired.

Beverly L. Hamilton was appointed third deputy comptroller of the $30 billion New York City Retirement Systems. The former assistant vice president-investor relations for the $6 billion United Technologies Corp. pension fund assumes her new duties June 24.

Carl W. Strayer, director-pension investments at Hartford, Conn.-based UTC, retired May 31.

A replacement has not yet been named for Ms. Hamilton; there will be no successor to Mr. Strayer.

Bill Rutherford, Oregon state treasurer and chairman of the $8 billion Oregon Investment Council, which oversees the state Public Employes Retirement System, is resigning June 30 to become an executive vice president with ABD International Management Corp., New York.

And Michael J. Finn, assistant director a[illegible] head of venture capital at the [illegible] billion Michigan State Employees' Retirement Systems, Lansing, will join Sears Investment Management Co., Chicago, as investment portfolio manager of the venture capital division.

Ms. Hamilton's new duties will include work in the management of all the city systems' assets, which are in fixed income and equity. She will report directly to Comptroller Harrison J. Goldin.

But her first duty will be to complete the restructuring of the New York City systems' equity portfolio.

She assumes the post vacated by Marvin L. Damsma in March. Mr. Damsma is now director of the $2.8 billion pension fund of Amoco Corp., Chicago.

Jon Lukomnik, a spokesman for the city systems, said Ms. Hamilton will complete Mr. Damsma's earlier work in restructuring the equity portfolio, which accounts for about 25% of the systems' total assets. Before joining Amoco, Mr. Damsma had completed restructuring the fixed-income portfolio, which entailed the hiring or retention of some 21 managers (*Pensions & Investment Age*, Feb. 9).

Mr. Lukomnik said a timetable and specifics of the equity restructuring will be determined by Ms. Hamilton. She was not available for comment.

Jack R. Meyer, chief investment officer of the Rockefeller Foundation and a former New York systems deputy comptroller who counseled the city in replacing Mr. Damsma, called Ms. Hamilton "a terrific find." Prior to joining UTC, she worked as head of the securities products group for Morgan Stanley Asset Management Inc., New York, as an assistant trust officer with Manufacturers Hanover Investment Corp. and in the trust department at ITT Corp., New York.

Mr. Lukomnik said the hiring

*Bill Rutherford will leave the Oregon Investment Council; Beverly Hamilton will join the N.Y. City Retirement Systems.*

# *World Bank sets up crossing network*

**By Marlene Givant**

NEW YORK — With 60% of its assets indexed globally, the $2.6 billion World Bank pension fund has devised its own crossing network to save money on tactical asset switches.

When the World Bank wants to reduce its equity position, it sells stocks from its index funds directly to other pension funds investing in index funds. Thus, neither party incurs transaction costs.

Swapping assets for cash flow internationally can save a fund up to seven percentage points a year if a portfolio turns over by 100% per year. Domestically, it can save 50 to 100 basis points, said Hilda Ochoa, chief-pension investments at the $2.6 billion pension fund. She would not identify the fund's crossing partners.

What's more, using indexed international stock and bond funds, World Bank pension officials are starting to develop a forward market in international equities to reduce price uncertainty during tactical shifts.

They also take forward and futures positions to reduce exposure to currency and interest rate risk.

A futures contract is an agreement to buy or sell a specific amount of a financial instrument at a particular price at a stipulated date. A forward transaction refers to the actual purchase or sale of a specific quantity of a security or foreign currency at a price specified now, with delivery and settlement at a specified date. Because a forward contract is a completed contract, unlike an option, it can be used to buy back futures contracts previously sold.

The fund's tactical asset allocation strategy has succeeded in boosting investment returns through short-term asset allocation switches.

In the 6½ years since officials began a strategy of managing the fund's asset and

# GM eyeing swap in Latin America

**By Marci Baker**

General Motors Corp., Detroit, is considering a $100 million swap of Latin American debt for equity to further capitalize its operations south of the border.

If it carries out the swap, the automaker would join a growing list of U.S. companies taking advantage of the secondary trading market for Latin American debt to build up operations there.

**Corporate finance**

Some observers predict such activity will heat up as a result of decisions by Citibank, New York, and other lenders to lesser developed countries to increase loan loss reserves and engage in swap transactions to reduce exposure to Third World loans.

"We've been looking seriously at (LDC debt conversions) for some time," said a GM spokesman who declined to comment on anything more specific.

Sources said, however, the company is working with Manufacturers Hanover Trust Co., New York, on a $100 million debt-for-equity swap of Mexican loans, which would be used to further capitalize manufacturing operations in that country.

In a typical swap transaction, the company purchases outstanding Third World loans from lenders at a substantial discount to their face value. It then presents the debt to the local government, which redeems it for local currency at the prevailing exchange rate. The company uses the proceeds of the transaction to infuse capital into existing operations, make acquisitions or help finance new projects.

Corporate officials and investment bankers say the transactions often offer the cheapest, most attractive mechanism to finance activities in developing nations. At the same time, the investments can help stimulate economic growth and foster employment for the countries.

"U.S. corporations are very substantial players in the secondary market," said John Simone, executive vice president in the international investment banking unit at Manufacturers Hanover.

"Activity is definitely on the rise."

Chrysler Corp., Highland Park, Mich.; Ford Motor Co., Dearborn, Mich.; Nissan Motor Co. Ltd., Tokyo; and Rohm & Haas Co., Philadelphia, are among the corporations investing in these countries through debt-for-equity swaps.

More recently, American Express Bank, New York, entered into an agreement with the Mexican government to convert $100 million of debt to

# World markets await Greenspan's impact

**By Marlene Givant**

Institutional investors are uncertain about how Alan Greenspan's appointment as chairman of the Federal Reserve Board will affect world currency and stock markets.

The possibility of a further dollar drop is intensifying some managers' fears of a Japanese stock market correction while others think the dollar is near bottom, regardless of Mr. Greenspan's appointment.

And at least one analyst believes currency fears caused by Mr. Greenspan's replacement of Paul A. Volcker will cause Japanese investors to slice their U.S. bond investments, sending a flood of assets into the Tokyo stock market.

But Harold Smith, president of the more than $1 billion Young Men's Christian Association retirement fund, New York, believes the change will more heavily affect the deutsche mark than the yen.

Expecting the mark to stabilize this summer under Mr. Greenspan's reign, the fund's in-house managers are buying 10-year French franc government bonds, which have higher interest rates than deutsche mark bonds, yet still would benefit from a fall in German interest rates because of France's heavy trade with Germany, according to Mr. Smith.

Other managers and plan executives interviewed were less certain about the impact of Mr. Greenspan's appointment on international currency and stock markets, especially Japan, for several reasons.

- Mr. Volcker, who left June 2, has been hailed for slashing inflation to less than one-third its average rate of 12.8% in 1979 and 1980, but Mr. Greenspan's anti-inflation know-how has not been established. Investor fears of inflation as well as uncertainty about whether U.S. interest rates will rise could cause a further drop in the dollar.
- Mr. Greenspan might have to raise interest rates more than Mr. Volcker would to stabilize the dollar, "until he gains the markets' confidence," said Christian Wignall, senior vice president at G.T. Capital Management, San Francisco, which manages $800 million for tax-exempt clients.
- Mr. Greenspan's hard-to-classify economics approach and his tendency to answer questions with few words aggravate investor uncertainty.
- The Fed might be less independent under Mr. Greenspan because of his ties to the White House, according to Rudi Leuthold, managing director of J.P. Morgan Investment Management Inc., London, which runs $11.7 billion in international assets, almost all for tax-exempt clients. This could cloud Fed policy with party goals.
- On May 27, Mr. Greenspan said the dollar would fall further, but when he was named Fed chairman, he said the dollar had fallen enough.

"How can investors make a judgment when (Mr.) Greenspan changes his mind in seven days?" asked Pierre Henchoz, chief of the investment management section of the nearly $7 billion United Nations Joint Staff Pension Fund, New York.

But YMCA's Mr. Smith said he thinks under Mr. Greenspan, West Germany will stimulate its economy and stabilize its currency.

"The U.S. feels it has achieved all it can achieve with Japan. I think it's quite clear the pressure is now going to be on the German mark. The whole attention of our government will be on the deutsche mark's relationship to the dollar," Mr. Smith said.

"Germans are very inflation conscious — reluctant to take stimulatory steps in fiscal or monetary policy. Mr. Greenspan might encourage them to reduce interest rates further in order to lower pressure on the dollar via the mark.

"The dollar-yen (relationship) is probably going to stabilize between 140 and 145. We've been at that level most of the past month — a surprise to many people. It appears there's some equilibrium there."

Michael Tintelnot, vice president and general manager of Capital Management International GmbH of Deutsche Bank, New

# *Numbers games used to claim proxy victory*

**By Marcia Parker**

Corporate management and institutional investors that sponsored anti-poison pill resolutions this year all are claiming victory now that the 1987 proxy season has come to a close.

Both sides are claiming moral victory because of a disagreement over methodology in the proxy area: Should success be measured in terms of the percentage of votes cast, or as a percentage of total outstanding shares? In addition, different ways of measuring abstentions also influence the hotly contested numbers game.

The disagreement carries over to the sensitivity each side has toward what the proposals are called, with proponents preferring "shareholder rights," and opponents, "poison pills."

And the tension underlying the proxy-counting contest promise issues between management and shareholders is far from over.

Confident of their achievements during their first proxy season as full-fledged activists, institutional investors are preparing strategic plans for making their presence as shareholders felt throughout the year.

Some are considering asking chief executives to meet with them frequently to review performance. Others are looking at lobbying outside directors to monitor companies — in effect, serving as watchdog for large shareholders.

At least one large public fund may target six "underperformers" and make a special effort to persuade management to do more to boost the value of the company for shareholders.

All are considering whether to

# Bill would protect pension surplus in takeover

By Nicky Robertshaw

WASHINGTON — A major Senate tender-offer reform bill would forbid corporations from using surplus pension assets to finance a takeover for five years after a change in control of the corporation.

In introducing his long-awaited Tender Offer Disclosure and Fairness Act of 1987 on June 4, Senate Banking Committee Chairman William Proxmire, D-Wis., said as a result of takeovers, "American workers are plundered even when they are not terminated." He cited federal statistics that found $12 billion in pension surpluses have been diverted to corporate raiders.

As of May 4, corporations have recovered $15.65 billion in surplus assets from their pension plans since 1980, with another $853 million in excess assets in pending terminations, according to the Pension Benefit Guaranty Corp.

Mr. Proxmire pointed to a plan by Darien, Conn.-based Schick Co., which recently took over Reeves Brothers Inc., Spartanburg, S.C., to terminate Reeves' pension plan and use $25 million in surplus funds to repay debt incurred in the takeover (*Pensions & Investment Age*, March 23). "None defended this plan," including the company, its bankers and its advisers, Mr. Proxmire noted in remarks in the Congressional Record.

An AFL-CIO official applauded the bill. "The workers' pension money should not be used to finance takeovers," said Larry Smedley, associate director of the union's department of occupational safety and health and social security. Since raiders often look at surplus pension assets as a partial inducement for takeovers, "pension funds should not be separate from the question of takeovers," Mr. Smedley said.

"It's absolutely the right thing to do," said Leigh Trevor, a Cleveland attorney who is president of Stakeholders in America, a group of corporate executives. "It's outrageous to permit pension assets to be used to finance the equivalent of a Falkland Islands military operation on a corporation."

He added the bill limits access by both outside corporate raiders as well as management seeking to take the company private.

"What bothers me most is that it's making pension policy on a piecemeal basis," said Seth H. Tievsky, an attorney with The Wyatt Co.'s research and information center in Washington. He pointed out terminating or establishing a pension fund is purely a non-fiduciary duty, and that a blanket five-year ban on reversions "is potentially unmanageable because it doesn't take into account changed business circumstances, for example."

"Cash is cash, and if you have a certain amount of money in general corporate funds, how do you know if it's the $20 million from reversions or from somewhere else?" said George Cowles, senior vice president of Bankers Trust Co. and a member of the Association of Private Pension and Welfare Plans' executive committee.

He said the first issue to address is whether the pension surplus belongs to the employees or to the company. "If it belongs to the company, then it's just another corporate asset."

While the Senate bill, S. 1323, is the primary vehicle for tender-offer reform in the Senate, its counterpart in the House, H.R. 2172, introduced by Energy and Commerce Committee Chairman John M. Dingell, D-Mich., does not mention the pensions issue. The subject, however, is expected to come up during hearings.

One reason the House bill lacks a pension provision is jurisdictional; legislation related to pensions is under the aegis of the House Education and Labor Committee.

One complaint about the Senate bill, hearings on which are scheduled for June 23-25, is that its focus on correcting takeover abuses includes insider trading and doesn't fully address the problem of pension reversions, according to Alan Reuther, associate general counsel for the United Auto Workers, Washington. "This might solve one small subset of the problem but it does not address it comprehensively."

"I wish they would take (the pension clause) out of the Proxmire bill," said Robert A.G. Monks, president of Institutional Shareholder Services Inc., Washington. "This is a serious question and it is more appropriate in terms of jurisdiction to be part of the pension law."

Separately, the Reagan administration has proposed altering funding rules of the Employee Retirement Income Security Act to both make it easier for employers to withdraw surplus assets from their pension plans and toughen funding rules for underfunded plans.

The Proxmire bill also calls for allowing pension fund investment managers — both internal and external — to reject a tender offer without violating their fiduciary duties under ERISA. This means fund managers could take a more long-term view and wouldn't be forced into supporting corporate raiders.

Yet a focus on short-term results is something dictated more by the desire of money managers to p'ease their clients than ERISA, said Mr. Cowles.

The Proxmire bill, in addition to the pension fund provision, calls for an array of takeover reforms including more complete and prompt disclosure by corporate raiders, tougher penalties for insider traders and bans on "greenmail," "golden parachutes," "poison-pill" provisions not approved by shareholders and other controversial takeover activities. ■

## Corrections & clarifications

• **NCNB National Bank**, Charlotte, N.C., is not getting out of the custodial business, as was reported incorrectly May 4. NCNB has 125 separate corporate custodial accounts and is looking for more, a bank executive said.

• The five-year median return for the period ended March 31 was omitted from the bar charts for the **PIPER** equity funds in the May 18 issue. The figure is a compound annualized 24%.

• In a June 1 article, the company Hiram F. Moody Jr. will join was misidentified. It is the **Home Insurance Co.**, New York.

• The 1985 median composite return stated for **Management Asset Corp.**, Westport, Conn., was reported incorrectly in a June 1 story. The correct figure is 24.6%.

Announcing the Midwest OTC 25

The Best of Both Trading Worlds

Now there's a way to trade 25 selected OTC stocks while getting all the benefits you'd expect from the auction market system. It's the Midwest OTC 25, and it brings buyers and sellers closer together.

As in listed equities, there is a unified opening. And of course the customer's order is always represented and takes precedence, while our specialists' markets and size are displayed at all times. The result is added liquidity, precision and predictability.

Add to this the most advanced systems technology available, and you have a major evolutionary step toward a true national market system.

# Disbursement . . .

*Continued from page 13*

ing attractive prices," said Ms. Rollins.

Forrest Johnson, senior vice president of Phoenix-Hecht, Research Triangle Park, N.C., said another reason for the drop in prices is the higher degree of automation the banks are using as part of their controlled disbursement product.

"It's less dependent on a phone call or a series of phone calls than before," said Mr. Johnson. "Other cash management services, such as lockboxes, are more labor-intensive."

Other executives said banks also have become more sophisticated in analyzing the costs of the services they offer. With a firmer grasp on expenses, bank officials can adjust the prices for various services accordingly.

Although the drop in disbursement prices may mean significant savings for a corporation, many executives said the total situation should be examined before agreeing to switch disbursement banks.

"We're not making decisions strictly on price because I think that would be a false economy for us," said David E. White, supervisor of treasury operations at ICI Americas Inc., Wilmington, Del. ICI Americas is in the process of reviewing both its disbursement and collection systems (*P&I Age*, May 4).

"I just don't think (pricing) is the No. 1 relevant factor," he said, adding quality is the important factor.

Mr. Johnson said corporate executives should be wary of hidden disbursement costs.

"For a corporation, it's the total cost of the disbursement system that is important," he said. While the per-item charge may be lower, other costs, such as account maintenance charges, might keep the total cost the same or possibly increase the expense. ■

# Bethlehem . . .

*Continued from page 13*

which are targeting their suppliers, Bethlehem is promoting the change first among its customers.

Messrs. Robinson and Price said Bethlehem isn't requiring its customers to adopt X12; and until the companies all do, it will continue to operate various systems to communicate trade information in the form a customer prefers, from paper to any specific electronic formats.

Mr. Price said customers, as well as Bethlehem, can cut costs by using the X12 standard. Although computer-to-computer communication for ordering is more efficient in general by eliminating clerical work and errors from rekeying paper-based data, he said the variety of electronic formats now in use mean both customers and suppliers have to have different software programs for transactions with different companies or different industries. In addition, electronic data interchange, especially under the standard X12 format, facilitates trade relations and communications in the current just-in-time inventory environment, requiring frequent ordering.

Although the use of corporate electronic trade payments gets a lot of attention, proponents of electronic data and funds transfer, such as the Automobile Industry Action Group, a Detroit-based trade organization, and others have noted the greatest saving in the ordering process comes from communicating all the trade information electronically rather than the actual payment.

Bethlehem's electronic data communication is integrated with the company's accounting, meaning the ordering transaction automatically is updated in its accounting system and the steel company doesn't have to rekey data from customers.

Although orders and shipments are made through its steel plants, Bethlehem's accounts payable system is centralized and sent out from its Pennsylvania headquarters where records indicate which communication format — paper, proprietary electronic, or X12 electronic — a customer prefers. ■

# Leasing

# Leasing meets range of companies' needs

**By Brad Rudin**

From the simple to the exotic, from the tax-driven to the purely economic, leasing gets high marks from equipment users because it meets a wide range of needs.

An informal telephone survey of lessors and lessees backed up predictions the leasing industry would thrive despite the Tax Reform Act of 1986.

The survey by *Pensions & Investment Age* covered such equipment as airplanes, computers, furniture, rail cars and power plants.

By cutting tax rates, eliminating the investment tax credit and slowing depreciation for some property, Congress reduced leasing's tax advantages.

But Congress also gave leasing a boost by establishing an alternative minimum tax that encourages some equipment users to lease because ownership generates depreciation write-offs that are added to alternative minimum tax calculations. By leasing from a lessor that can use depreciation write-offs, lessees get these tax benefits through lower lease rates.

Even the legislation eliminating the investment tax credit creates opportunities for tax-advantaged leasing. While repealing the investment tax credit for equipment placed in service after 1985, Congress also established transition rules governing the use of investment tax credit carry-forwards to taxable years beginning after Dec. 31, 1986. The rules require the phase-in of a 35% reduction in the value of the credit that is carried forward.

General Electric Credit Corp., Stamford, Conn., urges equipment users to accelerate the use of investment tax credit carry-forwards into earlier tax years so they can reduce the amount of the reduction. Sale-leasebacks can accelerate the use of these carry-forwards because the transaction creates a "tax liability, and, thereby, increases the potential for using more ITC carry-forwards in the year of sale," according to a pamphlet published by the GECC.

Still, much of the leasing industry's recent growth comes from the non-tax advantages that lessees enjoy, according to the 1987 U.S. Industrial Outlook published by the Department of Commerce. The percentage of lease deals motivated by tax advantage — 60% in 1984 — is falling, according to the report.

How tax reform will affect the lease/buy decision remains uncertain for many users.

"We're analyzing that right now," said Thomas D. Marion, assistant treasurer at the Trailer Train Co., Chicago. "We're not sure how we're going to come out."

The non-tax attributes of leasing — 100% financing, off-balance sheet treatment of lease payments, maintenance contracts and a hedge against technological obsolescence — have stimulated much of the leasing industry's recent growth, the report says.

The sale-leaseback of big-ticket assets offers another advantage. "Companies are realizing that they are sitting on assets that are worth something," said Madeline Bayliss-Allen, vice president at The CIT Group/Equipment Financing Inc., Livingston, N.J., which provides asset-based financing and leasing to equipment manufacturers and users.

"To me, it is the commercial equivalent of what is happening in the home equity finance market. Whoever is the owner of those assets is converting the value of those assets to some form of capital that they can use for other purposes."

Competition among lessors has sparked another advantage for equipment users: Some lessors are offering aggressive rental rates, basing the rates on unrealistic estimates of the equipment's residual value.

"There are people out there who are desperate for transactions, who are willing to go below where it makes financial sense," said Harvey Kinzelberg, chairman of the Meridian Leasing Corp., Deerfield, Ill.

There is a wide range of motivations behind leasing deals.

For example, Aetna Life & Casualty, Hartford, Conn., last year completed a $9 million leveraged lease transaction that was structured by First NH Resources Inc., Boston. That transaction financed the use of Steelcase office furniture.

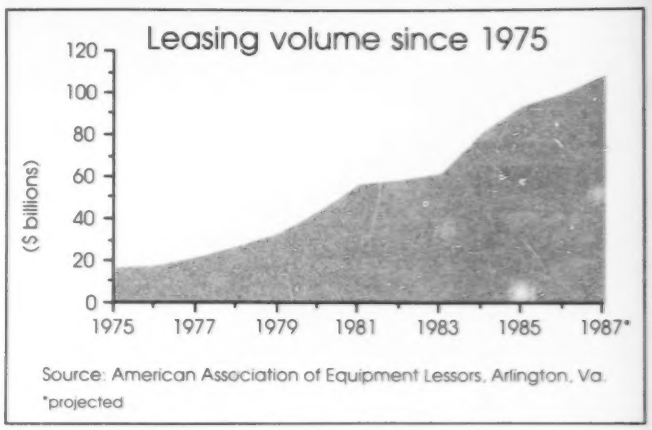
Leasing furniture makes sense under the accounting rules that govern the insurance industry, said Joseph P. Herzog, Aetna's director of corporate finance, because buying furniture erodes the surplus that governs how much business an insurance company can write.

Getting financing that would be allowed under the covenants of an industrial development revenue bond was the reason for a $4.6 million master lease facility entered into late last year by the West Co., Phoenixville, Pa. The manufacturing company decided to lease equipment because leasing is not counted against the $10 million project finance cap that governs the recipients of development bond proceeds, said Fred C. Lohrum, president of BancBoston Leasing Co., Boston.

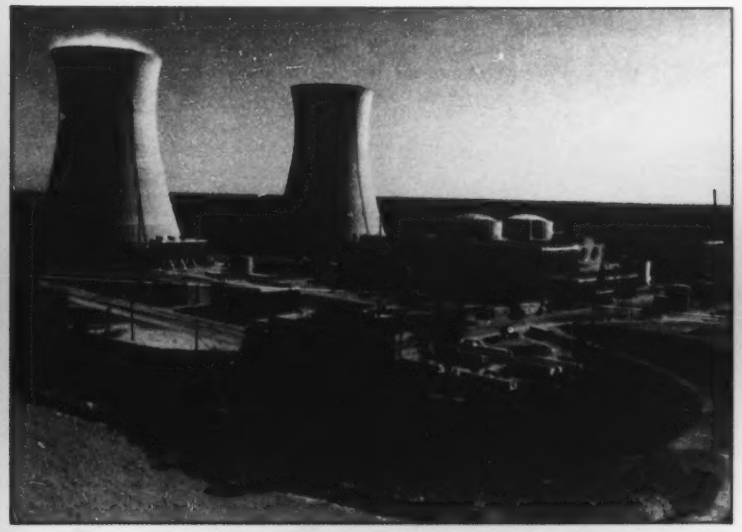
In a much bigger lease transaction, American Airlines made commercial aviation history with a "rent-a-plane" agreement with Airbus Industrie and the Boeing Commercial Airplane Co.

The March 1987 deal, valued between $2.2 billion and $2.5 billion, gives American the right to return 15 planes to Boeing and 25 to Airbus during the first 10

*Continued on page 20*



Source: American Association of Equipment Lessors, Arlington, Va.
*projected



*Leasing can translate into savings for some companies. A utility used a sale/leaseback arrangement for part of its interest in a nuclear power plant to save its customers money. Transportation companies often lease equipment to free capital for other uses.*

# Capital plentiful for transactions

**By Brad Rudin**

Capital for privately placed lease transactions will be plentiful in 1987, creating opportunities for equipment users, according to investment bankers.

Airline and utility companies, which dominated the list of major lessees in 1986, will reap the benefits of this surfeit of capital.

"For 1987, the supply of equity dollars vastly exceeds the supply of deals," said Donald R. Kendall, a managing director at Drexel Burnham Lambert Inc., New York. "Market rates are very, very competitive today and there are not enough leasing transactions available."

The excess of equity largely results from the expanded role of utility companies and banks in the leasing business.

Utility companies that have finished major projects look at equity positions in leasing deals as attractive investments. Banks have taken a greater interest in leasing deals because they seek tax-advantaged investments to replace the shelter on tax-exempt bond interest income that Congress killed in the Tax Reform Act of 1986.

Bruce E. Walenczyk, a vice president at Kidder Peabody & Co., also offered a bright assessment for the opportunities awaiting equipment users. "It's a good time to be a lessee."

Leasing offers a 400 to 500 basis-point advantage against other borrowing rates for equip-

# A new market for leases

## Securitization of receivables has bright future

By Brad Rudin

Publicly traded securities based on lease receivables may be poised for a second stage of growth as lessors, investment bankers and investors learn more about this 2-year-old financing instrument.

"It's my view that over an extended period of time — perhaps five or 10 years — the securitization of receivables will become a way of life in our industry," said Joseph J. Carroll, chief financial officer of The CIT Group, Livingston, N.J., the asset-based financing unit of Manufacturers Hanover Corp., New York.

He likened the future of securitized lease receivables to the development of the mortgage-related market, which grew slowly in the 1970s before becoming entrenched this decade.

*Joseph J. Carroll, chief financial officer of The CIT Group.*

*John R. Zacamy, Morgan Stanley & Co. managing director.*

Mortgage-related securities spawned products based on other assets — credit card receivables, car loans and lease receivables.

These non-mortgage products, first issued in 1985, are known as asset-backed securities.

Although growth has been slow — the volume of publicly traded lease-based deals rose only 12.3% in 1986 to $380 million compared with the 734% increase in all asset-backed securities to $10.3 billion — new players and products are expected to hit the public capital markets this year.

For example, Morgan Stanley & Co., New York, which previously has not been lead manager of an asset-backed issue, plans to introduce a securitized lease deal. Although John R. Zacamy, a managing director, would provide no details, he said, "It will be like no other structure."

Officials at Salomon Brothers Inc., the second-ranked investment bank in the receivable-backed market, have hopes of doing deals based on car lease receivables. If Salomon underwrites a car lease deal in the public market, it would be the first such transaction done by a Wall Street firm.

While officials at first-ranked First Boston Corp. expect the volume of publicly offered securitized lease receivables to reach $1 billion this year, John E. Graham, a vice president at Morgan Guaranty Trust Co., New York, said officials there tend "to think the private end of things is going to be where the development is going to happen most rapidly."

The private market has more potential for growth "because the public deals are just not at this point flexible enough to allow for some of the nuances in leasing," Mr. Graham said, noting changes in a deal are easier to make with the small number of lenders who invest in the typical private transaction.

Securitization of lease receivables has attracted the interest of lessors, investors and investment bankers.

"Any financial services company is a user of funds," said Edward C. Bray, group manager of the finance and real estate group at Fitch Investors Service Inc., New York. "They are interested in every avenue available to raise money."

For the investor, the securities offer a chance to buy highly rated debt with a substantial yield advantage at a time when A-rated corporate paper is becoming an endangered species.

Although concerns about liquidity have restrained institutional investors' participation in this market, once money managers "understand the credits and have some confidence that the markets are broad enough and liquid enough to deal in them, they'll be there," said Lawrence S. Harris, senior vice president in charge of fixed-income management at Alliance Capital Management Corp., New York.

For investment bankers, the securitization of lease receivables means underwriting and trading opportunities.

Among the benefits of securi-

*Continued from page 17*

ment that qualifies for grandfathered investment tax credits and favorable depreciation deductions, Mr. Walenczyk said, adding the advantage shrinks to about 200 basis points for equipment that lacks favorable depreciation treatment and eligibility under the transition rules governing the investment tax credit.

Because of the increased competition, lessors are offering more favorable fixed-price purchase options, said Richard A. Sun, vice president at First Boston Corp., New York.

Debt financing for leasing deals is also in good supply, said Gregory Clifford, a managing director at Smith Barney, Harris Upham & Co., New York. Debt investors are as comfortable with leasing transactions as they are with ordinary private placements, he said.

In a leveraged lease, the equity investor typically provides between 20% and 40% of the capital needed to buy the equipment. The equity investor, also called the lessor, enjoys all the tax benefits flowing from ownership even though the equity stake is less than 100%. Debt investors, who have no recourse to the lessor in the event of default by the lessee, put up a majority of the financing. The loan is secured by the lenders' claims on the equipment.

The now-repealed investment tax credit as well as depreciation deductions and deductions for interest used to fund the investment have been the primary tax advantages for lessors, which have passed these benefits through to equipment users in the form of lower rates.

Because of the transition rules governing the investment tax credit, the tax advantages of leveraged leasing will continue through 1987, said Drexel's Mr. Kendall. In 1988, however, the number of tax-driven big-ticket deals will decline substantially.

Utility companies will continue to do sale-leasebacks because these transactions enable the companies to make rate requests that are more likely to be granted by state regulatory agencies, Mr. Kendall said. Utility companies often face regulatory resistance to the hefty rate increases that result from the construction of large power plants.

Of the 10 equipment users that did the greatest volume of leveraged leasing in 1986, three are utilities, according to data compiled by IDD Information Services Inc., New York.

- In December 1986, Catalyst Energy Development Corp., New York, sold the Springerville (Arizona) Unit 1 coal-fired generating plant in a $705 million sale-leaseback. Catalyst acquired the Springerville unit in June when it bought the Alamito Co., Tucson, Ariz., increasing the value of the acquisition to stockholders by selling the Springerville plant.
- In 1985 and 1986, Public Service Co. of New Mexico, Albuquerque, sold its interest in the nuclear-powered Palo Verde units 1 and 2, Wintersburg, Ariz., to investors in transactions that totaled $325 million in 1985 and $575 million in 1986. The sale-leasebacks allowed the company to reduce a significant portion of its highest cost first-mortgage debt and preferred stock. The Palo Verde complex provides power to six utility companies.
- Arizona Public Service Co., Phoenix, sold and leased back part of the Palo Verde Unit 2 in two 1986 transactions that were expected to save customers more than $130 million.

Equity financing of nuclear power plants could become more difficult because the big investors in these projects may be reluctant to increase their exposure to this kind of deal, said Kidder's Mr. Walenczyk. "I just wonder when their appetite is going to be tapped out." ■

## Search slated

WASHINGTON — The $750 million American National Red Cross retirement plan is planning a search for small-capitalization stock managers late this summer, according to William Rose, director of treasury operations.

One or more firms will be selected and funded from a reduction in existing equity accounts or termination of an equity manager. ■

# New market . . .

*Continued from page 19*
tization are:
- elimination of interest rate and maturity risk;
- new source of funds;
- riskless fee income from the servicing of sold receivables;
- removal of sold assets from the balance sheet;
- improvement of financial measurements resulting from the reduction of balance sheet assets and liabilities with the retention of servicing income; and
- financing costs that are competitive with conventional debt financings, especially when the cost of equity is figured in.

Stephen T. Whelan, a partner in the law firm of Thacher Proffitt & Wood, New York, offered more reasons for lessors to consider securitization. Because the Tax Reform Act of 1986 reduces the benefits associated with equipment ownership, equity investors in lease deals are not expected to dominate them as in recent years, Mr. Whelan said. Debt will become a more important aspect of equipment financing.

Also, securitization reduces financing transaction costs because uniform commercial code filings and searches are less important than in conventional financings, he said.

Another advantage is the deals' flexibility. A lease that contains a lessee-oriented provision such as early termination might be difficult to finance conventionally, but financing that lease in a pool of more than 100 leases dilutes the risk of such a provision, Mr. Whelan said. And reduced risk results in competitive rates.

Still, lessors have been relatively slow to sell their receivables in the public capital markets.

Notes backed by lease receivables first were sold in the public markets in March 1985 when Sperry Lease Finance Corp. issued $192 million of 11% lease-backed notes due 1991.

Sperry Lease Finance is a bankruptcy-remote subsidiary formed by what was then Sperry Corp. to issue lease-backed securities. In a bankruptcy-remote relationship, the assets held by the finance subsidiary would not be subject to creditor claims if the parent came under the protection of the bankruptcy code.

In September 1985, Sperry Lease Finance sold an additional $146 million of 9.45% lease-backed notes due 1991. And in December 1986, it sold $174,450,000 of 7.05% lease-backed notes due 1992. First Boston lead managed all those deals.

*John E. Graham, Morgan Guaranty Trust Co.*

Photo by Arnie Adler

*Stephen T. Whelan of Thacher Proffitt & Wood*

In the Sperry offerings, the parent company — now Unisys Corp. — sold assets to the subsidiary. Sperry Lease Finance then issued "pay-through" debt secured by pools of lease receivables.

(The "pay through" structure is where the debt is the liability of the issuer and is secured by the cash flow of the lease receivable. It differs from the "pass through" approach, in which investors have an equity interest in receivables held by a grantor trust.)

Although unconsolidated for bankruptcy-law purposes, the two entities are consolidated for tax purposes. As a result, the parent company retained the tax benefits on the equipment sold to the subsidiary. Sperry did not recognize a gain or loss on the sale for accounting purposes.

A proposal by the Financial Accounting Standards Board to consolidate majority-owned subsidiaries with the parent company would bar parent companies from pushing assets off their books once the sale of the receivables to the subsidiary is complete.

By reducing the amount of total assets for accounting purposes, parent companies have been able to report better returns on assets. Consolidation "makes one of the selling points a little more difficult," said David Sayles, an associate at First Boston Corp.

But in cases where pass-through certificates are issued — such as in the case of General Motors Acceptance Corp. — consolidation would actually encourage the securitization of assets, said Morgan Stanley's Mr. Zacamy.

General Motors Corp., after consolidation with GMAC, would have balance sheet liabilities it might want to pay down by selling auto loan receivables.

Besides Sperry, the only other long-term public transaction based on lease receivables was the Goldome Bank, Buffalo, N.Y., offering of $205.7 million of 6.6% certificates due 1991.

Asked about the slow growth in the volume of lease-receivable securities, Morgan's Mr. Zacamy said many large financial institutions with lease subsidiaries need the high-yielding assets now on their books. "They are not about to shrink the business."

David Roe, chief financial officer at Xerox Credit Corp., Stamford, Conn., said he remained wary of securitized lease transactions because these deals might restrict the lessors' freedom to negotiate with customers. While the customer wants an agreement that offers maximum flexibility concerning the disposition of the equipment, the investor favors restrictions that ensure a stable cash flow. "The investor doesn't care; all they want is their money," Mr. Roe said.

At BancBoston Leasing Co., Boston, President Fred C. Lohrum offered a similar concern about the restrictions securitization might impose on lessors. "We want the flexibility to control the situation." ■

# Lease decisions . . .

*Continued from page 18*
tax will find leasing more attractive, or less unattractive. Further, the longer a business expects to pay the alternative minimum tax, the more attractive leasing becomes.

This is because the alternative tax tends to flatten out the tax advantage previously enjoyed by equipment owners relative to lessees. In the new tax environment, the alternative minimum tax pretty much eliminates accelerated depreciation by treating it as a tax preference.

Tables 3 and 4 show the cumulative tax shield generated by leasing and borrowing to buy for two different tax scenarios. In Table 3, the evaluating business expects to fall in the regular tax system at all times during the foreseeable future. Not surprisingly, the tax shield available under borrowing to buy in this case is created faster than under leasing, which increases the present value of ownership tax benefits.

If the evaluating firm expects to fall into the alternative minimum tax for the first five years, and to fall into the regular tax system thereafter, however, the tax results are shown in Table 4.

Note how the difference in tax shield between leasing and borrowing has been virtually eliminated until year six, when the firm has to "make up" the difference between the 20% alternative minimum tax and the 34% regular tax. By deferring the tax shield advantage of borrowing to buy, the present value cost advantage is diminished as well.

The present value cost differences between leasing and borrowing to buy for a number of tax system assumptions are shown in Table 5. The analysis supporting these values uses the debt displacement lease/buy model.

If the evaluating firm is a regular taxpayer, buying has a lower present value cost of $4,175. If the firm estimated it would pay the alternative minimum tax for one year and be a regular taxpayer thereafter, the present value cost advantage declines to $3,720. The longer a firm expects to pay the alternative minimum tax, the less attractive ownership becomes.

Leasing becomes more advantageous in this example if the expected excursion into the alternative minimum tax exceeds four years. ■

make anti-takeover devices like poison pills an issue again next year. They may challenge other common defenses such as staggered boards and fair price amendments.

Thirty-three shareholder resolutions challenging poison pills at various companies were filed this year by the $37 billion California Public Employees' Retirement System, Sacramento; the $52.3 billion Teachers Insurance and Annuity Association — College Retirement Equities Fund, New York; the $19.4 billion California State Teachers' Retirement System, Sacramento; the $13.5 billion State of Wisconsin Investment Board, Madison; and a few others.

None of the resolutions passed, although they did garner a vote count some would call significant. But the two camps are far apart when it comes to how to interpret the tallies.

Proxy sponsors insist they attracted an impressive level of support this year. Proxy solicitors, corporate executives and attorneys who represent client companies that were targeted say the resolutions didn't fare well at all.

"We think we did very well this year — we shot for 10% or 20% and we got 35% in some cases. The relationship between institutional investors and corporate management has changed. Large institutional investors have become a factor. We won't go back to being silent investors," declared Jose Arau, principal investment officer for the California employees fund.

Martin Lipton, the outspoken New York attorney from Wachtell, Lipton, Rosen & Katz who has long opposed these resolutions, is equally adamant in his view that the resolutions failed abysmally.

"As we reach the end of the May annual meeting season, it is clear the Council of Institutional Investors has suffered a stunning defeat in its proxy campaign against the poison pill," Mr. Lipton told clients in a memo May 26.

He called on the Securities and Exchange Commission to require groups of institutional investors with more than a 5% aggregate stake to file a 13D form with the agency "disclosing who they are and what they are up to."

A 13D must be filed when an investor acquires 5% or more of a company in connection with a tender offer.

Ian Lanoff, a Washington attorney with Willkie, Farr & Gallagher and secretariat of the Council of Institutional Investors, some members of which sponsored anti-pill resolutions, was angered by Mr. Lipton's comments, calling them "total bull----."

"Why is he trying to whip corporate clients into a frenzy when council members and other nonmember pension funds have tried to work with corporate managements? I don't think corporate executives are buying his venomous attack," Mr. Lanoff said.

He said the poison pill campaigns were fashioned by individual pension funds, not the council as a group, and he took issue with Mr. Lipton's suggestion that a 13D filing be required.

"The 13D filing is made in connection with an effort to acquire and take control of a company. Council members do not think we have the legal authority to act in concert and we weren't acting in concert," he said, adding the California public employees fund and the Wisconsin board are members, while TIAA-CREF is not.

Mr. Lanoff said the council members have said all along they want to be long-term stockholders in corporations and that they challenged the poison pills mainly on the ground they were put into place without being submitted to a shareholder vote.

Clearly, both proxy sponsors and corporate managements want to claim triumph during this year's season.

Proxy solicitors and their clients believe voting results should always be stated in terms of the percentage of outstanding shares. Looking at it that way, the votes on the shareholder proposals challenging poison pills appear to have garnered little support.

Data from Georgeson & Co. Inc., a New York proxy solicitation firm, show the vote tally both ways, but as a percentage of the outstanding vote, the tally ranges from 10.4% to 25.3%. (*See accompanying table.*)

"The vote as a percentage of outstanding vote is the truest measure of shareholder support," said John Wilcox, managing director and executive vice president at Georgeson.

Like his colleagues, Mr. Wilcox said the other two options — stating the vote as a percentage of the overall quorum or as a percentage of the shares cast on a particular proposal, are often misleading.

Using the percentage of shares voted, the anti-pill resolutions netted a low of 16.4% of the vote in one contest and a high of 41.4% in another.

Proponents of shareholder proposals, who usually state the results in terms of the number of shares cast on their proposals, are vehement that the proxy solicitors' habit of expressing the vote as a percentage of the outstanding shares is just as misleading.

"When it comes to approval, all that matters is the number of for and against votes cast," said James Heard, executive director of the Investor Responsibility Research Center, a Washington research group that tracks corporate governance issues. "Using the percentage of outstanding drops the level of support."

Perhaps the most closely watched poison pill contest was at International Paper Corp., New York, which put up a strong fight to keep the CREF-sponsored proposal off the ballot.

CREF's resolution netted about 9.8 million votes for, 25.5 million against, and 1.8 million abstentions. There were 52.4 million shares outstanding. By stating the results in terms of the number of votes cast, about 26.3% favored the CREF proposal. As a percentage of outstanding shares voted, the tally was 18.7%.

There are a few other problems with the numbers. Some votes include abstentions and some don't. Some tabulators count the abstention vote as the difference between the quorum figure (the total number of votes represented at the meeting) and the sum of the for and against vote. Others count the abstentions as only the boxes marked abstain. The SEC doesn't count abstentions.

Mr. Heard believes the high abstention rates — 2% to 20.4% — that occur in some cases mean money managers who cast ballots for their corporate pension fund clients don't want to vote against management so they abstain.

Most money managers deny they abstain, but they acknowledge this year there was more pressure from top executives, many of whom asked their money managers to let them review any votes that would be cast against the managements of companies. Many money managers said they avoided the problem by letting corporate managements cast the ballots. ■

More timely.

Beginning with the April 6th issue, *Pensions & Investment Age* became more timely, more compelling and more essential than ever.

That's because *P&I Age*'s editorial deadline has been extended until 11:00 a.m. Friday before issue date, making it possible for reporters to file important, late-breaking news later than before. The copy of *P&I Age* you read on Monday morning includes news from the previous business day.

Which means that *P&I Age*'s readers will be better served.

And so will our advertisers.

Which makes sense. Because, when you buy advertising, you buy the probability that your advertising will be exposed to and read by *P&I Age*'s audience. Each step *P&I Age* takes in improving readership translates to improved advertising exposure for you. And, it follows that the better we serve our readers, the better we serve you, our advertisers.

Keeping readers ahead editorially is the major reason that *P&I Age* continues to carry more investment management advertising than any other publication.

Because advertisers depend on *P&I Age* to deliver more readership, more frequency and more impact.

## Pension execs move up ladder

**By Chuck Paustian**

The pension post, once thought of in the industry to be somewhat of a dead-end job, has actually served as a stepping stone in the career paths of several corporate executives.

While all of the executives contacted had extensive academic training, and many had held other positions within the company, they all said the pension job offered opportunities for career advancement not found in other areas of the company.

"(The pension position) gives you a unique perspective on your company, from the capital market, outside-investor point of view," said William H. Schumann, treasurer of FMC Corp., Chicago. Before becoming treasurer, Mr. Schumann had been director of investor relations and investments at the company.

## CTA fund switches to full tactical allocation

**By Barry B. Burr**

CHICAGO — The $800 million Chicago Transit Authority pension fund has adopted possibly the most complete use so far of tactical asset allocation through financial futures.

The technique uses futures to make frequent shifts in asset mix in hopes of maximizing expected return.

The new allocation model, run by The Boston Co. Inc., Boston, is the centerpiece of a major restructuring of the fund's equity managers. In all, the restructuring involves shifting $429 million, or about 54%, of the fund's assets.

Aside from Boston Co., CTA officials hired nine equity managers, retained three and is dropping five mutual funds and three separate account portfolios. Changes will occur over the next few weeks.

In addition, officials in August will begin a search for the fund's first one or two international equity managers, expected to be hired by year end, said Gregory C. Nagle, manager-pensions. Other international managers could be hired over the next year or two.

The tactical allocation model, a generic term for what Boston Co. calls a deployment optimizer, will adjust the asset mix of the CTA fund at least monthly and possibly 15 times or more a year, according to Mr. Nagle and Edgar E. Peters, Boston Co. vice president and portfolio manager.

Depending on the scenario presented by the model, the CTA will change its equity mix from 20% to 80%, its bond allocation from 20% to 80% and its cash proxies from 60% to zero using futures.

The allocation model will affect about 60% of the fund.

The asset shifts using futures won't affect the CTA allocation to its investment managers.

"It will simply be an overlay done by Boston Co. to effect the change," Mr. Nagle said.

The fund's allocation of its investment assets among its managers will be 65% equities, 16% real estate and 19% cash, though its target is 65% equities, 20% real estate and 15% cash.

The CTA's current 60% equity allocation will increase to 65% once the new managers are funded. Because the CTA holds no bonds, Mr. Nagle said the model was adjusted to use the real estate allocation as a proxy for 20% of the bonds.

Until it increases the real estate allocation over the next couple of years to 20%, Boston Co. will go long in fixed-income futures, adding 4% to the real estate/bond allocation and thus reducing cash to the 15% target allocation.

Through tactical allocation, the fund expects to achieve a higher return by adjusting its asset mix periodically, Mr. Nagle said.

The fund uses futures because frequent buying and selling of stocks and bonds to change the asset mix would be too costly and time consuming.

Tactical allocation, a type of market timing, uses some of the same futures instruments and overlay techniques as portfolio insurance or dynamic hedging.

Portfolio insurance, however, tries to minimize loss, while tactical allocation seeks to maximize return.

Robert D. Arnott, vice president for equity and asset allocation strategy, Salomon Brothers Inc., New York, said, "As the market plummets, tactical asset allocation will tend to buy (stock index futures), while portfolio insurance will sell."

Although a number of other sponsors are using tactical allocation for part of their funds, the CTA appears to be most aggres-

## Trust to aid steel plans

**By Nicky Robertshaw**

WASHINGTON — Sen. John Heinz, R-Pa., contends the ailing steel industry could be rescued if steel companies would issue stock warrants to back a special trust fund he wants set up to pay supplemental retirement benefits.

A bill he is sponsoring, which is supported by organized labor and the steel industry, would make it easier for financially troubled steelmakers to close outmoded or excess-capacity plants. The costs associated with shutdowns sometimes have prevented the industry from streamlining and returning to profitability, said Milton Deaner, president of the American Iron & Steel Institute, Washington.

The newly created trust would cover certain supplemental retirement benefits, such as early retirement and plant shutdown benefits, that would have been generated from 1982 through 1990 from loss of steelmaking capacity. Total U.S. steel industry capacity is expected to shrink to 112 million tons in 1987 from 154 million tons in 1982, according to preliminary figures from the institute's annual statistical report.

Sen. Heinz's plan, however, does not address the massive unfunded pension liabilities accrued by steel companies. Most of those benefits are covered by the Pension Benefit Guaranty Corp.

In a speech to the United Steelworkers of America in Washington, Sen. Heinz outlined his plan for a Steel Industry Revitalization Act, which is being drafted. Plans are to move the proposal through this session, probably by attaching it to the budget reconciliation bill to be considered this summer, an aide to Sen. Heinz said.

The aide estimated supplemental benefits would not total more

# Folger Adam looks to secure its future

**By Marcia Parker**

LEMONT, Ill. — Folger Adam Co., a family-owned prison lock and detention equipment manufacturer that went private less than two years ago, is riding high on the nation's "put 'em behind bars" craze and the world's newly raised security consciousness — and speculation is the company soon will go public again.

**Corporate finance**

Since it went private in a leveraged buy-out, Folger Adam has grown rapidly, primarily by acquiring companies and unveiling new twists on old products, in a fast-paced market, where annual growth rates of 10% to 15% are not uncommon.

While it is not a big-name leveraged buy-out like Beatrice Cos., Folger Adam's story is a good example of what happens to a company after it has been taken private but before it has come full circle and gone public.

When Folger Adam was purchased in August 1985 by members of its management and Adler & Shaykin, a New York investment firm specializing in management leveraged buy-outs, it was an old-line, family-owned manufacturer with a well-respected, but limited, line of prison-related supplies. Sales for the fiscal year ended March 31, 1985, amounted to $22.5 million.

The growth prospects in the industry were clear, but Folger Adam didn't have the capital to make a big splash through acquisitions.

"Before the leveraged buy-out, we had the money to fuel internal growth, but we didn't have the capital to fund acquisitions," said Donald Stading, president. "Folger Adam couldn't have done it on a stand-alone basis."

With extra capital raised by

# Judge to weigh bid to block BP merger

**By Marcia Parker**

CLEVELAND, Ohio — An Ohio judge is expected to hear June 29 the California Public Employees' Retirement System's challenge of a proposed settlement between Standard Oil Co. minority shareholders and British Petroleum Co., which BP officials hope will complete their $7.7 billion bid for Standard Oil.

Judge Thomas Pokorny of the Court of Common Pleas of Cuyahoga County, Ohio, was scheduled to hold the hearing June 29 to decide whether to approve the settlement of London-based BP's final $71.50-per-share plus warrants offer for Standard Oil.

The $37.7 billion California pension fund owns 779,500 shares in Standard Oil and is the only minority shareholder challenging what it calls a "coercive" settlement that is an "attempted freeze-out of the minority shareholders."

It has also questioned whether BP breached its fiduciary duty to minority shareholders by failing to ask its investment banker, Goldman Sachs & Co., to render an opinion on BP's final offer.

If Judge Pokorny concurs with the objections of the Sacramento, Calif.-based pension fund to the proposed settlement, BP's acquisition of Standard Oil, Cleveland, could be held up indefinitely. Lengthy court action likely would follow.

BP officials had no comment on the California fund's action.

After minority shareholders, including the California pension fund, balked at BP's initial $70-per-share, all-cash offer in March and filed class-action suits, BP forged a settlement based on the higher, $71.50-per-share plus warrants offer.

All of the minority shareholders

# Flat economy will close out the year

**By Fred Williams**

Economists have all but given up on a recession this year and look for flat economic growth in the second half, after being off the mark in their predictions for gross national product and long-term interest rates during the first half of 1987.

Following the interest-rate run-up in the first half, economists have scaled back their interest rate projections on 30-year Treasury bonds for the second half, and believe inflationary pressures are receding.

In a December survey by *Pensions & Investment Age*, 12 leading economists predicted the interest rate on 30-year Treasury bonds would be between 6% and 7.25% by June. Rates on long-term bonds are at about 8.32% and were more than 9% at one point in June.

Eight of the 12 were surveyed again late this month; they predict long-term bond rates of between 7% and 10.3% by the end of the year.

Many of the economists point to rapid inventory accumulation caused by inflationary pressures and the decline of the dollar on foreign exchange markets as the primary reasons for missing on their last try.

Frank Schott, chief economist at the Equitable Life Assurance Society of the United States, New York, had called for long-term bond rates of 6.9% in June; he's now forecasting 8.5% by the end of the year.

"What went wrong was the interest-rate uplift I expected was a little earlier than I expected. It was partly related to inflation, which was worse than expected, and the dollar weakness, which was much worse than expected," he said.

"The worst mistake was calling for 6.9% on 30-year bonds instead of 8.4%. In order to calm down the investment markets, the Fed had to move toward higher interest rates, and it was more pronounced on the long end."

Like many of his colleagues, Mr. Schott was expecting a rise in interest rates, but "I put most of the rise in the second half. I now think rates will remain stable in the second half. It occurred sooner than expected, but for the year will be a modest increase."

Georges Rocourt, chief economist at Mercantile Safe Deposit and Trust Co., Baltimore, said timing was the chief factor in missing the call on long-term rates. He had called for midyear bond rates to be 6.8%; he's forecasting long-term rates to be 7.5% by 1988.

"It was all timing. I thought we would get at rise in rates and it would be over by May and then start down again. We had a stronger economy and stronger commodity prices, as well as renewed inflationary expectations and a rise in inventory growth . . . resulting in higher rates (in the first half)," said Mr. Rocourt.

According to Mickey Levy, senior vice president and chief economist at Fidelity Bank in Philadelphia, interest-rate pressures were due in large part to Fed monetary policies in response to inflationary pressures.

"I was looking for another Fed easing, which didn't occur. There was a tightening by the Fed rather than an easing. Inflationary expectations were going up. A steepening of the yield curve reflects inflationary expectations," said Mr. Levy. "Now, rates may come down in the near term but they will be up by year end."

Mr. Levy had anticipated 7% on 30-year bonds by midyear and now looks for 9.25% by year end.

The forecast rates on 90-day Treasury bills for June were closer to reality. Most projected short-term rates of about 5.75% by June. The rates are now about 5.64%. The economists are calling for short-term rates to be between 5% and 7.6% by the end of the year.

### GNP growth

The economists also were off when predicting growth in the gross national product for the first half. In December, the range was −3% — from Deborah Johnson, senior economist at Prudential-Bache Securities, New York — and 7.5% — from David Levine, chief economist at Sanford C. Bernstein & Co., New York. Most were forecasting GNP growth of just more than 2%.

Now, those surveyed believe GNP will show a growth rate of about 3.1% when the Commerce Department releases its statistic for the first half.

# PBGC terminates 5 LTV fund managers

By Fred Williams

WASHINGTON — The Pension Benefit Guaranty Corp., has terminated five investment management firms it inherited from The LTV Corp. in January when the company terminated four steel unit pension plans, and is starting to fold LTV's assets into its investment management structure.

In another development, the PBGC broadened the contract of consultant Wilshire Associates, Santa Monica, Calif. Wilshire, which has provided some measurement services 1980, now is a full-time consultant in such areas as investment analyses, management advisory services and case-related investment assistance.

With the assets of Dallas-based LTV, the PBGC terminated, effective June 1, Western Reserve Capital Management Inc., Dallas, a wholly owned subsidiary of LTV. Within a few days, the PBGC terminated equity accounts with Batterymarch Financial Management, Boston; InterFirst Investment Management Inc., Dallas; MSecurities Corp., Dallas; and MacKay-Shields Financial Corp., New York.

Western Reserve managed about $300 million of the assets turned over to the PBGC; amounts managed by the other terminated firms were not released.

LTV's remaining managers are Franklin Portfolio Associates Inc., Boston; Delaware Investment Advisers, Philadelphia; Lord, Abbett & Co., New York; Mellon Bank, Pittsburgh; Bankers Trust — Investment Management Group, New York; Scudder, Stevens & Clark, Boston; C B Institutional VI, New York; and Karsten Realty Advisors, Los Angeles.

The PBGC is reviewing the remaining managers, a process expected to take a few months.

"We are taking the time necessary to determine what is in the best interests of the pension fund and make an orderly transition in asset management. We are undertaking an evaluation of the asset management in order to make future decisions," a PBGC official said.

The official said the agency left LTV's structure intact for six months because PBGC staffers needed time to evaluate the disposition of the assets.

"We don't usually immediately liquidate assets (of terminated plans). There is usually an orderly transfer and it is common for companies to continue to be involved, but the time required varies depending on how large the fund is," she said. "LTV was unusual in the sense that the size and underfunded nature of the plans will take more time for us to review how the assets will be managed and for us to make the necessary decisions."

The PBGC assumed responsibility for $1.3 billion of LTV's approximately $2 billion in total pension assets. Trusteeship of the assets managed by the 12 external money managers was transferred to PBGC Jan. 13 along with an estimated $3.6 billion in unfunded liabilities for all LTV steel unit pension plans. The company filed for Chapter 11 of the Federal Bankruptcy Act in July 1986.

The PBGC initiated action to terminate LTV's Republic Steel retirement plan as of Sept. 30, 1986, after concluding the plan no longer could make payments to 3,000 retirees. ■

## Corrections & clarifications

Rowe Price-Fleming International Inc., Baltimore, provided incorrect information for *Pensions & Investment Age*'s profiles of the 50 largest international money managers. The firm has $51.5 billion in total foreign-invested assets under management, and $37.51 billion in international assets. The firm's directory profile is correct, but the new information was provided too late to be updated in *P&I Age*'s directory tables. Rowe Price-Fleming's corrected statistics would raise the firm's ranking among international managers one notch to eighth place.

# International, global assets at $51 billion

**By Marlene Givant**

Global assets under management at the 50 largest international investment management firms nearly doubled in the year ended March 31, with several firms gaining millions in assets from reporting none in *Pensions & Investment Age*'s 1986 directory of international investment managers.

Overall, assets in international and global accounts among the 50 largest international managers swelled about 58.7% in the 12 months ended March 31, to $51.04 billion from $32.18 billion. From 1985 to 1986, assets grew 105%.

The growth was slower this year mainl because pension executives "clawed cash back in many, many, many cases because they found themselves above international target levels," said Chris Nowakowski, president and founder of InterSec Research Corp., Stamford, Conn.

While global account assets nearly doubled, rising to $8.76 billion from $4.49 billion in the year ended March 31, international account assets rose 32.5%, to $37.05 billion from last year's $27.95 billion. But these figures reflect global's growth. Last year international assets made up 86.9% of the total assets; this year, only 81%.

International accounts are defined as those not invested in the United States; global accounts invest in any allowable market.

While interest in global investing grew at a faster pace than international, global returns have been lower than international returns. The Morgan Stanley Capital International World index returned 41.1% in the 12 months ended March 31, while the Europe Australia Far East index returned 61.3%.

Of global investments, equity accounts totaled $6.28 billion; fixed income, $2.07 billion; and balanced, $405 million.

One-third of all foreign fixed-income assets were in global accounts, even though overall global investments made up only 19% of total foreign investments; only $4.73 billion of international accounts were invested in fixed income.

Small firms experienced the greatest percentage growth in assets while Templeton International, Fort Lauderdale, Fla., and J.P. Morgan Investment Management Inc., London, maintained their No. 1 ranking in global and international, respectively, even though Templeton had a modest gain and J.P. Morgan dropped in assets.

Templeton's global assets rose 35% to $2.7 billion vs. $2 billion a year ago, a modest increase compared with the World index's 41.1% return.

Ken Scislaw, Templeton's manager-corporate development, attributed the low growth to the firm's not being invested in Japan for four to five years; that high-performing market represents a majority weighting in global benchmarks.

J.P. Morgan fell to $3.11 billion from $3.67 billion because many of its long-time clients cut back on international to return to target asset allocations or to take profits — at least temporarily, a spokeswoman said. Morgan is believed to have been the first money manager to put significant amounts of tax-exempt money into the market.

Other firms among the top 10 on both charts last year didn't fare as well.

Fidelity International Investment Advisors, Boston, slipped to seventh from third place in both the global and international listings, reporting $300 million in global and $2 billion in international accounts.

Capital Guardian Trust Co., Los Angeles, fell to eighth place among global managers from second because its assets slipped to $288 million from $291 million. John Seiter, senior vice president, said the slip was due to several large clients scaling back to target levels in international accounts and global accounts. The firm also focused less on adding new customers and more on developing existing client relationships, Mr. Seiter said.

In international, its assets rose slightly, given market gains, to $2.59 billion, ranking it fourth vs. last year's second place finish at $1.99 billion.

A number of firms that had nothing or very little in international or global accounts last year reported phenomenal gains this year, with those gains pushing some into the top 10.

Warburg Investment Management International Ltd., London, soared to fifth place from 24th among global managers when its assets jumped to $371 million from $20 million. Two large and one jumbo public fund accounts were responsible for the increase, said John Townsend, director.

"There's a bubbling interest in global (equities), but the majority of the business is still toward the EAFE approach," he said.

On the fixed-income side, things are a little different.

"People are still struggling about which is a better approach — international or global," Mr. Townsend said.

"The case for global bonds is often better than the case for global equities because bonds are more dependent on currency and interest rate moves for performance . . .

"People go into international equities for diversification; people go into foreign bonds to make money."

BA Investment Management International Ltd., London, also jumped — from zero to $321 million in global accounts, ranking sixth. The firm got roughly 10 new appointments in the first quarter of 1987 alone.

"Two accounts (totaling $50 million) originally wanted international; we convinced them to let us manage on a global balanced basis for the time being," said Francois Dennery, director and vice president. "It's not an avalanche, but we're seeing a lot of interest in balanced and global. In the next two years, I think most appointments are going to be that way."

Despite recent staff defections and a resulting loss of several clients, global assets of ABD International Management Corp., New York, jumped to $132 million from zero last year, lifting it to 15th place from 33rd. It has three global accounts, said Alan Fressle, client services representative.

State Street Bank and Trust Co.'s global assets grew to $158 million in two accounts from zero, jumping into 12th place. Among international account managers, State Street moved into second place, with $3.09 billion, vs. last year's sixth place finish with $1.57 billion.

Accounting, in part, for the increase is that for the first time, public funds went international and chose indexing, because "it's a safe way to go," said Larry Martin, vice president and head of the international portfolio department.

Of State Street's $3.25 billion in combined international and

### ABD International Management Corp.

*10 E. 53rd St., New York, N.Y. 10022; (212) 319-5020*

| | |
|---|---|
| Total assets managed | $1,064,000,000 |
| Tax-exempt assets managed: | |
| Total | $836,000,000 |
| International/global | $836,000,000 |

ABD International Management Corp., a subsidiary of ABD Securities, managed $706 million in international accounts as of March 31, all in equities.

The assets were committed most heavily to Japan, 45.6%; the United Kingdom, 20.9%; West Germany, 7.5%; Canada, 4.7%; and France, 4.2%.

It managed $130 million in global accounts as of March 31. The global assets, also all in equities, were committed most heavily to the United States, 42.4%; Japan, 26.4%; the United Kingdom, 11.8%; Germany, 4.4%; and Canada, 2.8%.

The investment approach encompasses selective equity investment in industries and companies with excellent growth prospects in 17 global markets. Managers use bonds and cash reserves to protect portfolio values during declining equity markets and employ active currency management to improve returns and reduce risk. The investment process views security and currency selections as two separate processes.

Of total assets under management, $228 million was for non-U.S. pension funds; there were eight U.S. tax-exempt clients.

Minimum account size for individual management is $15 million.

There was $101 million in mutual funds as of March 31.

Analysts or portfolio managers are stationed in Frankfurt.

The firm experienced a $467 million net loss in U.S. institutional tax-exempt business in the year ended March 31 for international and global equity accounts.

It has a non-U.S. hedging capability, and has been registered with the SEC since 1980.

Wilhelm Heischmann is chief investment officer. Armin Grunow, president, is client contact.

### Alliance Capital Management International

*43 Upper Grosvenor St., London, England W1X9PG; 011-44-1-493-9606*

| | |
|---|---|
| Total assets managed | $1,346,000,000 |
| Tax-exempt assets managed: | |
| Total | $378,000,000 |
| International/global | $378,000,000 |

Alliance Capital Management International Inc., a subsidiary of Alliance Capital Management Corp., invested $355 million in international accounts as of March 31. The international assets, all in equities, were committed most heavily to the Netherlands, 20.7%; Japan, 20.2%; West Germany, 17.2%; the United Kingdom, 8.2%; and Switzerland, 7.4%.

There was $23 million in global accounts, with $13 million in equities and $10 million in fixed income. Global equity assets were committed most heavily to the United States, 46.6%; West Germany, 17.5%; the Netherlands, 9.8%; the United Kingdom, 8.8%; and Japan, 6.6%.

The firm has an active growth-oriented investment philosophy. Research is applied to the early recognition of fundamental change, leading to the identification of investment opportunity through undervalued markets, currencies, industries and economic sectors.

Of the total assets under management March 31, $968 million was for non-U.S. pension funds; there were 25 U.S. tax-exempt clients.

Minimum account size for individual management is $10 million.

There was $210 million in mutual funds.

Analysts or portfolio managers are stationed in London, New York and Tokyo.

The firm had a $75 million net gain in U.S. tax-exempt institutional business for international and global accounts in the year ended March 31.

The firm has a non-U.S. hedging capability, and has been registered with the SEC since 1971.

Dave Williams, chief executive officer, is chief investment officer. The client contacts are Clinton J. Kendrick in New York at (212) 969-1030, and Philip Douglas in London.

### American Express Asset Management

*1 Broadgate, London, England EC2M 7HA; 011-44-1-601-0021*

| | |
|---|---|
| Total assets managed | $2,354,000,000 |
| Tax-exempt assets managed: | |
| Total | $397,000,000 |
| International/global | $397,000,000 |

American Express Asset Management, whose parent company is Shearson Lehman Brothers, a unit of American Express Co., invested $315.2 million in international accounts for U.S. tax-exempt clients as of March 31. The assets, all in equities, were committed most heavily to the United Kingdom, 21%; Japan, 17%; Spain/Portugal, 10%; Canada, 10%; and Singapore/Malaysia, 9%.

There was $81.6 million in global accounts, $70.6 million in equity accounts and $11 million in fixed-income accounts. Global equity assets were committed most heavily to the United States, 21%; United Kingdom, 17%; Japan, 11%; Singapore/Malaysia, 10%; and Australia, 8%.

American Express Asset Management is a specialist management firm of non-core portfolios. It takes a thematic approach, identifying global investment themes and then using valuation screens to select attractively valued companies benefiting from those themes.

Of total assets under management, $50 million was for non-U.S. pension funds; there were nine U.S. institutional tax-exempt clients.

Minimum account size for individual managers is $15 million.

There was $133 million in index funds.

Analysts or portfolio managers are stationed in London and Brussels.

The firm reported a $203 million gain in U.S. tax-exempt institutional business in international and global accounts for the year ended March 31.

The firm has non-U.S. hedging capability, and has been registered with the SEC since 1984.

Karl Van Horn, chairman, is chief investment officer. Susan Leader, director of marketing, is client contact at (212) 415-0802.

### BA Investment Management International Ltd.

*P.O. Box 262, 1 Watling St., London, England EC4P 4BX; 011-44-1-634-4664*

| | |
|---|---|
| Total assets managed | $1,808,000,000 |
| Tax-exempt assets managed: | |
| Total | $1,110,000,000 |
| International/global | $1,110,000,000 |

BA Investment Management International Ltd., whose parent is BA Investment Management Corp., invested $283.8 million in international equity and $504.7 million in international fixed-income accounts for U.S. tax-exempt clients as of March 31. The equity assets were committed most heavily to the United Kingdom, 28.3%; Spain, 19.1%; France, 15.1%; the Netherlands, 9.6%; and West Germany, 8.7%.

As of the same date, there was $8.2 million in global equity and $313 million in global fixed-income accounts, with the equity assets committed most heavily to the United States, 24.2%; United Kingdom, 23.9%; Spain, 16.1%; France, 13.3%; and West Germany, 8.2%.

The firm follows a three-step process. Objectives and risk/return parameters are mutually agreed upon. It practices active, discretionary management, with a top-down, disciplined team approach. Consensus expectations, reflected in market valuations, are assessed and compared to in-house analysis, with prospective risk/return profiles developed from alternative scenarios. Its global strategy uses common assumptions for fixed and eq-

When investing in foreign countries, you need a secret agent.

An agent who knows the ins and outs of foreign financial centers. And who knows how to accomplish your global custody aims; quietly, swiftly, surely.

A secret agent called The Mitsubishi Bank of California. As part of the world's fourth largest bank, with assets in excess of $210 billion, we get the job done for your trust/custodial accounts handling security settlements and transfers, foreign exchange, income collection, and tax reclamations, without calling attention to ourselves or what's being accomplished for you.

And, Mitsubishi Bank brings you two additional security measures as well. There are no double agents. Your clients remain your clients. And, Mitsubishi Bank headquarters are in Los Angeles; the most advantageous time zone for seizing European and Pacific basin opportunities within a single business day.

How secret is Mitsubishi Bank? It ranks third, behind Chase and State Street, in global custody assignments. And how many people know that?

Call Gearey Johnstone at (213) 621-1305 for more information on how many ways your global custody needs can be met by having a secret agent. And how many ways your institution can profit from having the surveillance and protection of secret service.

The best kept secret in global custody.

## Baring International Investment

*9 Bishopsgate, London, England EC2N 3AQ; 011-44-1-623-5264*

Total assets managed ..... $1,600,000,000
Tax-exempt assets managed:
Total ..... $1,547,000,000
International/global ..... $1,547,000,000

Baring International Investment, whose parent company is Baring International Investment Management, managed $1.25 billion in international equity and $301 million in international fixed-income accounts for U.S. tax-exempt clients as of March 31. The equity assets were committed most heavily to the United Kingdom, 25.8%; Japan, 24%; West Germany, 10.6%, Switzerland, 7.3%; and the Netherlands, 6.2%.

The firm is an active manager, selecting and weighting asset classes and markets from a top-down perspective. Regional specialists pick stocks based on company fundamentals, and managers will hedge to protect asset value.

Of total assets under management, $50 million was for non-U.S. pension funds; there were 19 U.S. institutional tax-exempt clients.

Minimum account size for individual management is $20 million.

Of the U.S. tax-exempt assets invested abroad, $50 million was in commingled accounts.

Analysts or portfolio managers are stationed in London, Tokyo, Hong Kong and Seoul.

The firm experienced a $151 million gain in U.S. institutional tax-exempt business in international accounts for the year ended March 31.

The firm has a non-U.S. hedging capability, and has been registered with the SEC since 1980.

Peter S. Hartley, managing director, is chief investment officer. John F. McNamara is client contact.

## Batterymarch Financial Management

*600 Atlantic Ave., Boston, Mass., 02210; (617) 973-9300*

Total assets managed ..... $10,369,000,000
Tax-exempt assets managed:
Total ..... $9,943,000,000
International/global ..... $1,180,000,000

Batterymarch Financial Management invested $1.15 billion in international equity accounts for U.S. tax-exempt clients as of March 31. The assets were committed most heavily in Japan, 22%; the United Kingdom, 12%; Australia, 14%; Canada, 15%; and Hong Kong, 8%.

As of the same date, there was $31 million in global equity accounts. The assets were committed most heavily in the United States 78%; Japan, 6%; United Kingdom, 3%; Australia, 3%; and Canada, 2%.

The overall investment philosophy is to manage portfolios actively on the basis of conservation, value-oriented and contrary opinion strategies in an attempt to exploit market inefficiencies. The management process is highly automated. The active management equity philosophy is to search for values in the form of capital gains or divided yields that exist in the sectors of the market perceived to be undervalued.

Of total assets under management, $40 million was for non-U.S. pension funds; there were 107 U.S. institutional tax-exempt clients.

Minimum account size for individual management is $10 million.

Of the U.S. tax-exempt assets invested abroad, $721 million was in mutual funds.

Analysts or portfolio managers are stationed in Boston.

The firm has been registered with the SEC since 1969.

Dean LaBaron, trustee, is chief investment officer. James R. Ullman is client contact.

The treasury management directory will appear Aug. 10.

WHAT DOES THIS BEAR
HAVE IN COMMON WITH A BULL?

In reality, very little. Bulls tend to follow the herd blindly. Charging ahead without reflection. Hardly the characteristics you would want in your international asset manager.

That's why more and more U.S. plan sponsors are turning to Julius Baer Investment Management. For good timing and consistently superior performance. In both fixed interest and equity markets.

We draw on the strong portfolio management capabilities of JBIM in London. And on the strategy and policy-making expertise of the Julius Baer Group, Zurich, which has over 40 years experience in international portfolio management and billions invested in global fixed income and equity markets.

If your objectives call for customized global asset management services, we invite you to take a closer look at JBIM. We plan ahead – on your behalf. Contact: Jay A. Dirnberger, Managing Director, JULIUS BAER INVESTMENT MANAGEMENT INC., 330 Madison Avenue, New York, N.Y. 10017, Tel.: (212) 949-9055.

### BEA Associates

*153 E. 53rd St., New York, N.Y. 10022; (212) 832-2626*

| | |
|---|---|
| Total assets managed | $6,496,000,000 |
| Tax-exempt assets managed: | |
| Total | $6,106,000,000 |
| International/global | $586,000,000 |

BEA Associates managed $586 million in global equity accounts for U.S. tax-exempt clients as of March 31. The assets were committed most heavily to the United States, 70%; Japan, 6%; Spain, 5%; the United Kingdom, 5%; and Mexico, 4%.

Managers buy stocks that are undervalued based on the firm's disagreement with the market consensus.

Minimum account size for individual management is $5 million.

Analysts or portfolio managers are stationed in New York.

The firm experienced a net loss of $2.7 million in U.S. institutional tax-exempt business for international and global accounts in the year ended March 31.

The firm has been registered with the SEC since 1940.

Albert Zesiger, president, is chief investment officer and client contact.

### Bessemer Trust Co.

*630 Fifth Ave., New York, N.Y., 10111; (212) 708-9100*

| | |
|---|---|
| Total assets managed | $5,100,000,000 |
| Tax-exempt assets managed: | |
| Total | $661,000,000 |
| International/global | $240,000,000 |

Bessemer Trust Co., a subsidiary of the Bessemer Group, managed $240 million in U.S. institutional tax-exempt assets in international equity accounts as of Dec. 31. The assets were committed most heavily to Japan, 32.3%; the United Kingdom, 16.6%; Spain, 8.2%; Hong Kong, 7.4%; and France, 6.2%.

The investment approach has a top-down orientation with the focus on macroeconomic analysis, control of currency exposure and analysis of emerging economies, technologies and companies. Active management of sectors and geographic commitments are the principal focus.

Of the total assets managed, $95 million was for non-U.S. pension funds; there were 68 U.S. tax-exempt clients.

Minimum account size for individual management is $5 million.

Of the U.S. tax-exempt assets invested abroad, $33 million was in mutual funds.

Analysts or portfolio managers are stationed in London.

The firm has non-U.S currency hedging capability.

John R. Whitmore is chief investment officer. Robert C. Elliott is client contact.

### Arnhold and S. Bleichroeder International

*45 Broadway, New York, N.Y. 10006; (212) 943-9200*

| | |
|---|---|
| Total assets managed | $510,000,000 |
| Tax-exempt assets managed: | |
| Total | $430,000,000 |
| International/global | $430,000,000 |

Arnhold and S. Bleichroeder International, whose parent is Arnhold and S. Bleichroeder Inc., managed $430 million in international equity accounts for 10 U.S. tax-exempt clients as of March 31. The assets were committed most heavily to the United Kingdom, 24%; Hong Kong, 17%; Australia, 13%; West Germany, 9%; and Switzerland, 7%.

The firm's investment approach focuses on the selection of securities, not countries. Managers evaluate the fundamental criteria of a company, and compare absolute and relative p/e and price cash flow. It targets a 50% rate of return for each selected stock over a 12-month to 24-month time horizon.

Of the U.S. tax-exempt assets invested abroad, $80 million was in mutual funds and $80 million in commingled accounts.

Analysts or portfolio managers are stationed in New York.

The firm reported a $200 million net gain in U.S. institutional tax-exempt business for international accounts for the year ended March 31.

The firm has a non-U.S. hedging capability, and has been registered with the SEC since 1950.

Howard B. Moss, senior portfolio manager, is the chief investment officer. Fred Reynolds is the client contact.

### Brown Brothers Harriman

*59 Wall St., New York, N.Y., 10005; (212) 483-1818*

| | |
|---|---|
| Total assets managed | $11,700,000,000 |
| Tax-exempt assets managed: | |
| Total | $5,900,000,000 |
| International/global | $298,000,000 |

Brown Brothers Harriman & Co. managed $293 million in international equity and $5 million in international fixed-income accounts for U.S. tax-exempt clients as of March 31. The equity assets were committed most heavily to Japan, 35%; the United Kingdom, 14%; West Germany, 11%; Hong Kong/Singapore, 7%; and Switzerland, 7%.

The firm's investment approach is to invest in countries whose growth rates will exceed that of the United States and whose policies are pro-investment. It seeks marketability, hedges currency risk when appropriate ar manages reserves aggressively.

Of the total assets under management, $51 million is for non-U.S. pension funds; there were 323 U.S. institutional tax-exempt clients.

Minimum account size for individual management is $5 million.

Analysts or portfolio managers are stationed in New York, London, Paris, Zurich and Tokyo.

The firm reported a $37 million net gain in U.S. institutional tax-exempt business in the year ended March 31 for international accounts.

The firm has non-U.S. hedging capability.

Elbridge T. Gerry Jr. is chief investment officer. Frank J. Keeler, marketing director, is client contact.

Martin Currie Ltd. & Subsidiaries, whose parent company is Martin Currie Ltd., managed $145 million in international equity accounts and $125 million in global equity accounts for four U.S. institutional tax-exempt clients as of March 31.

The international equity assets were committed most heavily to Japan, 46%; the United Kingdom, 23%; Canada, 6%; West Germany, 8%; and the Netherlands, 3%.

The global equity assets were committed most heavily to the United States, 38%; Japan, 29%; the United Kingdom, 17%; West Germany, 6%; and Hong Kong, 3%.

The investment approach is in two stages. The first is market selection, using various screens, particularly a currency screen. The second is stock selection, using qualitative and quantitative screens. The two major markets, Japan and the United Kingdom, always are included in portfolios.

Of the total assets under management, $1.34 billion is for non-U.S. pension funds.

Minimum account size for individual management is $10 million.

Analysts or portfolio managers are stationed in Edinburgh.

The firm has a non-U.S. currency hedging capability, and has been registered with the SEC since 1978.

Michael Kennedy, president of Martin Currie Inc., is chief investment officer and client contact.

## Daiwa International Capital Management Corp.

*200 Liberty St., 26th Floor, New York, N.Y. 10281; (212) 945-0099*

Total assets managed ..... $13,730,000,000
Tax-exempt assets managed:
Total ..... $563,000,000
International/global ..... $563,000,000

Daiwa International Capital Management Corp., a subsidiary of Daiwa International Capital Management Co. Ltd., managed $563 million in international equity accounts for eight U.S. institutional tax-exempt clients as of March 31. The assets were committed most heavily to Japan, 84%; Hong Kong, 3.9%; West Germany, 3.2%; Switzerland, 2.3%; and France, 1.8%.

The investment approach emphasizes high-growth sectors that benefit from changes in the industrial structure and from technological innovation. The focus is on those companies that will lead growth in the economy as well as those that will be able to sustain high earnings growth through management efficiency.

Of the total assets under management, $12.7 billion is for non-U.S. pension funds.

Minimum account size for individual management is $5 million.

Of the U.S. institutional tax-exempt asset invested abroad, $40 million was in commingled accounts.

Analysts or portfolio managers are stationed in Tokyo, London and New York.

The firm has a non-U.S. currency hedging capability, and has been registered with the SEC since 1981.

Keisuke Oshima, senior managing director, is chief investment officer. Robert Russell is client contact at (212) 341-5405.

## Eaton Vance Management

*24 Federal St., Boston, Mass., 02110; (617) 482-8260*

Total assets managed ..... $6,500,000,000
Tax-exempt assets managed:
Total ..... $1,440,000,000
International/global ..... $1,440,000,000

Eaton Vance Management, a subsidiary of Eaton Vance Corp., managed $662 million in global equity and $778 million in global fixed-income accounts for 110 U.S. institutional tax-exempt clients as of March 31.

The equity assets were committed most heavily to the United States, 88%; Great Britain, 4%; the Netherlands, 2%; Canada, 2%; and Italy, 2%.

The firm favors equities of companies affording significant appreciation potential based on unrecognized change, reasonableness of value, accelerating earnings growth, availability of stock and timeliness of purchase.

Minimum account size for individual management is $1 million.

Analysts or portfolio managers are stationed in Boston and San Francisco.

The firm has been registered with the SEC since 1940.

James B. Hawkes is chief investment officer. John H. Wise Jr. is client contact.

## Fidelity International Investment Advisors Ltd.

*111 Devonshire St., Boston, Mass., 02109; (617) 292-7090*

Total assets managed ..... $3,100,000,000
Tax-exempt assets managed:
Total ..... $2,300,000,000
International/global ..... $2,300,000,000

Fidelity International Investment Advisors Ltd., a subsidiary of Fidelity International Ltd., managed $2 billion in international equity accounts and $300 million in global equity accounts for 19 U.S. institutional tax-exempt clients as of March 31.

The international assets were committed most heavily Japan, 45%; the United Kingdom, 20%; France, 7%; Spain, 7%; and Canada, 5%.

The global assets were committed most heavily to the United States, 43%; Japan, 28%; the United Kingdom, 10%; Spain, 4%; and France, 4%.

The investment approach begins with geographic and asset allocations, which are decided by the international investment policy group. Once assets are allocated to countries, stock selection is made by investment managers at the local level.

Of the total assets managed, $725

# The eye-opening story of the pension investments officer who couldn't see any reason to meet with an international investment manager.

He was too shortsighted to see why Henderson has become one of the largest investment managers in the world. And, with over 50 years of international investment experience, one of the oldest.

He never discovered that Henderson has a consistently above-average track record of investment performance. Not just in one particular year or area. But consistently over time and in key money markets around the world.

And he never found out how Henderson, with a new U.S. office, is uniquely qualified to help funds invest worldwide. For profits—and for invaluable protection against the fluctuations of national economies and currencies.

Yet all it would have taken is 30 minutes of his time. (For Henderson respects the value of managers' time, as well as the value of their funds.)

Having had an eye-opening experience in junk bonds, this poor fellow has since admitted that he must have been blind not to see the sense in meeting with us.

Bringing us to the obvious question:

When can you see us?

We'll call to set up a time.

## Henderson International Inc.

Half an hour with us might save your company a fortune.

Or make it one.

*If you'd rather not wait for our call, telephone Geoff Owen, Senior Vice President, at 212-315-5660. Or write to him at Henderson International, Rockefeller Center, 630 Fifth Avenue, Suite 811, New York, NY 10111.*

million [illegible] for non-U.S. pension funds.

The minimum account size for individual managed is $20 million.

Of the U.S. tax-exempt assets invested abroad, $175 million was in commingled accounts.

Analysts or portfolio managers are stationed in Boston, London, Tokyo, Hong Kong, Taipei and Bermuda.

The firm experienced a net loss of $230 million in U.S. tax-exempt institutional business in the year ended March 31 for international and global accounts.

The firm has a non-U.S. currency hedging capability, and has been registered with the SEC since 1977.

James Tonner is chief investment officer. William B. Fink is client contact.

### Fidelity Management Trust

*82 Devonshire, Boston, Mass., 02109; (617) 570-6982*

| | |
|---|---|
| Total assets managed | $6,600,000,000 |
| Tax-exempt assets managed: | |
| Total | $174,000,000 |
| International/global | $174,000,000 |

Fidelity Management Trust Co., a subsidiary of FMR Corp., managed $174 million in international equity accounts for five U.S. institutional tax-exempt clients as of March 31.

The assets were committed most heavily to Japan, 63%; France, 11%; the United Kingdom, 8%; Spain, 3.6%; and the Netherlands, 2.8%.

The investment approach is bottom-up, with research-intensive, fundamental analysis used to identify candidates for investment.

All of the U.S. institutional tax-exempt assets invested abroad were in commingled accounts.

Analysts or portfolio managers are stationed in Boston, London and Tokyo.

The firm has a non-U.S. hedging capability.

George Noble, vice president, is chief investment officer. Robert L. Reynolds, senior vice president, is client contact.

### Fiduciary Trust Co. International

*2 World Trade Center, New York, N.Y. 10048; (212) 466-4100*

| | |
|---|---|
| Total assets managed | $8,385,000,000 |
| Tax-exempt assets managed: | |
| Total | $5,817,000,000 |
| International/global | $813,000,000 |

Fiduciary Trust Co. International invested $113 million in international equity accounts for U.S. institutional tax-exempt clients as of Jan. 1.

The assets were committed most heavily to Japan, 31%; the United Kingdom, 10%; France, 9%; the Netherlands, 8%; and Hong Kong, 6%.

As of the same date, there was $700 million in global accounts; $302.3 million in fixed-income and $397.4 million in balanced accounts. The equity assets of the global accounts were committed most heavily to the United States, 38%; Japan, 20%; West Germany, 7%; the Netherlands, 5%; and the United Kingdom, 5%.

The investment approach emphasizes stock selection within a macroeconomic framework. The active management style produces concentrated portfolios both in stocks and markets. Country allocations vary from EAFE weightings according to the firm's market assessments.

Currency and market diversification are used to reduce risk. Long-term hedging may be used.

The firm has 174 U.S. tax-exempt institutional clients.

Minimum account size for individual management is $10 million.

Of the U.S. tax-exempt assets invested abroad, $10 million was in commingled accounts and $104 million in mutual funds.

Analysts or portfolio managers are stationed in New York, London, Geneva and Los Angeles.

The firm has non-U.S. hedging capability.

Richard King, senior vice president, is chief investment officer. George J. Mullen and Belinda Gibbs are client contacts.

### First Chicago Investment Advisors

*3 First National Plaza, Chicago, Ill. 60670; (312) 732-6474*

| | |
|---|---|
| Total assets managed | $9,600,000,000 |
| Tax-exempt assets managed: | |
| Total | $9,600,000,000 |
| International/global | $2,297,000,000 |

First Chicago Investment Advisors, a subsidiary of First Chicago Corp., managed $581 million in international equity accounts and $1.64 billion in international fixed-income accounts for U.S. institutional tax-exempt clients as of March 31.

The equity assets of those accounts were committed most heavily to Japan, 42.8%; the United Kingdom, 16.7%; West Germany, 7.2%; Belgium, 4.8%; and Australia, 4.7%.

As of the same date, the firm managed $74 million in global fixed-income accounts for U.S. tax-exempt clients.

First Chicago is an active manager of core international equity and fixed-income portfolios, using internally developed valuation models, risk systems and other quantitative techniques in a structured decision process. The equity approach is value-oriented and identifies mispriced markets and securities. Fixed income is treated as a separate asset class, with interest rate and currency forecasts integrated into strategic forecasts.

Of the total assets managed, $7 million was for non-U.S. pension funds. There were 73 U.S. institutional tax-exempt clients.

Minimum account size for individual management is $10 million.

Of the U.S. tax-exempt institutional assets invested abroad, $547 million was in commingled accounts.

Analysts or portfolio managers are stationed in Chicago and London; by year end, the firm plans to have an analyst stationed in Tokyo.

The firm reported a net gain of $419 million in U.S. institutional tax-exempt business in international and global accounts for the year ended March 31.

The firm has a non-U.S. currency hedging capability.

Gary P. Brinson is president and chief investment officer. Richard C. Carr, managing director, is client contact.

### Grantham, Mayo, Van Otterloo

*125 High St., Boston, Mass., 02110; (617) 574-4817*

| | |
|---|---|
| Total assets managed | $2,246,000,000 |
| Tax-exempt assets managed: | |
| Total | $2,246,000,000 |
| International/global | $2,246,000,000 |

Grantham, Mayo, Van Otterloo managed $2.25 billion in international equity accounts for 28 U.S. institutional tax-exempt clients as of March 31. The assets were committed most heavily to the United Kingdom, 27%; Japan, 15%; West Germany, 11%; the Netherlands, 8%; and France, 6%.

The firm's International Quantitative Equities Pool has been designed to enable institutional investors to achieve very large, low-beta foreign equity exposure. It provides diversification and liquidity on a highly quantitative basis.

Of the U.S. tax-exempt institutional assets invested abroad, $2.13 billion was in commingled accounts and $4.5 million in mutual funds.

Analysts or portfolio managers are stationed in Boston.

The firm experienced a net loss of $35 million in U.S. tax-exempt institutional business in the year ended March 31.

The firm has a non-U.S. currency hedging capability and has been registered with the SEC since 1977.

Eyk Van Otterloo, principal, is chief investment officer and client contact.

### G.T. Capital Management

*601 Montgomery St., Suite 1400, San Francisco, Calif., 94111; (415) 392-6181*

| | |
|---|---|
| Total assets managed | $1,200,000,000 |
| Tax-exempt assets managed: | |
| Total | $688,000,000 |
| International/global | $688,000,000 |

G.T. Capital Management Inc., whose parent is GT Management PLC, managed $665 million in international equity accounts for U.S. institutional tax-exempt clients as of March 31. The equity assets were committed most heavily to Japan, 27%; the United Kingdom, 18%; West Germany, 10%; Canada, 9%; and France, 8%.

As of the same date, there was $23 million in global equity accounts, most heavily committed to the United States, 52%; the United Kingdom, 10%; Japan, 9%; France, 5%; and Switzerland, 4%.

The firm takes a global approach to identifying investment opportunities. Accordingly, managers put considerable effort into early identification of major international trends. They then look for the most appropriate countries and companies through which to exploit such trends and themes. The search is for growth companies with undiscounted earnings acceleration.

Of the total under management, $80 million is for non-U.S. pension funds. It has 11 U.S. tax-exempt institutional clients.

Minimum account size for separate management is $15 million.

Of the U.S. tax-exempt assets invested abroad, $8 million was in commingled accounts and $95 million in mutual funds.

Analysts or portfolio managers are stationed in Hong Kong, London, San Francisco, Tokyo and Sydney.

The firm reported a $375 million net loss in U.S. institutional tax-exempt business for international and global equity accounts in the year ended March 31.

The firm has a non-U.S. currency hedging capability, and has been registered with the SEC since 1974.

Robert J. Boyd, joint managing director, is chief investment officer. Mary Lou Bernhoft, vice president-marketing and client services, is client contact.

### Hill Samuel Investment Advisers

*1100 Dain Tower, Minneapolis, Minn. 55402; (612) 371-2939*

| | |
|---|---|
| Total assets managed | $347,000,000 |
| Tax-exempt assets managed: | |
| Total | $333,000,000 |
| International/global | $333,000,000 |

Hill Samuel Investment Advisers, a subsidiary of Hill Samuel Group PLC, managed $260 million in international equity and $23 million in international fixed-income accounts for U.S. tax-exempt institutional clients as of March 31.

The equity assets were committed most heavily to Japan, 26.5%; the United Kingdom, 27.5%; West Germany, 11.8%; Hong Kong, 9%; and the Netherlands, 11.3%.

As of the same date, there was $49 million in global fixed-income accounts.

The firm takes a quantitative approach to value investing, using a consistent appraisal in evaluating all world markets, securities and currencies.

Of the total under management, $14 million was for non-U.S. pension funds; there were seven U.S. tax-exempt institutional clients.

Minimum account size for individual management is $10 million.

Of the U.S. tax-exempt institutional assets invested abroad, $128 million was in commingled accounts.

Analysts or portfolio managers are stationed in London.

The firm has non-U.S. currency hedging capability, and has been registered with the SEC since 1983.

David Tilles is chief investment officer. I.P. "Kip" Knelman, director and executive vice president, is client contact.

### IDS International Inc.

*IDS Tower 10, Minneapolis, Minn. 55440; (612) 372-1335*

| | |
|---|---|
| Total assets managed | $1,030,000,000 |
| Tax-exempt assets managed: | |
| Total | $474,000,000 |
| International/global | $474,000,000 |

IDS International Inc., a subsidiary of IDS, a unit of American Express Co., managed $403 million in international equity and $71 million in global equity accounts as of March 31 for 15 U.S. tax-exempt institutional clients.

The international account assets were committed most heavily to Japan, 46%; Australia, 11%; Hong Kong, 9%; the United Kingdom, 7%; and the Netherlands, 5%.

The global account assets were committed most heavily to the United States, 32%; Japan, 23%; Australia, 9%; Hong Kong, 6%; and France, 5%.

The firm takes a top-down, bottom-up approach. Based on a macroeconomic, geopolitical overview, assets are allocated among stocks, bonds and cash; currency views are taken; and countries are distributed into economic categories and weighted. Stocks are selected based on fundamental analysis.

Of the total assets under management, $237 million was for non-U.S. pension funds.

Minimum account size for individual management is $15 million.

Of the U.S. tax-exempt institutional assets invested abroad, $67 million was in commingled accounts.

Analysts or portfolio managers are stationed in Minneapolis and London.

The firm experienced a $15 million net gain in U.S. institutional tax-exempt business for international and global equity accounts.

The firm has a non-U.S. currency hedging capability, and has been registered with the SEC since 1981.

Peter A. Lamaison is chief investment officer. Diane K. Vener, vice president, is client contact.

### Ivory & Sime International

global context.

Of the total assets under management, $50 million was for non-U.S. pension funds.

Minimum account size for individual management is $5 million.

Analysts or portfolio managers are stationed in Edinburgh.

The firm reported a net gain of $60 million in U.S. institutional tax-exempt business in international and global equity accounts in the year ended March 31.

The firm has a non-U.S. currency hedging capability, and has been registered with the SEC since 1978.

Pascal deSalabery, director, is chief investment officer. Keith Wood, president, is client contact.

### Kemper-Murray Johnstone International

*120 S. LaSalle St., Chicago, Ill. 60603; (312) 845-1880*

Total assets managed ..... $546,000,000
Tax-exempt assets managed:
Total ..... $325,000,000
International/global ..... $325,000,000

Kemper-Murray Johnstone International, a subsidiary of Kemper Financial Services and Murray Johnstone, managed $114 million in international equity and $211 million in international fixed-income accounts for 27 U.S. institutional tax-exempt clients as of March 31.

The equity assets were committed most heavily to Japan, 29.9%; Hong Kong, 11.9%; the United Kingdom, 11.3%; West Germany, 11.1%; and France, 8.8%.

The investment objective is to provide actively managed, diversified international portfolios that provide real returns (vs. CPI) and superior returns (vs. EAFE) over a market cycle. Managers strive to optimize portfolio weightings in Japan, the United Kingdom and core Europe, emphasizing peripheral markets as opportunities arise.

Minimum account size for individual management is $5 million.

Of the U.S. tax-exempt institutional assets invested overseas, $221 million was in mutual funds.

Analysts or portfolio managers are stationed in Glasgow.

The firm has a non-U.S. currency hedging capability, and has been registered with the SEC since 1980.

Michael Parlett is chief investment officer. Sue Mullin, at (312) 845-1934, is client contact.

### Kleinwort Benson International Investment

*200 Park Ave., New York, N.Y. 10166; (212) 972-9315*

Total assets managed ..... $314,000,000
Tax-exempt assets managed:
Total ..... $187,000,000
International/global ..... $187,000,000

Kleinwort Benson International Investment Ltd., a subsidiary of Kleinwort Benson Lonsdale PLC, managed $187 million in international equity accounts for seven U.S. institutional tax-exempt clients as of March 31.

The assets were committed most heavily to Japan, 32%; the United Kingdom, 20%; France, 11%; Switzerland, 5.5%; and Australia, 4.5%.

The investment approach has two aspects. In equity investments, stock selection is emphasized. In fixed income, investments are selected on a strictly top-down basis with major importance attached to the macroeconomic analysis and their forecasts on interest rate and currency movements.

There is a minimum fee of $40,000 a year.

Of the U.S. tax-exempt institutional assets invested abroad, $135 million was in mutual funds.

Analysts or portfolio managers are stationed in London, New York, Brussels, Geneva, the Channel Islands, Hong Kong, Tokyo and Melbourne.

The firm reported a net loss of $58 million in U.S. institutional tax-exempt business for international accounts in the year ended March 31.

The firm has a non-U.S. currency hedging capability, and has been registered with the SEC since 1980.

John F.H. Trott is chief investment officer. Julie M. Cochran and Kim P. Hedbawny are client contacts.

### Lombard Odier Holdings (UK) Ltd.

*Norfolk House, 13 Southampton Place, London, England WC1A 2AJ; 011-44-1-831-2350*

Total assets managed ..... $2,537,000,000
Tax-exempt assets managed:
Total ..... $181,000,000
International/global ..... $181,000,000

Lombard Odier Holdings (UK) Ltd., a subsidiary of Lombard Odier & Cie, Geneva, managed $37 million in international equity accounts for U.S. institutional tax-exempt clients as of March 31. The assets were committed most heavily to Japan, 50.8%; the United Kingdom, 12%; France, 9.8%; Spain, 5.6%; and West Germany, 5.5%.

As of the same date, the firm managed $72 million in global equity and $71 million in global fixed-income accounts. The global equity assets were committed most heavily to the United States, 47.6%; Japan, 24.9%; the United Kingdom, 5.3%; Spain, 4.3%; and France, 3.6%.

The investment approach is macroeconomic to the regional allocation of assets. Portfolio managers/analysts implement the equity allocation within their geographic regions. The fixed-income team has an interest rate anticipation approach. Currency hedging, if applicable, is used for return enhancement.

Of the total assets under management, $2.36 billion was for non-U.S. pension funds; there were three U.S. tax-exempt institutional clients.

Minimum account size for individual management is $10 million.

Analysts or portfolio managers are stationed in London, Geneva, Amsterdam and Montreal.

The firm reported a $122 million net loss in U.S. institutional tax-exempt business for international and global accounts in the year ended March 31.

The firm has a non-U.S. currency hedging capability, and has been registered with the SEC since 1978.

Robert van Maasdijk is chief investment officer. Karin Bonding is client contact.

### Mellon-Pictet International Management Ltd.

*Cutlers Garden, 5 Devonshire Square, London, England EC2 M4LD; 011-44-1-283-7471*

Total assets managed ..... $1,100,000,000

# COMPREHENSIVE ASSET MANAGEMENT BEGINS WITH A GLOBAL PERSPECTIVE

We believe the key to achieving consistently good investment results in every market environment is a comprehensive approach toward investing. At Bessemer, we maintain a global perspective in making investments that includes an analysis of international investment opportunities as well as those available in the United States.

Our London-based international investment staff is devoted full time to analyzing the relative attraction of the World's markets and thoroughly researching investments throughout Europe, the U.K. and the Far East.

Bessemer manages over $5 billion for approximately 500 individuals and institutions located in the United States and abroad. We create for our clients a comprehensive investment program that includes U.S. and international securities, real estate, oil and gas and private investments.

To learn more, call or write Robert C. Elliott, Senior Executive Vice President, Bessemer Trust Company, N.A., 630 Fifth Avenue, New York, New York 10111, (212) 708-9141.

### J.P. Morgan Investment Management Inc.

*83 Pall Mall, London, England SW1 Y5ES; 011-44-1-930-9444*

| | |
|---|---|
| Total assets managed | $11,282,000,000 |
| Tax-exempt assets managed: | |
| Total | $3,231,000,000 |
| Invested overseas | $3,231,000,000 |

J.P. Morgan Investment Management Inc., a subsidiary of J.P. Morgan & Co. Inc., managed $2.56 billion in international equity and $549 million in international fixed-income accounts for U.S. institutional tax-exempt clients as of March 31.

Those equity assets were committed most heavily to Japan, 40%; the United Kingdom, 20%; West Germany, 14%; Switzerland, 6%; and Canada, 4%.

As of the same date, there was $38 million in global equity and $87 million in global fixed-income accounts.

The global equity assets were committed most heavily to the United States, 35%; Japan, 30%; the United Kingdom, 10%; Canada, 5%; and West Germany, 4%.

The investment approach uses a well-defined decision-making process to manage the asset mix, country and currency exposure and individual bond and equity security selection to maximize total return and minimize risk in U.S. dollars. Investment strategies are tailored to meet client objectives.

Of the total assets under management, $574 million was for non-U.S. pension funds; there were 35 U.S. tax-exempt institutional clients.

Minimum account size for individual management is $10 million.

Of the U.S. tax-exempt assets invested abroad, $1.047 billion was in commingled accounts.

Analysts or portfolio managers are stationed in New York, London, Singapore and Tokyo.

The firm has a non-U.S. currency hedging capability, and has been registered with the SEC since 1984.

C. Nicholas Potter, president, is chief investment officer. Anthony P. Wilson, vice president, is client contact at (212) 826-7909.

### Nomura Capital Management

*180 Maiden Lane, Suite 2903, New York, N.Y. 10038; (212) 509-8181*

| | |
|---|---|
| Total assets managed | $1,134,000,000 |
| Tax-exempt assets managed: | |
| Total | $800,000,000 |
| International/global | $800,000,000 |

Nomura Capital Management Inc., whose parent is Nomura Investment Co. Ltd., managed $800 million in international equity accounts for 12 U.S. tax-exempt clients as of March 31. The assets were committed most heavily to Japan, 49.1%; the United Kingdom, 17.7%; France, 10.6%; West Germany, 4.4%; and Australia, 4.2%.

Nomura has an active equity management approach using original fundamental and economic research to create portfolios through a disciplined valuation and a structured management process. Attention is focused on client risk parameters.

Minimum account size is $5 million.

Analysts or portfolio managers are located in Tokyo, New York, London, Washington, Hong Kong, Singapore and Shanghai.

The firm reported a $90 million net gain in U.S. tax-exempt institutional business in the year ended March 31 for international accounts.

The firm has a non-U.S. hedging capacity, and has been registered with the SEC since 1976.

Takeo Nakamura, president, is chief investment officer. Brian X. Fitzgibbon, senior vice president, is client contact.

### Oechsle International Advisors

*260 Franklin St., Boston, Mass. 02110; (617) 439-6270*

| | |
|---|---|
| Total assets managed | $500,000,000 |
| Tax-exempt assets managed: | |
| Total | $492,000,000 |
| International/global | $492,000,000 |

Oechsle International Advisors managed $492 million in international equity accounts for 12 U.S. tax-exempt institutional clients as of March 31. The assets were committed most heavily to Japan, 29.1%; Canada, 20.6%; the United Kingdom, 12.1%; Australia, 8.1%; and France, 7.5%.

Managers combine a top-down and bottom-up investment approach. Country and currency considerations are built into the top-down decision; stock picking and industry emphasis are the focus of the bottom-up analysis. From a top-down view, quantitative techniques and qualitative judgments are combined to establish weightings in each country. From the bottom-up, managers analyze sectors and individual issues to establish an approved stock list.

Of the total assets managed, $8 million was for non-U.S. pension funds.

Minimum account size for individual management is $10 million.

Analysts or portfolio managers are stationed in Boston, London and Tokyo.

You didn't know that there's a better approach to asset management in Japan? There is. It's called *SIAMI* ('Sanyo Investment Advisory and Management International'). It's a rigorous, quantitative strategy that uses the latest developments in financial technology. Nobody else in Japan has anything like it. Nobody. To find out more, give us a call.

SANYO SECURITIES
*Japan's fastest growing securities firm*

TOKYO • LONDON • GENEVA • PARIS • NEW YORK • LOS ANGELES • TORONTO • HONG KONG • BEIJING • MELBOURNE

The firm has a non-U.S. currency hedging capability, and has been registered with the SEC since 1986.

Walter Oechsle, general partner, is chief investment officer. Stephen P. Langer, partner, is client contact.

### PCM International

*745 Broad St., Newark, N.J. 07101; (201) 877-4559*

| | |
|---|---|
| Total assets managed | $3,200,000,000 |
| Tax-exempt assets managed: | |
| Total | $724,000,000 |
| International/global | $724,000,000 |

PCM International, a subsidiary of Prudential Insurance Co. of America, managed $347 million in international equity and $201 million in international fixed-income accounts for U.S. institutional tax-exempt clients as of March 31. The equity assets were committed most heavily to Japan, 34%; the United Kingdom, 20%; Canada, 14%; Hong Kong, 9%; and Singapore, 7%.

As of the same date, the firm managed $176 million in global fixed-income accounts for U.S. tax-exempt clients.

The investment approach for equities emphasizes bottom-up stock selection with defensive currency and stock market techniques. In fixed income, managers emphasize currency and maturity management using top-quality issues.

There were 25 U.S. institutional tax-exempt clients March 31; minimum account size for individual management for equities is $10 million.

All of the U.S. institutional tax-exempt assets invested abroad were in commingled accounts.

The firm reported a net gain of $63 million in U.S. institutional tax-exempt business in international and global accounts for the year ended March 31.

The firm has a non-U.S. currency hedging capability, and has been registered with the SEC since 1984.

Barry Gillman, managing director, is chief investment officer. Eric Nelson is client contact.

Cash management survey: Nov. 2.

### Rowe Price-Fleming International Inc.

*100 E. Pratt St., Baltimore, Md. 21202; (301) 547-2141*

| | |
|---|---|
| Total assets managed | $2,600,000,000 |
| Tax-exempt assets managed: | |
| Total | $2,062,000,000 |
| International/global | $2,062,000,000 |

Rowe Price-Fleming International Inc. managed $1.84 billion in international equity and $25 million in international fixed-income accounts for U.S. institutional tax-exempt clients as of March 31. Those equity assets were committed most heavily to Japan, 26%; the United Kingdom, 23%; France, 10%; West Germany, 8%; and Hong Kong, 8%.

As of the same date, the firm managed $200 million in global equity accounts for U.S. tax-exempt clients. Those assets were committed most heavily to Japan, 18.3%; the United Kingdom, 17.2%; the United States, 15.8%; France, 8.9%; and the Netherlands, 5.6%.

The active management style uses a top-down, bottom-up approach to equity investment. Large- and small-capitalization stocks are used, and its worldwide research capabilities are of primary importance. The fixed-income approach is fundamentally oriented with active management of credit markets and currency exposure.

The firm has 21 U.S. tax-exempt institutional clients; minimum account size for individual management is $10 million for equity accounts and $20 million for fixed-income accounts.

Of the U.S. institutional tax-exempt assets invested overseas, $25 million was in commingled accounts and $1.1 billion in mutual funds.

Analysts or portfolio managers are stationed in Bahrain, Baltimore, Frankfurt, Geneva, Hong Kong, Jakarta, Kuala Lumpur, London, New York, Paris, the Philippines, Seoul, Sydney, Melbourne, Taipei, Tokyo and Zurich.

The firm reported a net gain of $30 million in U.S. institutional tax-exempt business for international and global accounts in the year ended March 31.

The firm has a non-U.S. currency hedging capability, and has been registered with the SEC since 1979.

Its parent companies are T. Rowe Price Associates, Robert Fleming Holdings and Jardine Fleming International.

Martin G. Wade, president, is chief investment officer. George A. Murnaghan is client contact.

### The Putnam Cos. Inc.

*1 Post Office Square, Boston, Mass. 02109; (617) 292-1795*

| | |
|---|---|
| Total assets managed | $41,100,000,000 |
| Tax-exempt assets managed: | |
| Total | $6,800,000,000 |
| International/global | $274,000,000 |

The Putnam Cos. Inc. (Putnam International Advisors), a subsidiary of Marsh & McLennan Cos. Inc., managed $274 million in international equity accounts for U.S. institutional tax-exempt clients as of March 31. The assets were committed most heavily to Japan, 23.1%; the United Kingdom, 14.9%; West Germany, 7.4%; the Netherlands, 6.3%; and Sweden, 5.8%.

The investment approach seeks to achieve above-average return over the longer term by significantly overweighting markets believed to be relatively attractive, while minimizing risk through diversification across markets. Stocks are bought whose present value is attractive in relation to expectations for cash earnings, per-share earnings and dividend growth over an investment horizon of 12 to 18 months. Stocks are sold when their present value fully reflects expectations for growth in earnings and dividends.

Of the total assets under management, $305 million was for non-U.S. pension funds; there were 137 U.S. tax-exempt institutional clients.

Minimum account size for individual management is $10 million.

Of the U.S. tax-exempt institutional assets invested abroad, $92 million was in commingled accounts.

Analysts or portfolio managers are stationed in Boston, London and Tokyo.

The firm reported a $419 million net loss in U.S. institutional tax-exempt business in international equity accounts for the year ended March 31.

The firm has a non-U.S. currency hedging capability, and has been registered with the SEC since 1969.

Anthony W. Regan, head of international investments, is chief investment officer. Elliott M. Gartner, head of institutional marketing, is client contact.

### N.M. Rothschild International Asset Management Ltd.

*1 Rockefeller Plaza, New York, N.Y. 10020; (212) 757-6000*

| | |
|---|---|
| Total assets managed | $2,516,000,000 |
| Tax-exempt assets managed: | |
| Total | $1,161,000,000 |
| International/global | $1,101,000,000 |

N.M. Rothschild International Asset Management Ltd., whose parent is N.M. Rothschild Asset Management (Holdings) Ltd., managed $439 million in international equity and $570 million in international fixed-income accounts for U.S. institutional tax-exempt clients as of March 31.

Those equity assets were committed most heavily to the United Kingdom, 35%; Japan, 30%; France, 9%; Hong Kong, 6%; and Canada, 6%.

As of the same date, it managed $92 million in global equity accounts for U.S. tax-exempt clients, with those assets most heavily committed to the United States, 60%; Japan, 15%; the United Kingdom, 10%; Hong Kong, 3.5%; and France, 3.5%.

The firm aims to add value by currency, market and stock selection. Most value is added by market selection. The firm's style is active and concentrated, with emphasis on currency.

Of total assets under management, $1.35 billion is for non-U.S. pension funds. There are 11 U.S. institutional tax-exempt clients.

Minimum account size for individual management is $10 million.

Analysts or portfolio managers are stationed in London, New York, Paris, Zurich, Tokyo, Hong Kong, Singapore, Kuala Lumpur, Sydney and Melbourne.

The firm reported a $115.9 million net gain in U.S. tax-exempt institutional business for the year ended March 31 for international and global accounts.

The firm has a non-U.S. hedging capacity, and has been registered with the SEC since 1980.

Chief investment officer is James Heyworth-Dunne. Client contact is Christopher Wyke.

### Frank Russell Trust Co.

*P.O. Box 1454, Tacoma, Wash. 98401; (206) 572-2282*

| | |
|---|---|
| Total assets managed | $5,400,000,000 |
| Tax-exempt assets managed: | |
| Total | $5,000,000,000 |
| International/global | $412,000,000 |

Frank Russell Trust Co., whose parent is Frank Russell Co., ran $412 million in international equity accounts for U.S. institutional tax-exempt clients as of March 31. The assets were committed most heavily to Japan, 27%; the United Kingdom, 20%; West Germany, 10%; Hong Kong, 7%; and Australia, 6%.

The firm uses a multimanager, multistyle approach to achieve better long-term investment returns with lower risk. The International I Fund uses four advisers with a global emphasis on non-U.S. equities. The International II Fund places emphasis on the Pacific Basin using four on-site advisers.

Because it does not manage the assets itself, its figures are not included in the aggregate data.

Of the total assets under management, $400 million was for non-U.S. pension funds; the firm has 155 U.S. tax-exempt institutional clients.

Minimum account size for individual management is $5 million.

All of the U.S. institutional tax-exempt assets invested abroad March 31 were in commingled accounts.

The firm reported a $235 million net gain in U.S. institutional tax-exempt business for international equity accounts in the year ended March 31.

The firm has a non-U.S. currency hedging capability.

Michael C. Malone, vice president, is chief investment officer. Paul Kaltinick is client contact.

### SBC Portfolio Management International Inc.

|---|---|
| Total assets managed | $345,000,000 |
| Tax-exempt assets managed: | |
| Total | $156,000,000 |
| International/global | $144,000,000 |

SBC Portfolio Management International Inc., whose parent is Swiss Bank Corp. International Securities Inc., managed $131 million in international equity accounts for U.S. institutional tax-exempt clients as of March 31. The assets were committed most heavily to Japan, 34%; the United Kingdom, 16%; France, 10%; Australia, 7%; and

As a pension fund manager, you should know why General American's Commercial Mortgage Fund is a top performer. And safe. And why it will be both for years to come.

*Why our Commercial Mortgage Fund performs so well*

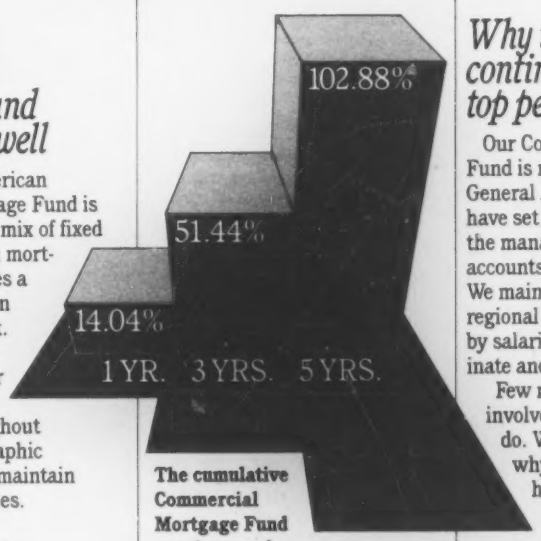
The General American Commercial Mortgage Fund is based on a healthy mix of fixed and variable return mortgages. So it provides a strong rate of return with minimum risk.

Investments are made only in newer commercial buildings located throughout high-growth geographic areas in which we maintain mortgage loan offices.

*Why it is safe*

The Fund accepts only first mortgages. We lend no more than 75% of appraised value of the properties. (The average is actually much lower.)

There's even a unique element of safety in terms of liquidity. General American guarantees to "buy back" up to $300,000 of your fund shares.



**The cumulative Commercial Mortgage Fund earnings performance has been 14.04% for the past year (12/31/85–12/31/86); 51.44% for the past three years (12/31/83–12/31/86), and 102.88% for the past five years (12/31/81–12/31/86).**

*Why it will continue to be a top performer.*

Our Commercial Mortgage Fund is managed by the same General American people who have set industry standards for the management of mortgage accounts over the past 20 years. We maintain a network of regional mortgage offices staffed by salaried employees who originate and service all loans.

Few mortgage lenders get as involved in their loans as we do. Which is one good reason why our mortgage fund has consistently outperformed the industry over the years.

**To get more facts on the General American Commercial Mortgage Fund, mail this coupon today. Or call Ron Drury, Vice-President—Group Pensions, at (314) 444-0778.**

General American

Group Pension Marketing H5-14

*The Investors Choice.*

Sweden, 5%.

As of the same date, it managed $13 million in global equity accounts, with those assets committed most heavily to the United States, 46%; Japan, 18%; the United Kingdom, 8%; France, 6%; and Canada, 4%.

SBC officials believe 80% of international investment "value-added" stems from the country selection, and structure the top-down philosophy, process and allocation of resources accordingly. Strong bets against the EAFE index are protected by aggressive currency hedging where appropriate. Stock selection uses value screens and favors small-capitalization issues where market liquidity permits.

Of the total under management, $189 million was for non-U.S. pension funds; there were nine U.S. tax-exempt institutional clients.

Minimum account size for individual management is $5 million.

SBC has access to analysts located worldwide, including the United Kingdom, Switzerland, the United States, Japan, Hong Kong, Singapore and Australia.

The firm reported a $53 million net gain in U.S. institutional tax-exempt business for international and global accounts in the year ended March 31.

The firm has a non-U.S. currency hedging capability, and has been registered with the SEC since 1982.

Peter J. Morant is chief investment officer. John W. Conlin is client contact.

### Schroder Capital Management International

*1 State Street Plaza, New York, N.Y., 10004; (212) 269-6500*

| | |
|---|---|
| Total assets managed | $2,200,000,000 |
| Tax-exempt assets managed: | |
| Total | $1,509,000,000 |
| International/global | $1,509,000,000 |

Schroder Capital Management International Inc., whose parent is Schroders PLC, managed $1.37 billion in international equity accounts for U.S. institutional tax-exempt clients as of March 31. The assets were committed most heavily to Japan, 35%; the United Kingdom, 20%; Switzerland, 10%; West Germany, 10%; and the Netherlands, 6%.

As of the same date, it managed $139 million in global equity accounts, with those assets most heavily committed to the United States, 47%; Japan, 17%; the United Kingdom, 11%; West Germany, 6%; and Switzerland, 6%.

Country allocations begin the investment process, with emphasis on stock selection in countries with the best economic prospects. Broad guidelines for country investment are based on two-year economic projections, with asset allocation based on shorter term considerations. Distinctively emerging growth stocks make up the core of Schroder portfolios. The firm emphasizes independent regional research.

Of the total assets managed, $562 million was for non-U.S. pension funds. There were 27 U.S. tax-exempt institutional clients.

Minimum account size for individual management is $10 million.

Of the U.S. tax-exempt institutional assets invested abroad, $22 million was in in commingled funds and $522 million in mutual funds.

Analysts or portfolio managers are stationed in London, Zurich, Tokyo, Hong Kong, Singapore and Sydney.

The firm reported a net gain of $255 million in U.S. institutional tax-exempt business for international and global equity accounts in the year ended March 31.

The firm has a non-U.S. currency hedging capability, and has been registered with the SEC since 1980.

David M. Salisbury is chief investment officer. Sharon L. Haugh is client contact.

### Scudder, Stevens & Clark

*345 Park Ave., New York, N.Y. 10154; (212) 326-6200*

| | |
|---|---|
| Total assets managed | $38,419,000,000 |
| Tax-exempt assets managed: | |
| Total | $11,797,000,000 |
| International/global | $615,000,000 |

Scudder, Stevens & Clark managed $608 million in international equity accounts for U.S. tax-exempt institutional clients as of March 31. The assets were committed most heavily to Japan, 19%; the United Kingdom, 16%; France, 11%; West Germany, 10%; and the Netherlands, 8%.

As of the same date, it managed $7 million in global balanced accounts of U.S. tax-exempt clients. The equity assets of those accounts were committed most heavily to the United States, 44%; the United Kingdom, 11%; Japan, 5%; France, 5%; and West Germany, 4%.

The investment approach is both top-down and bottom-up. Assessments of the global economy and local market and currency factors are meshed with in-depth security analysis.

The firm has 650 U.S. tax-exempt institutional clients; minimum account size for individual management is $5 million.

Of the U.S. tax-exempt institutional assets invested abroad, $400 million was in mutual funds.

International analysts and equity portfolio managers are based in New York. International fixed-income portfolio managers/analysts are in Boston.

The firm reported a $25 million gain in U.S. institutional tax-exempt business for international and global accounts in the year ended March 31.

The firm has a non-U.S. currency hedging capability, and has been registered with the SEC since 1943.

Nicholas Bratt, managing director, is chief investment officer. Victoria J. Herget, principal, at (312) 861-2700, is client contact.

### State Street Bank and Trust

*225 Franklin St., Boston, Mass., 02110; (617) 786-3000*

| | |
|---|---|
| Total assets managed | $28,900,000,000 |
| Tax-exempt assets managed: | |
| Total | $25,620,000,000 |
| International/global | $3,249,000,000 |

State Street Bank and Trust Co., whose parent is State Street Boston Corp., managed $3.09 billion in international equity accounts for U.S. tax-exempt clients as of March 31. The assets were committed most heavily to Japan, 58.9%; the United Kingdom, 14.4%; West Germany, 6.1%; France, 4.4%; and Switzerland, 3.3%.

As of the same date, it managed $158 million in global equity accounts, with those assets committed most heavily to the United States, 38.1%; Japan, 33.8%; the United Kingdom, 8.2%; West Germany, 3.6%; and Canada, 2.8%.

The firm offers flexible, quantitatively driven funds based on the EAFE index. These include index funds designed to replicate the EAFE; country selection funds, which index to selected country markets; and high-value portfolios, which select securities with the lowest price to cash flow, earnings and book value, but weight countries and industries according to the EAFE. World index funds, South Africa-free funds and the use of international futures also are available.

Of total assets under management, $570 million was for non-U.S. pension funds; there were 310 U.S. institutional tax-exempt clients.

Minimum account size for individual management is $10 million.

Of the U.S. tax-exempt institutional assets invested abroad, $1.2 billion was in commingled accounts and $3 billion in index funds.

Analysts or portfolio managers are stationed in Boston.

The firm reported a net gain of $1.28 billion in the year ended March 31 in U.S. institutional tax-exempt business for international and global accounts.

The firm has a non-U.S. hedging capability.

Nicholas A. Lopardo, senior vice president, is chief investment officer. Peter E. Braun is client contact at (617) 654-3953.

| Total assets managed | $1,189,000,000 |
| Tax-exempt assets managed: | |
| Total | $834,000,000 |
| International/global | $834,000,000 |

Warburg Investment Management International Ltd., whose parent is Mercury Asset Management PLC, managed $463 million in international equity accounts for U.S. tax-exempt clients as of March 31. The assets were committed most heavily to Japan, 57%; the United Kingdom, 9%; France, 5%; West Germany, 4%; and Switzerland, 3%.

As of the same date, it managed $303 million in global equity and $68 million in global fixed-income accounts for U.S. tax-exempt clients. Global equity assets were committed most heavily to the United States, 37%; Japan; 31%; the United Kingdom, 7%; France, 4%; and Canada, 3%.

The firm is an active manager and uses a combination of top-down and bottom-up techniques. Organizational strength and substantial research are vital to its investment approach.

Of the total assets under management, $29 million was for non-U.S. pension funds; there were 16 U.S. institutional tax-exempt clients.

Its minimum fee is $50,000.

Of the U.S. tax-exempt institutional assets invested abroad, $156 million was in mutual funds.

Analysts or portfolio managers are stationed in London and Tokyo.

The firm reported a $438 million net gain in U.S. tax-exempt institutional business for the year ended March 31 in international and global accounts.

The firm has a non-U.S. hedging capacity, and has been registered with the SEC since 1976.

Robert Michaelson is the chief investment officer. John Townsend is the client contact.

### Wellington Management Co./Thorndike, Doran, Paine & Lewis

*28 State St., Boston, Mass. 02109; (617) 227-9500*

| | |
|---|---|
| Total assets managed | $32,894,000,000 |
| Tax-exempt assets managed: | |
| Total | $10,247,000,000 |
| International/global | $166,000,000 |

Wellington Management Co./Thorndike, Doran, Paine & Lewis managed $162 million in international equity and $4 million in international fixed-income accounts for U.S. institutional tax-exempt clients as of March 31. The equity assets were committed most heavily to Japan, 21%; the United Kingdom, 21%; France, 10%; Switzerland, 9%; Spain, 8%; and the Netherlands, 8%.

The investment approach is to achieve superior, long-term equity results by focusing on a carefully selected, diversified, dynamic group of growing foreign companies. The emphasis is on timely identification of the best relative values among various foreign companies and markets; portfolios periodically are repositioned to take advantage of valuation changes.

The firm has 107 U.S. tax-exempt institutional clients; minimum account size for individual management is $10 million.

Of the U.S. tax-exempt institutional assets invested abroad, $60 million was in commingled accounts.

Analysts or portfolio managers are stationed in Boston and London.

The firm reported a net loss of $27 million in U.S. institutional tax-exempt business for international equity accounts in the year ended March 31.

The firm has a non-U.S. currency hedging capability, and has been registered with the SEC since 1960.

Robert W. Doran is chief investment officer. Dena Willmore is client contact.

# Billion . . .

*Continued from page 35*

global assets, $3 billion is in index funds.

Capital Research & Management, which is adviser to the American Funds Group of Mutual Funds, tripled its global account assets to $246 million from $80 million last year, moving up four spots to rank 10th.

Grantham, Mayo, Van Otterloo & Co., Boston, rose to fifth place with $2.25 billion in international account assets from seventh. It added three to four new clients for quantitatively managed commingled funds, said Diane Whelan, marketer and trader.

In a departure from previous years' directories, *P&I Age* this year profiled only the top 50 managers in terms of foreign discretionary U.S. tax-exempt assets under management — international and global assets combined.

Frank Russell Trust Co., Tacoma, Wash., is profiled but not included in the rankings or the aggregate data because it is a manager of managers; it does not itself run money.

Assets of Fiduciary Trust Co. International, New York, ranked third this year with $700 billion in global assets, were understated last year because the firm did not include U.S. assets in its global figure, said Belinda Gibbs, assistant vice president.

Baillie Gifford Overseas, Edinburgh, Scotland, gained a sizeable total of $165 million in international accounts this year compared with $96.3 million last year. The firm's $2 million figure last year was incorrect. Gain was based on 59% return in 1986 and additional contributions from existing clients.

Because the questionnaire did not specify to include only assets in accounts with global or international mandates and whose investment performance is measured against global or international indexes or manager universes, two money managers — Eaton Vance Management, Boston, and BEA Associates Inc., New York — listed themselves as global managers because they have foreign securities in their domestic portfolios.

Eaton Vance ranked second in global assets with $1.44 billion; it was not included in last year's directory.

BEA Associates jumped to $586 million in global accounts, ranking fourth, from nothing last year.

A small portion, $8.3 billion, in tax-exempt assets invested abroad were in commingled accounts; $4.3 billion, in mutual funds, and $3.28 billion in index funds. ●

# Letters to the editor

The following Letters to the Editor are in response to the May 25 Largest Money Managers issue. The regular letters column appears on page 10.

## David J. Greene

To the Editor: I am writing regarding the profile of David J. Greene and Co. on page 80 of the May 25 *Pensions & Investment Age* special profiles issue. In particular, I would like to draw your attention to the paragraph describing our equity approach. While your statement is accurate, you neglect to mention a key element of our investment philosophy by omitting the phrase "emphasis is placed on special situations."

Investing in special situations has been an integral part of our investment philosophy for over 50 years and in combination with undervalued securities has produced consistent results.

The ownership of special situations differentiates us from the majority of value investors and provides us with opportunities when the general market appears overvalued by most historical comparisons. Special situations may at times constitute over 30% of an equity portfolio and therefore we trust will be included in any future descriptions of David J. Greene and Co.'s investment philosophy.

We thoroughly enjoy receiving your publication and read with special interest your articles highlighting trends within the industry. As always, we are pleased to be included in your profiles of the largest money managers.

**Nanci D. Tucker**
David J. Greene and Co.
New York

## Aetna Life Insurance

To the Editor: The following corrections should be made to the separate accounts asset mix given on our 1987 investment adviser questionnaire:

Stocks, 35.01%, $3.2 billion; bonds, 7.12%, $651 million; cash, 20.42%, $1.87 billion; equity real estate, 24.26%, $2.22 billion; mortgages, 12.08%, $1.11 billion; international, 1.11%, $102 million.

The above changes would be reflected in two of the charts in your May 25 special profiles issue, moving us to sixth largest equity real estate adviser and fourth largest mortgage adviser.

**Barbara A. Aurell**
Manager,
Aetna Life Insurance Co.
Hartford, Conn.

## Sanwa Bank

To the Editor: Please note the following changes in the information published in the May 25 profiles issue.

Cynthia S. Ellner is no longer employed with Sanwa Bank California. The client contact is now Vincent L. Shepherd, senior vice president and deputy division head.

**John R. Thompson**
Vice president and
senior trust investment officer
Sanwa Bank California
Los Angeles

## Frontier Capital

To the Editor: In reviewing the May 25 profiles issue, we felt the description of Frontier was somewhat incomplete.

Frontier Capital Management Co.'s equity portfolios focus upon the identification of sectors and industries likely to grow at above-average rates over a two- to three-year time period. Portfolios are then constructed of companies likely to benefit from these trends resulting in a weighted average earnings growth rate significantly greater than that of total corporate profits.

In addition to its core equity portfolios, Frontier offers specialized portfolios of smaller-capitalization companies.

The above engages in fundamental research and quantitative screening of over 1,000 companies. Approximately 150 companies are closely followed at any point in time.

**John A. McQuilkin**
Senior vice president
Frontier Capital Mgmt. Co.
Boston

## Adams Express Co.

To the Editor: Pursuant to our phone conversation of today, this is to note the Adams Express Co. has no parent company and does not emphasize energy stocks. However, because of our affiliation with Petroleum & Resources Corporation, we do have expertise in energy stocks. We were not 100% invested in stocks Jan. 1; it should have been 95%.

**Monica C. Loh**
Vice president
Investment advisory services
Adams Express Co.
Baltimore

## DP Asset Mgmt.

To the Editor: I am sorry we were not included in the 1987 investment manager survey.

Attached are the data for publication. All correspondence should be sent to my attention.

DP Asset Management Inc.; 3801 Kennett Pike, C. 304; Wilmington, Del. 19807; (302) 658-7675.

The firm manages total assets of $132 million, of which $77 million is from 22 tax-exempt clients.

The tax-exempt asset mix was equities, 68%; bonds, 29%; and cash and short-term, 3%.

The investment strategy is bottom up, emphasizing small- to medium-capitalization equities. It provides both balanced and equity management. International management is available through PHP.

It employs five analysts.

The firm is a subsidiary of Delfi American Corp. & Pierson, Heldring & Pierson, Amsterdam.

Key personnel for tax-exempt accounts are Daniel Devine, executive vice president and chief investment officer; Peter Cooke, executive vice president and senior portfolio manager; and Francis DeMariel Keen, vice president and secretary.

Mark Hanna, executive vice president, is client contact.

**Mark C. Hanna**
Executive vice president
DP Asset Management Inc.
Wilmington, Del.

## Liberty Capital Mgmt.

To the Editor: Liberty Capital missed the opportunity of appearing in your May 25 profiles issue. We would like to submit the following information:

Liberty Capital Management Inc.; 11 Broadway, Suite 1066; New York, N.Y. 10004; (212) 509-0550.

Total assets managed, $500 million; tax-exempt assets managed, $220 million; tax-exempt clients, 55; types of accounts managed — corporate, foundations, government and jointly trusteed; minimum separate account, $5 million; number of portfolio managers, 3.

Liberty Capital Management is a fixed-income manager specializing in government securities.

Its investment approach is active, based on quantitative, risk-averse management of securities, with the goal of producing capital gains during periods of price strength. Options on futures can be used to enhance returns during periods of price weakness.

Clients include Coleman Co., ILGWU and the Cleveland Clinic.

Jonathan Leader is president and chief investment officer. Susan B. Thompson is client contact.

**Susan B. Thompson**
Marketing manager
Liberty Capital Management
New York

## Marsh & Cunningham

To the Editor: Enclosed is the lost information on Marsh & Cunningham.

Marsh & Cunningham Inc.; 1 Liberty Square, P.O. Box 1961; Boston, Mass. 02105; (617) 482-0290.

Total assets managed, $212 million; tax-exempt assets managed, $81 million; international assets managed, $51 million; minimum separate account, $1 million; number of portfolio managers, 4; types of accounts managed — corporate pension funds and educational and private endowments.

In management portfolios we stress broad diversification among investment-quality securities having good dividend yields, modest price-earnings ratios, favorable price-to-book relationships and liquid markets.

Chief investment officers are John B. Marsh and Joseph M. Cunningham Jr., principals. Client contact is Douglas E. Hart, principal.

**Douglas E. Hart**
Marsh & Cunningham Inc.
Investment Management
Boston, Mass.

## GAMCO Investors

To the Editor: Somehow we were shut out! At year-end 1986, GAMCO Investors Inc. had total assets of $1.25 billion under management, of which $900 million was tax-exempt. This would have placed GAMCO Investors Inc. at a ranking of 286, up from 300 in 1985 when we had $630 million in tax-exempt assets ($898 million in total) and up from 394 in 1984.

We are an equity manager that invests in companies that are selling at a discount to their private market value. We do all our own research, and have approximately 90 companies in our portfolio.

Mario J. Gabelli is the chief investment officer, Douglas R. Jamieson is the client contact. The minimum separate account size is $5 million.

**Douglas R. Jamieson**
GAMCO Investors Inc.
New York

## Midlantic Corp.

To the Editor: Midlantic Corp. was not included in the May 25 special directory of money managers.

Midlantic Corp. is at 499 Thornall St., Edison, N.J. 08818; (201) 321-8380.

As of Jan. 1, total assets under management were $3.6 billion; of that, $1.9 billion was tax exempt.

In equities, Midlantic is decidedly value-oriented and as a result tends to be contrarian. Strong financials are essential and decision rules provide the discipline necessary to take advantage of market emotions.

In fixed income, Midlantic invests in high-quality, moderate maturity shift with laddered structure and average maturity ranging between five and eight years. Mortgage pass-through bonds account for substantial positions.

There are 11 portfolio managers and three members of the research staff. The firm follows 300 stocks closely and develops a portfolio of 25 to 30 equities.

Minimum account size for individual management is $5 million. Clients include Hoffman-LaRoche, Foster Wheeler and Kidde.

William P. DuBose, senior vice president, is the chief investment officer and department head.

**Walter T. Bednarz**
Client contact
Midlantic National Bank
Edison, N.J.

## Seafirst Bank

To the Editor: Information on Seafirst Bank was not included in your May 25 issue on money managers. I have prepared the following information for you.

Total assets managed, $2.8 million; tax-exempt assets managed, $682,000; types of accounts managed, corporate, endowments and foundations; minimum separate account, $1 million; number of portfolio managers, 5; and size of research staff, 8.

Seafirst is an equity, fixed-income, balanced and real estate manager. Its equity approach emphasizes value. A cash decision and emphasis on stock groupings are additional strategies used. Its fixed-income approach uses moderate changes in duration of portfolios combined with sector analysis with an emphasis on mortgage-backed securities.

The asset mix Jan. 1 was 19% equity, 45% fixed-income and 36% cash.

John P. Privat, vice president, is chief investment officer. Steven A. Horman, vice president, is client contact.

Thank you for your assistance.

**Steven A. Horman**
Vice president
Trust division
Seafirst Bank
Seattle

## Harris Associates

To the Editor: Harris Associates L.P. has been left out of your listing of the largest money managers. The data follow:

Harris Associates, L.P.; 2 N. LaSalle St., Suite 500, Chicago, Ill. 60602; (312) 621-0612.

Total assets under management as of March 31 were $3.09 billion. Tax-exempts assets totaled $1.28 billion for 153 clients. Of the tax-exempt total, discretionary accounts made up $1.26 billion.

The asset mix was 77% stocks, 12% bonds and 11% cash.

The minimum amount required for separate accounts is $5 million.

There are six portfolio managers and 10 researchers.

Earl J. Rusnak Jr., principal, is client contact.

We hope you will correct this oversight.

**Earl J. Rusnak, Jr.**
Principal
Harris Associates L.P.
Chicago

ASB Capital Management Inc. was omitted inadvertently from this table when it appeared in the May 25 issue.

**25 largest managers of equity index funds**

| Manager | $ millions |
|---|---|
| Wells Fargo Investment Advisors | 34,331 |
| Bankers Trust-Investment Management Group | 19,500 |
| State Street Bank and Trust | 8,361 |
| American National Bank & Trust, Chicago | 8,250 |
| Mellon Capital Management | 7,500 |
| Dimensional Fund Advisors | 2,954 |
| Alliance Capital Management | 2,885 |
| Wilshire Asset Management | 2,500 |

| BA Investment Management | 129 |
| Travelers Cos. | 112 |
| Derivative Markets Management | 84 |
| **TOTAL** | **92,255** |

## Corrections & clarifications

- **The Putnam Cos. Inc.** offers both passive and active fixed-income management. The investment approach printed in the firm's May 25 profile could have been read as offering passive investment only.
- The telephone number of **PM Portfolio Management GmbH** was printed incorrectly in the firm's May 25 profile. The correct number is 011-89-33-20-36.
- The figure given for total assets managed by the Top 100 investment managers in the **Profile statistics at a glance** chart in the May 25 issue was incorrect. The correct figure is $1.811 trillion.
- Townsend Asset Management and Henderson International should not have been included among the top 100 investment advisers by total assets in *Pensions & Investment Age*'s May 25 special issue on the largest money managers.

# Money movers

### *Warner-Lambert Co.*

MORRIS PLAINS, N.J. — The nearly $1 billion Warner-Lambert Co. pension fund has added two active international equity managers, according to Marc Shapiro, director of pension investments.

Assets will be rebalanced so that the new managers — Schroder Capital Management International, New York, and SBC Portfolio Management International Inc., New York — and the fund's holdover international equity manager, Rowe Price-Fleming International Inc., Baltimore, each will run $30 million.

Assets for the new managers mainly came from an international equity account managed by Putnam International Advisors, Boston. The firm was terminated due to a loss of key personnel, Mr. Shapiro said (*Pensions & Investment Age*, Sept. 1, 1986). A small portion of assets came from Rowe Price-Fleming's account.

Warner-Lambert officials decided against hiring an index fund manager because "at this point we felt it was more prudent to remain actively managed. Indexing is an active bet on the strength of the Japanese market, which makes up about 60% of the (Morgan Stanley Capital International Europe Australia Far East) index, Mr. Shapiro said.

The managers were chosen because of their continuity of professionals, consistent performance, and reputation in terms of client service.

### *Canteen Co.*

CHICAGO — Canteen Co. hired five new managers and released one balanced manager for a total of $60 million in pension and profit-sharing assets, said Karl Sedlarz, vice president at Canteen.

Canteen, a division of TW Services Inc., New York, has $19 million in profit-sharing assets and about $55 million in pension assets, Mr. Sedlarz said.

The remaining $14 million is invested directly with insurance companies, primarily in guaranteed investment contracts, he said.

The managers hired were Harris Trust and Savings Bank, Chicago, equities; Sun Bank Investment Management Group, Orlando, Fla., equities; Newbold's Asset Management, Philadelphia, equities; Kemper Financial Services Inc., Chicago, fixed income; and CMB Investment Counselors, Los Angeles, fixed income.

Mr. Sedlarz declined to release the specific allocations. "It was approximately an even split, although some got more and some got less," he said.

Frank Russell Trust Co., Tacoma, Wash., was terminated.

The new hires were not expected to alter the funds' asset mix. The consolidated asset mix of the portfolios was 54% equities and 46% fixed income, including GICs, bonds and some real estate, said Mr. Sedlarz.

Performance Analytics Inc., a consulting firm based in Chicago, aided the company with its manager search.

### *Georgia-Pacific Corp.*

ATLANTA — The Georgia-Pacific Corp. Atlanta, has hired Cramer, Rosenthal & McGlynn Inc., White Plains, N.Y., and Husic Capital Management, San Francisco, to manage a total of $30 million in equity assets for the $375 million pension fund.

The two managers were hired to outperform the core equity portfolios that track the Standard & Poor's 500 stock index, said John E. Stettler, director of employee benefit investments.

Cramer and Husic each received $15 million in June, Mr. Stettler said. Funds for two firms came from contributions and a recently terminated manager, which he declined to identify.

Ennis, Knupp & Associates, Chicago, served as the search consultant.

### *McGill University*

MONTREAL — The $265 million McGill University Endowment Fund, Montreal, has hired and allocated a total of $28 million to Oppenheimer Capital Corp. and First Manhattan Capital Management, both of New York, for management in U.S. equities.

S.J. Budden, treasurer, said the allocation came from a terminated manager he declined to name, which had invested in a balanced account of Canadian stocks and fixed income. The allocation increases the endowment's allocation of U.S. equities to 25%.

Evaluation Associates Inc., Westport, Conn., was the consultant.

### *Procter & Gamble Co.*

CINCINNATI — Procter & Gamble Co. replaced three managers and hired Wells Fargo Investment Advisors, San Francisco, and IDS Advisory Group, Minneapolis, in shifting $100 million for three employee benefit funds, according to John R. Smith, manager-pension plan coordination.

P&G hired Wells Fargo to replace Griffin Group, Chicago, as sole manager for its $40 million Norwich-Eaton defined benefit fund.

For its $106 million Richardson-Vicks defined benefit fund, P&G replaced Glickenhaus & Co., New York, an equity manager, and Western Asset Management Co., Los Angeles, a fixed-income manager, and assigned the $20 million each ran to Wells.

For both pension funds, Wells will divide the money equally into equity and fixed-income index funds.

Also, P&G hired IDS Advisory to run its $20 million 501(c)9 post-retirement medical fund in a balanced account. That money had been run in-house.

Mr. Smith said the moves were made to improve performance and simplify management. No consultant was used.

### *Chicago Sun-Times*

CHICAGO — The Chicago Sun-Times hired three new balanced fund managers, after terminating accounts with two other investment managers, according to Gerald Corcoran, controller.

Investment Advisers Inc., Minneapolis; Smith Barney Capital Management, New York; and Citicorp Investment Management Inc., Chicago; were selected to manage a total of $28 million in defined benefit assets, according to Mr. Corcoran. The fund covers editorial employees of The Newspaper Guild as well as office workers.

Investment Advisers and Smith Barney were allocated $10 million each, while Citicorp received $8 million in assets.

### *Washington University*

ST.LOUIS — Washington University's $1.2 billion endowment fund has hired Trinity Investment Management Corp., Boston, and Dreman Value Management, New York, to manage separate $20 million equity accounts, said Jerry Woodham, treasurer. The assets will be taken from unallocated cash, he said.

The growth-oriented endowment fund added the two value managers to protect its assets from unpredictable movements in today's volatile market. Trinity and Dreman are two of the strongest value managers around, Mr. Woodham said.

"We like their three- to five-year performance numbers," Mr. Woodham said.

The Wellesley Group Inc., Waltham, Mass., and Cambridge Associates, Cambridge, Mass., assisted in the search. The endowment fund's asset allocation as of March 31 was 79.5% equities, 17.5% fixed income and 3% cash.

# Finnish market a good bet

**By Marlene Givant**

LONDON — Quietly benefiting from trade with the Soviet Union, a pro-business government and an expanding manufacturing base, the Finnish stock market is a good bet for sophisticated international investors with a long-term outlook, according to an American Express Asset Management report written by Chilton Thomson, director.

The small but sophisticated market is a world leader in several niche industries, from the manufacture of exercise bicycles to icebreakers, and its base of exports is growing beyond the country's large forest products sector.

The 20% of goods and services Finland exports to the Soviet Union is shrinking as Finland begins to boost trade with large Western markets.

In response to the nation's increasing competitiveness, local investors, who dominate the Finnish market, are re-rating stocks in a manner more in line with ratings of companies in larger markets. This is raising relatively low Finnish price-earnings multiples.

Locally, the Finnish government is increasingly supportive of business.A conservative coalition elected in March "will undoubtedly reinforce these positive trends," he added.

The government also recently raised the limits on foreign stock ownership. Formerly a company could offer 20% of shares to foreigners; companies may now offer 40%.

Because Finland's market isn't part of any established international index, equities are underowned by global investors — "a situation which is likely to change over time," Mr. Thomson wrote.

At the end of 1986, the stock exchange list included 100 share listings for 52 companies, of which 36 listings were open to foreigners. The market capitalization then was about $13 billion.

On current earnings, the market is on a multiple of 11, although this is difficult to calculate, he wrote. "Finnish accounting is exceedingly conservative and in addition, tax laws permit generous reserves. The result is that analysts don't agree about historic earnings, let alone prospective ones."

In addition, there s limited liquidity and trading is generally difficult especially since there is no market making per se.

Two banks, an insurance company and a conglomerate dominate the list of Finnish companies. The largest bank is the **Union Bank of Finland**, closely followed by **Kansalis-Osake-Pankki** or KOP. **Pohjola Group** is the largest insurance company. "These three institutions all have extensive holdings of Finnish equities, valued at much less than market value, and all are thus in a sense proxies for the market," Mr. Thomson wrote.

The largest company, **Nokia Oy Ab**, is a conglomerate whose activities range from rubber boots and tires to computer monitors, he wrote.

Finnish exports surged 11% in the last quarter of 1986. As a result, the overall corporate earnings outlook for Finland is quite bright; corporate profitability is expected to increased about 10% in 1987.

American Express, which manages $450 million for U.S. tax-exempt clients, invests 3% to 5% in Finland in a typical aggressive equity portfolio. ■

An incorrect column was entered for the IRRC data in the proxy voting results table published June 15. A corrected table is printed below.

## Armco fund sells stock

By Joel Chernoff

PARSIPPANY, N.J. — The $1.5 billion Armco Inc. pension fund sold a special issue of preferred stock for $13 million less than its value when Armco contributed the stock to the fund four years ago.

The fund sold the 1 million-share issue of $4.50 cumulative convertible preferred stock on the secondary market for $37 million, or $37 per share. The shares were valued at $50 each when contributed to two of Armco's pension plans in June 1983.

The selloff is the second recently by a steel industry pension fund. Last month, the USX Corp. pension fund sold back 1 million shares of preferred stock to the company. Those shares stemmed from a 2.5 million-share contribution originally made by the company in 1983 that later was swapped for a different issue of preferred stock and warrants.

In 1986, the USX pension fund sold 1.5 million shares of the new preferred stock to the public. Last month's sale —

# Bail-out by Ginnie Mae

## Agency assumes 25% of mobile home portfolios

By Marcia Parker

The Government National Mortgage Association, Washington, has taken over six troubled mobile home loan portfolios totaling $850 million to $900 million because of mounting defaults, and now is wrestling with how to minimize potentially significant losses to the government.

That represents about 25% of the present outstanding balances on mobile home loans backing $3.6 billion in Ginnie Mae securities.

This does not appear to have affected the private market, however, as issuers led by Green Tree Acceptance Corp., St. Paul, Minn., are putting the finishing touches on about $200 million in new private placements of mobile home loan-backed securities.

The mobile home loan portfolios Ginnie Mae took over belong to six mobile home financiers mostly in the depressed oil patch and agricultural states of the Southwest. The individual mobile home owners were hit by the regional economic downturn and have had trouble meeting payments. Ginnie Mae officials, who declined to identify the six lenders, aren't yet certain what losses their agency might have to absorb.

"There will be a net loss, but we don't yet know how much," said Louis Gasper, executive vice president of Ginnie Mae. "We haven't inventoried everything yet."

Ginnie Mae buys loans from a long list of approved lenders and swaps them for its own securities backed by the loans, which the lenders can keep or sell. The lenders remain responsible for servicing and making principal and interest payments to investors.

Because Ginnie Mae is a U.S. government entity, the government's full faith and credit guarantee stands behind every security. That means if even one mortgagee doesn't make his or her payments, and the lender, in turn, isn't able to pay the investor who bought the securities backed by the loans, Ginnie Mae must take over the portfolio and pay the security holder.

Not all loans in the portfolios Ginnie Mae assumed are bad, but Mr. Gasper declined to give a specific percentage.

He said he doesn't expect Ginnie Mae to be confronted with many more troubled mobile home loan portfolios. "Our guess is we've gotten into the soup as deeply as we can get. We are seeing some signs that things have stabilized," he said.

The problem loans Ginnie Mae holds surface at a time when the still-infant market for securities backed by mobile home mortgages is beginning to take off.

Although it's a relatively new niche in the fast-growing mortgage-backed securities market, mobile home loans are satisfying what appears to be a sizable appetite among issuers and investors for new assets to securitize.

Hugh Frater, senior associate at Shearson-Lehman Brothers Inc.'s mortgage securities group, New York, estimates total manufactured housing debt outstanding is about $27.5 billion. Only about 10% has been securitized through Ginnie Mae guarantee programs and an equally small percentage securitized by other issuers that placed them privately with institutional investors.

Ginnie Mae's difficulties also come on the heels of widespread questioning in the investment community over whether investors truly understand the risks inherent in owning highly complex mortgage-backed securities. Debate was spurred by Merrill Lynch & Co.'s $275 million in losses in May from mortgage-backed securities trading.

Ginnie Mae isn't the only issuer to feel the fallout from bad mobile home loans. Non-government issuers like Green Tree and General Electric Credit Corp., Stamford, Conn., have had their share.

# California Teachers' puts $6 billion into bond index

By Jacqueline Dutton

SACRAMENTO, Calif. — In a major step toward its goal of moving to in-house management of fixed income, the California State Teachers' Retirement System moved its $6 billion bond portfolio into what is believed to be the largest single bond index account.

The account with Manufacturers Hanover Investment Corp., New York, was established to consolidate assets while the fund prepares to bring the assets in house, said Lawrence Kurmel, chief executive officer of the $23 billion fund. He expects the transition to take place in eight months.

MHIC was chosen as manager of the temporary index account in part because the firm had been an active manager of about 90% of the fund's $6 billion in bond assets.

"They've adjusted their (active) style to accommodate our needs," Mr. Kurmel said of MHIC, which was managing only $650 million in bond index accounts for clients before the California Teachers' move. "They are responsive to the direction we are heading to."

The California fund is only one of several pension funds moving to bond indexing. *(See related story, page 3.)*

Mr. Kurmel said the fund's transition to passive from active management of the fixed-income portfolio is based on the need to contain management costs.

Kevin Hurley, director-quantitative fixed-income investment at MHIC, said the index fund will be weighted to give the portfolio a longer duration than the market to cover the fund's long-term liabilities, adding this is less constraining than a strict dedicated portfolio. He noted the fund has many active employees now, so its liabilities are more long term.

"I think they (California Teachers) concluded that their objective would be better served by indexing as opposed to having a group of managers on board whose objective was more aimed at beating the market than meeting liabilities," said Robert C. Peck Jr., a senior vice president at MHIC.

"If you are attempting to put together an investment plan designed to fund a specific system's liabilities, what is the relativity of beating the Shearson" Lehman Goverment/Corporate bond index?

Mr. Peck said MHIC was not surprised by its termination as an active manager. He said the firm's portfolio managers were aware of the fund's plans, and were helping the fund's investment officers prepare for the shift.

The latest phase of the fixed-income restructuring intensified in the past two months with the termination of active managers Manufacturers Hanover; Loomis, Sayles & Co. Inc., Boston; Miller, Anderson & Sherrerd, Bala Cynwyd, Pa.; Pacific Investment Management Co., Newport Beach, Calif.; Scudder, Stevens & Clark, New York; Stein Roe & Farnham, Chicago; and T. Rowe Price Associates, Baltimore.

California's investment officers stepped up efforts to consolidate the fixed-income assets just as New York City officials were completing a fixed-income restructuring similar in scope and objective.

During the course of a $17 billion restructuring completed in February, the five New York funds hired 17 managers to handle accounts in four different sectors — government, corporate, foreign and mortgage-backed securities *(Pensions & Investment Age*, Nov. 10).

The restructuring of the California Teachers' fixed-income component is part of an effort to bring the fund's portfolio into "modern times," Mr. Kurmel said.

He said that when he and Chief Investment Officer Thomas E. Flanigan joined the fund in 1985, they decided its mix of 57% fixed income, 24% equity, 12% cash and the remainder in real estate and other investments, was "archaic."

Since then, the fund has reduced its fixed-income position to 35%, including mortgages and mortgage-backed securities, by boosting its equity allocation to 55%, boosting real estate to 2.5% real estate and reducing cash to 7.5%.

The next phase, he said, is adding international equity to the portfolio, a move that likely will take place in the fall after a manager search. He estimated the initial allocation will be $300 million to $500 million.

# Pension *funds* face negative cash flow

By John Covaleski

Surging investment gains and the maturing of pension funds are presenting pension executives with a new investment problem — negative cash flow.

Although not widespread, negative cash flow — when a pension fund's outflow for benefit payments and operating costs exceeds its plan sponsor contributions and investment income — looms as potentially a more common occurrence for pension funds.

To cope, money managers and consultants say, pension executives may keep their fund assets as liquid as possible to have cash on hand to pay liabilities as they come due or establish bond portfolios whose maturities match liabilities.

Pension funds whose executives have confirmed they are in or nearing negative cash flow are those of Kraft Inc., Northbrook, Ill.; Armco Inc., Middletown, Ohio; Bethlehem Steel Co., Bethlehem, Pa.; and Bechtel Power Co., San Francisco.

Investment gains have increased the asset sizes of some pension funds to the point of reaching the full funding limitation, the level at which the Internal Revenue Service disallows additional contributions on a tax-exempt basis. That severely limits fund income.

At the same time, maturing pension funds often have more retirees than active workers. That increases benefits paid out.

*When employees of Kraft Inc. began taking lump-sum benefit payments, the pension plan neared negative cash flow.*

Corporate sell-offs or shutdowns of operating subsidiaries further increase the likelihood of negative cash flows.

In these subsidiaries, plan sponsors' pension funds are responsible for the liabilities of workers who retire from the subsidiaries, but the active employees generally are transferred into new pension plans.

The Labor Department reports a steadily increasing percentage of pension funds are hitting negative cash flow. Based on Form 5500 reports, 13% of the 201,000 plans filing for calendar year 1984 — the most recent data available — reported being in a negative cash flow, up from 11.1% of 199,000 plans in 1983 and 7.6% of the 191,000 plans reporting in 1982.

The pension funds reporting were both defined benefit and defined contribution plans. Their total assets were $628 billion in 1984; $606 billion in 1983; and $553 billion in 1982. Although more recent data are not available, pension fund observers say the trend of more funds entering negative cash flow is continuing.

"There's a real possibility more and more pension funds will go into negative cash flow. With the aging of America's work force and fewer younger people entering it, you're getting more retirees than active workers, and you have to play catch-up," warned Stuart J. Brahs, executive director of the Association of Private Pension and Welfare Plans, Washington.

Larry B. Wiltse, consulting actuary and director of forecasting and planning services at Buck Consultants Inc., New York, said, "Any plans that are well-funded to begin with and then experience serious declines in employment are susceptible" to negative cash flows. But, he said the amounts by which outflow exceed inflow gen-

## Directory questionnaires mailed

Questionnaires for *Pensions & Investment Age*'s annual directories of master trust banks and real estate asset managers are in the mail.

Master trust banks and real estate investment managers that have not received questionnaires by July 17 and want to be included in the directories should call Carol Wiley, directory coordinator, at (312) 649-5486.

The master trust directory will be published Sept. 7; deadline for return of the completed questionnaires is Aug. 10.

The real estate directory will be published Sept. 21; completed questionnaires must be returned by Aug. 1.

# Asset-liability studies flourish

By Trudy Ring

Asset-liability studies are enjoying popularity among pension funds, thanks in part to the accounting rules that put pension liabilities on corporate balance sheets.

Most consultants interviewed wouldn't divulge the number of asset-liability studies they have done. The numbers from the few that would indicate at least 60 plan sponsors did the studies in the past year, and at least 15 are in the process. The industry totals probably are much higher.

However, corporate sponsors that look at liabilities because of accounting standards may be doing it for the wrong reason, some plan executives and consultants said. The Financial Accounting Standards Board's new rules suggest a short-term, year-to-year outlook, while pension plans have long-term needs.

Still, many contend the liabilities merit a look with or without accounting considerations, simply because the purpose of the assets is to pay for the liabilities. Others, however, say asset-liability studies don't tell plan executives anything they don't already know, or that liability growth is irrelevant to a well-funded, well-invested plan.

In an asset-liability study, pension officers look not only at the optimal asset allocation for a defined benefit plan, but at how both the liabilities and the assets will grow under various economic circumstances. Many plans use consultants for these studies, while a few do the work in-house.

Use of asset-liability modeling has been growing steadily since the mid-1970s, but concern about FASB rules has caused growth to explode in the past year, said Irwin Tepper, president of Irwin Tepper Associates, Newton, Mass., a firm that provides such models.

Most of the users of asset-liability studies have been corporate plan sponsors; a few public plans, although not affected by FASB, have used them because of concerns about meeting liabilities or investing in alternative asset classes.

A pension fund sponsor that did asset-liability studies even before their recent growth in popularity was Owens-Illinois Inc., Toledo, Ohio, which has about $2 billion in pension assets. Ronald C. Boller, director-benefit finance, said his first discovery upon taking the job in 1980 was that asset-liability studies weren't being done, but should be.

"The only way to set asset mix is to simultaneously look at assets and liabilities," he said. "You're in business to pay the liabilities, and the assets are the only way to do it."

*Ronald C. Boller of Owens-Illinois used asset-liability studies before they were popular.*

Owens-Illinois did its first study in 1981, using a liability model from Winklevoss & Associates, Philadelphia. It was one of the few models available then.

Since 1981, Owens-Illinois has done an asset-liability study every year, looking at liabilities both on an ongoing and a termination basis. Findings resulted in larger allocations to international equities, which grew to 15% from 4%, and international bonds, to 3% from 1%, and the reduction and eventual elimination of defined benefit plan contributions.

"What (doing the studies) caused us to do is to see three or four years early the same thing everybody else is seeing now and get our contributions down dramatically," Mr. Boller said.

# *Curbs likely for leveraged ESOPs*

By Nicky Robertshaw

WASHINGTON — The House Ways and Means Committee is considering dramatically restricting the ability of companies to establish leveraged employee stock ownership plans.

The proposal, among a host of options prepared by the committee and the Joint Committee on Taxation to help Congress find $19.3 billion in new tax revenue, would eliminate ESOPs' ability to make loans to a party related to the plans.

On the same day the two committees suggested eliminating some tax benefits of ESOPs, the plans' principal proponent, former Sen. Russell B. Long, D-La., was urging the Senate Banking Committee to expand the use of ESOPs in corporate takeover situations.

But the ESOP community will have to rally to keep the plans' current tax preferences before being able to pursue expansions of their use.

"We are going to be organizing our members and be as aggressive as possible," said David Binns, managing director of the Employee Stock Ownership Association, Washington.

In a letter to members, the association said the House Ways and Means Committee could vote as early as July 20 to effectively repeal leveraged ESOPs and all special ESOP tax rules. "Although there is good reason to believe this incredibly drastic anti-ESOP proposal will not become law, the proposal does present a very real threat," the letter said.

Mr. Binns pointed out the changes are "not one of the high-ticket items" on the committee's list of 200 revenue-raising options, generating $100 million compared with the $19.3 billion the Ways and Means Committee hopes to raise for fiscal 1988. For that reason, it might not be as tempting to lawmakers. The likelihood the options actually will make it into the 1988 budget depends on a number of factors, including how likely the president is to stand by his promise to veto any tax increase and whether Congress could override that veto. Other factors include how politically damaging the changes might be to members of Congress, and whether the areas in question were addressed by the 1986 Tax Reform Act.

Leveraged ESOPs, which provide companies with a way to borrow money with attractive tax incentives, account for about 25% of all ESOPs and make up the fastest-growing segment of the industry, Mr. Binns said. They are seen as affecting banks and companies but not stirring the voters' ire as strongly as taxing health benefits and other considerations, according to a congressional source.

The proposal would severely disrupt use of leveraged ESOPs by eliminating the plans' automatic exclusion from the Employee Retirement Income Security Act's rules against establishing loans between an employee benefit plan and a party connected with the plan.

Pointing out similar exclusions could be obtained on a case-by-case basis from the Department of Labor, one observer believes instead of eliminating the ESOP ex-

# Indexed assets top $187 billion

By Hank Berkowitz

Impressive growth of fixed-income and international equity index funds boosted the overall growth of indexed assets for U.S. pension funds to $187.96 billion, up 24% from $151.58 billion for the six months ended May 31.

After accounting for market appreciation, assets in domestic stock index funds grew a net 5.1%; those in bond index funds grew a net 49.5%; and those in international index funds grew a net 43.7%, according to a *Pensions & Investment Age* poll of 72 money managers known to engage in at least one form of indexing.

Wells Fargo Investment Advisors, San Francisco, easily remained the largest index fund manager with $62.3 billion in total indexed assets, up from $55.3 billion as of Nov. 30, when *P&I Age* last surveyed U.S. index fund managers (*P&I Age*, Jan. 12). Wells Fargo's nearest competitor is Bankers Trust Co. — Investment Management Group, New York, which had $28.5 billion in indexed assets as of May 31.

Rounding out the top five are Mellon Capital Management, San Francisco, $20 billion; State Street Bank & Trust Co., Boston, $15.2 billion; and American National Bank & Trust Co. of Chicago, $9.6 billion.

Of the total indexed assets, $124.07 billion, or 66%, tracked domestic equity indexes. That figure is up 23.3% from $100.59 billion Nov. 30, a gain that resulted primarily from an 18.2% increase in the Standard & Poor's 500 stock index in the six months.

However, the 5.1% net gain in stock indexing surprised many industry observers who expected stock indexing to bottom out after registering a net gain of less than 1% in the previous six-month period.

"Particularly when the market is meandering sideways, rather than up and down, it's tough for anyone to beat the index," Chuck Clinton, vice president-asset management services, Hartford Life Insurance Cos., Hartford, Conn., said explaining the gain. Hartford has $42 million in indexed assets.

While traditional S&P 500 index funds claim $99.9 billion, or more than 80%, of stock index assets, other indexes have gained in popularity.

More than $10.2 billion, or 8.2%

# JMB raising more cash to buy Cadillac Fairview

By John Covaleski

CHICAGO — In an 11th-hour twist, JMB Realty Corp. likely will be forced to raise $460 million more than planned for its acquisition of Cadillac Fairview Corp., the Toronto real estate developer.

The $1.96 billion deal (based on the 90-day forward currency exchange rate between Canada and the United States) is considered the largest single real estate transaction ever, and will be financed mainly by tax-exempt institutions investing in a private placement.

Although JMB initially expected to raise $1.5 billion of the purchase price, the stakes will be raised to the entire $1.96 billion, unless negotiators break through an impasse in plans to sell $450 million worth of Cadillac Fairview assets to an investment group consisting of Copley Real Estate Advisors, Boston, and Michael Prentiss, president of Cadillac Fairview's urban development unit in Dallas.

In addition, terms of the deal have been changed, with JMB now required to finance the acquisition entirely with cash instead of cash and some preferred stock. The change to all cash has increased the amount of cash JMB has to raise by $10 million, but the per-share sale price was lowered to $25.53 from $26.28, and JMB's deadline for raising the money was extended two months to Oct. 31.

(A $10 million discrepancy exists between the size of the total transaction — $1.96 billion — and the two components — $450 million from the Copley-Prentiss group and $1.5 billion from the private placement. JMB officials said the $10 million difference is due to rounding.)

Cadillac Fairview officials signed a definitive sales agreement with JMB last week, in which JMB will pay cash for 78 million shares outstanding. Previously, JMB was to have acquired up to 35% of Cadillac Fairview shares, which included all those owned by the Bronfman family, in exchange for two series of preferred stock in the new company.

Under the new terms, the sale price decreased $60 million.

The price change and the switch to an all-cash deal were made because of proposed changes in Canadian income tax law, said Bernhard I. Ghert, president and chief executive officer of Cadillac Fairview. But sources said the price was reduced because Copley executives complained about the pricing of the Cadillac Fairview assets the Copley group had been planning to acquire.

By far the most critical new variable of the transaction is whether Copley will buy the Cadillac Fairview assets, the sale of which would have generated liquid assets so JMB would have had to come up with less cash.

Differences about pricing caused a "serious impasse" in negotiations, said Peter Harrington, second vice president of public relations for The New England Mutual Life Insurance Co., Boston, Copley's parent organization. Mr. Harrington added there is only a "slight" chance negotia-

# Investment tax resurfaces

By Nicky Robertshaw

WASHINGTON — A proposal to impose a 5% excise tax on investment income of qualified pension funds and other tax-exempt organizations has resurfaced.

The House Ways and Means Committee and the Joint Committee on Taxation have latched onto the idea, listing it among 200-odd revenue-raising options to be considered in raising $19.3 billion for the fiscal 1988 federal budget. A recent Congressional Budget Office study suggested imposing such a tax on pension funds only (*Pensions & Investment Age*, June 1).

The option proposes imposing a 5% tax on net income, which is defined as gross investment income including dividends and interest plus net capital gain minus the expenses of earning the income. Unrealized gains would not be taxed under the proposal.

The excise tax is attractive because it would raise $3.5 billion during fiscal 1988 and $15.1 billion during the next three years.

But placing a tax on this income could have an enormous effect on investment decisions, as pension fund money managers move away from interest and dividend-producing investments toward equities without dividends, which present a higher risk, several observers said.

"We're talking about a massive base of assets, and the extent to which this could influence investments is a serious question that I don't think has been answered," said Harold Dankner, a partner at Coopers & Lybrand, Washington.

Other key options affecting retirement plans provided by the joint tax committee include tightening maximum funding rules for pension funds and effectively repealing the use of leveraged employee stock ownership plans, as well as imposing several other restrictions on ESOPs (*see related story, page 2*).

Notably absent from the list of revenue-raising options is the repeal of 401(k) salary reduction plans, which would have generated $21.8 billion between fiscal 1988 and 1991, said Gerald L. Uslander, a principal in the Louisville, Ky., office of William M. Mercer-Meidinger-Hansen Inc.

This possibility, as well as a proposed freeze on maximum contributions to defined benefit and defined contribution plans, had been on a preliminary version of the list prepared by the joint taxation committee in lat

# U.S. bank subsidiary gets Japanese funds

**By Marlene Givant**

TOKYO — Japan Bankers Trust Co. has been awarded $14 million of Japan's $380 billion welfare pension plan funds — the Japanese equivalent of Social Security — making it the first foreign trust bank to make a splash in that enormous pool of assets.

It also gives Japan Bankers Trust an edge over some 24 foreign managers in Tokyo trying to break into Japan's institutional and investment trust market.

Japan Bankers, a wholly owned trust banking arm of Bankers Trust New York Corp., joins eight Japanese trust banks selected last year to manage part of the welfare pension plan assets, which previously had been managed by the Ministry of Finance.

The nine trust banks have received $3.4 billion total this year.

Japan Bankers Trust's account will be invested within the asset allocation guidelines set by the Ministry of Finance with an emphasis on equity and international investments. The assets may be invested in Euroyen bonds, but only 30% may be in non-yen investments.

Japan Bankers Trust plans to invest in specialty areas in which it has expertise, such as index funds and futures and options, according to Dennis H. Ferro, president of Japan Bankers Trust.

Bankers Trust Co., New York — the principal subsidiary of Bankers Trust New York Corp. — was one of nine foreign banks selected by the Ministry of Finance in June 1985 to set up a trust bank subsidiary in Japan. Japan Bankers Trust, which was established in October 1985, reported $2.2 billion under management as of March 31. ■

## Corrections & clarifications

• In a June 15 article on Alan Greenspan's appointment to the Federal Reserve Board, a reference by **John Conlin**, marketing director of **SBC Portfolio Management International Inc.**, New York, to high Japanese earnings multiples should have said multiples exceed 200 times earnings in such companies as Nippon Telephone & Telegraph.

• **Wells Fargo Investment Advisors**, San Francisco, was omitted inadvertently from the June 29 Directory of the 50 Largest International Managers. With $647 million in international equities under management as of March 31, Wells Fargo would have been 24th among managers ranked by tax-exempt assets in international and global accounts, and 18th among managers ranked only by international accounts.

Assets under management by the firm as of March 31 totaled $67.2 billion, of which $66.9 billion were tax-exempt.

All international equities are indexed to the Morgan Stanley Capital International Europe Australia Far East stock index, but other investment strategies are available.

Fred Grauer, president, is chief investment officer. Bob Haber, client service coordinator, is client contact.

• **Beutel, Goodman International PLC, London,** was omitted inadvertently from the June 29 listing of the 50 largest international and global money managers. Reporting $213 million in foreign investments for U.S. institutional tax-exempt clients as of March 31, the firm would have ranked 44th.

Of that total, $202 million was invested in global bonds, with the remainder in cash. The firm would have ranked 10th in the chart of managers ranked by tax-exempt assets in global accounts.

Chief investment officers are Olaf Rogge and Peter Mellor, principals. The client contact is Daniel Freelund, Fairfield Capital Associates, Westport, Conn.; (203) 254-1215.

The investment consultants directory will be published Nov. 16.

## Foreign currency warrants blast off

By Brad Rudin

NEW YORK — A flurry of deals inspired by Bear, Stearns & Co. Inc.'s currency exchange warrants hit the market last month as issuers seized the opportunity to achieve all-in-cost savings that exceeded 20 basis points.

Among the issuers were General Electric Credit Corp., Stamford, Conn.; Ford Motor Credit Co., Dearborn, Mich.; Emerson Electric Co., St. Louis; Citicorp, New York; and the Student Loan Marketing Association, Washington. More deals — by General Mills Inc., Minneapolis, and Xerox Credit Corp., Stamford, Conn. — are in the works.

"They appear to be the hottest thing on the block," said Lisa K. Polsky, a Citicorp Investment Bank vice president who heads the options and new products department.

Citicorp arranged the currency hedge in several of last month's foreign currency warrant deals.

In these deals, issuers sell warrants that will be valueless unless the dollar appreciates against the yen or the deutsche mark during the five-year life of the warrant. A hedged position protects the issuer from currency risk.

Issuers offer notes and warrants simultaneously, but not as a unit.

The warrants, which are being traded on the American Stock Exchange, are regulated by the Securities and Exchange Commission.

Combining the net proceeds of the warrants and the notes produces a lower all-in-cost of borrowing, said a Bear, Stearns official who asked to remain unidentified.

Yet the cost of hedging against currency risk combined with the legal and investment banking fees for this new product results in "significant costs all the way around — this is not found money," the Bear, Stearns official said.

"There's obviously a little bit of learning that has to take place when somebody does the first one," said Robert G. Scott, a managing director at Morgan Stanley & Co. Inc. "But once they're over that hump, the costs will decrease a little bit."

Artur Walther, partner in charge of capital markets at Goldman, Sachs & Co., predicted the product would survive its infancy.

"It probably will slow down a little because there have been quite a number of issues, but I think we'll continuously see transactions in the future," he said.

Bear, Stearns started the ball rolling June 10 with a notes and yen-linked warrants issue for General Electric Credit. According to a Bear, Stearns statement, it was the first time this type of foreign currency warrant was sold in the United States.

The firm followed through June 18 with an offering of yen-linked currency exchange warrants for Ford Motor Credit and June 24 with a deutsche mark-linked warrants issue for General Electric Credit that was co-managed by Kidder, Peabody & Co. The next day Emerson Electric made its offering of notes and deutsche mark-linked warrants in a deal managed by Bear, Stearns and co-managed by Prudential-Bache Capital Funding.

By the end of June, Morgan Stanley, Goldman and Salomon Brothers Inc. had completed or planned similar deals for Citicorp, Sallie Mae, Xerox Credit and General Mills.

Issuers hedge their positions by buying over-the-counter options from a money center bank. The option gives the holder the right to buy or sell a stated amount of foreign currency for a previously established price until the option expires. The issuer sells the warrants at a spread over the purchase price of the option.

By purchasing the option, the issuer acquires the right to sell foreign currency in exchange for dollars — a move that covers the issuer's obligation to pay the warrant holders.

In the June 10 General Electric Credit deal, the warrant holders get paid only if the dollar reaches a value of more than 149.70 yen before June 15, 1992. As the dollar appreciates, the cash settlement value of the warrants increases. The dollar has been trading re-

## Underwriting volume up 7%

By Mercl Baker

NEW YORK — First-half domestic underwriting volume climbed 7% from that generated during the first half of 1986, with Salomon Brothers Inc. continuing to lead underwriters with 15.4% of the total raised by issuers.

The six-month numbers were dampened by a dropoff in domestic underwriting activity in the second quarter when an increase in interest rates and jittery bond prices sidelined issuers of new securities.

Corporations raised $153.9 billion during the first six months of the year, compared with $143.8 billion in the comparable period last year, according to IDD Information Services, New York.

Most came in the first quarter when $87.7 billion in new securities offerings came to market. Second-quarter volume fell almost a third to $66.2 billion.

Despite the shaky interest rate environment, U.S. issuers, more than ever, preferred to raise funds at home. These issuers raised $183.3 billion worldwide during the first half, down slightly from the $185.8 billion raised worldwide in the same period last year, IDD reported. But only $12.5 billion constituted offerings issued overseas — a 43.4% drop from the $22.1 billion raised overseas by U.S. issuers in the first half of 1986.

Domestically, Salomon Brothers garnered the greatest market share for overall underwriting volume, although other firms continue to chip at its lead.

Salomon acted as lead manager on $23.7 billion of total domestic underwritings, for a 15.4% market share. First Boston Corp., the closest competitor managed $20.3 billion for a 13.2% share. For the same period last year, Salomon was credited with 20% of domestic underwriting volume and First Boston, 14%.

Merrill Lynch Capital Markets Inc. moved to third from sixth place for the first-half rankings. It held the lead manager role on $13.8 billion of total volume, for a 12.2% market share. Goldman, Sachs & Co. followed with $17 billion or 11.1% according to IDD. Morgan Stanley & Co. Inc. was fifth, managing $10.1 billion or 10.5%.

Drexel Burnham Lambert Inc., which is battling stiffer competition in junk bond and merger financings amid investigations into its business operations, slipped to sixth for the first half from third for the 1986 period. The firm managed $11.3 billion to garner a 7.3% market share. For the 1986 period it managed $18 billion for a 12.3% market share.

Breakdowns of domestic underwriting numbers reveal only modest increases in tech-

# Volume up . . .

*Continued from page 17*

vidual market volumes almost across the board. One exception was in the mortgage-backed securities arena, where six-month volume shot up 130% from the 1986 period.

Mortgage-related offerings totaled $48.5 billion for the first half, compared with $21.1 billion for the 1986 period.

Much of that activity came in the first quarter, when volume reached $31.1 billion. The interest rate surge of the second quarter slowed issuing activity and volume shrank to $17.4 billion.

Salomon and First Boston, garnering 21.2% and 16.8% of first-half mortgage-related volume, continued to dominate that area, but by a much smaller margin. Salomon and First Boston were lead managers for 32.9% and 28.9%, respectively, of the total for the 1986 period.

Merrill Lynch placed third in the mortgage-related arena, garnering 14%. Its standing represented a five-percentage-point increase from the 1986 period. But it came at a high price — the firm reported a $250 million trading loss in mortgage securities in the second quarter.

Also increasing market share were Goldman and Kidder, Peabody & Co. Inc., which placed fourth and fifth for the first half. IDD credited 8.3% of total volume to Goldman, up from 2.3% for the same period in 1986. Kidder's market share climbed to 7.2% from 4.7%.

While the mortgage area witnessed a tumultuous first half, straight and convertible debt were more stable. Straight-debt volume climbed to $113 billion, up 6% from $106.8 billion raised domestically in the first half of 1986. Convertible debt issuance was up 12.7%, with issuers raising $8 billion vs. $7.1 billion.

Salomon and First Boston held their respective first- and second-place standings in straight-debt underwriting. Salomon captured 19.4% of the market, and First Boston, 15.5%. Following the two firms were Merrill Lynch, with a 12.9% market share; Morgan Stanley, with 11.3%; and Goldman, Sachs, with 10.6%.

An aggressive first half in convertible-debt underwritings won Smith Barney, Harris Upham & Co. Inc. the No. 1 spot in that market segment. The firm, which ranked 10th for the 1986 period, managed nine deals totaling $1.2 billion for a 15.1% market share. Goldman followed with 12.4% of the total, while Morgan Stanley placed third with 12%.

Drexel, which held the top spot for the comparable period last year, fell to fourth with a 9.8% market share. First Boston was fifth with 6.7% of the total.

Common stock volume, like that of the domestic debt markets, remained relatively stable in the first half. Volume totaled $25 billion, up only 7.3% from the $23.3 billion issued domestically in the first six months of 1986.

Goldman led underwriters in the common stock rankings, managing 13.1% of the total. Merrill and Shearson Lehman Brothers Inc. followed, with 11.7% and 9.3% respectively.

However, two regional firms — Alex. Brown & Sons Inc., Baltimore, and Wheat, First Securities Inc., Richmond, Va. — rose dramatically to take fourth and fifth place in the common stock rankings.

Alex. Brown, which ranked 12th in the first half of 1986, placed 24 stock offerings, including 14 initial public offerings, totaling $2.2 billion or 8.6% of total common equity volume.

Wheat, First Securities, which ranked 30th last year, achieved its 7.8% market share with two IPOs totaling just less than $2 billion. It was lead manager for the $850 million share offering for MFS Government Markets Income Trust and the $1.1 billion offering for MFS Multimarket Income Trust.

Among other first-half underwriting highlights:

- Salomon Brothers led in worldwide underwritings by U.S. issuers only, with 15.1% of the $163 billion raised. First Boston was second with 13%, followed by Merrill Lynch, 10.9%; Morgan Stanley, 10.3%; and Goldman, Sachs, 10.1%.
- Worldwide underwriting volume (excluding international equity offerings) by both U.S. and foreign issuers reached $258.3 billion for the six months, only slightly more than the $253.4 billion raised by all issuers during the period last year. Salomon and First Boston retained first and second, with respective market shares of 10.4% and 9.7%. Merrill Lynch moved into third place with 7.6%, and Morgan Stanley was fourth with 7.4%.
- Volume for IPOs increased 68.2% to $14.8 billion in the first half. IPO volume total $8.8 billion during the same period last year. Goldman, Sachs, with 14.5% of the IPO total, jumped to first place from 14th last year. The firm was lead manager in the $1.5 billion Consolidated Rail Corp. stock offering, launched at the end of March.

Ranking second was Merrill Lynch, with a 13.5% market share. Wheat, First and Alex. Brown climbed to third and fourth place, respectively, with 13.2% and 12.4%.

- Junk-bond volume declined 16% during the first half to $13.1 billion from the $15.6 billion raised during the same period last year. Drexel managed 41.6% of total volume, down from the 60.2% share it held for the 1986 period.
- Issuers raised almost $7.8 billion of preferred stock, up 17% from the $6.6 billion raised during the first half of 1986. Of the total, $4.6 billion represented straight preferred offerings and $3.1 billion, convertible preferred offerings.

Morgan Stanley led in the overall preferred category, with 16.1%. Merrill Lynch ranked second with 14.4% and Shearson Lehman, third with 11.5%.

- A breakdown by issuer type showed only financial companies increasing funds raised during the six months. These companies issued $88.5 billion of securities, up 41% from the $62.8 billion raised during the first half of last year. Financing volume from utilities tumbled the most, 44.4%, to $10.3 billion.

Volume among industrial and agency issuers declined 11.7% and 11.5%, respectively. Industrial financing ended the first half at $52.7 billion, compared with $59.7 billion in the 1986, and agencies raised $2.3 billion vs. $2.6 billion. ■

# Indexed . . .

*Continued from page 3*

of the stock index assets, tracked the Wilshire 5000, compared with $3.5 billion six months ago.

The remainder of the domestic stock side was made up of various enhanced and customized indexes, including the Russell 1000, the Russell 2000 and a South Africa-free index that attracted about $150 million is assets.

The Financial Accounting Standards Board Statement 87, which requires companies to report pension liabilities on the balance sheet, has enhanced the attractiveness of index funds, according to several money managers.

"FASB rules are going to offer passive money managers big opportunities to insure the surplus," said Luke Mazur, vice president in trust department of strategic investment services at The Northern Trust Co., Chicago.

"With FASB 87 there's a greater move to offset the (accumulated benefit obligation) and (projected benefit obligation) areas of their liabilities," said Brian Hersey, product manager at Aetna Life Insurance Co., Hartford, Conn.

Aetna Life reported $450 million in total indexed assets as of May 31.

Many money managers say FASB changes and minimal transaction fees particularly have boosted the popularity of fixed-income index funds.

Despite a 1% decline in the widely tracked Shearson Lehman Government/Corporate bond index for the six months ended May 31, assets in fixed-income index funds increased 48.5% to $43.73 billion from $29.45 billion during the period.

"Bond indexing is very attractive now, especially for public funds which are tired of paying higher fees for less-than-market performance," said Erich Weissenberger Jr., marketing director of Favia Hill & Associates, New York.

"We haven't had a real bear market in bonds in a long time," Mr. Weissenberger said. "The jury's still out as to whether managers will move more money into bond indexes when the bear market comes."

Favia Hill had $101 million in indexed assets May 31, all in fixed-income index funds.

The Shearson Lehman index remained bond index managers' most widely used benchmark, attracting more than $30 billion, up from $17.8 billion Nov. 30.

Approximately $9.3 billion in assets tracked the Salomon Brothers Broad Investment Grade bond index, up from $1.3 billion at the beginning of the period. The remaining fixed-income dollars were indexed to customized indexes.

Many money managers told *P&I Age* in late 1986 that international indexing would be an area of tremendous growth, especially since international managers have had trouble beating the Morgan Stanley Capital International Europe Australia Far East index. They've been on the right track.

Tax-exempt U.S. assets deposited in international index funds grew to $6.53 billion from $3.51 billion for the six-month period, a net gain of 42.3% after accounting for EAFE's 43.7% appreciation during the period.

Nearly $5.1 billion in U.S. tax-exempt assets tracked the EAFE, up from $3.2 billion Nov. 30.

Money managers cited several reasons they expect international indexing to grow.

One is pension executives considering a passive management approach generally are just discovering the advantages of using international indexing to diversify their assets.

Six months ago, only six managers offered international index funds. Today there are at least 13.

"International funds give managers the ability to hedge against the dollar," said Ed Robie managing director of Western Asset Management Co., Los Angeles. Western Asset reported managing $300 million in indexed assets, all in fixed-income funds.

International indexing — like other forms of indexing — also offers tremendous savings over active portfolios, said Harry Sterling, vice president of the State Street Bank & Trust.

State Street, which ranked as the nation's largest manager of international and global account assets in *P&I Age*'s June 29 directory of international managers, also leads managers of international index funds, with $3.86 billion — more than half of the total.

But while State Street dominates that area, a number of new players entered the international indexing game in 1987.

Bankers Trust Co., New York, and Manufacturers National Bank-Detroit have $300 million each in international index funds, after reporting none in Nov. 30.

Other investment management firms that reported none in November, are Alliance Capital Management Corp., New York, now with $250 million; Axe Core Investors, Tarrytown, N.Y., $125 million; American National Bank & Trust Co. of Chicago, $100 million; and Travelers Investment Management Co., Hartford, Conn., $52 million. ■

# $15 PBGC . . .

*Continued from page 8*

minimum funding standards and because of reduced transfers from the PBGC trust fund, according to a congressional staff member.

Citing these revenue figures, the subcommittee leaders requested the Joint Committee on Taxation be asked to re-examine them to ensure accuracy, and that the base premium and variable-rate component be modified if the costs are lower.

The oversight subcommittee also recommended employers sponsoring underfunded defined benefit plans be required to fund their plans more rapidly, and set forth a set of minimum funding standards along the lines of the administration's proposal.

"When terminating an underfunded pension plan, employers should be liable to their plan participants to the full extent of the plan's promised benefits, and to the PBGC for the full amount of the benefits guaranteed," according to the letter to Mr. Rostenkowski from Messrs. Pickle and Schultze.

Under the proposed minimum funding standards, there would no distress termination for companies in reorganization under Chapter 11 bankruptcy laws, and no access to reversions except after termination. The excise tax on the reversions would be doubled to 20% from 10%.

A company also would be able to recover assets from a terminated plan only if the employer's other defined benefit plans have assets of at least 125% of termination liability.

Although the reaction of PBGC Executive Director Kathleen P. Utgoff was favorable, industry representatives were less than pleased.

"The PBGC is very encouraged by the Ways and Means proposal because it is very similar to the administration's bill," Ms. Utgoff said in a statement. "Although it doesn't go as far as we had hoped, we feel these are steps in the right direction."

Mark J. Ugoretz, executive director of the ERISA Industry Committee, said if the Ways and Means proposal became law, "you'd see a wholesale retreat from defined benefit plans, because it's not that hard anymore to decide you won't pay the freight on this type of plan."

Mr. Ugoretz pointed out several important factors were left vague in the proposal, including the definition of termination liability and the interest rate assumed by the proposal.

"We are greatly distressed to see that the starting point would be $15," said Stuart J. Brahs, executive director of the Association of Private Pension and Welfare Plans. He said the APPWP's members continue to question the accuracy of the PBGC's estimate of its financial troubles and if that estimate justifies such an increase.

Also strongly opposed to the proposal are labor representatives, saying the faster funding requirements on existing liabilities are too harsh. The cost would be so high it could lead to a big loss of jobs or even put some companies under, said Alan Reuther, assistant general counsel of the United Auto Workers. ■

# Plan sells . . .

*Continued from page 1*

at 100⅛ each on shares originally valued at $100 each — completed the transactions (*Pensions & Investment Age*, June 29).

Numerous companies, especially in the metals industry, contributed employer securities in lieu of part or all of their pension contributions in the early 1980s, when they were pressed for cash.

So far, only one pension fund has taken a major loss on such a contribution. Wheeling-Pittsburgh Steel Corp.'s 1982 contribution of 753,488 shares of preferred stock to its pension fund — originally valued at $26.3 million — was roughly valued at $1 by an official at the Pension Benefit Guaranty Corp. earlier this year (*P&I Age*, March 9).

The PBGC had assumed control of the company's underfunded plans after Wheeling-Pitt had filed for reorganization under Chapter 11 of the federal Bankruptcy Code in 1985.

The Armco stock was sold for $37 million, or 26% less than its original valuation of $50 million. But inclusion of the $4.50 annual dividend would have provided the pension fund with an additional $18 million, more than offsetting the $13 million paper loss on the securities. Thus, the total value of the investment grew by a cumulative 10% during the four-year period, before considering reinvestment of the dividends.

Nevertheless, the fund's opportunity loss was substantial. In the four-year period ended June 30, the Standard & Poor's 500 has soared a cumulative 112.5%.

Officials at Armco did not respond to requests for comment on the fund's action.

As of Jan. 1, 1986, the most recent financial statements available, Armco had $1.51 billion in pension assets and $1.67 billion in accrued liabilities for vested and non-vested benefits.

The company has been restructuring its operations in recent years in the face of sizable losses. It reported net losses of $472 million in 1986, $476.9 million in 1984, $672.5 million in 1983 and $345.1 million in 1982.

In the first quarter of 1987, however, Armco reported net income of $52.5 million; it also showed a $44.8 million profit for 1985. Long-term debt as a percentage of total capitalization increased to 51.7% March 31, 1987, from 21.4% Jan. 1, 1982.

Analysts said it was opportune for the fund to sell the shares.

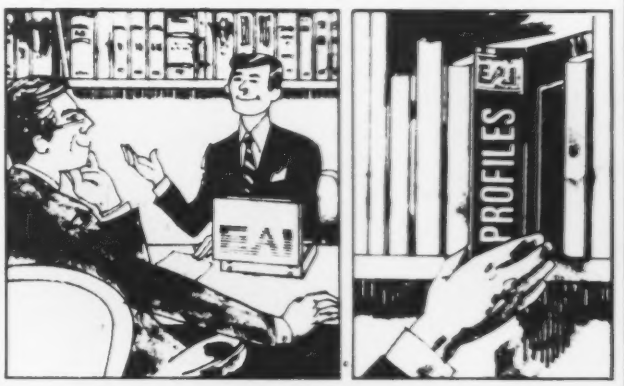
"We think they (the company) have made incredible progress in strengthening their financial position," said Charles Bradford, vice president at Merrill Lynch Capital Markets, New York. He said Armco now enjoys a high cash position and has dramatically improved its balance sheet.

The company's common stock has rebounded to the $10-per-share level, after being below $5 per share last year.

Each share of the preferred stock issue is convertible into 2.22 shares of common stock at any time. Armco can redeem the shares at any time, in whole or in part, for between $50 and $52.70 per share.

Steven Brooks, a senior analyst at Moody's Investors Service, New York, said the company is enjoying improved access to the market, in light of common stock and debt issued recently. That Armco's pension fund was able to sell the stock "speaks well for the company," he said. ■

The Next Best Thing To An EAI Consultant In Your Office...



...Is An EAI PROFILES On Your Shelf.

As a fund sponsor, you need precise, objective information on a large universe of money managers and the complex services they offer. Now the same, reliable information that EAI, leading consultant to fund sponsors, has developed is available to you in five separate PROFILES publications.

So, if you have funds invested in U.S. stocks and bonds, GICs, international capital markets, or real estate, look into PROFILES today and take advantage of the best investment management information available anywhere.

# Convertible investors fight losses

**By Marcia Parker**

Major investors in convertible securities are fed up with losing millions of dollars on conversion rights in some takeovers and restructurings, and are threatening to stay on the sidelines unless Wall Street underwriters provide them with adequate protection.

"What we're saying is, 'We're not going to take it anymore,' " said John Calamos, managing director, Noddings-Calamos Asset Management Inc., an Oak Brook, Ill., convertible manager with about $200 million in convertibles under management.

"There has to be some economic value associated with the conversion privilege. There have been some flagrant abuses over the years," he said.

About 20 players like Mr. Calamos want protection against takeovers in which the tendering stock price is less than the conversion price. They cited a dozen cases in which they have suffered, or could suffer, big losses, including:

- The acquisition in June of Grunthal Financial Corp. by Home Group Inc., both New York firms, in which the takeover price was $9.50 per share and the conversion price, $10 per share.
- The pending acquisition of Crazy Eddie Inc., the Edison, N.J., consumer-electronics firm facing buy-out bids from its chairman and Entertainment Marketing Inc., Houston, in which convertible holders stand to lose because the takeover prices are $7 and $8 per share respectively, and the conversion price, $23.125.

Some underwriters are quietly succeeding in getting corporate issuers to include protective clauses in the indentures of new convertible issues. A few recent issuers — such as Burlington Industries Inc., Greensboro, N.C., and Freuhauf Corp., Detroit — employed what many say will become standard: "freeze out" protection guaranteeing convertible investors a fair return on their investments.

Meantime, even as some remedies are being fashioned, the players are debating what the best protection is and who should pay for it. Some convertible investors don't think they should have to pay for the protection, while others aren't convinced the protection is worth the cost.

And in an odd twist, some corporate issuers are accepting the idea of protection as a mini-poison pill, although they don't like to admit it. The protective clauses act as a mild deterrent to raiders, boosting the cost of the takeover because they require the acquiring company to pay convertible holders up front in cash — and they also might have to give bondholders something more to boot.

The convertible managers actively pressing underwriters for protective clauses include Froley Revy Investment Co., Los Angeles, with $700 million in convertibles; Wellington Management Co./ Thorndike, Doran, Paine & Lewis, Boston, which manages $400 million in convertibles; Trust Co. of the West, Los Angeles, with $1.5 billion; and Noddings-Calamos.

They have been joined — although quietly — by executives of a few corporate pension funds that invest in convertibles, such as the $18.2 billion fund of IBM Corp., Stamford, Conn., and the $32.9 billion General Motors Corp. fund, New York.

In recent months, the money managers and corporate pension executives have told top convertible underwriters — Smith, Barney, Harris Upham & Co. Inc; Drexel Burnham Lambert Inc.; Goldman, Sachs & Co.; and Morgan Stanley & Co. — they want protective clauses in new issues.

The remedies range from a reset

# Twist on 10% rule aired

**By Chuck Paustian**

A proposal allowing overfunded defined benefit plans to invest more than 10% of assets in employer securities was rejected twice by the Department of Labor, but has stirred interest among pension experts.

The proposal, a new interpretation of part of the Employee Retirement Income Security Act, first was contained in a prohibited transaction exemption request from Thomson McKinnon Inc., New York. Hartmarx Corp., Chicago, subsequently used the proposal in a similar exemption request.

Both Thomson McKinnon, which filed its original application in August 1986, and Hartmarx, which filed its first request in December, were seeking the exemptions to establish pension floor offset arrangements.

Thomson McKinnon officials no longer are pursuing their exemption request, and have filed their intention to terminate the $36.8 million plan and recoup $9 million in surplus assets.

Executives of the Hartmarx plan continue to seek the exemption, but the application no longer contains the proposal to reinterpret the 10% rule (*see related story, page 45*).

Executives of the two companies asked Labor Department officials to reinterpret the portion of ERISA that deals with employer securities. They suggested investments in securities of the plan sponsor be based on the relationship of a plan's assets to its termination liabilities, with assets equal to 90% of the plan's termination liabilities invested in non-employer securities.

*Continued on page 45*

*David Walker says the 10% ERISA provision doesn't need reinterpreting.*

*John Erlenborn says the argument for revision is compelling and appealing.*

# N.Y. fund boosts real estate

**By John Covaleski**

NEW YORK — The approximately $36 billion New York State Common Retirement Fund will increase its equity real estate exposure to about 6% from 0.67%, by 1992 primarily through direct investments, said Robert J. Steves, the fund's new assistant deputy comptroller for real estate investments.

Based on its current size, the increased allocation would boost the fund's equity real estate investments to $2.16 billion from $133 million now invested (of $240 million allocated), making it one of the biggest real estate equity investors among U.S. pension funds and the third jumbo public fund to dramatically increase its target.

The $43 billion California Public Employees' Retirement System and the $23.5 billion California State Teachers' Retirement System, both in Sacramento, already have revealed plans to increase their real estate allocations to 10% each (*Pensions & Investment Age*, June 29).

The ultimate size of New York State Common's increase "depends on the market, but to the extent that our real estate portfolio can grow, it will grow," said Mr. Steves, who joined the state fund's New York City office in April from L.F. Rothschild Unterberg Towbin Inc., New York, where he was a senior vice president in municipal finance.

Under Mr. Steves, the state fund has made one new equity real estate investment, committing $25 million to TCW Land Fund I, a closed-end, commingled fund managed by TCW Realty Advisors, Los Angeles, for investment in undeveloped land (*see related story on page 37*).

Mr. Steves said the goal is to invest about 4% of total assets in direct real estate deals, mainly as sole investor. The remaining 2% is

*Continued on page 48*

# Pension expense drops 51%

By Sheryl L. Cohen

Implementation of FASB 87 helped slash aggregate pension expense of the Fortune 100 companies 51% in 1986, to $5.3 billion from $10.82 billion in 1985.

Only six of the 100 largest industrial and manufacturing companies (by sales) reported a higher pension expense in 1986 than in 1985, according to Wright Investors' Service, Bridgeport, Conn., which collected the information for *Pensions & Investment Age* from the companies' annual reports.

Financial Accounting Standards Board Statement 87 was cited for much of the dramatic decrease.

Under the accounting rule, when a corporation with an overfunded plan switches to Statement 87, any surplus is amortized over the remaining service years of the employees or 15 years, whichever is less.

Also under FASB 87, corporations are encouraged to use the Pension Benefit Guaranty Corp.'s interest rate assumption, which generally is tied to market rates and normally is higher than the more conservative actuarial assumptions used under the old accounting rule.

In addition, FASB 87 calls for use of the unit credit method for funding liabilities. This reduces pension fund expense, lowering cost in the early years, while raising it later.

Although FASB 87 is credited with the decline in reported pension expense, it is not the first nor the exclusive method used by corporations desiring to issue lower pension expense figures. According to William H.S. Preece Jr., director-corporate finance at Kraft Inc., Northbrook, Ill., corporations conceivably could have dropped their pension expense prior to FASB 87, using a number of different "tricks."

But FASB 87 "forces everybody into a lower expense," he said.

Although some corporations did not implement FASB 87 as part of the 1986 annual report information, compliance was mandated by Dec. 15, 1986.

Excluding the 14 firms moving to a pension income status from a pension expense, Sun Co. Inc., Radnor, Pa. showed the largest decline. The company reported a 96.4% decrease in pension expense, dropping to $3 million in 1986 from $83 million a year earlier.

Richard L. Veith, manager-benefit plans investments, said the FASB accounting rule served as the external factor that transformed the overfunded plan from an expense to a near-credit in 1986.

In addition, Mr. Veith cited the good health of the company and pension plan as an additional reason for the drop.

Although not as dramatic, Mr. Veith said 1987 should bring another drop in pension expense — or even a reversal to a credit.

Our position would be even greater — but not markedly," he said.

Philip Morris Inc., New York, showed a 93% drop in pension expense, second to Sun. The company's expense fell to $7 million from $100 million in 1985. According to a spokeswoman for the corporation, the primary reason was a change in assumption rate.

"I think it is connected to FASB," said Mary Lee Caliman, manager-financial services. "We decided to change the assumption rate for funding as well. Now we're fully funded."

Chevron Corp., San Francisco, Calif., also cited FASB 87, this time as the impetus for its transformation to a company with pension income. Between 1985 and 1986, pension expense declined $187 million, leaving Chevron with an income of $6 million, according to R.G. Williamson, assistant controller.

Like Chevron, International Paper Co., New York, also moved from an expense to pension income. In 1986, the corporation reported an income of $38 million, compared with the 1985 expense of $4 million.

"FASB 87 gave us a big pension income. It is certainly the bulk of the impact," said Myra Drucker, director-pension investments.

The largest jump in expense belonged to Shell Oil Co., Houston, which reported an expense of $38 million in 1986, up 58.3% from $24 million in 1985. Controller Mike Sullivan attributed the in-

*Sandy Lincoln of Mercer-Meidinger-Hansen says yield managers lead the pack.*

# Yield style on a roll in market

By Marlene Givant

NEW YORK — Yield managers — historically high performers in neutral or down periods — have turned out surprisingly strong returns this bull market.

"I think it's fair to say this is about as long a run for one style that we have seen in market history. Year by year over the past five years, the high-yield group has done better than managers using small-cap, low-yield stocks," said Sandy Lincoln, managing director in the Deerfield, Ill., office of William M. Mercer-Meidinger-Hansen Inc.

And those returns have pleased pension fund clients.

"It was not a conscious decision to employ a 'yield manager,' " Vernon Strickland, director of the $1.9 billion Louisiana Employees Retirement System, Baton Rouge, said of the firm's hiring Duff & Phelps Investment Management Co. almost two years ago. "The board thought more managers with more management styles would be the appropriate thing to do."

Chicago-based Duff & Phelps, which manages a balanced account for the system, emphasizes low price-earnings, high dividend income and above-average return on equity.

"Their returns were quite respectable. We're satisfied customers," he said, adding returns have beaten the market

*Continued on page 44*

# $200 'exit charge' proposed

## House panel seeks new per-participant termination fee

By Nicky Robertshaw

WASHINGTON — Employers that terminate a defined benefit pension plan during the next three years would have to pay an exit charge of $200 per participant to the PBGC under a proposal by a House subcommittee.

The premium, which would be required for plans terminating on or after July 1, 1987, would apply whether a plan is underfunded or overfunded. Plans terminating after 1990 would pay exit costs that would be calculated as a portion of the Pension Benefit Guaranty Corp. debt at the time.

The exit charge was coupled with a flat-rate PBGC premium of $19 per participant per year, up from the current $8.50 premium.

The subcommittee proposal also would dramatically accelerate amortization of actuarial gains and losses to five years from the current 15 years. This provision could cause a dramatic increase in pension contributions when markets plunge.

The House Education and Labor Committee Subcommittee on Labor-Management Relations approved the proposal, as well as a surprise portability amendment, on July 23. Full committee consideration is expected this week.

The subcommittee's action came a day after the House Ways and Means Committee approved an alternative minimum funding measure that includes a variable-rate PBGC premium. That committee slightly altered a proposal from one of its subcommittees, lowering the base premium under the variable-rate plan to $14 per participant per year from $15; it retained a $50 premium cap (*Pensions & Investment Age*, July 13).

It also changed the asset threshold after which the funding charge is required to 100% of vested benefits rather than 110%.

Under the Education and Labor subcommittee's proposal, an employer would have to pay the larger of current funding requirements law or an amount sufficient to cover plan benefit payments plus interest on the plan's unfunded vested liabilities, subject to a complex cap.

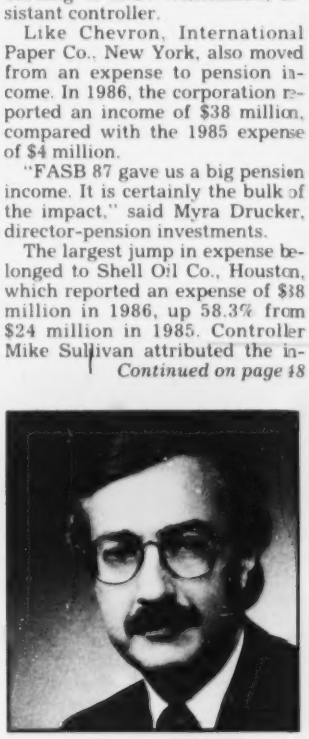
Both panels' proposals are moving ahead as part of the federal budget reconciliation. The House Ways and Means Committee, in its quest to raise $65 billion in revenue in the next three years, wants $500 million to $100 million for fiscal 1988 to come from the pensions area.

The exit-fee proposal once again puts management and labor on opposite sides of the fence.

From the employers' perspective, the $200-per-participant exit fee proposal is expensive and would generate more money than the PBGC needs, said Stuart J. Brahs, executive director of the Association of Private Pension and Welfare Plans, Washington.

"Clearly you have got to provide some incentive to keep employers in the system," Mr. Brahs said, pointing to the group's concern that changes in the law could make it difficult, if not impossible, for employers to stay within the defined benefit system.

But Alan Reuther, associate general counsel for the United Auto Workers, said the exit charge is preferable to the Ways and Means proposal, which labor sees as hitting hardest those companies that can least afford more stringent premiums and funding requirements.



*Stuart J. Brahs said the exit fee would generate more money than the PBGC needs.*

While conceding the termination funding charge portion of the proposal has "conceptual merit," David Walker, deputy assistant secretary of labor, said the administration strongly opposes the proposal.

"We will continue to support a

# Western advisers tap into $16 billion from Japanese

**By Joel Chernoff and Marlene Givant**

Non-Japanese money managers are acting as advisers on or running the investment of $16.84 billion in Japanese institutional and individual assets, according to a survey by *Pensions & Investment Age*.

Unlike some manufacturers, U.S. money managers have obtained access to Japanese markets, even though they usually must establish ties with Japanese firms to pull in clients.

Largely in the past 18 months, non-Japanese managers — led by U.S. and European firms — have started to make significant inroads into the Japanese investment market as investors there increasingly are looking to foreign markets to invest their burgeoning capital and the Japanese government is loosening restrictions on investment (*see related story, page 4*).

Accounts garnered by "gaijin" — foreign — firms are invested in local and overseas markets; geographic breakouts are not available. But the Japanese clearly are looking to other markets to absorb their surpluses. Last year, Japan's current account surplus exceeded $85 billion and this year's surplus is expected to be near $75 billion, according to Salomon Brothers Inc., New York.

There is no question the amount of Japanese assets becoming available to foreign managers is huge. The growing "tokkin" — Japanese corporate liquidity reserves — represented some $93 billion at the end of April, according to Daiwa Securities Co. Ltd., Tokyo. Unit trust assets — the equivalent of mutual funds — stood at $160 billion, and the fund trust market, comprising other institutional and corporate assets, was $73 billion as of March 31, said George Curuby, Curuby & Co., a Tokyo-based consultant.

Meanwhile, the Japanese private and public pension market — valued around $310 billion, according to InterSec Research Corp., Stamford, Conn. — is the fastest growing in the world

"Obviously, pension money is what all foreigners are waiting to get their hands on," said Jonathan Taylor, marketing director of Baring International Investment Ltd., London. Now, only trust banks, Daiwa Bank and insurance companies can manage Japanese pension assets.

The vast amounts of surplus assets generated through foreign trade, the yen's high value and lower volatility and price-earnings ratios in the U.S. market have caused the Japanese to invest in the United States. In addition, a need to become competitive internationally in the investment area and to provide better long-term rates of return have resulted in an intense drive by the Japanese to both learn the state-of-the-art investment technology and invest abroad, observers say.

Some argue Japan's Ministry of Finance — by loosening restrictions on how much Japanese institutions can invest abroad and opening the market to foreign trust banks and investment advisers — has created a "national mission" of learning the investment management business.

"It's an economy that's shifted from MITI to MoF," said Anne Cabot, manager of marketing for Sanyo Securities Co. Ltd., Tokyo, referring to the ministry's growing importance compared with the Ministry of International Trade & Industry.

Efforts to pierce the Japanese market, as well as to invest on behalf of domestic clients, have led to a variety of joint ventures by U.S. and European money managers with Japanese firms, as well as establishment of Japanese subsidiaries and offices.

The biggest and best-known of the investment managers have picked up Japanese business. Topping the list are three of the nine foreign banks with Japanese trust subsidiaries: Bankers Trust Co., with $2.65 billion in Japanese assets under management; Chemical Bank, with $1.5 billion; and J.P. Morgan Co., $1 billion. All are based in New York.

Of the non-trust managers, Morgan Grenfell Asset Management Ltd., London, led the pack with $750 million; Mercury Asset Management, $678 million; T.T. Capital Management Ltd., London, $600 million; CIGNA Asset Advisers Inc., Hartford, Conn., $525 million; and Hill Samuel Group PLC, London, had $520 million.

Some $16.84 billion is run either directly by the firms or through a joint venture with a Japanese firm, which may provide marketing, research or distribution.

In addition, non-Japanese managers run a portion of some $2.28 billion in funds that have multiple managers, including Japanese firms, and where breakouts of each firm's assets under management were not available (*see accompanying table*).

The tables, however, do not include mutual funds that are sold worldwide. Merrill Lynch & Co., New York, for example, manages hundreds of millions of dollars in mutual funds with significant Japanese investment, according to Richard Reller, vice president of Merrill Lynch Asset Management Inc., Princeton, N.J.

Many of the joint ventures have been directed toward individual investors in Japan, but now products are appearing for institutional investors as well.

- Batterymarch Financial Management, Boston, has two joint ventures with Japanese firms: a $60 million-plus mutual fund investing in U.S. stocks set up last year with Yamaichi Securities Co. Ltd., Tokyo, and a $250 million conservatively managed mutual fund with Taiyo Investment Trust and Management Co., Tokyo.
- Wells Fargo Investment Advisors, San Francisco, advises on a stock index fund based on the Standard & Poor's 500 and marketed to individual Japanese investors by Nikko Securities Co. Ltd., Tokyo. Within the past six months, it has pulled in about $300 million, said Jeff Skelton, executive vice president with Wells.
- U.S. firms are handling the U.S. portion of global funds marketed in Japan. The Putnam Cos., Boston, run the $28 million U.S. portion of a $294 million global fund with six different investment options, said Stanford Brainerd, senior executive vice president at Yamaichi International America Inc., New York.
- Aimed at the Japanese institutional market, nine foreign trust banks are operating subsidiaries in Japan, often in joint ventures with Japanese partners.

For example, Morgan Trust Bank, Tokyo, is responsible for $1 billion in Japanese institutional assets. J.P. Morgan Investment Management Inc.'s New York and London offices invest 70% of the assets in foreign markets; the remainder is invested in local markets by the Tokyo office, said George E. Austin, managing director of the New

# Divestiture ruling disappoints execs at Baltimore fund

**By Trudy Ring**

BALTIMORE — The Baltimore Employees' Retirement Systems almost certainly will appeal a court decision upholding the city's South Africa divestiture ordinance, said Ernest J. Glinka, retirement systems administrator.

Judge Martin B. Greenfeld ruled July 17 in Baltimore Circuit Court the ordinance is constitutional. The ordinance requires the three systems to divest themselves of securities in all companies doing business in South Africa.

The $1.2 billion systems have about $400 million in these securities. The ordinance called on the fund to begin divestiture last Jan. 1 and complete it within two years. During litigation, the fund has used suspension provisions of the ordinance to avoid divestiture.

Pension fund officials argued the ordinance conflicted with the interstate and foreign commerce clauses of the U.S. Constitution, conflicted with the foreign affairs power of the federal government, was pre-empted by federal law regarding South Africa and impaired contracts existing between the systems and their participants and beneficiaries.

Judge Greenfeld ruled these claims were without merit. Among his findings were:

- The city, like a private investor, can decide with what companies to deal without impinging on the interstate commerce clause.
- The ordinance's influence on foreign commerce cannot be characterized as more pervasive than other measures, such as franchise taxes, upheld by other courts.
- The federal government's power to conduct foreign affairs does not mean a state or local government may not establish moral guidelines when investing its own funds for proprietary purposes.
- If Congress had intended to invalidate state and local divestiture laws when it approved economic sanctions against South Africa, the sanctions legislation likely would have contained express language to that effect.
- The projected effect of divestiture upon investment return is so small it could not impair contracts for promised benefits the retirement systems have made with their members.

The retirement systems' trustees were meeting late last week to discuss appealing the ruling to Maryland Appellate Court, Mr. Glinka said. He said he was "99.9% certain" they would appeal it. ■

## Corrections & clarifications

- An article on foreign assets under management by the **50 largest international money managers** in the June 29 issue incorrectly stated the total. The correct number is $45.809 billion.
- A story on the **Government National Mortgage Association**'s troubled mobile home portfolio in the July 13 issue incorrectly identified the underwriters for General Electric Credit Corp.'s $59 million issue of mobile home loan-backed securities. Kidder Peabody & Co. was sole underwriter.
- The Current Accounts section of the July 13 issue of *Pensions & Investment Age* incorrectly identified the manager of a balanced account for the Chicago Sun-Times. The correct manager is **Investment Advisers Inc.**, Minneapolis.
- **Wilshire Asset Management**, Santa Monica, Calif., was omitted inadvertently from *Pensions & Investment Age*'s July 13 ranking of top index fund managers. Wilshire is the nation's 12th largest index fund manager, with $2.8 billion in tax-exempt assets as of May 31, all in domestic equity index funds.

**When investing in foreign countries, you need a secret agent.**

An agent who knows the ins and outs of foreign financial centers. And who knows how to accomplish your global custody aims; quietly, swiftly, surely.

A secret agent called The Mitsubishi Bank of California. As part of the world's fourth largest bank, with assets in excess of $210 billion, we get the job done for your trust/custodial accounts handling security settlements and transfers, foreign exchange, income collection, and tax reclamations, without calling attention to ourselves or what's being accomplished for you.

And, Mitsubishi Bank brings you two additional security measures as well. There are no double agents. Your clients remain your clients. And, Mitsubishi Bank headquarters are in Los Angeles; the most advantageous time zone for seizing European and Pacific basin opportunities within a single business day.

How secret is Mitsubishi Bank? It ranks third, behind Chase and State Street, in global custody assignments. And how many people know that?

Call Gearey Johnstone at (213) 621-1305 for more information on how many ways your global custody needs can be met by having a secret agent. And how many ways your institution can profit from having the surveillance and protection of secret service.

The best kept secret in global custody.

# Assets increase 65% for top 100 advisers

By Sheryl L. Cohen

Assets under management by the 100 largest investment institutions grew 65.5% to about $3.066 trillion from $1.852 trillion in the 21 months ended Dec. 31, a *Pensions & Investment Age* survey shows.

A complete listing of the 100 institutions and their subsidiaries begins on page 49.

The 10 firms with the most assets under management as of Dec. 31 represented 31.58% of the total, with $968.346 billion, whereas the top 10 as of March 31, 1985, represented 32.3% of the total, with $598.742 billion.

Insurance companies were most represented in the top 10 in both surveys. Prudential Insurance Co. of America, Newark, N.J., was first in both surveys. The company and its subsidiaries grew to $177.466 billion from $86.368 billion.

The 105.5% increase is due to a number of events, including the bull market and the establishment of three subsidiaries, said Susan O'Brien, manager of marketing at Prudential.

American Express Corp., New York, was second on this year's list, moving up from fifth. American Express reported $140.021 billion assets under management.

New to *P&I Age*'s top 10 are Wells Fargo & Co., San Francisco, and FMR Corp., Boston.

Wells Fargo made the largest leap on the chart, to eighth place from 26th. Assets under management grew to $63.783 billion from $22.433 billion.

The increased popularity of indexing and the acquisition last year of Crocker National Bank contributed to the bank holding company's growth, said Dave Demarest, vice president.

FMR, which includes Fidelity mutual funds, ranked seventh, up from 15th. Assets under management grew to $65.12 billion from $29.83 billion. According to Roy Lyons, senior communications specialist, the growth is based on several things, including the stronger securities market, an expanded asset base, growing brokerage revenue and strong sales of low-load funds.

Investment managers held 34 of the 100 positions in this year's survey, the greatest number of the five sectors included. They represented 37.1% of the total with $1.138 trillion. Although the 16 insurance companies ranked third in number, they had the second highest percentage of assets under management, 25.28%. They collectively held $775.226 billion.

Banks and trust companies, which numbered 30, held $725.898 billion assets under management, representing 23.67%. The seven corporate funds included in the survey captured 4.92% of the total with $151.12 billion assets under management, while 13 state and local government funds reported $264.259 billion, 8.61% of the total.

No internally managed pension fund made the top 10, but California Public Employees' Retirement System, Sacramento, was the highest-ranked one, moving to 20 from 21 in 1985. The fund reported $40.72 billion under management.

Three banks reported a decline in assets under management. The largest drop, $3.99 billion, was reported by First Interstate Bancorp, Los Angeles, and the smallest, $521 million, by Harris Bankcorp, Chicago. First Chicago Corp. reported $13.6 billion as of Dec. 31, down $3.69 billion from $17.29 as of March 31, 1985.

On the other hand, Aetna Life & Casualty Co., Hartford, Conn., increased its total assets under management to $104.556 billion, from $76.971 billion, a 35.83% increase.

The jump, which pushed Aetna up a notch to third place, is attributed to a "remarkable" growth in sales, according to Barbara Aurell, manager-employee benefits division.

High returns on mutual funds and the attractiveness of stocks and bonds have led to the dramatic growth of Franklin Funds, San Francisco, according to Edward McVey, vice president-national sales manager. Franklin jumped to 31 from 81. Assets under management increased to $32.24 billion from $8.23 billion. ■

# Corporate credit improves in 2nd quarter

By Brad Rudin

NEW YORK — Corporate credit ratings improved during the second quarter, the result of the weak dollar, a slackening in the pace of corporate restructurings and improved productivity.

Downgrades as a percentage of total rating actions dropped at three of the five national rating agencies.

Downgrades accounted for 55% of Standard & Poor's Corp.'s second-quarter rating actions vs. 74% of the New York-based agency's first-quarter decisions; at Moody's Investors Service, New York, downgrades were made in 60% of their second-quarter actions, down from 66% in the first quarter; and at Fitch Investors Service Inc., New York, downgrades accounted for 54% of the second-quarter actions vs. 71% in the first quarter.

But at Duff & Phelps Inc., Chicago, downgrades rose to 63% vs. 60%; and at McCarthy, Crisanti & Maffei Inc., New York, they rose to 83% from 53%.

The dollar amount of upgraded debt underscored improvement in corporate credit quality. Second-quarter upgrades at Moody's affected $49 billion of corporate debt while downgrades affected $41 billion of these obligations. Moody's reported the dollar amount upgraded by the agency exceeded the amount downgraded for the first time since the second quarter of 1986.

In the first quarter of 1987, $9 billion of debt rated by Moody's was affected by upgrades while $61 billion was affected by downgrades.

Moody's cited the Ford Motor Co., Dearborn, Mich., as a major rating change of the second quarter, noting in a statement the higher rating for some $25 billion of company debt resulted from "productivity improvements and continuing ability to generate cash."

It also mentioned the higher rating given to Unisys Corp., Detroit, which affected $3.8 billion of outstanding debt. Unisys' higher rating reflected the company's "accelerated progress in consolidating Burroughs and Sperry."

Preliminary second-quarter figures offered by Standard & Poor's show that agency raised the ratings on $31 billion of debt, close to the $38 billion affected by downgrades. "That is an improvement from the first quarter, when $12 billion of upgraded debt was overwhelmed by $63 billion downgraded," according to an article in Standard & Poor's Credit Week.

The improved ratio of downgrades to upgrades also was cited in Credit Week, which put S&P's second-quarter ratio at 1.22-to-1. That ratio of downgrades to upgrades is the most favorable since the fourth quarter of 1984. In the first quarter of 1987, the ratio stood at 2.82-to-1.

The weakened dollar should receive credit for the improved ratings, said Neal M. Soss, chief economist at First Boston Corp., New York. U.S. companies involved in world trade have benefited from the more expensive imports and cheaper exports created by the devalued dollar, he said.

"You can see it in their orders, their employment patterns, their profits and now you can see it in their ratings," Mr. Soss said. "I think that will persist, not in the sense that the dollar will get even cheaper, but (in the sense that) the cheaper dollar has benefits still to confer in the future."

S&P, in its Credit Week summary of the second-quarter rating changes, commented on the improvement in the industrial sector, noting downgrades in that sector ran four times upgrades in 1986 and the first quarter of 1987 while in the second quarter, the 33 upgrades came close to the 34 downgrades.

Rising stock prices largely are responsible for the improvement of credit quality because the bull market makes it more expensive for raiders to make acquisitions, said Byron Klapper, a senior vice president at Standard & Poor's. Mergers and acquisitions have been a leading cause of credit quality deterioration.

Loan loss reserves established by money center banks to protect themselves from default by Latin American debtors also have contributed to the stabilization of credit ratings, Mr. Klapper said.

S&P is optimistic about the future of credit quality, he said. "We see the trend continuing favorably through the year."

Moody's, however, offered a less sanguine prediction about credit quality. The improved second-quarter results are likely to be an aberration, Harold H. Goldberg, rating committee chairman, said in a statement. "Upgrades also outpaced downgrades during the second quarter of 1986, but we went on to finish the year with record declines in credit quality." ■

## Small firms will tap paper issuing pool

By Chuck Paustian

Three New Haven-based companies are among those expecting to obtain financing through a commercial paper issuing pool set up as an alternative capital source to conventional bank borrowing and industrial development bonds.

Kramer's of New Haven, Connecticut Chair Car Inc. and The Park Plaza Hotel all have applied for financing from the commercial paper pool, set up by American Development Finance Inc., Washington.

American Development Finance's commercial paper issuing pool is the latest attempt to provide smaller companies with low-cost financing via the commercial paper market.

The Cooperative Association of Tractor Dealers Inc., Chevy Chase, Md., already has a commercial paper pool for small borrowers under way, while Capital Funding Partners, Chicago, is setting one up (*Pensions & Investment Age*, Sept. 15).

The American Development Finance pool, called the Enterprise Capital Fund, was established to provide loans to small and medium-size corporations nationwide for projects sponsored by local economic development agencies.

In addition to requiring the sponsorship of an economic development agency, loans also must be backed by real estate and most will require a separate credit enhancement, such as a bank letter of credit.

Although the pool has yet to issue any commercial paper, the initial size of the program is set at $100 million, with Shearson Lehman Brothers Inc., New York, serving as dealer and financial adviser.

The commercial paper program is backed by a letter of credit from the New York branch of Banque Indosuez, the seventh largest bank in France. Based on the credit of the bank, the commercial paper should carry the highest ratings for commercial paper, according to Shearson Lehman and American Development Finance executives.

American Development Finance is a non-profit corporation formed under the guidance of the National Association of State Development Agencies.

"For our borrowers, we're cheaper than what's available through conventional means," including bank borrowings, said Ruth E. Goldberg, executive vice president and chief operating officer at American Development Finance. She added the process also is less complicated than tax-exempt financing, although not as cost effective.

American Development Finance estimates the total cost of its loans will be between 50 and 100 basis points more than the prime rate, compared with the 200 to 300 basis points above prime at which these companies normally borrow.

In addition, the Tax Reform Act of 1986 reduced the possibility of obtaining financing through the issuance of industrial development bonds. The law lowered the amount of the bonds issued in each state and restricted the use of the proceeds to manufacturing concerns.

"It's a very viable alternative for local businesses to obtain financing," said Lawrence Liebman, an attorney and president of Kramer's of New Haven, a women's apparel and furrier company, which hopes to obtain a $2 million loan, backed by a combined store and office building.

"It's very attractive for me," he said.

Mr. Liebman also said he doesn't think the program will give him any additional leverage in his commercial bank relationships. "You have to be a pretty good credit to get this," he said, adding the banks already were reflecting that credit quality in their lending rates.

Executives of Connecticut Chair Car and Park Plaza Hotel were unavailable for comment.

According to Sal Brancati, executive director of the New Haven Community Investment Corp., one of two development agencies sponsoring local loan applications, the financing from the commercial paper pool is very competitive with other capital sources.

"It's a very effective program," Mr. Brancati said. "We tried to find the flaw and in fact we couldn't find any."

Ms. Goldberg said borrowers will pay about 70 basis points above the cost of the commercial paper to cover various fees, including 50 basis points for Banque Indosuez; 12.5 basis points for Bankers Trust Co., New York, the program's trustee; and 5 basis points for American Development Finance's administrative costs.

Other payment options, such as one that offers some protection against interest rate volatility, are available, Ms. Goldberg said. The costs and risks of these schedules vary and are borne by the borrower.

She said the program will issue its first commercial paper sometime this month, once the first loan application receives final approval.

"All the hard parts, in terms of establishing the program, are done," she said. "The day we need the money, that's when we will sell the paper." ■

*Pitman Co., a distributor of the graphic arts supplies shown here, is consolidating collection and disbursement services at a saving of $2 million. As a result, the company will have to do less borrowing.*

## Pitman moving cash services to Continental Bank

By Barry B. Burr

SECAUCUS, N.J. — Pitman Co. expects to save almost $2 million by eliminating compensating balances and improving availability as it drops 12 banks and moves to a single bank for its collection and disbursement, according to Gerald R. Knueven, treasurer.

With the additional cash, the company will have to do less borrowing, he said.

"Now we have $1.9 million in tax-exempt (securities invested)," he added. "Last year we didn't have any investments; we were borrowing."

Pitman is moving its collection and disbursement, both for payroll and nonpayroll, to Continental Illinois National Bank & Trust Co., Chicago.

The company, a graphic arts and printing supplies distributor with $200 million in annual sales, also will move its cash concentration account to Continental.

Pitman's decentralized operations, with 13 branch distribution offices, strained its former system of decentralized cash management banks.

As a decentralized operation, he said, some regions would have excess cash while others would need to borrow. Because of "the communications and timing bureaucracy," the excess balances couldn't always be made available, so some regions would have to borrow on their lines of credit with their regional banks.

By centralizing its banking services, he said, Pitman easily can make any excess funds from one region available to another.

"We realized there were pockets of money" maintained as balances with the banks the company couldn't use, added John Cunningham, cash manager and inventory manager.

"Every bank required balances," ranging from $50,000 to $100,000.

Concentration and regular, or nonpayroll, disbursement accounts had been with First Jersey National Bank, Jersey City, N.J.; Trust Co. Bank, Atlanta; and Continental.

Pitman had 10 lockbox banks, including Continental and two other banks that also handled disbursements and concentration. Seven other banks handled lockbox collections only, including Wachovia Bank & Trust Co., Charlotte, N.C.; Norwest Bank, Minneapolis; United Missouri Bank, Kansas City, Mo.; First National Bank of Boston; Sun Bank, Tampa; Hamilton Bank, Philadelphia.

In addition, Pitman had three payroll disbursement accounts, all with small local banks that didn't have any lockbox accounts.

Of the $2 million available cash Pitman picked up since moving to Continental, he said $400,000 to $600,000 came from eliminating compensating balances, $500,000 from increased availability and about $1 million from more efficient movement of funds by eliminating the banks.

Besides dropping the banks for cash management services, he said Pitman ended all lines of credit with the banks.

He said the company is keeping only a $3.5 million line of credit with Continental, though it uses it little, if at all, since the new system has been put in place.

"They sold themselves out of some lending," he said of Continental. "But we will need it down the road" as the company grows.

Mr. Knueven said the changes, begun in January, were completed this month.

Pitman has a lockbox for each of its 13 branch offices, though some of the collection points are located in the same city and handled by the same bank. Continental's mail-intercept network provides 10 lockbox sites in or near the same cities the company had with its old system. The lockbox receipts, all processed daily in Chicago, are picked up at the sites by Continental's couriers four times daily, Mr. Knueven noted.

Even though the collections are centralized by one bank, Mr. Knueven said Continental maintains the decentralized lockbox receipt data for each of Pitman's branch offices, sending the information back daily.

He noted each branch is responsible for accounts receivable accounting and for collecting payments, including overseeing delinquent accounts and credit relations with customers.

**Definitions**

**Total pension liabilities:**
The actuarial present value of benefits promised to all past and present employees based on service already performed.

**Vested benefits:**
The present value of all benefits accrued by employees who have worked long enough with the company to have a legal right to the benefits.

**Fund assets:**
The market value of the assets that have been set aside to fund pension benefit payments.

**Vested funding status:**
Fund assets minus vested benefits. Overfunded plans have a positive status; plans with an unfunded vested liability have a negative status.

**Assumed rate of return:**
The weighted average interest rate the company's actuary uses in deriving the present value of total pension benefits.

**Net worth:**
The amount of equity available for stockholders as shown on the company's balance sheet.

**Adjusted operating income:**
Operating income plus pension expense.

**Operating income:**
Income derived from actual operations of the company.

**Pension expense:**
The amount charged against income to fund benefit payments in a given year.

**Corporate assets:**
The value of all corporate assets, as shown on the balance sheet.

**Vested funding status as a percentage of net worth:**
A comparison of the vested funding status, either positive or negative, to a company's net worth.

**Notes:**
A - Procter & Gamble has a profit-sharing plan and no defined benefit plan.
M - Pension statistics as percentages of either a negative net income or negative operating profit are meaningless.

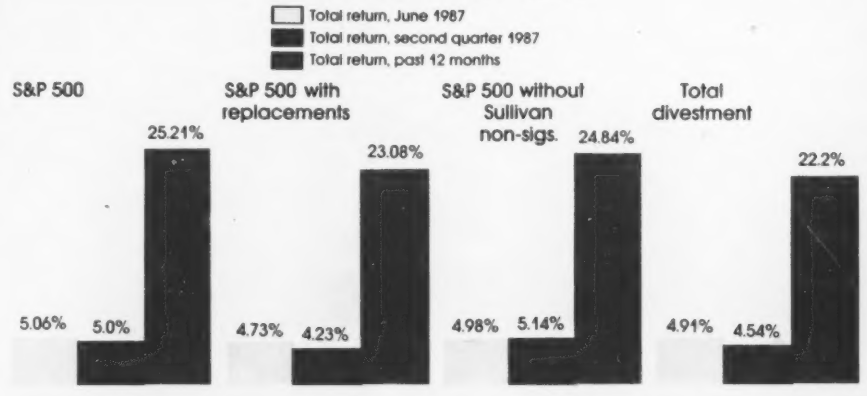
# Statistically speaking

The Statistically Speaking page offers an at-a-glance look at statistics for the latest quarter.

The Wilshire South Africa Free Index, Mercer-Meidinger bullet GIC data, First Chicago's MMI and the Russell 3000 returns will appear regularly.

Other data will be used as time and space allow.

## South Africa Free Index



Source: Wilshire Associates, Santa Monica, Calif.

**S&P 500 with replacements:** replaces a South Africa-related company with next largest company in the industry. **S&P 500 without Sullivan non-signatories:** excludes 20 companies, no replacements. **Total divestment:** eliminates all companies with South Africa involvement, no replacements.

## Multiple Markets Index

The Multiple Markets Index is a benchmark for total portfolio returns. It is composed of eight asset classes used by retirement plan executives; it is calibrated to reflect the same degree of risk of the typical pension portfolio; it uses passive fixed policy weights; and it represents the individual asset classes by the broadest and most complete market return data available.

| | Weights |
|---|---|
| Large cap stocks | 30% |
| Small cap stocks | 15 |
| International stocks | 10 |
| Venture capital | 5 |
| Domestic bonds | 15 |
| International $ bonds | 4 |
| Non-dollar bonds | 6 |
| Real estate (equity) | 15 |
| | 100% |

*Robert Steves, assistant deputy comptroller for real estate investments, wants the New York State Common Retirement Fund to be a leader in equity real estate investment.*

# N.Y. fund . . .

*Continued from page 1*

to be invested in commingled funds.

All of the fund's current equity real estate allocation is in commingled funds.

Mr. Steves said there are no immediate plans to alter the fund's 8.6% allocation to mortgages and its 8.6% allocation to mortgage-backed securities.

He said the new targets follow a recently completed investment policy review by the fund's staff. Fund officials said the money for the increased real estate allocation initially will come from cash flow, but, eventually, the higher real estate allocation likely will lead to changes in the allocation to other asset classes.

The board of trustees is expected to approve the revised policy in September, he added. The manager screening process is scheduled to begin in August, and manager changes might come as early as October, he said.

State Comptroller Edward V. Regan "said to me the other day, 'The reason you're here is because real estate needs to be focused on more as a separate asset class.' (The increased allocation) represents his commitment to real estate investing," said Mr. Steves. Mr. Regan is sole trustee for the Common Retirement Fund.

Fund officials haven't decided on any other specific equity investments, but Mr. Steves said he wants to invest in what "other major funds" do, such as direct ownership of malls, office buildings and industrial properties.

He said officials are interested in specialized commingled funds, citing the TCW land fund and one invested only in rental housing.

# Expense cut . . .

*Continued from page 2*

crease to "changes made in the basic plan." He didn't elaborate.

Other corporations reporting an increase in pension expense are:

- Chrysler Corp., Detroit, Mich. — up 7.5% to $236.3 million from $219.8 million;
- ConAgra Inc., Omaha, Neb. — up 25% to $12 million from $9.6 million;
- CPC International Inc., Englewood Cliffs, N.J. — 10.7% to $34.1 million from $30.8 million;
- Dow Chemical Co., Midland, Mich. — 4% to $156 million from $150 million; and
- Ford Motor Co., Dearborn, Mich., 32.1% to $711.4 million from $538.6 million.

Although in many cases pension expense is plummeting, the trend likely will be slowed, if not counteracted by another change likely to take place — a decline in the discount rate, the assumed rate of return achieved by discounting present liabilities to future values.

"It will be interesting to see what will happen with the discount rate — it should be lowered (by many companies). This will increase their liabilities," said Mr. Veith.

"This goes against increasing the income. You're going to have a larger liability. "It may tend to undo some of the good results" of 1986.

While the pension expense reported by the 100 companies generally dropped, both pension assets and liabilities rose from 1985. The aggregate asset total in 1986 was $273.25 billion, up 17% from 1985's $233.5 billion; aggregate vested liabilities rose 13.2% to $195.22 billion from $172.5 billion.

Three corporations moved to underfunded from overfunded status, and five jumped to the overfunded category from underfunded.

The aggregate surplus for overfunded plans rose almost 22% to $78 billion from $64 billion in 1985.

Within the overfunded plans, 66 increased their assets and only 19 decreased, while still remaining overfunded. The biggest increases were reported by: American Brands Inc., New York, where surplus assets skyrocketed 19,618.8%, to $315.5 million from $1.6 million in 1985, and American Cyanamid Co., Wayne, N.J., where surplus assets leaped 706.4% to $88.7 million from $11 million.

Companies whose surplus assets declined significantly, even though their plans still are overfunded, include:

- Phillips Petroleum Co., Bartlesville, Okla., whose surplus decreased 85.5%. In 1986, the plan reported surplus assets of $111 million, compared with 1985's $766 million.
- General Electric Corp., Stamford, Conn., whose surplus dropped to $1.35 billion from $5.96 billion, a 77% decline.

Funding surpluses for 1986 ranged from $12.23 billion for IBM Corp. to $17.8 million for Occidental Petroleum Co. Deficits varied from Bethlehem Steel Corp.'s $1.21 billion to Baxter Travenol Laboratories Inc.'s $7 million. ■

# *Minnick to leave SEI post*

WAYNE, Pa. — James E. Minnick will leave SEI Funds Evaluation Services, and William R. Bullion will relinquish his marketing duties to concentrate on evaluation services.

Mr. Minnick, executive vice president of SEI Corp., will join Morgan Grenfell Capital Management Inc., New York, as an executive vice president.

He will head marketing efforts for Morgan Grenfell Capital Management, which manages $160 million in U.S. equity investments, and Morgan Grenfell Investment Services, which manages $4 billion in equity and fixed-income investments globally for North American clients.

Starting Jan. 1, he will begin marketing two new domestic products for Morgan Grenfell, in which the firm's international and domestic research are applied to domestic stock picking, said J. Richard Walton, president of Morgan Grenfell Capital Management.

Mr. Bullion, SEI's executive vice president and general manager of the consultant's evaluation services division in Wayne, is turning over his responsibility for marketing and consulting nationwide to Ed Loughlin, former senior vice president and Eastern region manager, who is being named senior vice president of account management.

Mr. Bullion's title will not change.

"I thought I was Superman for a year," said Mr. Bullion.

"Now I find it's normal to handle one job at a time."

Gilbert L. Beebower, formerly senior vice president, has been promoted to executive vice president in charge of a newly structured research division consisting of the advanced product concepts and investment policy planning groups.

Mr. Beebower will assume Mr. Bullion's research responsibilities.

In other SEI promotions, William B. Madden, formerly vice president, has been named a senior vice president and will continue to manage the investment policy planning group.

Keith McDowell, formerly vice president, has been promoted to senior vice president. Mr. McDowell still will be responsible for all professional development, such as training new and current employees.

Taking over for Mr. Loughlin, Robert Hudon, former vice president and Chicago-based branch manager-central regions, has been named a senior vice president and Eastern region manager.

He will be based in Wayne.

Replacing Mr. Hudon is John Angley, formerly an account executive in charge of institutional funds evaluation.

His previous duties will be reassigned among existing employees. ■

*Jonathan Taylor recognizes the appeal of pension assets.*

# Western firms . . .

*Continued from page 3*

York-based money manager.

Chase Investors Management Corp., New York, runs Japanese institutional accounts through joint ventures with two Japanese firms. For Daiwa International Capital Management, New York, Chase manages an $80 million small-capitalization U.S. equities fund, while for Yamaichi, Chase runs a $147 million double-hedging bond fund. Chase also directly runs a $40 million separate account for an unnamed Japanese financial institution.

• Insurance companies and independent investment firms also are breaking through the barriers and entering the market. CIGNA's Tokyo subsidiary runs $525 million for three Japanese subsidiaries, while Alliance Capital Management International's Tokyo office manages $232 million in Japanese assets and has just announced an agreement to invest in non-Japanese markets for Mitsui Investment Management Co. clients. In exchange, Alliance will train Mitsui personnel in the management of diversified international portfolios.

• Leland O'Brien Rubinstein Associates Inc. recently licensed its dynamic hedging technology to Nikko, primarily for use in the Japanese market, and is negotiating with other Japanese firms, said Scott Grannis, vice president at the Los Angeles-based money manager. ■

# U.S. mentors . . .

*Continued from page 3*

investors approach the market, leading the Japanese to explore heavily quantitative techniques.

The Japanese "don't understand how we manage stocks in this country but they do understand a systematic approach," said William Jacques, a partner at Martingale Asset Management, Boston.

Michael Phillips, director of international consulting for Frank Russell Co., Tacoma, Wash., agreed. "The Japanese are more comfortable with mechanistic" approaches than eclectic ones, he said.

For example, observers cite tremendous interest in portfolio protection techniques by Japanese investors, and expected such strategies to grow enormously as the incipient Japanese futures market develops.

"There's definitely a great deal of interest in portfolio insurance-type of strategies" in Japan, said Roger Sayler, managing director at J.P. Morgan Investment Management Inc., New York.

But the Japanese not only want to use foreign investment expertise, they want to learn the business. To achieve this, the Japanese have placed trainees in U.S. counterparts.

"A large amount of training of their people has been a quid pro quo," said Andrew Rudd, president of BARRA, the San Francisco-based consulting firm that established a Tokyo office last year.

Hartford, Conn.-based CIGNA Corp. has trained employees of Sumitomo Fire & Marine Insurance Co. Ltd., Tokyo, a CIGNA client, in various aspects of insurance for the past 25 years. Now, Sumitomo's first investment management trainee just finished a 12-month program at CIGNA Investment Group, studying fixed-income, real estate and equity investments and overall portfolio management.

At Batterymarch, Mr. Williams estimates more than 50 Japanese firms have sent delegations to see the firm's offices in the past few years. They come as part of study groups charged with a broad agenda of learning the U.S. capital markets and business climate, the pension fund industry, computer applications and the latest investment techniques, he said.

The concern of some, of course, is that the Japanese eventually will become as good or better than foreigners at their own game.

While noting Merrill Lynch, Pierce Fenner & Smith Inc. had worked with Nomura Securities Co. Ltd., Tokyo, in the 1960s, only to be surpassed later by the Japanese firm as the world's largest brokerage firm, "the relationship helped both, and that's the way we feel about it," said Gordon L. Bowyer, president and chief investment officer, Credit Suisse Asset Management, New York.

"We're teaching Mitsui (Bank, Tokyo) while we're making small inroads. It's important to be there. If we're not, somebody else will be," he said.

"We don't feel it's arming the competition, we feel it's building the relationship," said David Cripps, vice president and general manager-international investment department, Manufacturers Hanover Investment Corp., New York.

While MHIC has trained Japanese managers in the past, it has no formal arrangement to do so with any one organization.

But the Japanese still have a long way to go, some observers believe. While they may be picking up ultramodern computer-driven investment techniques, the conservatively oriented Japanese still are a long way from understanding contemporary notions of risk.

"Three or four years ago, you couldn't get an insurer to understand what a time-weighted return was," said George Curuby of Curuby & Co., a Tokyo-based consultant to U.S. firms establishing Japanese offices.

In the past, Japanese firms typically asked their money managers to meet an absolute rate of return while providing no reward if the managers beat the target — while facing potential loss of the account if they took on additional risk.

While the Japanese are expanding their foreign investments, they "have yet to understand that diversifying overseas reduces volatility and risk," Mr. Curuby said.

Even though some U.S. money managers concede they eventually may lose their domestically invested Japanese business to local investment managers, they say they will find niches in the international markets in such specialized areas as mortgage-backed securities.

In addition, others believe the heavy reliance on investment technology by the Japanese may be misguided. As Mr. Curuby suggested, the Japanese are "interested in taking the human element out of the investment process."

"They think it's a game of getting the technology together," but fail to see the need for making innovations in the model, said Anne Cabot, manager of marketing for Sanyo Securities Co. Ltd., Tokyo.

"It's going to take the Japanese a long time to beat us at our game," said Scott Grannis, vice president at Leland O'Brien Rubinstein, Los Angeles. ■

# Putnam fund is targeting bonds

BOSTON — The Putnam Management Co. Inc. is introducing a mutual fund consisting mainly of global government bonds.

The fund will strive for high current income by generally investing in bonds of at least three countries. Investments may span Western Europe, the Pacific Basin and North America. A portion of assets might be invested in investment-grade U.S. corporate bonds, foreign bonds rated A or better or stocks, but some 65% will be in high-yield government bonds.

Managers will hedge the portfolio using foreign exchange and futures and options transactions.

Anthony R. Regan, chief of international investments, and Stephen Bartow, senior international portfolio manager, will direct the trust. ■

# *Tokkin offer tax saving*

**By Marlene Givant**

"Tokkin" funds — the institutional investment vehicle most open to foreign management — appeal to Japanese businesses largely because setting up the corporate liquidity funds, which now hold $93 billion, allows the companies favorable tax treatment and anonymity in their investments.

Japanese companies typically have vast stock holdings at low book values relative to market values; if the companies were to sell the stocks, they would record significant capital gains.

One advantage of setting up a tokkin is to minimize taxable income. Under Japanese law, if a company makes additional purchases of a stock with low book value through a tokkin, taxable gains accrued at the subsequent sale of the stock are less than if the company had purchased the shares directly.

In addition, once a year, when a company closes the books on its tokkin, it may convert into dividends any capital gains achieved by the accounts, thereby recognizing capital gains as income.

Another advantage is that registration of tokkin securities is in the name of the trustee, affording the client anonymity. This is a plus for cultural reasons — a company can sell its stock in a company with which it does business, without insulting the party.

Investments of the tokkin are broadening beyond Japanese government fixed income, enhancing opportunities for non-Japanese managers to sell their equity expertise.

While Japanese government bonds historically have been popular investments for the funds, the portion of tokkin assets invested in stocks reached 33.7% as of March 31, compared with 19.9% as of Dec. 31, 1984, according to Takaaki Yoda, a chief analyst at Daiwa Securities Co. Ltd., Tokyo.

But any gains made by foreign firms may be short-lived.

Less than 5% of tokkin assets are invested abroad and investment advisory companies in general manage less than half of outstanding tokkin assets, Mr. Yoda said. The rest are managed by the investors.

Investment of tokkin funds on an in-house basis has grown as institutional investors gain expertise in equities transactions.

"The direct management of tokkin accounts by institutional investors should increase in the future, as employees who have been sent to investment advisory companies for training gain experience in portfolio management and investment strategies," he added. ■

# Foreign registration plan hanging on

By Nicky Robertshaw

WASHINGTON — A proposal to require registration of domestic real estate and business interests held by foreign investors is still alive despite its defeat in the Senate.

Although rejected as an amendment to the Senate trade bill, Senate Commerce Committee Chairman Ernest F. Hollings, D-S.C., pledged his committee would hold hearings promptly if the proposal were introduced as an independent bill.

And despite the defeat of the amendment, sponsored by Sen. Tom Harkin, D-Iowa, registration of foreign investors will still be considered as the bill goes to conference, because a similar measure is alive in the House (*Pensions & Investment Age*, May 18).

Separately, the Senate approved an amendment to the trade bill — known as the Omnibus Trade and Competitiveness Act of 1987 — requiring Senate committees to assess the economic impact of legislative proposals mandating employers to provide employee benefits.

The Senate completed work on the trade bill, but no specific date had been set at press time for conference action.

The House bill provision would require all foreign investors who acquire more than 5% of a privately held U.S. business or a real estate property valued at more than $5 million or companies with annual sales exceeding $10 million to register with the federal government basic information such as their identity and nationality.

Any equity investment in a U.S. company valued at more than $50 million also would have to be reported.

Tougher reporting rules would apply where the foreign interest exceeds 25% of the total ownership of a business with more than $20 million in assets or gross sales exceeding $20 million.

The rules in the defeated Senate amendment were similar. The Senate measure would not have affected securities investments, Treasury bonds, bank deposits and other such investments, but only real estate and business interests, Mr. Harkin said.

For publicly traded companies, the Harkin amendment would have required disclosures to the extent required by the Securities and Exchange Commission, according to an aide to Mr. Harkin. He added the senator has not yet decided whether to introduce a free-standing version of the bill.

In arguing for his amendment on the Senate floor, he pointed out foreign capital investments in the U.S. economy have doubled in the past three years to $1.3 trillion, with about $250 million of it used to purchase interests in U.S. manufacturing firms, farmland and other assets.

The proposal is controversial, because many experts, including former Federal Reserve Chairman Paul Volcker, argue disclosure requirements would discourage foreign investments.

"I am troubled by the prospect that taken together these provisions, if enacted, could have a seriously adverse affect on foreign investments in the United States at a time when our economy remains highly dependent on the inflow of savings from abroad to finance our budget deficit and to sustain the overall rate of investment in the U.S. economy," Mr. Volcker said in an April 21 letter to House Energy and Commerce Committee Chairman John M. Dingell, D-Mich.

While conceding points raised by Mr. Volcker and others, Mr. Harkin said the disclosure required under his proposal is no more stringent than that in other countries where U.S. entities invest their assets. He added "the short-term advantages of foreign investment should not prevent us from considering the potentially long-term effects on our economy and our national security" that might result from lack of information about investors.

Mr. Harkin's amendment was defeated 83 to 11, although an aide said it was because lawmakers didn't want the provision added to the trade bill, not because they were opposed to disclosure.

Sen. John C. Danforth, R-Mo., called the measure "veto-bait" that would endanger the entire trade bill. He pointed to strong opposition by the Reagan administration and the business community.

An amendment to the trade bill that did survive Senate action was a provision sponsored by Sen. Dan Quayle, R-Ind., that would require Senate committees to assess the economic impact of legislative proposals mandating employee benefits.

Under the proposal, any time a bill that would require additional employee benefits is considered in committee, there would have to be an objective analysis of its potential impact on employers, the economy in terms of international competitiveness and employees. ■

# Convertible . . .

*Continued from page 1*

of the conversion ratio to adjustment of the coupon to a "put" on change of control at the redemption price plus accrued interest.

Although the number of problem cases is minimal compared with the number of convertible issues, some investors contend they won't participate without protective clauses.

Others held out in some takeover situations until they got a better deal.

The lobbying campaign for protection began after convertible holders lived through one too many "nightmares of the convertible," said Patricia Peters, vice president, J.P. Morgan Investment Management Inc., New York, which manages about $900 million in convertibles.

"I have mixed feelings. We're not in a risk-free business. But when it happens to me, I don't like it," she said.

Although convertible investors began to get hit in the mid-1970s, the takeover and restructuring frenzy of recent years brought the issue to the forefront. Most of the companies are small to medium-size issuers (*see accompanying chart*).

Investors complain they lose an important component of their investment — the opportunity to take advantage of stock appreciation — without compensation. Convertible investors usually accept lower coupon interest than that offered by straight bonds in exchange for the conversion opportunity.

In addition, those that buy convertible bonds of corporations that restructure and create highly leveraged balance sheets also can end up holding bonds that pay coupon rates below those commensurate with the companies' changed creditworthiness.

"It's a very important issue, and we are pushing for protection selectively. We look closely at the terms and conditions. It's our fiduciary duty. Eventually we expect the language to become boilerplate, like call protection," said a corporate pension executive who oversees convertible investments.

Participants estimate the convertibles market has experienced explosive growth, to $70 billion now from $40 billion in 1985.

Investor interest in convertibles is rising partly because the securities increasingly are seen as a low-risk way to participate in the bull market.

As convertibles have grown in importance, the clout of convertible managers has improved. Most underwriters say they are responding to the concerns of convertible investors, although all parties agree there is still some resistance from issuers.

"We have begun to insist on language. Both investment bankers and companies have become more willing to include the type of language," said Arthur Berry, vice president, Alliance Capital Management Corp., New York, and president of Alliance Convertible Fund. Alliance Capital Management has more than $500 million in convertibles.

Thomas Revy, managing director of Froley, Revy, has asked underwriters to change the terms to the lower of the takeover price or the conversion price. Another option, he said, is to compensate for the loss of equity participation by increasing the coupon to 150% of the original.

Howard Marks, managing director, Trust Co. of the West, has suggested a put on change of control or other significant events, perhaps at the redemption price plus accrued interest.

That provision was included in recent issues by Freuhauf and Burlington, both underwritten by Kidder Peabody & Co., New York.

"Like any other feature, we will have to assess its value relative to its cost to us," Mr. Marks said.

Mike Rodier, assistant portfolio manager of Wellington Management, and Mr. Calamos of Noddings-Calamos don't think bondholders should have to pay to be treated fairly. Mr. Rodier supports strong protection, at least in the critical first few years after a convertible has been issued.

"The only people who have to fear this are people who anticipate this kind of change. I don't expect to pay extra for this," Mr. Rodier said.

"It is merely keeping us whole. Most issuers need the financing. If they are raising the money under false premises, they deserve to pay for it."

W. Gregory Robertson, executive vice president and director of the investment banking division at Thomson McKinnon Securities Inc., New York, said his firm is encouraging issuers to adopt protective clauses. A protective provision was included in the $30 million convertible issue Thomson McKinnon underwrote in December for Jacobson Stores Inc., a Jackson, Mich.-based specialty department store chain. For a period of five years, each bondholder can put his bonds back to the company at the then-current optional redemption price if there is a change of control.

Rick Nelson, vice president and convertible securities analyst at Kidder Peabody, acknowledged many companies are wary of including the protective clauses. For some, the "indigestion pill" characteristics of the provisions make it possible to sell the idea to the issuer, he said. Kidder is adding the protective clauses when issuers and investors ask for it.

"Frankly I'm surprised more clients aren't asking for it," he said. "I don't think it will become standard unless there's more damage suffered in the marketplace. In this bull market, converts are participating and still making an above-average return." ■

# Execs say CEO job elusive

Most corporate pension executives believe the pension management slot opens up promotion to general financial management at their companies, but an even larger number believes the chief executive's job is beyond their reach.

These are among the key findings of a career expectations survey sent by *Pensions & Investment Age* to 500 corporate pension executives. Complete responses were returned by 153 executives.

Sixty-one percent of the respondents believed the pension area was a good place from which to move into general financial management, but 74.5% believed they could not advance to chief executive.

And most of those who thought it was possible to rise to chief executive were either chief financial officer or treasurer of their companies already. Most of the lower-ranked pension executives had set their sights lower.

Even one treasurer commented it was not possible to rise to the rank of chief executive officer if an executive was too long in the pension position.

When asked what they expected their next career move to be, the largest number, 25.5%, said they expected to move into a general financial management position with their current employer; 10.5% said they expected to move to a general financial management position with another company.

However, 11.5% hoped to move to a client liaison position with a money management firm, 4.5% hoped to move to a portfolio management position at a money management firm, and 11.5% hoped to move to an investment management consulting firm.

On average, the executives expected to take their next career steps in 2½ years.

The relatively large number of executives planning to leave the corporate side of the business for the investment management/consulting side reflected considerable job dissatisfaction.

While 28 of the pension executives responding were entirely content with their jobs — especially those who had achieved the rank of chief financial officer or treasurer — the remainder had a wide range of dissatisfactions:

- salary too low for the amount of responsibility;
- too much bureaucracy;
- lack of visibility with corporate top management — out of corporate mainstream;
- lack of importance given to the pension area;
- lack of clear promotion path;
- insufficient staff;
- responsibility without sufficient authority; and
- politics within the organization.

Each of these complaints was mentioned by several pension executives.

One executive commented the greatest frustration was the difficulty of convincing "executive management of the importance of the (pension management) program as compared with those functions which are revenue-producing."

Another executive with a pension fund in the $1 billion to $5 billion range said the greatest source of dissatisfaction was "low pay with significant risk of not being promoted within the company."

Another said the greatest source of dissatisfaction was the "chairman of the investment committee doesn't exhibit enough interest in the activity."

The most common titles among the respondents began with "director" (30) or "manager" (26). Twenty-one were treasurers, 20 were assistant treasurers and the remainder held a variety of titles including chief financial officer, vice president of administration and financial analyst.

Overall, the respondents were well-educated and had significant experience. More than half of them had master's of business administration degrees, 12 had other master's degrees, four had doctorates and three, law degrees.

Interestingly, those with MBAs as their highest level of education were, on average, three years younger than the respondents whose highest level of education was a bachelor's degree.

The average length of career of the respondents was 19 years, the average length of service with the current company was 13.2 years and they had held their current responsibilities for an average of 4.8 years.

Only 32% of the respondents had responsibility for internal management of pension assets, with the average amount managed internally $731 million.

Of the respondents, 20.1% were with funds with less than $250 million; 27.9% were with funds between $250 million and $500 million; 28.6% were with funds between $500 million and $1 billion; 20.1% were with funds between $1 billion and $5 billion; and 3.1% were with funds of more than $5 billion. ■

**Pension executives' expected next career move**

| | % responses |

variable-rate premium, which is in the Ways and Means proposal, and we would like to see it in the Education and Labor Committee as well," Mr. Walker added.

During the subcommittee consideration, Rep. Marge Roukema, R-N.J., proposed taking up a variable-rate premium similar to that of the Ways and Means plan, but with a $45 limit. Her proposal was countered by subcommittee Chairman William Clay, D-Mo., who said a variable-rate premium would do "irreparable harm" to companies in marginal financial condition, forcing them out of business.

Another surprise was a pension portability amendment introduced by Rep. James Jeffords, R-Vermont, and approved during the discussion. The proposal would make it easier for employees leaving a job to roll over a lump-sum pre-retirement pension distribution from that job into a new, portable pension plan maintained by investment managers. Mr. Jeffords said his amendment "is designed to improve retirement income security and address issues of worker dislocation, mobility and competitiveness by enhancing pension investment choice, national savings and capital formation."

Mr. Jeffords' proposal was added over the objections of pension industry trade groups. The groups generally want further study of the portability idea, believing enough consideration hasn't been given to the increased administrative burdens of such a plan and that there has not been enough time given to assess the impact of the Tax Reform Act of 1986.

"Such a move is ill-considered, ill-timed and does not necessarily represent the best interests of the nation's pension systems," said a letter to the committee from eight trade groups, including the APPWP and the ERISA Industry Committee.

The subcommittee proposal also would:

- Allow employers to get reversions from a defined benefit plan without terminating, as long as they leave a cushion of 25% in that plan as well as in every other plan maintained by the control group. If a plan terminates, however, employees would receive the cushion, while the employers would be entitled to any excess funds beyond the 125% level.
- Allow companies reorganizing under Chapter 11 to continue to meet the criteria for distress termination, but an employer could not terminate an underfunded plan if the employer or any member of the controlled group maintains an overfunded plan. ■

## Late news

### Japan venture OK'd

WASHINGTON — The Federal Reserve System Board of Governors has paved the way for Sumitomo Trust & Banking Co. Ltd., Osaka, Japan, to offer investment advisory services to U.S. and Japanese pension fund advisers through a joint venture with Security Pacific Corp., Los Angeles.

The move into investment advisory services by Japan's second largest trust company is part of Japan's aggressive move into the U.S. financial services market. Sumitomo of Japan has $113.6 billion in assets.

Sumitomo will set up a joint venture with Security Pacific. Sumitomo and Security Pacific each will own 50% of the voting shares of the company, called Sumitrust Security Pacific Investment Managers Inc., Los Angeles.

Initially, the joint venture company will advise on investments in U.S. and Japanese debt and equity securities. Later, the company may market directly to pension funds.

### ESOP growth eyed

TRENTON, Mich. — Workers at McLouth Steel Products Co. are negotiating arrangements that eventually would give their employee stock ownership plan 87% of the company.

The ESOP now owns about 13% of the company, which would be converted to a 2% share after a restructuring of the financially troubled steelmaker, said John Skidmore, recording secretary of United Steelworkers of America Local 2659, which represents about 1,800 of McLouth's 2,400 employees. The ESOP covers union and non-union employees.

The restructuring would give McLouth's creditors an 85% share that would be transferred to the ESOP as debts are paid off, Mr. Skidmore said.

Workers and creditors, with assistance from the Michigan Department of Commerce, are negotiating financial arrangements for the stock transfer. The Pension Benefit Guaranty Corp. also is expected to be involved, as the company's predecessor, McLouth Steel Corp., terminated two underfunded pension plans in 1982, during a bankruptcy reorganization.

### Consortium formed

PALO ALTO, Calif. — Five pension funds, a major university endowment and a financial services company have formed an oil and gas investment venture to acquire producing properties from failed banks by purchasing loans secured by the properties from the Federal Deposit Insurance Corp.

The funds have committed $87 million to invest in a corporation formed to purchase defaulted bank loans secured by oil and gas properties with the objective of ultimately acquiring the properties.

Participants are the pension plans of Aluminum Co. of America, Pittsburgh; Echlin Inc., Branford, Conn.; Honeywell Inc., Minneapolis; Eastman Kodak Co., Rochester, N.Y.; and the Knights of Columbus, New Haven, Conn.

Aneas Venture Corp., an investment affiliate of the Harvard University endowment, which took the leading role in a similar oil and gas program called Smith Offshore Exploration Co., is the lead investor with a $10 million commitment.

Also investing is Dreyfus Corp., Camden, N.J.

According to one participant, each participant will receive capital stock and covertible debentures in the acquiring corporation, known as Cherokee Resources Inc., as the funds are expended and properties acquired.

### Overdraft plans pass

WASHINGTON — Five Federal Reserve Board daylight overdraft proposals were approved without modification at a July 23 board of governors meeting, according to Julius Oreska, manager of electronic payments.

The amendments, expected to take effect in early 1988, include a 25% reduction in the cap for daylight overdrafts. Also, an amendment was passed granting very small institutions immunity from a self-assessment procedure required of all institutions, with the stipulation overdrafts do not exceed $500,000.

### Late money movers

- SAN FRANCISCO — Following an asset allocation study, the $2.5 billion Pacific Gas & Electric Co. retirement plan has added two international managers and one real estate manager, according to Sunny Oberoi, director-pension fund management.

The international managers are American Express Asset Management, New York, and Oechsle International Advisors Inc., Boston. Each will manage $30 million.

The fund also will invest $25 million in an apartment fund with JMB Institutional Realty, Chicago, to supplement its $175 million in existing real estate investments.

- ORANGE, Calif. — Bergen Brunswig Corp., with a combined $33 million in retirement plan assets, hired Bankers Trust Co., New York, to replace Security Pacific National Bank, as master trustee.
- WASHINGTON — The newly independent $1.12 billion TWA Pilot Trust Annuity Plan has hired its first international manager team, according to Teddy Hogle, fund administrator.

SBC Portfolio Management International Inc., New York, and BA Investment Management International Ltd., London, each will run $25 million.

- NEW YORK — The $560 million Pan American World Airways Inc. Variable Benefit Retirement Plan for Pilots has added BA Investment Management International Ltd., London, to manage $20 million in international equities, according to George Mehm, manager-pensions/financial.
- FORT WAYNE, Ind. — Zollner Corp. hired two active fixed-income managers for its $37 million defined benefit plan, said Edwin E. Coil, vice president personnel at Zollner.

The managers, hired to run $5 million each, were Denver Investment Advisors Inc., Denver, and Caywood-Christian Capital Management, San Diego.

- CARSON CITY, Nev. — The $2.4 billion Nevada Public Employees' Retirement System hired two fixed-income managers to run $175 million each, said Laura Wallace, chief investment officer.

Hired were State Street Research & Management Co., Boston, and The Patterson Capital Corp., Los Angeles.

- SAN FRANCISCO — The Jewish Community Federation of San Francisco, the Peninsula, Marin and Sonoma Counties has retained Sumitomo Bank of California, San Francisco, as trustee of its $11 million retirement plan, according to Nancy Hair, director of finance.

The federation also retained Fleckenstein Capital Inc., Seattle, to manage a $6 million fixed-income portfolio for its $60 million endowment fund, Ms. Hair said.

# GE Financial Services is primed for competition

**By Marcia Parker**

FAIRFIELD, Conn. — General Electric Co.'s fast-growing financial services group, a fierce competitor of top investment and commercial banks in some areas, is expected to contribute $1 billion a year to the bottom line by 1991.

Backed by GE's financial clout and top-notch ratings, GE Financial Services Inc. has a cost advantage over its competitors that can only intensify the pressure on Wall Street's old-line firms as it builds into one of the world's leading finance companies and deal-makers.

"There's no question that we have grown dramatically and that we are now among the top 10 finance companies. We contribute about 20% to GE's earnings now . . . $1 billion by 1991 is not out of reach at all," said Michael Carpenter, executive vice president of GE Financial Services.

The quick growth of GEFS is an indication of the apparent success of the restructuring of GE, which in the past six years has shifted emphasis to high technology and services from manufacturing.

**Corporate finance**

Since Chairman John F. Welch Jr. began paring the company's low-margin, old-line manufacturing subsidiaries to create a miniconglomerate around eight high-technology, service-oriented businesses, GE has been building its financial services unit.

GEFS, the Stamford, Conn.-based parent holding company for GE's vast financial services operations, has made several acquisitions since 1984.

The two best-known are Kidder, Peabody Inc., the investment banking firm, and Employers Reinsurance Corp., a major reinsurer. Its flagship, GE Credit Corp., the huge leasing and asset management company, has been expanding its extensive reach, including a big push to tap new markets for corporate financial services and to boost its commercial real estate financing activities. Another thrust for GECC is to move aggressively into managing assets it historically has financed, such as rail cars.

"We are constantly looking for ways to leverage our understanding of the businesses that we have been financing for years," said

# Court stymies surplus assets use

**By Nicky Robertshaw**

ATLANTA — A federal appeals court decision threatens to imperil employers' ability to recapture surplus assets through terminating overfunded pension plans.

The 11th U.S. Circuit Court of Appeals has ruled an employer cannot take reversions from a terminated plan until it has paid out unaccrued forfeitable benefits as well as all accrued benefits. The decision is being appealed, with the full circuit being asked to review the decision.

Because of this and related decisions, the Internal Revenue Service temporarily has suspended issuing termination letters on defined benefit plans in the 11th and 4th circuits, and will issue a position shortly, an agency official said.

The 11th Circuit comprises Florida, Georgia and Alabama; the 4th Circuit comprises North Carolina, South Carolina, Virginia, West Virginia and Maryland.

In the 4th Circuit case, Tilley vs. The Mead Corp., the court ruled in April that when terminating a defined benefit plan, employers must pay out early retirement benefits to compensate employees who have not reached the designated retirement age before the employer can take reversions.

The June 1 ruling by the three-judge 11th Circuit panel overturned a lower court's finding that Atlanta-based Dixie Engine Co. was entitled to a reversion of $225,000 after paying benefits accrued up to Dec. 31, 1982, the date the company's retirement plan was terminated as a result of the sale of the business.

A figure for how much the unaccrued forfeitable benefits in question are worth was not available, but is believed to be larger than $225,000.

Unaccrued forfeitable benefits are defined as the unearned future benefits employees would have gotten at normal retirement age, reduced to present cash value.

The plaintiffs, participants in the pension fund, had argued participants were entitled both to benefits accrued up to termination as well as unaccrued forfeitable benefits, and because Dixie had not fulfilled all of these obligations, it could not receive the reversion.

Under the Employee Retirement Income Security Act, an employer must satisfy all obligations to participants before it can receive any excess assets.

The decision by the appellate panel drew fire from officials at the Pension Benefit Guaranty Corp. and others in the defined benefit pension plan area, who said the opinion would provide further disincentives for employers to fund their plans.

Although it is "not unheard of" for employers to provide benefits beyond what has been accrued, "to push that further in a court decision is giving employers a disincentive to fund their defined benefit plans or even to have defined benefit plans to begin with," said Henry von Wodtke, a benefits consultant in the New York office of Buck Consultants Inc.

In asking for a hearing by the full circuit, ettorneys for the Dixie plan said the appel-

# Brazil lures 2 U.S. funds

**By Marlene Givant**

The pension funds of Owens-Illinois Inc. and General Electric Co. are breaking into the Brazilian stock market. The two are believed to be the first U.S. pension funds to invest in that market.

The $2 billion Owens-Illinois fund, Toledo, Ohio, and the $30 billion GE fund, Stamford, Conn., have allocated a total of $5 million to investment manager Marsh & Cunningham Inc., Boston, for investment in a stock fund managed by a Brazilian bank. The exact investment of each fund could not be learned.

The total allocation to Brazil represents 8% of those clients' international portfolios with Marsh & Cunningham, which manages $70 million in international assets for U.S. tax-exempt clients.

Officials at Owens-Illinois were interested in the investment because they have been watching emerging markets for some time.

"We're particularly interested in developing Third World countries. There are prospects for investment in a number of them. We've followed them; this is the first we've made," besides Marsh & Cunningham's investments in emerging markets like South Korea and Taiwan, said Ronald Boller, director-benefit finance of Owens-Illinois.

"They have discretion over our account. Their recommendation carried a heavy weight with us. When they or any manager believes something is a reasonable investment, we give it consideration," Mr. Boller said.

Hakan Castegren, principal at Marsh & Cunningham, "studied it and it meets his requirements and criteria, but the general notion was supported by us," Mr. Boller said.

Assets added to Marsh & Cunningham's allocation came from existing accounts, Mr. Boller said. He declined to elaborate, but said no managers were terminated.

The Owens-Illinois fund invests 15% in international equities and 3% in international bonds. He would not reveal how much the fund has with Marsh & Cunningham.

GE officials declined to comment on the Brazil investment.

"I think I'm the first (U.S. pension fund) manager in there," said Mr. Castegren.

The allocation makes Brazil — the eighth largest economy in the

# 8 funds invest in gold bullion

By Joel Chernoff

PROVIDENCE, R.I. — Seeking a hedge against inflation and diversification from overheated financial markets, HT Investors Inc. is recommending its balanced clients invest up to 5% of pension assets in gold bullion.

So far, eight clients with $100 million in total pension assets have agreed to the strategy, which started in April and builds up the gold stake at the rate of 1% of assets per month. To date, some $3.2 million has been invested in gold bullion by HT. Henry Greenleaf Jr., president and chief investment officer, expects that with approval from additional clients, the firm may have about $15 million invested in gold by year end.

The threat of renewed inflation and "hyperinflation" of financial assets, particularly in Japan, makes securities investments increasingly risky, Mr. Greenleaf explained.

To hedge against that risk, HT, which manages about $800 million in balanced assets for tax-exempt investors, suggests gold may be an appropriate investment. The manager runs $1.1 billion in tax-exempt assets.

"It's a risk-averse way to diversify the portfolio into an asset that looks like it may be on the way up," Mr. Greenleaf said. In the past 12 months, gold has appreciated 34%, to $470 per ounce from $350.

In implementing the strategy, HT will be able to pick the brains of its sister company, Rhode Island Hospital Trust National Bank, which is second only to the U.S. Treasury in the amount of gold kept on deposit. Both are subsidiaries of RIHT Financial Corp.

HT buys gold bullion through the bank, said J. Richard Schroder, vice president-director of marketing/sales. The manager may have to take steps to meet requirements of the Employee Retirement Income Security Act: the bank may have to forgo any profits from the gold sales, and

*Continued on page 28*

*Gold, according to Henry Greenleaf Jr. of HT Investors Inc., will protect clients from inflation and volatile markets.*

*John Steinbach, assistant treasurer and investment manager, says moves by K mart will give its fund a more defensive strategy and enable the company to keep from making contributions.*

# K mart plan pulls back to guard market gains

By Trudy Ring

TROY, Mich. — K mart Corp.'s $960 million defined benefit fund has shifted about $200 million, reducing its equity exposure and moving into defensive strategies to preserve market gains.

*In the process, K mart released* two managers, hired one, cut one's allocation and increased another's. It also has planned to bring about $90 million of the $200 million in-house in fixed income. The remainder of the assets shifted will stay in less aggressive equity strategies.

At the end of the 1982 recession, the K mart pension fund was 100% in equities, said John Steinbach, assistant treasurer and investment manager. It cut back the equity exposure to about 80% in 1983 and roughly 70% in 1984.

"Once we implement the recommendations, we will be at 58% equities," Mr. Steinbach said. "This is just a continuation of what we've been doing the past few years."

K mart's investment committee *approved the changes July 21. A* major move toward defensive strategies was the termination of a $155 million aggressive equity account with T. Rowe Price Associates Inc., Baltimore. K mart also trimmed its growth stock manager, Alliance Capital Management Corp., New York, by $40 million to $135 million.

It also terminated a futures account of a little more than $1 million with Bostian Research Associates Inc., New York. It was an aggressive futures program at a time when K mart officials wanted to become more defensive, Mr. Steinbach said.

K mart hired, pending successful contract negotiations, Stein Roe & Farnham Inc., Chicago, to run $50 million in a futures-enhanced Standard & *Poor's 500 index fund. Stein Roe* will arbitrage the stocks against S&P 500 futures, Mr. Steinbach said.

He said this will give K mart a chance to become more experienced with futures, which pension funds likely will use more in years to come. K mart has used arbitrage in its $50 million medical trust, although not with Stein Roe, and is exploring other arbitrage opportunities with Stein Roe.

# Internal manager picked for Arco European stock

By Marlene Givant

LOS ANGELES — The $2.3 billion Atlantic Richfield Co. pension fund — one of a very few running non-U.S. equities in-house — has hired its first internal European equities manager.

Arco has hired Nicole F. Holmes, former investment analyst of the $4 billion Hughes Aircraft Co. pension fund, El Segundo, Calif., as portfolio manager-European investments.

The Arco fund runs $1.2 billion in-house; it could not be learned how much of that was invested internationally. Until now, all international assets managed in-house were invested only in Far East stocks, said E. Kent Damon Jr., vice president and investment officer. But assets managed by outside managers were invested in Europe.

The Arco fund had more than $520 million in international equity and fixed income as of Sept. 30, 1986, according to *Pension & Investment Age*'s annual directory of the nation's largest pension funds (*P&I Age*, Jan. 26). Outside managers included Capital Guardian Trust Co., Los Angeles; Fidelity International Investment Advisors Ltd., Boston; Fiduciary Trust Co. International, New York; GT Capital Management Inc., San Francisco; Rowe Price-Fleming International Inc., Baltimore; and Warburg Investment Management International Ltd., New York; according to the directory.

Ms. Holmes will be replaced at Hughes "as soon as we find the right person," said W. Allen Reed, staff vice president-investments at Hughes. The individual will come from outside the organization, he said.

Ms. Holmes will manage U.K. and continental European equities. The amount to be invested has not been decided.

"The European equity amount will vary depending on asset allocation," Mr. Damon said. "It will come from a variety of different portfolios not determined as yet. We have no plans to terminate any managers."

The fund has been running Far

# SEC clears trading network

By Fred Williams

The Portfolio System for Institutional Trading, POSIT, has been cleared for operation by the Securities and Exchange Commission, making it the second computer-based trading system for equity portfolio managers matching buyers and sellers.

In a statement acknowledging SEC approval of POSIT, Jefferies & Co., one of the developers of POSIT, also announced the resignation of Donald L. Luskin, the senior vice president in the Chicago office who had managed the development of POSIT since its inception a year ago.

Mr. Luskin will join Wells Fargo Investment Advisors, San Francisco, where he will be senior vice president in charge of investment management and trading.

He has been replaced by Mike Alex, senior vice president-strategic investments at The Northern Trust Co., Chicago. Mr. Alex will be senior vice president and manager of the investment technology group at Jefferies.

Assuming Mr. Alex's duties as head of passive equity products is Stephen J. Krisik. Mr. Krisik had been vice president in product development with the strategic investments group at Northern Trust.

Jefferies, Los Angeles, and BARRA, a Berkeley, Calif., consulting firm, were cleared by the SEC to operate the electronic matching network developed jointly by the two firms.

POSIT is designed to bring buyers and sellers of equity portfolios together through a centralized computer outside brokerage houses and stock exchanges.

POSIT is expected to become

*Marcia Parker, left, is P&I Age's new associate editor for corporate finance; Jacqueline Dutton is a new staff reporter.*

## P&I Age promotes 2 on staff

Two *Pensions & Investment Age* editorial staff members have been promoted.

Marcia Parker, who had been covering general pension issues, mergers and acquisitions and mortgage-backed securities, was named associate editor for corporate finance.

Ms. Parker joined *P&I Age* in October with more than 10 years of experience at United Press International, Oil & Gas Journal and Buyouts & Acquisitions.

She has a master's degree from the Fletcher School of Law & Diplomacy at Tufts University and is an adjunct professor at Columbia University's Graduate School of Journalism.

Jacqueline Dutton, who joined *P&I Age* as editorial assistant in February, has been named a staff reporter covering general pensions management and investment issues.

She has worked for the Iowa City Press-Citizen and served an internship on the Des Moines Register.

An honors student, Ms. Dutton has a bachelor's degree from the University of Iowa and has studied at City University of London's Graduate Centre for Journalism.

Both are in *P&I Age*'s New York office. ■

## Corrections & clarifications

- A list of benefits of securitization in a June 15 story should have been attributed to **First Boston Corp.**
- **County Investment Management Ltd.**'s $75 million in indexed U.S. tax-exempt assets should have been listed as international assets in the July 13 issue.
- A table in the July 27 issue incorrectly listed **Merrill Lynch Asset Management** as running $500 million in Japan-based assets in conjunction with Nomura. Those assets are managed in separate accounts; the company maintains a separate relationship with Nomura on mutual fund assets.
- The **100 Largest Investment Advisers** chart July 27 omitted the Principal Financial Group, Des Moines, Iowa. Total assets of the parent company, as of Dec. 31, were $17.9 billion. Assets under management by its subsidiaries include: Value Investors, $2.7 billion; Principal National Life Insurance Co., $327 million; and Principal Casualty Insurance Co., $32 million.

Money movers are a *Pensions & Investment Age* feature that details new investments of tax-exempt assets. They appear in each issue of *P&I Age*.

Information for the section is welcomed. Please send details to:

## Ambitious restructuring putting Armco in the pink

By Marcia Parker

PARSIPPANY, N.J. — Armco Inc.'s just completed two-year financial overhaul has dramatically improved the balance sheet of the long struggling steel producer, eliminating more than $1 billion in total debt and other obligations, and has allowed it to tap the capital markets once again.

The ambitious financial restructuring, set in motion in early 1985, has been very successful, according to several institutional investors and Wall Street analysts who follow the company.

"We have come a long way toward fixing the balance sheet and a long way toward fixing the basic business," said Wallace B. Askins, Armco's chief financial officer and executive vice president. "We still have lots to do."

Armco has slashed its heavy debt load, boosted its cash position, replaced high-interest debt, sold off poor-performing or ill-fitting assets and shut plants, and in the process gained a good measure of financial flexibility. Flush with that accomplishment, Armco is scouting for acquisitions, looking for improved terms from its bankers and rethinking what the Armco of the future will look like. Chairman Robert E. Boni is also considering a merger.

"We think they have made immense progress in strengthening their financial position," said Charles Bradford, vice president at Merrill Lynch Capital Markets, New York. "They're getting better recognition now because of their progress."

So far, Armco's financial shape-up campaign has paid off. The company has:

- amassed about $350 million in cash;
- eliminated more than $1 billion in total debt and other obligations, including about $800 million in off-balance-sheet debt. The percentage of debt to total capitalization was 45.8% at the end of June, compared with 56% at the end of 1986;
- negotiated a $75 million revolving credit line through 1988, with an eye toward negotiating an even bigger line with better terms soon;
- reached agreement with virtually all its private debtholders to exchange Armco's equity for debt. The exchanges avoided the need to use cash for debt repayment and added $135 million to Armco's shareholder's equity;
- generated more than $700 million in proceeds from asset sales, which was used to pay down debt. Another $40 million to $50 million is expected from other sales this year;
- gone to the capital markets four times in less than six months, for a $175 million debt offering, two debt-for-equity swaps, and a preferred stock sale in the secondary market. All the offerings were oversubscribed. The securities have been selling at a premium, and Armco's stock price has strengthened;
- sold off several of its troubled insurance affiliates, and used the cash to strengthen the remainder, reducing their liabilities substantially; and
- improved Armco's earnings. For the first six months of 1987, Armco had net income of $88.7 million, compared with a net loss of $447.6 million for the same period last year. In the second quarter, Armco had net income of $36.2 million on sales of $719.5 million, compared with a net loss of $38.7 million on sales of $657.7 million for the same quarter 1986. It was the third consecutive quarter the company has achieved an operating profit.

While Mr. Askins and William M. Trubeck, corporate vice president and treasurer, teamed up on the financial restructuring, other Armco executives embarked on an extensive operational overhaul of the company.

Through divestments and plant closing, Armco has restructured into four smaller, decentralized business units. Its specialty steel, Latin American division and carbon steel operations are profitable. In April, Armco transferred the business and related assets of its oil field equipment segment to a joint venture equally owned by subsidiaries of Armco and USX Corp., Pittsburgh. While the joint venture suffered losses in its first quarter of operation, they were substantially less than Armco's oil field equipment division had sus-

*After taking steps to put its finances back in shape, Armco, which produces these steel coils, is considering acquisitions, mergers and other possibilities to give it a secure future.*

*Mattel's Michael McCafferty says the deal is the best option for permanent financing.*

## Companies try a first in offerings

By Brad Rudin

Union Carbide Corp. and Mattel Inc. are planning offerings of asset-backed preferred stock that would mark the first time industrial companies have used credit support to sell equity collateralized by trade receivables.

The deals likely will come to market in September, said Craig J. Goldberg, vice president at First Boston Corp., New York, which will act as lead manager on both offerings. First Boston calls the security Asset-Backed Short-Term Auction Rate Preferred stock, or STAR Preferred.

"From the issuers' point of view, to the extent that companies are not going to pay taxes, we believe that generally speaking STAR Preferred will give them the lowest possible

# Services anything but uniform

By Barry B. Burr

Both regionally and nationally, competing banks differ sharply in cash management services they offer and charges they assess, the *Pensions & Investment Age* Treasury Management Directory shows.

The directory, based on responses to questionnaires, profiles 115 U.S. and four Canadian banks, detailing major cash management services they offer.

Besides banks, the directory also features profiles of:

- Twenty-nine non-bank cash management services providers, including consulting firms;
- Fifty-three corporate cash investment managers, running more than $25 billion;
- Fifteen treasury workstation organizations, providing such systems to more than 1,000 corporations; and
- Twenty-two regional and national corporate cash management associations.

Among the banks, the profiles show:

- Some banks are adding surcharges for corporate customers paying for cash management services in fees, as cash payment is known, to discourage moves away from maintaining compensating balances.
- More banks are itemizing charges for Federal Deposit Insurance Corp. premiums. The profiles show 10 of the 41 banks that itemize began this year. In addition, Wells Fargo Bank plans to begin next year, bringing the total to 42.
- In electronic funds transfer, 60 banks plan to have capability this year to handle the CTX, or corporate trade exchange, format of the National Automated Clearing House Association.

Notably, the directory shows few regions where banks compete by offering nearly the same services and at similar prices.

In New York, the earnings credit rate of six reporting banks ranged from Bankers Trust Co.'s 4.87% to Chemical Bank's 5.73%. Two banks didn't disclose their rates.

In Florida, Southeast Bank, Miami, offers the most major services (15), while Florida National Bank, Jacksonville, offers the fewest (seven) of five major banks in the state. Sun Bank, Orlando, offers 12; Barnett Bank, Jacksonville, 11; and First Union National Bank of Florida, Jacksonville, 10.

In the area of fees vs. compensating balances:

- Twenty-seven percent of corporate clients on average pay banks for cash management services in fees, while 73% pay in compensating balances, according to 90 reporting banks.
- Thirteen banks assess a surcharge for corporate customers paying for cash management services in fees rather than compensating balances.

Among highlights of differences in banking services and charges, the profiles show:

- AmeriTrust Bank, Cleveland; National City Bank, Cleveland; and Fifth Third Bank, Cincinnati, began itemizing FDIC premiums this year, the first Ohio banks to do so. None of the major banks in Massachusetts, Connecticut or Rhode Island itemize FDIC premiums.
- In California, the amount of compensating balances the five major banks required their corporate customers to maintain to offset $100 in cash management charges varied by almost $8,000. As of March 31, the amount was: $20,008 at First Interstate Bank of California, Los Angeles; $21,000 at First Interstate Bank Ltd., Los Angeles; $21,467 at Wells Fargo Bank, San Francisco; $23,935 at Bank of America, San Francisco; and $27,734 at Security Pacific National Bank, Los Angeles.
- In Chicago, the earnings credit rate as of March 31 varied by 80 basis points — 4.93% at First National Bank of Chicago; 5.73% at Harris Trust & Savings Bank; 5.75% at ABN LaSalle National Bank; and 5.85% at Continental Illinois National Bank & Trust Co. Northern Trust Co. declined to disclose its rate.
- The highest earnings credit rate was 5.95% at First Union National Banks of Georgia, North Carolina and South Carolina; the lowest was 4.49% at Central Trust Co., Cincinnati. The average for all banks was 5.53%.
- The highest compensating balance to offset $100 in banking charges was $30,303 at Old Kent Bank & Trust Co., Grand Rapids, Mich.; the lowest was $19,788 at First Union National Banks. The average for all banks was $23,379.
- Of Detroit's three major banks, Comerica Bank and Manufacturers National Bank offer controlled disbursement reports by 10.30 a.m., while only Comerica offers

# Book-entry transactions gaining trust with firms

By Chuck Paustian

Exxon Credit Corp. and John Deere Credit Co. plan to switch part of their commercial paper borrowings to a book-entry basis, joining a growing number of companies using the electronic issuing method to lower cost and simplify administration.

New York-based Exxon Credit expects to begin issuing book-entry commercial paper later this year. Company executives hope to convert between 20% and 25% of commercial paper borrowings by the first quarter of 1988, said John F. Williams, treasurer of the Exxon Corp. unit. As of June 30, Exxon Credit had $1.25 billion of commercial paper outstanding.

"With any system that provides a direct link between the investor, or the investor's bank, and the issuer, the potential for fails is reduced dramatically," Mr. Williams said. For example, with conventional commercial paper, there is the risk of the physical notes being damaged, lost or misprinted.

At John Deere Credit, Moline, Ill., Claudia Milse, coordinator of commercial paper sales, said the company is examining book-entry issuing.

"The whole industry is going in that direction," said Ms. Milse. "You have to do everything you can to keep up with the industry."

As of June 30, the Deere & Co. unit had about $1 billion in commercial paper outstanding.

She said a timetable for the switch to book-entry commercial paper has yet to be decided.

Ester Lord, senior vice president and assistant treasurer at Associates Corp. of North

# Banks in no hurry for accounting standard

By Hank Berkowitz

Despite being unveiled with much fanfare almost a year ago, use of the National Corporate Cash Management Association's account analysis standard still may be a way off.

"Corporations have been calling us every day, asking where is it," said Raymond L. Cushing, corporate cash manager at Nordson Corp., Westlake, Ohio, and chairman of the NCCMA Standards Committee.

The group wasn't expected to adopt the final version of the standard and an accompanying glossary until late July, and the results won't be released until the New York Cash Exchange conference in September.

Few banks have plans to immediately adopt the standard that was unveiled in November by the NCCMA at its Anaheim, Calif., conference, a *Pensions & Investment Age* survey of 120 major cash management banks shows.

The *P&I Age* survey found only 11 banks with plans to introduce the standard this year, if it's available; 31, next year; and 44, in 1989 or later. Officials of the remaining banks said they are unsure of their plans.

But because of NCCMA delays in producing the final version, several representatives of the banks that indicated they would adopt the standard this year revised their estimates to mid- or late 1988.

A bank's adoption doesn't mean, however, the standard will replace its current account analysis format; a bank may offer the standard as only an option.

NCCMA executives believe corporate treasury executives would welcome the standard, making it easier to evaluate and compare the charges of each of their banks. But none of the bankers interviewed reported any demand for the standard from corporate customers.

The standard, or prototype as the NCCMA describes it, will provide a uniform format for presenting account analysis statements — an itemized, generally monthly, listing of cash management services and charges that banks will issue to their corporate clients.

There have been some delays with the NCCMA adoption, Mr. Cushing conceded. "We want to make sure it's a consensus document," agreeable to banks and corporations, he said. "We want to provide the industry with something everyone can use."

*Raymond L. Cushing says the NCCMA wants to ensure the standard is acceptable.*

"Banks don't want to commit themselves yet" to using the standard, added Jeff Jankowski, treasurer of Howmet Turbine Components Corp., Greenwich, Conn.

"A lot of banks are still adjusting to the fact that customers are actually interested in what's on their account analysis statements," said Randall Wilds, bank relations supervisor at Ford Motor Co., Dearborn, Mich.

Mercantile Bank, St. Louis, plans to offer the NCCMA standard only on a "manual and requested basis," said Leo M. Malone, senior vice president and division executive.

"I'm not gearing up to change our software to meet the NCCMA standard," Mr. Malone said. "It's just too expensive." Instead, the bank will use a personal computer to prepare statements on request, and at no charge.

None of Mercantile's customers has inquired about the NCCMA standard, he added.

"I think it indicates they (the NCCMA) haven't pushed their local chapter to push it," he said.

Mr. Malone said Mercantile's statement already incorporates much of the NCCMA's.

"The banking industry isn't that enamored with the NCCMA

# Announcing the Dawn of a New Era in Corporate Cash Management.

## Introducing Scudder Treasurers Trust.

## A powerful new tool for effective cash management.

Scudder is introducing the cash management account that will change the way your company invests its cash reserves.

It's Scudder Treasurers Trust, a complete line-up of cash management portfolios available exclusively to corporate and institutional investors.

With Treasurers Trust, you can choose money market, tax-free or qualified dividend income.

You can custom-tailor a sophisticated, professionally-managed, short-term portfolio, balancing stability and higher return.

Most important, you enjoy daily liquidity. And you can reduce the costs of your current investment program by commanding the narrowed spreads and higher rates that contribute to better returns.

Treasurers Trust will save you valuable time and simplify your recordkeeping with automatic confirmation of each transaction and comprehensive monthly statements.

And Treasurers Trust will save you money because you pay no commissions or 12(b)-1 fees.

Professional management and credit analysis are provided by Scudder, Stevens & Clark, the firm that currently supervises over $30 billion, including $2.5 billion in liquid assets for many of the nation's largest corporations.

## Ask for a no-obligation Information Packet.

To find out more, return this coupon or call the Treasurers Trust Money Desk at 1-800-541-7703 for your free Information Packet. It has all the information you need, including a prospectus and application form.

SCUDDER TREASURERS TRUST

175 Federal Street • Boston, MA 02110

1-800-541-7703

**Please send me a Scudder Treasurers Trust Information Packet.**

For more complete information about Scudder Treasurers Trust—the new sales-commission-free cash management account—call or write Scudder Fund Distributors, Inc. for a free prospectus detailing management fees and expenses. Please read it carefully before you invest or send money. Minimum initial investment: $100,000.

"Before we discovered INTERPLEX, we had signed up for another financial management system.

It looked great on paper. All the functions were there. Everything seemed to be covered.

Then came the *shock*. It was only on paper. They simply could not deliver the product and we lost *one complete year*!

INTERPLEX, however, is a working system in *fact*, not theory. It's complete with the software including upgrades and enhancements. Plus the knowledgeable people to support it on a continual basis.

When we installed INTERPLEX, we found to our amazement, we were on-line in only *three days*.

But, most importantly, the INTERPLEX people responded to our needs and requirements rather than saying 'Here is the software package available.'

That's the kind of *support* that makes all the difference.

It's a lesson we learned the hard way."

**What INTERPLEX offers:**

INTERPLEX is a microcomputer-based management system that gathers, formats, stores, retrieves and manipulates your corporate financial information. Automatically.

The system has been designed to be totally flexible to your corporation's technological and informational needs—ranging from the most basic to the most complex.

**How INTERPLEX differs:**

In a field rife with over-promises, false starts and support problems, INTERPLEX has carved out a unique reputation as the system that *delivers*.

We have the expertise, the people and the installation and support capabilities to make your venture into information automation painless. And rewarding.

**The INTERPLEX promise:**

As the standard in the field of treasury automation, INTERPLEX will put you and keep you in the vanguard of information management.

Spurred on by the commitment of Manufacturers Hanover, we will continue to evolve. And to lead.

Enter the world of INTERPLEX. Contact George Chelius, Vice President and Manager of Sales, Financial Services Group, at 212-808-0292.

# THE BEST TRAINED CASH MANAGERS ALL COME FROM THE SAME UNIVERSITY.

It may not have an ivy-covered campus or even a football team.

But Cash Management University® turns out the highest quality cash managers around.

That's because Cash Management University is a unique banking school within Mellon Bank. It offers continuing education for over 500 Mellon professional cash managers and bank personnel.

Along with their full time jobs at Mellon, these "students" take an average of six courses a year.

The full year's schedule includes over 60 courses designed to keep our cash managers up to date on the latest technology. They study everything from traditional collection and disbursement systems to advanced electronic payment and information reporting services.

Of course, a quality cash management education means more than just learning about the latest technology. It also means learning how to apply it to meet our customers' needs.

To do that, we make sure every course includes special emphasis on customer service.

What's more, most new representatives spend at least a year on the job under the guidance of an experienced cash management officer. This way, our cash managers not only learn to recognize customer problems, but also the best ways to solve them.

It's simply another one of the benefits of a quality education—not only for the students of Cash Management University, but also for our customers.

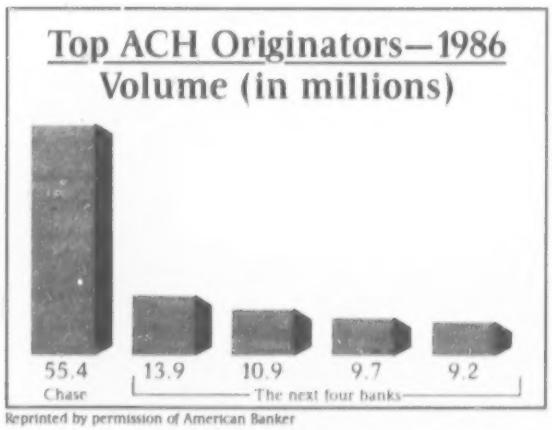
PIPER report: Sept. 7

# It takes more to remain in electroni



Reprinted by permission of American Banker

## "Chase Remains Clearing House Volume Leader"

**–American Banker, March 17, 1987**

American Banker's 1986 figures have just been released and Chase remains the leader in volume of electronic payments. In fact, Chase initiates more payments than the next four banks combined. But we never take our leadership for granted.

How we remain the leader all stems from a single idea: quality. It's in everything we do.

It starts with a commitment to service.

# than volume the leader c payments.

We tailor our cash management services to work with your business needs.

We've developed our own Automated Clearing House in order to provide you with greater efficiency and direct electronic access to the Chase electronic banking system. It allows you to pay suppliers, concentrate funds and automatically process intercompany and consumer payments.

Quality service includes advanced innovation in technology. We use hardware and software dedicated only to EFT processing. And a computerized system that provides constant backup and extensive storage capacity to meet your volume needs.

But the most important ingredient to making the technology work is people.

At Chase, our dedicated team of professionals carries years of experience in cash management products and services. Our people offer the skills to solve your most complex cash management needs.

With commitments like these, it's no wonder we're still the world's largest dollar transfer bank. And that's why you'll never see us taking our leadership for granted.

## Managers

### Aetna Capital Management
*151 Farmington Ave., Hartford, Conn. 06156; (203) 636-6226*

**Short-term funds:** $966,000,000
**Clients:** 20
**Investment style:** Managers aggressively alter the account's maturity based on interest rate outlook. Account weightings are moved from overvalued sectors to undervalued sectors to compound investment gains. Managers monitor portfolio total return performance to ensure adherence to strict risk control guidelines.
**Instruments/strategies:** Govern-

ment money market; taxable and tax-exempt commercial paper; municipal or other tax-exempt securities; adjustable-rate preferred stocks; and auction-rate preferred stocks.

**Fees:** 0.6% for the first $5 million in mean assets; 0.35% for the next $20 million; then 0.125%.

**Client contact:** T. Jerald Moore, president.

### Alpine Capital Management

*650 S. Cherry St., Suite 700, Denver, Colo. 80222; (303) 320-3944*

**Short-term funds:** $12,000,000
**Clients:** 55

**Investment style:** Managers take an asset allocation approach, maximizing the yield curve and spreads, and emphasizing preservation of capital during adverse market conditions.

**Instruments/strategies:** Government money market; municipal or other tax-exempt securities; straight-rate and adjustable-rate preferred stocks.

**Fees:** 1.5% annually, declining 0.1% for each $250,000 to a minimum annual fee of 0.7%.

**Client contact:** Jim Morrill, principal.

### BA Investment Management Corp.

*555 California St., San Francisco, Calif. 94104; (415) 622-6770*

**Short-term funds:** $1,500,000,000
**Clients:** 55, including A.F.G. Industries; Mattel; Computer Sciences.

**Investment style:** The firm is an active manager, consistently adding value while controlling risk to achieve client objectives of preservation of principal, liquidity and performance.

**Instruments/strategies:** Government money market; foreign-denominated securities; taxable commercial paper (prime, Euro-commercial); tax-exempt commercial paper; bank loan participation agreements; municipal or other tax-exempt securities; dividend capture strategies; auction-rate preferred stocks.

**Fees:** 0.15% annually.

**Client contact:** A.L. McNitt Jr., vice president.

### Bartlett & Co.

*36 E. Fourth St., Cincinnati, Ohio 45202; (513) 621-4612*

**Short-term funds:** $75,000,000
**Clients:** 95

**Investment style:** The firm runs the Bartlett Corporate Cash Mutual Fund, which is diversified in different instruments, as well as separate accounts in dividend capture and other strategies.

**Instruments/strategies:** Government money market; foreign-denominated securities; taxable commercial paper (prime, not prime/unrated and Euro-commercial); tax-exempt commercial paper; municipal or other tax-exempt securities; dividend capture strategies; straight-, adjustable- and auction-rate preferred stocks; common stocks; stock index futures/options; individual stock options; and interest rate futures/options.

**Client contact:** Larry Lutz, director of marketing.

### The Boston Co./Boston Safe Deposit & Trust Co.

*1 Boston Place, Boston, Mass. 02106; (617) 722-7578*

**Short-term funds:** $300,000,000
**Clients:** 8

**Investment style:** The firm uses active management and a flexible fee structure. Yield, liquidity and safety parameters are strictly observed.

**Instruments/strategies:** Government money market; foreign-denominated securities; taxable commercial paper (prime); municipal or other tax-exempt securities; and adjustable-rate preferred and auction-rate preferred stocks.

**Fees:** 10 to 25 basis points, depending on size.

**Client contact:** Peter B. McManus, vice president.

### Brown Brothers Harriman

*59 Wall St., New York, N.Y. 10005; (212) 483-1818*

**Short-term funds:** $1,600,000,000
**Clients:** 13

**Investment style:** The firm actively manages high-quality, highly liquid, short-term assets, including U.S. Treasury, agency, corporate and money-market securities.

**Instruments/strategies:** Government money market; taxable commercial paper (prime and Euro-commercial); and straight-, adjustable- and auction-rate preferred stocks.

**Fees:** 0.15% annually on the first $50 million; 0.125% on the next $100 million; and 0.1% on excess of $150 million, with a minimum of $50,000 per year.

**Client contact:** Paul A. Legvold, manager.

### S.A. Bush Consolidated Cash Management Accounts/Interstate

*4830 W. Kennedy Blvd., Suite 690, Tampa, Fla. 33609; (813) 875-8854*

**Short-term funds:** $10,000,000
**Clients:** 15, including Milford Construction and Poe and Associates.

**Investment style:** Managers use the Bush/Interstate Corporate Cash Management Index; proprietary computer screens to search for price discrepancies in income-producing securities; individualized tax strategies; and a proprietary model for specialized short-term asset allocation. Minimum for commingled accounts is $50,000; minimum for individual accounts is $5 million.

**Instruments/strategies:** Municipal or other tax-exempt securities; dividend capture; straight-, adjustable— and auction-rate preferred stocks; common stocks; convertible preferred stocks and depository units.

**Fees:** No advisory fees. There are soft-dollar fees for transactions at discounted institutional rates.

**Client contact:** Stephen A. Bush, sales vice president.

### Capitoline Investment Services Inc.

*919 E. Main St., Richmond, Va. 23219; (804) 782-7?51*

**Short-term funds:** $225,000,000
**Clients:** 63

**Investment style:** Managers pay primary attention to analysis of the yield curve and probable movements of short-term rates, actively positioning maturities to best take advantage of such movements. Particular attention also is paid to special situations that give rise to attractive short-term yield opportunities. The firm also offers a dividend capture program, using a deep-in-the-money buy/write strategy and dynamic hedging with index options.

**Instruments/strategies:** Government money market; taxable commercial paper (prime); tax-exempt commercial paper; municipal or other tax-exempt securities; dividend capture; adjustable-rate preferred stocks; common stocks; stock index options/futures; and individual stock options.

**Fees:** Vary with type of service.

**Client contact:** William E. Heisler, vice president-director of marketing.

### W.P. Carey & Co.

**Fees:** Load-fund management fees start at 2%.

**Client contact:** Kathie Tricarico, second vice president.

### Chase Lincoln First Bank

*1 Lincoln First Square, Rochester, N.Y. 14643; (716) 258-5220*

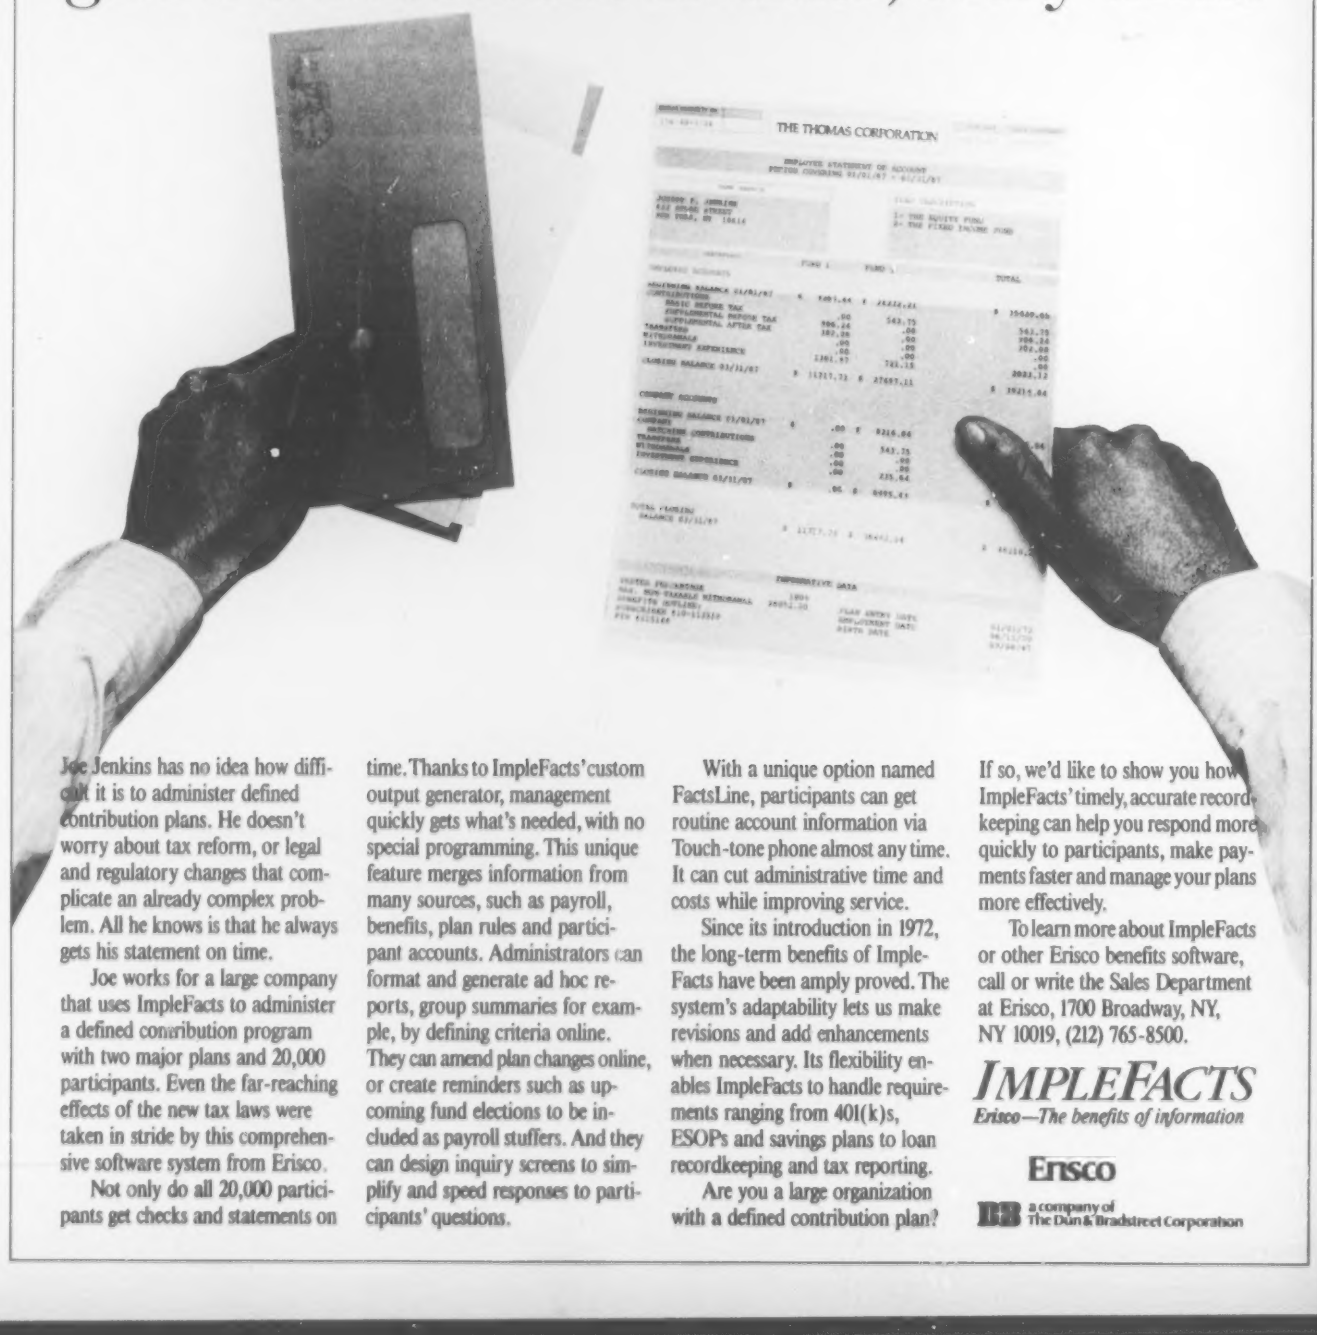
**Short-term funds:** $900,000,000
**Clients:** 60

**Investment style:** The firm uses active trading, interest rate judgments and a wide range of short-term vehicles.

**Instruments/strategies:** Govern-

*ImpleFacts—The Defined Contribution Administration System*

# Tax reform. Two major plans. 20,000 participants. But Joe Jenkins still gets his statement on time, every time.



Joe Jenkins has no idea how difficult it is to administer defined contribution plans. He doesn't worry about tax reform, or legal and regulatory changes that complicate an already complex problem. All he knows is that he always gets his statement on time.

Joe works for a large company that uses ImpleFacts to administer a defined contribution program with two major plans and 20,000 participants. Even the far-reaching effects of the new tax laws were taken in stride by this comprehensive software system from Erisco.

Not only do all 20,000 participants get checks and statements on time. Thanks to ImpleFacts' custom output generator, management quickly gets what's needed, with no special programming. This unique feature merges information from many sources, such as payroll, benefits, plan rules and participant accounts. Administrators can format and generate ad hoc reports, group summaries for example, by defining criteria online. They can amend plan changes online, or create reminders such as upcoming fund elections to be included as payroll stuffers. And they can design inquiry screens to simplify and speed responses to participants' questions.

With a unique option named FactsLine, participants can get routine account information via Touch-tone phone almost any time. It can cut administrative time and costs while improving service.

Since its introduction in 1972, the long-term benefits of ImpleFacts have been amply proved. The system's adaptability lets us make revisions and add enhancements when necessary. Its flexibility enables ImpleFacts to handle requirements ranging from 401(k)s, ESOPs and savings plans to loan recordkeeping and tax reporting.

Are you a large organization with a defined contribution plan? If so, we'd like to show you how ImpleFacts' timely, accurate recordkeeping can help you respond more quickly to participants, make payments faster and manage your plans more effectively.

To learn more about ImpleFacts or other Erisco benefits software, call or write the Sales Department at Erisco, 1700 Broadway, NY, NY 10019, (212) 765-8500.

*8 Sound Shore Drive, Greenwich, Conn. 06830; (203) 629-2090*

**Investment style:** The firm actively manages short-term and intermediate portfolios on a total return basis, tailored to each client's needs.
**Instruments/strategies:** Government money market; foreign-denominated securities; taxable commercial paper (prime, not prime/unrated, Euro-commercial); tax-exempt commercial paper; municipal or other tax-exempt securities; adjustable- and auction-rate preferred stocks; and interest rate futures/options.
**Fees:** 20 basis points on the first $100 million, 15 basis points thereafter.
**Client contact:** Thomas E. O'Connor, managing partner.

### Gateway Investment Advisers Inc.

*400 TechneCenter Drive, Cincinnati, Ohio 45150; (513) 248-2700*

**Short-term funds:** $180,000,000
**Clients:** 30, including Central Illinois Public Service; Eagle-Picher; Guilford Mills; and Lee Data.
**Investment style:** Gateway Investment Advisers follows a classic dividend capture strategy: call options are sold against positions and index put options are used to reduce downside risk. Diversification of assets is stressed.
**Instruments/strategies:** Dividend capture; common stocks; stock index futures/options; individual stock options.
**Fees:** 1.2% of asset value.
**Client contact:** Peter W. Thayer, executive vice president.

### Huntington Advisers Inc.

*251 S. Lake Ave., Suite 600, Pasadena, Calif. 91101; (213) 681-3700*

**Investment style:** Multi-currency cash equivalents are emphasized. Investment are actively managed for maximum total return with minimal credit and maturity risk.
**Instruments/strategies:** Government money market; foreign-denominated securities; taxable commercial paper (prime, not prime/unrated, Euro-commercial).
**Fees:** 0.65%
**Client contact:** Donald P. Gould, president.

### Jefferies & Co.

*55 W. Monroe, Suite 2500, Chicago, Ill. 60603; (312) 750-4949*

**Short-term funds:** $300,000,000
**Clients:** 50
**Investment style:** Dividend capture.
**Instruments/strategies:** Dividend capture; straight-rate preferred stocks; interest rate futures/options.
**Fees:** Brokerage commissions.
**Client contact:** John M. Eberle, senior vice president and national manager-corporate investment group.

### Laidlaw Capital Management

*275 Madison Ave., New York, N.Y. 10016; (212) 949-5407*

**Short-term funds:** $5,000,000
**Clients:** 5, including Zeus Scientific and Federal Bronze Products.
**Investment style:** Tailored to client requirements.
**Instruments/strategies:** Government money market; foreign-denominated securities; municipal or other tax-exempt securities; dividend capture; straight- and adjustable-rate preferred stocks; common stocks.
**Fees:** 0.4% to 0.5%
**Client contact:** W.L. Twiste, vice chairman.

### The Leonard Management Group

*407 W. Avon Road, Avon, Conn. 06001; (203) 673-3237*

**Short-term funds:** $20,000,000
**Clients:** 10
**Investment style:** Tailored to client needs.
**Instruments/strategies:** Government money market; taxable commercial paper (prime, not prime/unrated); tax-exempt commercial paper; bank loan participation agreements; municipal or other tax-exempt securities; dividend capture; straight- and adjustable-rate preferred stocks; common stocks; individual stock options.
**Fees:** 0.5% annually of assets under management, collected 0.125% quarterly.
**Client contact:** James P. Leonard, president.

### Liberty Capital Management

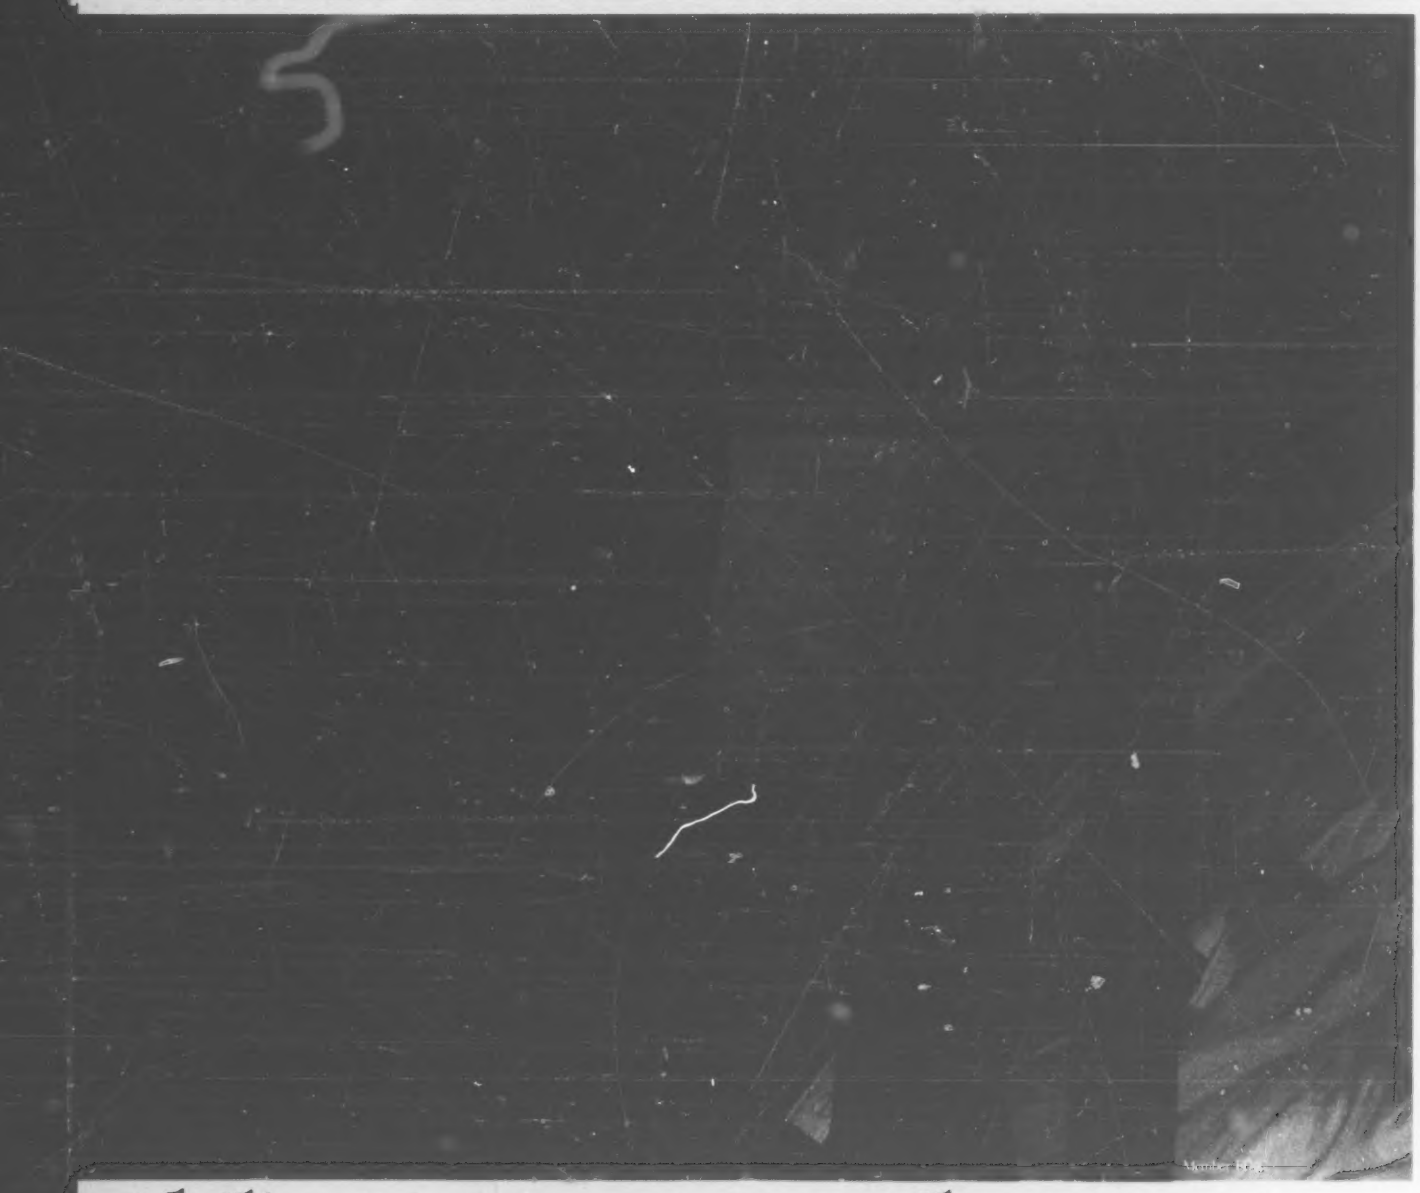
*11 Broadway, Suite 1066, New York, N.Y. 10004; (212) 509-0550*

**Short-term funds:** $194,000,000
**Clients:** 43, including Southern Life Insurance; Blue Cross/Blue Shield of Minnesota; and Hawaii Medical Services Association.
**Investment style:** Liberty Capital invests alternately in cash and four-year Treasury notes with the goal of producing capital gains in the notes. Investment decisions are based on a quantitative program that focuses on the price movements of T-notes. ARPS portfolios also are available.
**Instruments/strategies:** Government money market and adjustable-rate preferred stocks.
**Fees:** 0.5% on up to $20 million; 0.4% on the next $30 million; 0.3% on amounts more than $50 million.
**Client contact:** Susan B. Thompson, marketing manager.

### J.P. Morgan Investment Management Inc.

*9 W. 57th St., New York, N.Y. 10019; (212) 826-7296*

**Short-term funds:** $1,145,000,000
**Clients:** 18
**Investment style:** Accounts are actively managed, using a balanced approach to trading and risk management. Three elements are stressed: applying fundamental analysis to time market moves, control maturity structure and allocate assets; diversifying across a broad range of fixed-income investments to increase returns and lower portfolio risk; using rigorous credit analysis to maintain high credit quality.



Ability To Master Detail Of The Big Picture.

### The Putnam Cos.
*1 Post Office Square, Boston, Mass. 02109; (617) 292-1200*

**Short-term funds:** $1,100,000,000
**Clients:** 6 separate accounts, two mutual funds.
**Investment style:** The firm invests at least 80% of its assets in relatively high-yielding common and preferred stocks, including investment-grade adjustable-rate preferred stocks. Ordinarily, options will be written on the common stocks to improve return and increase their stability. Common stocks on which options are not written basically will be utility common stocks, which are used to increase the qualifying portion of the income stream. They also may be bought as part of a dividend capture program.
**Instruments/strategies:** Dividend capture; adjustable- and auction-rate preferred stocks; common stocks; individual stock options.
**Fees:** 0.75% on the first $20 million; 0.5% on the next $20 million; 0.375% on the next $20 million.
**Client contact:** George H. Pendergast, senior vice president-institutional marketing.

### Rampart Investment Management Co. Inc.
*Exchange Place, Suite 2800, Boston, Mass. 02109; (617) 742-7400*

**Short-term funds:** $200,000,000
**Clients:** 14
**Investment style:** The firm invests in a diversified portfolio of high-quality common stocks hedged with in-the-money call options. No more than 3% is invested in any one issuer. Market index puts are purchased for market protection.
**Instruments/strategies:** Dividend capture; common stocks; stock index futures/options; individual stock options.
**Fees:** 1.5% on first $10 million; 1.25% on the next $20 million; 1% over $30 million.
**Client contact:** R. Ronald Guerriero, senior vice president.

### Ross Capital Corp.
*485 Madison Ave., New York, N.Y. 10022; (212) 308-9860*

**Short-term funds:** $350,000,000
**Clients:** 20
**Investment style:** Ross Capital uses a dividend capture strategy designed to minimize portfolio volatility and maintain liquidity, while providing after-tax returns of 1.8 to 2.5 times the after-tax, 90-day CD rate. The typical portfolio contains approximately 35 high-yielding, investment-grade common stocks with in-the-money call options written against the shares. Market index put options are purchased to provide additional portfolio protection.
**Instruments/strategies:** Dividend capture; common stocks; stock index options; individual stock options.
**Client contact:** Pamela Clement, executive vice president.

### M.D. Sass

**Short-term funds:** $275,000,000
**Clients:** 13
**Investment style:** The firm manages secondary reserve portfolios through its Protected Dividend Income Program. This strategy consists of a diversified equity portfolio; the purchase of dividend paying common stocks; the sale of qualified covered call options against the stocks to earn premium income and to reduce the risk of price declines. The entire portfolio is then hedged through the purchase of index puts or the sale of index calls. The objective is to earn an after-tax rate of return that is equal to the pre-tax return on Treasury bills.
**Instruments/strategies:** Taxable commercial paper; municipal or other tax-exempt securities; dividend capture; auction-rate preferred stocks; common stocks; stock index futures/options; individual stock options.
**Fees:** For equity and balanced accounts: the greater of $100,000 or 1% of the first $10 million; 0.75% of the next $10 million; 0.5% of the remainder. For fixed-income accounts: the greater of $50,000 or 0.5% of the net assets.
**Client contact:** Thomas J. Mackell Jr., senior vice president.

### Schroder Capital Management International
*1 State St., New York, N.Y. 10004; (212) 269-6500*

**Short-term funds:** $200,000,000
**Clients:** 8
**Investment style:** Schroder Capital actively manages portfolios in the context of tight investment guidelines geared toward the preservation of principal, the maintenance of liquidity and the maximization of after-tax return.
**Instruments/strategies:** Government money market; foreign-denominated securities; taxable commercial paper (prime); tax-exempt commercial paper; municipal or other tax-exempt securities; and auction-rate preferred stocks.
**Client contact:** John J. Mahar, first vice president.

### Scudder, Stevens & Clark
*345 Park Ave., New York, N.Y. 10154; (212) 326-6515*

**Short-term funds:** $2,100,000,000
**Clients:** 36
**Investment style:** Scudder Stevens & Clark Ltd. actively manages short-term portfolios to achieve excess returns over a buy-and-hold strategy. Market sectors and maturities are shifted according to the firm's assessment of the yield curve and sector spreads. A proprietary opportunity/risk analysis is at the core of this approach.
**Instruments/strategies:** All money market instruments; taxable, tax-exempt and tax-preferenced as well as securitized instruments and options and futures.
**Client contact:** Richard R. Daniels, vice president-investments.

### The Alan G. Seidner Co.
*201 S. Lake Ave., Suite 705, Pasadena, Calif. 91101; (818) 795-2251*

**Short-term funds:** $250,000,000
**Clients:** 35, including R&B; Bixby Ranch; Presbyterian Intercommunity Hospital.
**Investment style:** The firm, a fixed-income manager, seeks the best relative values based on yield spread and yield curve analysis.
**Instruments/strategies:** Government money market; taxable commercial paper (prime, Euro-commercial); tax-exempt commercial paper; bank loan participation agreements; municipal or other tax-exempt securities; adjustable- and auction-rate preferred stocks.
**Fees:** For Money Market Portfolio, with an average weighted maturity under one year: 0.15% on the first $25 million; 0.125% on the next $25 million; and 0.1% thereafter. For Fixed-Income Portfolio: 0.4% on the first $10 million; 0.35% on the next $40 million; 0.3% on the next $50 million; and 0.25% over $100 million.
**Client contact:** Alan G. Seidner, president.

### Twenty-First Securities
*805 Third Ave., New York, N.Y. 10022; (212) 308-4626*

**Short-term funds:** $500,000,000
**Clients:** 75
**Investment style:** Dividend capture and pure arbitrage.
**Instruments/strategies:** Dividend capture; common stocks with options only; stock index futures/options; individual stock options; shorting stocks.
**Fees:** Commissions only.
**Client contact:** Robert Gordon, president.

### The Vanguard Group of Investment Companies
*1200 Morris Drive, Wayne, Pa. 19087; (215) 648-6023*

**Short-term funds:** $618,000,000
**Clients:** 658
**Investment style:** Clients decide among a range of mutual funds.
**Instruments/strategies:** Government money market; taxable and tax-exempt commercial paper; municipal or other tax-exempt securities; straight-, adjustable- and auction-rate preferred stocks; common stocks.
**Fees:** The firm is a no-load mutual fund company. Average expense ratios are about 0.4%.
**Client contact:** Ronald L. Cannon, vice president.

### Webster Management/Kidder Peabody & Co. Inc.
*20 Exchange Place, New York, N.Y. 10005; (212) 510-5039*

**Short-term funds:** $635,000,000
**Clients:** 22, including Fleetwood Enterprises; Heritage Communications; Reebok.
**Investment style:** Strategies emphasize consistency of total return, avoidance of unnecessary credit exposure, interest rate forecasting and a disciplined analysis of yield curve slopes and sector spreads to determine optimal maturity choices. Return enhancement strategies include dividend capture programs, index arbitrage and hedged fixed-income portfolios. Service is customized, and special-purpose money market mutual funds are available.
**Instruments/strategies:** Government money market; taxable commercial paper (prime); tax-exempt commercial paper; municipal or other tax-exempt securities; dividend capture; straight-, adjustable- and auction-rate preferred stocks; common stocks; stock index futures/options; individual stock options; interest rate futures/options.
**Fees:** Vary according to assets managed and strategies used.
**Client contact:** Richard D. Shaffer, vice president.

### Weiss Asset Management
*1 State St., Hartford, Conn. 06103; (203) 247-5161*

**Investment style:** Dividend capture.
**Client contact:** Kevin Bradley, partner.

### Wertheim Asset Management
*230 Park Ave., New York, N.Y. 10169; (212) 370-6140*

**Short-term funds:** $33,000,000
**Clients:** 3
**Investment style:** The approach emphasizes total return through active management. The primary strategy is interest rate anticipation, followed by sector selection. Use of standard cash equivalents is combined with creative and new vehicles to enhance returns.
**Instruments/strategies:** Government money market; taxable commercial paper (prime); tax-exempt commercial paper; municipal or other tax-exempt securities; straight-, adjustable- and auction-rate preferred stocks.
**Fees:** 0.25%.
**Client contact:** Steven W. Golann, senior vice president.

### Wharton Asset Management
*595 Madison Ave., New York, N.Y. 10022; (212) 888-7680*

**Short-term funds:** $175,000,000
**Clients:** 22
**Investment style:** Wharton Asset Management invests in a diversified portfolio of utility common stocks and preferred stocks. Futures and options are used to hedge adverse moves in the stock market and rises in interest rates. Capital gains are generated through deep-in-the-money buy/writes, spreads and synthetics.
**Instruments/strategies:** Dividend capture; straight-rate preferred stocks; common stocks; stock index futures/options; individual stock options; interest rate futures/options; shorting stocks.
**Fees:** Based on assets under management.
**Client contact:** Arnold L. Mintz, executive vice president.

## Treasury Workstations

### ADS Associates Inc.
*23586 Calabasas Road, Suite 200, Calabasas, Calif. 91302; (818) 347-9100*

**Contact:** Barry T. Bolger, vice president-marketing
**Applications and clients:**
**Investment/debt:** 180
**Balance reporting:** 200
**Funds transfer — ACH, wire:** 200
**General ledger:** 180
**Worksheet:** 100
**Reconciliation:** 160

The cost of the system is $10,000, which includes all packages except the general ledger interface which is $4,200. The annual maintenance fee is 12% of the total system cost. The workstation was developed in-house.

### Bank of America
*P.O. Box 37000, Dept. 5529, San Francisco, Calif. 94137; (415) 624-2847*

**Contact:** Abdul Premji, vice president
**Applications and clients:**
**Investment/debt:** 67
**Balance reporting:** 375
**Funds transfer — ACH, wire:** 22
**General ledger:** 20
**Worksheet:** 212
**Reconciliation:** 40
**Foreign exchange:** 7

The prices for the applications ranges from $1,500 to $17,500 each. The annual maintenance fee is 1.5% of the software fee. The workstation was developed in-house and by ADS Associates and Swallow business.

### Byad Inc.
*85 W. Algonquin Road, Arlington Heights, Ill. 60005; (312) 228-3400*

**Contact:** Jeff Fischer, president
**Applications and clients:**
**Investment/debt:** 5
**Balance reporting:** 40
**Funds transfer — ACH, wire:** 20
**General ledger:** 15
**Worksheet:** 40
**Reconciliation:** 15

The price for each application ranges from $3,400 to $6,000. The workstation was developed in-house.

### Chemical Bank Financial Services Division
*380 Madison Ave., 13th Floor, New York, N.Y. 10017; (212) 309-5741*

**Contact:** Alphonse J. Briand Jr., vice president-micro products manager
**Applications:**
**Investment/debt**
**Balance reporting**
**Funds transfer — ACH, wire**
**Trade services**
**General ledger**
**Worksheet**
**Commercial paper issuance**

Prices will be quoted upon inquiry. The annual maintenance fees are 1.5% of the software price. The workstation was developed by ICM.

### First Interstate Bank
*P.O. Box 53456, Phoenix, Ariz. 85702-3456; (602) 271-1297*

**Contact:** Kathy Morris, assistant vice president, or Barbara Stemm, technical support representative.
**Applications and clients:**
**Investment/debt:** 24
**Balance reporting;** 30
**Funds transfer — ACH, wire:** 16
**General ledger:** 10
**Worksheet:** 30
**Reconciliation:** 15

The price for each application ranges from $450 to $1,800. The basic package, which includes cash and banking, debt, investment and bank relationship, costs $3,000. The cost of annual maintenance depends on the customer's package. The workstation was developed by ADS.

### First Tennessee Bank
*165 Madison Ave., Memphis, Tenn. 38103; (901, 523-4773*

**Contact:** Philip Brooks, corporate products officer
**Applications and clients:**
**Investment/debt:** 1
**Balance reporting:** 1
**Funds transfer — ACH, wire:** 1
**Worksheet:** 1
**Lotus 1-2-3 interface:** 1

The investment/debt package is priced at $2,500. The automated treasurer core modules are part of the basic balance reporting package, priced at $4,500. The annual maintenance is $300. The workstation was developed by Chase Access Services.

### Florida National Bank
*225 Water St., Jacksonville, Fla. 32201; (904) 359-5042*

**Contact:** J. Stewart Baker, senior vice president.

Florida MicroLink has three applications — balance reporting, funds transfer instructions and general ledger interface — that are installed as a package; it is non-modular. Corporations are charged based on transactions generated. Forty corporations use the workstations. Annual maintenance fees range between $120 and $450. The workstation was developed by Chemical Technologies.

### Harris Trust and Savings Bank
*111 W. Monroe, P.O. Box 755, Chicago, Ill. 60690; (312) 461-7162*

**Contact:** William C. Brodt, corporate services officer
**Applications and clients:**
**Investment/debt:** 9
**Balance reporting:** 15
**Funds transfer — ACH, wire:** 9
**Worksheet:** 13
**Bank relationship manager:** 16

The price for each application ranges from $1,000 to $5,000 each. The annual maintenance fees are $4,530. The workstation was developed by ICM.

### ICMS/Wills-Van den Bergh
*1150 Bayhill Drive, San Bruno, Calif. 94066; (415) 583-7909*

**Contact:** Pat Wall, director of sales
**Applications and clients:**
**Investment/debt:** 19
**Balance reporting:** 29
**Funds transfer — ACH, wire:** 5
**Trade services:** 4
**General ledger:** 6
**Worksheet:** 19
**Reconciliation:** 16
**Cash accounting:** 19
**Forecast:** 11
**Cashflow budget:** 4
**Foreign exchange:** 6
**Bank relationship:** 10

The price for each application ranges from $1,000 to $7,000. Mainframe and micro versions are available. Mainframe prices are $250,000 for a global system. The annual maintenance fees are 24% of total cost of the modules. The workstation was developed in-house.

Since PNB Wrapped Up American Packaging's Management Buyout, Things Are Really Popping.

When a recent change in ownership at American Packaging required a management buyout, it was no surprise that Philadelphia National Bank's name popped up.

As a top manufacturer of flexible packaging, small bags and cartons, American Packaging was well aware of PNB's financial abilities. They'd had a strong working relationship with PNB for more than twenty years. As Stan Schottland, CEO of American Packaging put it, "Who would know our business better than our own bank?"

So PNB, working with its subsidiary, Philadelphia Capital Advisors, organized a syndicate to finance the management buyout.

It came off beautifully. Since PNB required no warrants, there was no dilution of equity. As a result, business at American Packaging is really heating up. "Best of all," said Schottland, "is PNB's continued help in our expansion."

This kind of strong, close relationship between client and bank is nothing new at The CoreStates Banks – Philadelphia National, Hamilton and New Jersey National. It's what has made us one of the nation's leaders in commercial banking.

But most importantly, it's why we should be your bank.

To find out, call Bruce F. Morgan, Vice President, at 215-629-3318.

Who knows? We could help you get your next financial move in the bag.

## Directory

**Manufacturers Hanover Trust**
*140 E. 45th St., New York, N.Y. 10017; (212) 808-0292*

**Contact:** George Chelius, vice president, sales.
**Business Manager workstation**
**Applications and clients:**
**Balance reporting:** 170
**Funds transfer — ACH, wire:** 50
**Trade services:** 25
**Worksheet:** 20
**Reconciliation:** 5

Investment/debt and general ledger interface modules are planned. The workstation was developed in-house.

**Interplex Financial Management**
**Source workstation**
**Applications and clients:**
**Investment/debt:** 104
**Balance reporting:** 126
**Funds transfer — ACH, wire:** 97
**Worksheet:** 120
**Reconciliation:** 50
**Cash ledger:** 58
**Bank relationship:** 35

The price for each application ranges from $500 to $12,000. Users can customize their own general ledger interface. The maintenance fees are 15% annually. The workstation was developed by ADS.

**PNC Financial Corp.**
*Fifth & Wood Streets, Pittsburgh, Pa. 15265; (412) 355-5095, (215) 585-6614*

**Contact:** Susan Sherrod or Charles Huffman, vice presidents.
**Applications and clients:**
**Investment:** 5
**Debt:** 6
**Balance reporting:** 12
**Funds transfer — ACH, wire:** 8
**General ledger:** 3
**User defined reporting/Lotus:** 12
**Pending module:** 7

The price range of the application modules ranges from $900 to $20,000 each. The investment and debt modules are sold separately; the worksheet module is included with balanced reporting. The annual maintenance fees are 2% of the license fee per month. The workstation was developed by ADS Associates Inc.

**Software Systems Group**
*15200 Shady Grove Road, Rockville, Md. 20850; (301) 330-2300*

**Contact:** John N. Gonzalez, president.

The firm offers MicroCTS Levels 1 and 2. Encompassed in either product are investment/debt, balance reporting, funds transfer instructions, worksheet, Sig tracking/bank relationship, text and graphics. Both products are bundled. Level 1 is priced at $4,000 with 40 users; Level 2 is priced at $8,000 with 110 users. Annual maintenance fees are 15% of the purchase price. The workstation was developed in-house.

**Southeast Bank**
*1 Southeast Financial Center, Miami, Fla. 33131; (305) 375-6687*

**Contact:** Lee Madden, assistant vice president
**Applications and clients:**

**Applications and clients:**
**Balance reporting:** 5
**Funds transfer — ACH, wire** 5
**Worksheet:** 5
**Reconciliation:** 5

The price for the package is $4,000. The maintenance fee is $500. The workstation was developed ADP.

**Wells Fargo Bank**
*595 Market St., 15th floor, San Francisco, Calif. 94163; (415) 396-7777*

**Contact:** David Kurrasch, vice president and national sales manager.

The MicroExpress is offered with various worksheets, data base programs and balance reporting services. There are 75 corporations that use the package, which costs $4,500. The annual maintenance fee is $50 per hour as needed. The workstation was developed in-house.

The Cash Pro® family of cash management services now includes an important new product. It's our CashPro Treasury System: a microcomputer based system that goes further than other systems in recognizing the fact that every customer's needs are different.

The CashPro System features a powerful integration capability that allows you to pull data from all the System's modules, rather than just a few. This enables you to easily create and analyze relationships between all facets of your treasury and cash management operations.

Our treasury management specialists help identify your needs and match them with a customized solution. Once installed, the system further allows you to customize output without the need for programming experts.

In addition to our treasury management software, we can provide a full complement of collection, disbursement, concentration and reporting services.

Learn how our CashPro System truly can streamline your treasury operation: freeing you from administrative tasks and better equipping you to make treasury management decisions. Call us at 1-800-845-8884, or contact the nearest of our 13 offices.

# Fewer pass exam given by NCCMA

**By Barry B. Burr**

NEWTOWN, Conn. — A sharp drop by corporate and government cash management practitioners led a general decline in the number of people who passed this year's certified cash manager examination.

Compared to last year, 41% fewer corporate and government practitioners in cash management passed the National Corporate Cash Management Association-sponsored exam.

Including bankers and professionals in other fields, the total number of people passing the test this year was down in absolute numbers and in percentage figures from last year.

In all, 67%, or 916, of the 1,365 people who took the examination this year passed.

Last year, 73%, or 953, of the 1,312 people who took the examination passed. (Last year's figures include 14 people who helped prepare the test and were "grandfathered" in and awarded certificates.)

Broken down by groups of those who passed the test this year, 373 work for corporations or government, 523 for banks and 20 for academia, consultants or financial service vendors.

By comparison last year, 628 who passed worked for corporations or government, 299 for banks and 26 for academia, consultants, or financial service vendors.

The NCCMA, which supplied the aggregate results, had no breakdown of how many candidates in each professional group took the exam. Figures separating the corporate and government group were also unavailable.

Martin Decere, treasurer of Raymark Corp., Trumbull, Conn., and chairman of the NCCMA's certification council, denied the results indicated corporate and government practitioners were losing interest in the certification program.

"We're pleased with the exams," he said. "I don't think it's relevant to look at different groups.

"The test was no more or no less hard than last year," said Susan Olenick, program director at Educational Testing Service Inc., Princeton, N.J., which administered the exam both years.

Ms. Olenick said the testing service and the NCCMA expected the pass rate to be lower this year.

"You would expect the cream of the crop — people most confident in their abilities — to come out the first year," she added.

The certification program is an effort by the NCCMA to promote professionalism in cash management. A person with two years' cash management experience qualifies for a CCM credential by passing the exam. ■

# Services not . . .

*Continued from page CM1*
next-day funding of controlled disbursement. Only National Bank of Detroit offers foreign exchange trading and international wire transfers.

Among other organizations, the directory shows more non-banking companies offering retail lockboxes and remittance processing. (Retail remittance processing refers to large-volume, low dollar-value receipts, mainly received from individual consumers; wholesale remittance processing refers to low volume, high dollar-value receipts, mainly from corporate customers.)

The newest entries are: EDS Remittance Processing Services, a Livonia, Mich.-based operation of Electronic Data Systems Corp., Dallas, a unit of General Motors Corp.; and Nationwide Remittance Centers Inc., McLean, Va.

Both began offering services this year, not including EDS's own contracts with two GM units, Motors Insurance Corp. and General Motors Acceptance Corp.

Longer established non-bank remittance processors profiled are J.C. Penney Credit Services Inc., Dallas, a unit of J.C. Penney Co.; and National Processing Co., a unit of First Kentucky National Corp., a Louisville, Ky.-based holding company and parent of First National Bank of Louisville.

Banks still dominate retail lockboxes. The directory lists 91 U.S. banks and three Canadian banks offering the service.

But even more banks provide wholesale lockboxes: 114 in the United States and four in Canada.

One of the newest services is electronic funds transfer and electronic data interchange.

EDI Group Ltd., Oak Park, Ill., was started this year by Daniel M. Ferguson, president, and Ned C. Hill, vice president. Mr. Ferguson left his position as vice president at First National Bank of Chicago. Mr. Hill, who is leaving as associate professor of finance at Indiana University, Bloomington, to accept the Joel C. Peterson chair of finance at Brigham Young University, will continue to teach.

Though several more companies offer it as part of a host of cash management services, White Papers Inc., Montclair, N.J., and Electronic Cash Management Inc., Marietta, Ga., also specialize exclusively in EFT/EDI consulting.

The investment managers profiled run $25.1 billion in taxable corporate treasury cash, which excludes employee benefit assets.

The largest managers, ranked by corporate assets, are: Chemical Bank with $2.8 billion; Scudder Stevens & Clark Ltd., $2.1 billion; Brown Brothers Harriman & Co., $1.6 billion; BA Investment Management Corp., $1.5 billion; Citicorp Investment Management Inc. and Payden & Rygel, $1.3 billion each; J.P. Morgan Investment Management Inc. and Putnam Cos., $1.1 billion each; Flaherty & Crumrine Inc., $1 billion; and Aetna Capital Management Inc., $966 million.

The directory lists 23 managers that offer a dividend capture strategy, including 14 that specialize in it, and another 21 that offer strategies involving common stocks or preferred stocks, including adjustable rate and auction rate.

Many managers offer money-market and fixed-income strategies, including tax-advantaged investments, such as municipal securities.

The treasury workstation organizations have 1,008 corporate clients using the systems, according to the directory.

The workstations allow corporations to monitor such functions as banking data, using a personal computer and related software.

A growing applications package or module is the general ledger interface. It allows a corporate user to update the general ledgers daily with the other information gathered by the workstation, saving the need to rekey data.

The directory lists nine of the 15 treasury workstation organizations with such a general ledger interface, including two that began offering it this year — Chemical Bank Financial Services Division, New York, and Florida National Bank.

One organization excluded from the total, Manufacturers Hanover Trust Co., New York, is plans to offer it.

The largest workstation providers, ranked by number of corporate clients, are: Bank of America with 212; ADS Associates Inc., 200; Manufacturers Hanover Trust, 170; Software Systems Group Inc., 170; Wells Fargo Bank, 150; BYAD Inc., 50; Florida National Bank, 40; ICMS/Wills-Van den Bergh Inc., 33; First Interstate Bank of Arizona, 30; and Harris Trust & Savings Bank, 21.

Among cash management services offered by banks, the directory lists 59 with lockbox networks, 99 with electronic transmission capability of lockbox receipt information and 46 with Saturday and Sunday processing and clearing.

It also lists 112 banks with controlled disbursement, 75 with controlled disbursement reports by 10.30 a.m. Eastern time and 49 with next-day funding of controlled disbursements. ■

# Banks . . .

*Continued from page CM1*
effort to standardize the account analysis," he said. "But nobody has guts enough to tell them that."

At Fifth Third Bank, Cincinnati, James L. Doepker, treasury department supervisor, said banks will shift to standardized account analysis statements when their largest customers demand such services.

"You get peer pressure and you get customer pressure," he said. "Banks will agree to anything a customer needs, within reason." He doesn't expect the NCCMA's final version of the standard to be ready for the bank to offer on a requested and manual basis until 1988.

Treasury executives and bankers agree unwillingness to provide account analysis statements in a standardized form probably wouldn't cause a corporation to end its relationship with a bank, but it could hurt chances for adding clients.

"It could be the tiebreaker, everything else being equal," said Tom McKechney, vice president at Continental Illinois National Bank & Trust Co., Chicago.

George Markole, senior vice president, Branch Banking & Trust Co., Raleigh, N.C., predicted at least a 12-month lag between the release of the prototype and when the first banks implement it.

The transition hinges upon how quickly banks and their bank accounting software suppliers can reformat account analysis statements.

Changing systems will be expensive for most banks, said Mr. McKechney. "Account analysis is a very large, complicated system that must be interfaced from various departments," he said.

Bank cash managers expect problems with reformatting the statement to conform to the NCCMA standard and changing the procedure for making retroactive adjustments to statements from previous months.

Banks using modular systems, or systems that tie together several specific software packages, will have to wait for software vendors to design products that will conform to the NCCMA standard.

The majority of banks use non-modular systems based on complex computer programs that would be expensive and difficult to reprogram, said Joe Kaski, public relations coordinator at Hogan Systems Inc., Dallas, a bank accounting software company. The system would have to reprogrammed so all facets of the bank's account analysis system generate data in accordance with the NCCMA standard.

Neither banks nor software vendors would disclose prices for incorporating account analysis products under modular and non-modular systems.

Steven McQuarry, division executive of Bank of Boston, said its account analysis system is designed by California-based Software Alliance, which he said has been "more aggressive" than other software vendors in redesigning products to conform to the NCCMA prototype. He expects Software Alliance to have its new products ready within six months after the NCCMA's prototype becomes official.

Hogan, which serves about 100 of the 500 largest banks, has the simplest system to revise and is the most flexible software for large banks, said Charlotte Walker, senior vice president, at L.F. Rothschild & Co., New York.

UCCEL, Dallas, is the largest supplier of cash management software for banks, Ms. Walker said, serving mostly small and mid-size banks.

"Our goal is to keep (software companies) abreast of the standards, making sure the standards can be incorporated into their software, so they'll be ready to go," said Chuck Rollins, assistant treasurer, Georgia Power Co., Atlanta, and a member of the NCCMA Standards Committee.

Without waiting for the NCCMA standard, corporations have developed or have bought software packages to evaluate their account analysis statements, essentially customizing their own standard formats.

Treasury Strategies Inc., Chicago, and Phoenix-Hecht, Northfield, Ill., sell account analysis evaluation software.

Richard J. Poje, Treasury Strategies principal, said he welcomes the NCCMA standard.

"I know how difficult those things are to understand," he said of the monthly bank statements.

Despite the delays in reaching a final version of the standard, he said the NCCMA should be credited for taking the time to "touch all the bases."

Mr. Poje said Treasury Strategies runs across a surprising number of account statement errors.

"The balances are usually right, but there are many transposition errors and data errors," often with regard to wire transfers, he said.

Banks have been hesitant to adopt uniform account analysis statements because they tend to give highest priority to "products and services tied to the revenue stream," while the statements would "neither cut costs nor generate revenues," Continental's Mr. McKechney said.

Costs vary tremendously among banks, said Albert Hill, senior vice president of Connecticut Bank & Trust Co., Hartford, Conn., which, according to Mr. Hill, will be among the first to offer statements in standardized form.

Other banks like Continental and Bank of Boston had been planning to redesign their outdated account analysis systems; the NCCMA "gave us the push we needed," Mr. McKechney said.

Some cash managers are looking beyond the NCCMA account analysis standard to an electronic transmission standard. Having the data already keyed in computer form will make it easier to evaluate than having to compare paper statements. They contend standardized account analysis statements won't be widely available until they're transmitted electronically from banks to corporate treasury departments.

"It (would be) easier for the simple fact you no longer have paper," said Fifth Third's Mr. Doepker. "The less human involvement the better." ■

# Trust . . .

*Continued from page CM1*
America, Dallas, estimates 90% of issuers with programs of $750 million or more already are using book-entry systems, though only to some extent; all still issue the majority of the short-term debt in paper form.

Some significant hurdles — such as the legal issue of ownership transfer, a lack of a standard depository system and investor reluctance to forgo possession of a physical note — impede a more widespread usage of book-entry commercial paper, observers said.

Despite those obstacles, some executives believe the domestic commercial paper market can be completely converted to a book-entry system within three years.

"When the enthusiasm gets there and the cost justification evolves, everyone is going to jump on the bandwagon," said Ms. Lord.

"About $500 million (in commercial paper outstanding) is a good breaking point for a company to go direct and manage the portfolio themselves, rather than giving it to a broker to manage.

"At that point and moving upward, you really have to put a pencil to it and start examining the advantages of going book entry," she said. As of June 30, Associates Corp., a unit of New York-based Gulf & Western Industries Inc., had about $3.6 billion in commercial paper outstanding, of which about 10% was book entry.

The book-entry concept has been used for other types of securities for a number of years, but book-entry commercial paper did not really begin until 1983, said David Ehlers, manager of U.S. borrowing at General Motors Acceptance Corp., Detroit.

GMAC, which began using book-entry commercial paper in 1983, had about $31 billion outstanding as of June 30, of which 40% was book entry. Mr. Ehlers said he hopes to increase the amount of book-entry paper to 55% of total outstandings by year end and to between 90% and 95% within three years.

Most of the progress made thus far with book-entry commercial paper has been among the direct issuers of commercial paper, companies that sell the short-term promissory note themselves, not through dealers.

"It's a volume-driven thing," said David Robison, vice president and treasurer of Chrysler Financial Corp., Troy, Mich.

"It'd be more expensive to set up the computer system if you didn't have the volume to support it," he said. As of June 30, Chrysler Financial, a direct issuer, had about $8 billion in commercial paper outstanding, of which 30% was book entry.

With a book-entry system, the commercial paper issuer doesn't need to print certificates or transfer the paper forms to buyers. A detailed electronic description of the transaction is sent through the issuing agent's bank to the investor's custodian.

Daniel F. Benton, vice president and manager at Salomon Brothers Inc., New York, said the opportunities for cost savings are many. "It costs a couple thousand dollars to print the notes, then you have to keep them some place. You also have to pay to have the physical notes delivered," he said.

Mr. Benton estimated book-entry commercial paper could shave between three and five basis points from the total cost of a transaction.

Mr. Ehlers noted the administrative benefits: "We realized an awful lot of economies and efficiencies in the back-room" operations, he said. He said book entry eliminated the need to keep records on mature notes that were never presented for payment. "Under book entry, when the notes become due upon maturity, we wire the money to them," he said. "You don't have notes not presented."

Brace Young, vice president at Goldman, Sachs & Co., New York, is chairman of a subcommittee of the Public Securities Association, Washington, exploring ways to promote book-entry commercial paper.

Among the obstacles, he said, is "a legal issue of when ownership is transferred."

Another problem, said Salomon's Mr. Benton, is the lack of a central depository for the electronic transactions. Serving as custodian for the physical notes has been a lucrative business, and "you're talking about impacting some major revenue streams of the banks," he said.

Not all banks are opposed to book-entry commercial paper.

Midwest Securities Trust Co., Chicago, has developed the Short Term Instruments Clearing System that basically serves as a log for book-entry commercial paper transactions.

Pamela Zielezinski, product manager for commercial paper at Midwest Securities, said five Chicago banks and 15 issuers, including GMAC, are on the system, which will be offered nationally.

The system, operating since Jan. 1, 1986, charges a $100 monthly participation fee, a $50 monthly account maintenance fee and $2 per transaction.

Ms. Zielezinski also said executives at Midwest Securities are working on being able to net book-entry transactions on the system. Each customer then would receive or send one wire transfer to Midwest Securities to settle all of its payments.

"It could clean up a lot of the end-of-the-day crunch and rush to get wires out," she said.

"We need the same type of network in New York City. We need the same type of system on the West Coast," commented Associates' Ms. Lord.

Besides the technical issues, proponents of book-entry commercial paper also must overcome the reluctance by some investors to give up possession of a physical note. "They have covenants in some of their (investment) agreements referring to the holding of physical notes," said GMAC's Mr. Ehlers.

Some of the executives said gaining the confidence of investors could be a big breakthrough.

"If you talk to the issuers, they'd love to do it," Mr. Benton said. "If you talk to the dealers, they'd love to do it. But if you talk to the buyers, some of them will say, 'Gee, I need to have delivery of physical notes.'" ■

# IRS recalls GM plan ruling

By Nicky Robertshaw

WASHINGTON — The Internal Revenue Service is reconsidering the tax-exempt status of the more than $11 billion General Motors Corp. salaried retirement program after complaints GM illegally cut back some employees' early retirement benefits.

The problem stems from the transfer to Electronic Data Systems Corp. of some GM employees following GM's 1984 takeover of the Dallas firm. The transferred employees became participants in the EDS pension plan. Under the terms of the EDS plan, employees do not become eligible for early retirement as quickly as they would under the GM plan.

In an Aug. 5 letter, IRS officials said GM no longer can depend on a March 1986 favorable determination letter on its salaried plan, because the letter might have been issued in error.

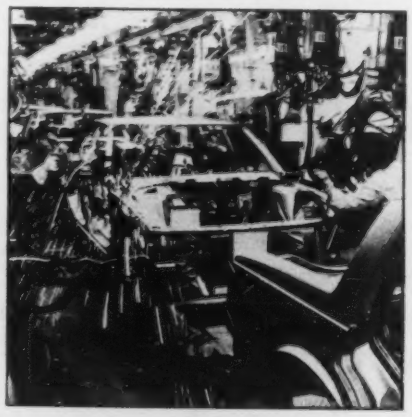
The letter was issued after GM directors amended the salaried plan to exclude employees of any subsidiary acquired after March 1, 1984, from participation in the plan, including the credited service portion. The amendment was approved Oct. 3, 1984, after the directors agreed to merge with EDS. The merger was completed two weeks later.

A favorable determination letter informs an employer the IRS believes the plan meets qualifications for tax-exempt status. Although employers are not required to obtain such a letter, virtually all do, and the letter remains in effect until the plan experiences substantive amendments, in which case the company must reapply.

The IRS officials said the determination process for the plan is being reopened and, in the meantime, GM would have a chance "to amend the plan or otherwise resolve any of the issues raised without jeopardizing the continued qualified status of the plan."

A GM spokeswoman said the company is "cooperating fully" with the IRS. Although company executives don't believe the agency will find any reason to drop the fund's tax-exempt status, it will address any problems the IRS might find, she said.

The IRS reviewed GM's determination status after being notified by Sen. Carl Levin, D-Mich., of complaints from GM employees, according to an aide for the senator.



*The IRS is reviewing a GM retirement plan because of amendments made by the automaker's directors.*

Among the issues the IRS is re-examining is a possible violation of section 411(d)(6) of the Internal Revenue Code that deals with determining eligibility for a subsidized early retirement benefit. This provision forbids employers from decreasing an employee's accrued benefits; it was amended by the Retirement Equity Act of 1984 to prevent reduction or elimination of early retirement benefits as well.

The retirement act is effective for any plan amendments made after July 30, 1984.

At issue are the early retirement benefits for some 7,000 GM data processing employees who were transferred to EDS and, in the process, were switched to EDS' defined benefit plan.

The GM plan has a 30-and-out provision, which gave an employee an early retirement option after 30 years of service regardless of age. The EDS plan sets age 55 as the requirement for early retirement.

Two of the transferred employees, who would have reached the 30-year mark this year, sued GM in 1984, claiming they were entitled to remain eligible for the 30-and-out program.

In responding to the charges, GM pointed to the Oct. 3, 1984, amendment.

U.S. District Court in Flint, Mich., ruled in favor of GM. The decision has been appealed to the 6th U.S. Circuit Court of Appeals.

The applicability of the Retirement Eq-

# Bull market lifts funds $800 billion

By Brad Rudin and Marlene Givant

The bull market, which celebrated its fifth anniversary Aug. 13, has added at least $800 billion to the nation's pension funds and radically altered the ways in which they are managed.

The bull market:

- contributed to the overfunded status of many of the nation's pension plans and encouraged some corporations to terminate those plans and recoup $16.4 billion in surplus assets. It allowed other companies to cease making contributions to their plans.
- sparked explosive growth in the use of index funds for pension fund management, and increased the disenchantment with active equity management.
- fueled rapid growth in the use of portfolio insurance products and other hedging techniques as pension executives positioned their assets so they will avoid giving back the gains when the bull market ends. Such techniques have been blamed for causing sudden large declines in the stock market.

During the bull market, the nation's total private and state and local government pension assets increased to an estimated $2.3 trillion from approximately $1 trillion. More than $800 billion of that was from the stock market; the median equity manager achieved a compound annual return for the period of more than 24%, according to Pensions & Investments' Performance Evaluation Report. The Standard & Poor's 500 stock index gained 29.7% in the same period.

Strong gains in the stock market, and in the bond market for much of the period, that far exceeded rates assumed for actuarial purposes meant many corporate pension funds were more than fully funded on a termination basis.

"Plans are overfunded, but no more than they were in early or mid-1982 because bond rates came down . . . which leaves (plans) in a pretty healthy position," said Robert D. Arnott, vice president and equity strategist at Salomon Brothers Inc., New York.

The net present value of liabilities has risen in line with the value of the asset base, he said.

He estimated the assets of U.S. pension funds have gained $1 trillion in the

# Euroconvertible market growing

By Marcia Parker

NEW YORK — U.S. institutional investors, hungry for ways to reap the rewards of the worldwide bull market and move with the tide of international equity investing, are starting to snap up U.S. dollar-denominated and newer non-U.S. dollar-denominated convertible securities issued by foreign companies in London.

Several money managers are looking at investing in convertibles, including Trust Co. of the West, Los Angeles, which manages $1.5 billion in convertibles; Calamos Asset Management Inc., Oak Brook, Ill., with about $200 million in convertibles under management; and Alliance Capital Management Corp., New York, which manages more than $500 million in convertibles.

Good statistics are hard to come by, but investment bankers and dealers say the number of convertibles issued by foreign companies has doubled in the past year. More than $25 billion in convertibles issued by British, Japanese, Australian and other companies are outstanding. They are about evenly split between U.S. dollar-denominated and non-U.S. dollar-denominated.

"The story of the past few years has been the explosive growth of domestic convertibles. The story for the next five years will be the continued growth of equity-linked securities for non-U.S. companies," said Marc Suvall, managing director at First Boston Corp., New York.

"The world loves equity-linked securities. Everyone wants a piece of the international equity market."

William Gridley, manager of international equity-linked trading for First Boston, said the market for U.S. dollar-denominated convertibles by U.S. companies has matured and is moving on.

"The appetite among U.S. investors is growing. They are moving from domestic equity investing to international equity investing and from international equity investing to international equity-linked investing," Mr. Gridley explained.

The Euroconvertible market growth has been especially strong in Eurosterling issues, fueled by the strength of the U.K. equity market.

# Small fund making global move

**By Marlene Givant**

ST. LOUIS — Defying its small size, the $85 million Edison Brothers Stores Inc. pension fund has started lending global securities.

At the same time, while other funds are boosting cash, Edison, a women's shoe and apparel retailer, is raising its equity exposure.

The few U.S. funds that lend global securities are billion-dollar ones, but Edison officials have decided to lend a small amount of Japanese equities and bonds in conjunction with the fund's domestic lending program. Lending is handled by the Harborside, N.J., office of the fund's master trustee, Bankers Trust Co., New York.

BEA Associates Inc., New York, runs the fund's entire portfolio, which includes less than 5% in foreign equities and fixed income.

The firm's value approach and Edison's innovative attitude have paid off. For the 12 months ended March 31, the fund returned 16.1%. For the three- and five-year periods, the fund reported compound annualized returns of 21.1% and 20.4%, respectively.

CDA Investment Technologies Inc., Silver Spring, Md., reported a median balanced fund from a universe with a 50-50 bond-equity mix returned 14.1% for the year ended March 31. For the three- and five-year periods, the compound annualized returns were 19.6% and 19.4%, respectively.

Three months ago, the Edison fund's asset mix was almost evenly divided between stocks and bonds. Now the overfunded plan has moved toward 60% in equities.

"We're willing to assume slightly more risk in anticipation of greater returns. That's why we're moving in that direction," said Suren S. Singhvi, vice president and treasurer.

The decision to boost equities also follows a late 1986 shift of $21 million to a fixed-rate annuity account for retirees set up with New York Life Insurance Co., New York.

"This really fits within (that) overall strategic allocation of their assets. Therefore, the proportion we've been running in a balanced portfolio can be increased toward more common stocks," said John B. Hurford, managing director of BEA, which manages about $7 billion for U.S. tax-exempt clients.

Mr. Singhvi considers the $21 million account separate from the $85 million pension fund. The assets previously were managed by BEA.

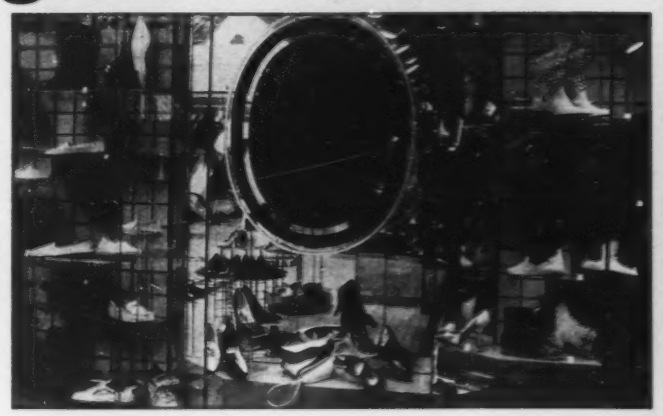
Because BEA is supposed to outperform its peers in down markets, Mr. Singhvi is not nervous about adding to equities while others cut back.

"They are value managers relying on selection of securities when they see long-term potential. It doesn't matter whether people are getting out or getting in," he said of the stock market.

A relative value manager, BEA strategists believe price-earnings ratios for U.S. companies are hardly rock-bottom, but still worth being bought.

"We're still looking at lower p/e stocks. They're not as low absolutely as we'd like, but that doesn't preclude us from buying equities," said Mr. Hurford.

For international securities, "we're looking for diversification and names with relative valuations attractive compared to companies in the U.S. market. When we buy a foreign stock we'd like a p/e lower relative to p/es (of stocks) we would buy in this country," he said.



*The Wild Pair is one of the shoe franchises owned by Edison Brothers Stores. Despite its size, the company's fund is entering global securities lending and is bucking the trend by boosting equities.*

For fixed income, the firm looks for undervalued credit names in sectors selling at depressed levels. The firm adds value through swapping, but does not make big market-timing bets.

To a smaller extent, Edison enhances returns through securities lending, which it has done with Japanese securities since March 1.

"The results were more than originally projected," Mr. Singhvi said. The revenue varies from month to month because loans are short-term — for three to seven days. The fund sometimes lends corporate bonds and government securities as well as equities. ■

# Eastern fight traps trustees

**By Nicky Robertshaw**

WASHINGTON — Now that a federal judge has blocked any shareholders from tendering the shares held by Eastern Air Lines Inc.'s stock ownership plan, attorneys for all the parties will be working to resolve the issue of how trustees for the shares can legally respond to the offer.

U.S. District Judge Thomas Penfield Jackson in the District of Columbia issued a preliminary injunction Aug. 12 blocking anyone from tendering Eastern Air Lines 20% participating, non-cumulative convertible preferred stock pursuant under TAC Acquisition Inc.'s tender offer. TAC is a subsidiary of Texas Air Corp., the new owner of Eastern.

In response to the court's action, the offer, which had been set to expire Aug. 14, has been extended to Aug. 28 and made effective for all the shares rather than the original 1.6 million shares, according to the revised tender offer filing with the Securities and Exchange Commission.

Texas Air's move to extend its tender offer is seen as an indication the company intends to press forward despite the opposition.

"It's a signal it's not a small issue for Texas Air," said Timothy Pettee, airline analyst at Bear, Stearns & Co., New York. He added the move is a precursor to labor negotiations set for later this year with Eastern employees, and given that the dividends on the stock are 20% of net income, "It's a potentially expensive preferred stock issue."

The block of stock owned by the Eastern Wage Investment Program Trust has been a thorn in the side of Eastern and its new owner, Texas Air, since the November 1986 merger. Under the terms of the preferred stock, the trust can block certain major business changes.

The terms of the trust, which Eastern set up in 1984 in exchange for major employee concessions, also spell out the shares may not be tendered.

The judge's ruling addressed the concerns of plan trustees, who at an Aug. 11 hearing argued they would be liable for breach of fiduciary duty whether they tender the shares or decline to tender the shares.

Each trustee "prays for guidance from the court as to whether it must adhere to plan and trust provisions restricting the transfer of the preferred shares, or make a decision to tender or not, based solely on its own analysis as a fiduciary under the Employee Retirement Income Security Act as to the pecuniary merit of the offer, disregarding the transfer restrictions in the trust and the plan agreement," Judge Jackson wrote.

Attorneys for the airline had argued the trustees could rely on a legal opinion contained in TAC Acquisition's July 17 tender offer for the plan shares, which states that under the fiduciary duties set forth in ERISA, the trustees — in making an independent judgment — may be required to tender the shares despite the restrictions on transfers set forth in the plans.

An attorney for the Air Line Pilots Association took issue with this argument, adding that under the collective bargaining requirements of the Railroad Labor Act the voting restrictions set forth in

# Passive strategies lure Illinois funds

URBANA, Ill. — The University of Illinois' two endowment funds, with $120 million in total assets, dropped long-time managers to move into index and mutual funds, said Rea Jones, assistant vice president-business affairs.

The funds are the $85 million University of Illinois Foundation Endowment Fund, a private, not-for-profit corporation, and the $35 million University of Illinois Endowment Fund, which is controlled by the university's trustees.

The foundation dropped Continental Illinois National Bank & Trust Co., Chicago, while the university fund dropped First Chicago Investment Advisors. Both ran balanced portfolios; they were terminated primarily because they didn't offer passive strategies the funds desired.

Both funds also will drop First National Bank of Chicago as custodian.

Because of the move to index and mutual fund strategies, the endowment funds will hold only shares of commingled funds, rather than individual securities, so they won't need a separate custodian, Mr. Jones said.

The foundation hired American National Bank & Trust Co. of Chicago, to run four index funds — $21.25 million each in funds tracking the Standard & Poor's 500 stock index and the Shearson Lehman Government/Corporate bond index and $8.5 million each in a small-capitalization stock fund, tracking the Wilshire 5000 stock index minus the S&P 500, and a foreign stock fund, tracking the Morgan Stanley Capital International Europe, Australia Far East index.

Also, the foundation hired Miller Anderson and Sherrerd, Bala Cynwyd, Pa., to run $25.5 million in a balanced account of mutual funds, with equities not to exceed 50% of the portfolio.

The university endowment fund hired Wells Fargo Investment Advisors, San Francisco, to run $19.25 million in a South Africa-free S&P 500 index fund and Miller Anderson and Sherrerd to manage $15.75 million in a South-Africa free bond mutual fund.

Mr. Jones said the university endowment plans to hire a closed-end real estate manager later this year to run 10% of its assets, taking the money equally from its two new managers.

Unlike the university endowment fund, the foundation doesn't follow the university's restrictions on buying securities of companies with operations in South Africa, said Mr. Jones. He noted American National doesn't offer a South Africa-free fund.

He pointed out the funds are separate legal entities, although they share similar investment advice, and separately used the same search consultant, Ennis Knupp & Associates Inc., Chicago. ■

## Corrections & clarifications

• In a July 27 article on convertible securities, **John Calamos** was identified incorrectly as managing director of Noddings-Calamos Asset Management Inc. Mr. Calamos and Tom Noddings have parted; Mr. Calamos is president of Calamos Asset Management Inc.

• The figure reported in the July 27 issue for **Ford Motor Co.**'s 1986 pension expense reflected worldwide expense. Ford's domestic expense was $544.8 million, an increase of only 1.2% from 1985.

# Cash Management

## Treasurers focus greater attention on cash portfolios

By Sheryl L. Cohen

Treasury executives increasingly are bringing their corporate cash portfolios under more rigorous investment management by hiring their first outside money managers, requesting broader authority to use newer types of strategies and seeking better performance measurement benchmarks.

At Joseph E. Seagram & Sons Inc., New York, cash managers have commenced a first-time search for managers to invest up to 90% of Seagram's treasury assets with four managers, according to Ronald F. Reed, director-cash management. Seagram would retain 10% for in-house, day-to-day management.

At Eastman Kodak Co., Rochester, N.Y., cash executives are considering their first use of futures and options to hedge a preferred stock portfolio that already is being run by an outside manager.

Although more companies are employing outside managers to help invest corporate cash, many still rely on internal staffs to oversee most short-term cash investments.

In an informal telephone survey of 10 companies, *Pensions & Investment Age* found three employ outside managers.

None has more than three employees in the investment area in the cash management department. In fact, many have only one, and often investments are only a fraction of their duties.

At Nike Inc., Beaverton, Ore., for example, only one employee has duties that include investing Nike's $125 million in corporate cash.

Despite the size of their cash portfolios, most of the managers claim their small staffs are adequate. But a growing number recognize that outside managers can provide expertise, more complex strategies and potential for higher returns.

The *P&I Age* survey also found a preference for liquidity and safety in corporate cash investments, even at the cost of higher yields.

Among other companies surveyed:

- Henley Group Inc., La Jolla, Calif., although just more than a year old, already hired one outside manager to run a some corporate cash investments.
- Josten's Co., Minneapolis, runs all its corporate cash investments in house. The manufacturer of school-related supplies moves from being a net investor in summer to a net borrower in fall in a fairly predictable yearly cycle.
- CF Industries Inc., Long Grove, Ill., also must plan corporate cash investments around what one executive terms "a very seasonal cash flow."

The chemical fertilizing company uses only in-house staff for investing its $95 million cash portfolio, claiming, "We feel we know cash flow cycle's better than someone

## Portland General switches

PORTLAND, Ore. — Portland General Electric Co. switched to Shearson Lehman Brothers Inc., New York, as its commercial paper dealer, said William E. Beyer, manager-cash and banking at Portland General Corp., the parent company.

He said Shearson Lehman replaces Merrill Lynch Money Markets Inc., New York, but declined to disclose the reason for the change.

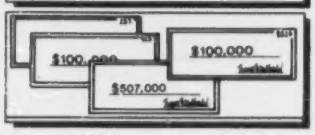
Mr. Beyer added, however, the switch in commercial paper dealers will not affect the company's loan participation program, which is spread among five banks.

"We intend to use both markets right now," he said.

Loan participations is "not just another alternative, it's a very competitive alternative right now," he added.

The company had about $100 million in commercial paper and about $43 million in loan participations outstanding as of June 30.

### Cash accounts



### Direct deposit slated

CINCINNATI — Procter & Gamble Co. is beginning a program to offer individual shareholders direct deposit of their dividends, said M. Eugene Bailey, section manager-treasury management.

He said the dividends would be deposited electronically to 6,000 of the company's 85,000 shareholders, starting with the Aug. 15 dividend.

Fifth Third Bank, Cincinnati, will originate the transactions for Procter & Gamble in a preauthorized payment and deposit, or PPD, format through the automated clearinghouse to accounts at shareholders' banks.

Mr. Bailey was unable to quantify any cost or saving of the new program.

"It's somewhere between breakeven or costing us a few bucks on lost float," he said.

The program "was conceived as an investor relations service," but he noted the company will be saving by moving more dividends to ACH from checks.

He said the company's bank charges about 5 cents to 8 cents to process an ACH credit, compared with 25 cents for a dividend

## Banks make inroads in short-term loan market

By Fred Williams

Banks are regaining some of the market for short-term commercial loans, lost in recent years to the increasing use of commercial paper.

The growth in the commercial paper market has slowed, due in part to the effort by banks to attract corporate treasurers and finance executives with lending vehicles that are more competitive than conventional short-term loans with commercial paper.

Among the major innovations are loan participation agreements and revolving credit lines linked to the federal funds rate.

In loan participations, banks price short-term loans to be competitive with commercial paper, then sell all or portions of the loans — and the risk — to other investors, such as other banks or corporations, to invest as treasury cash.

The originating bank profits on the fee for initiating the loan, rather than just by earning interest from holding the loan.

The popularity of loan participations by corporate borrowers is still uncertain. Some industry participants claim loan participations have slowed the growth in the commercial paper market since 1985.

But data show banks are regaining some lost ground in commercial lending.

According to the latest revised statistics of the Federal Reserve Bank of New York, the average amount of non-financial commercial paper outstanding peaked in 1985 at $86.9 billion. Non-financial paper outstanding fell to $76.5 billion in the first quarter of 1987 from $78.5 billion in the same period last year.

At the same time, short-term bank loans, as a percentage of all short-term, non-financial business credit, showed a slight increase for the first quarter to 27.17% from 26.17% in first quarter 1986.

Although improvement is evident, it still falls short of the banks' 27.59% share in the same period of 1985 and a 28.85% share in 1984.

And banks still have a lot of ground to cover to return to their position of 1980, when the use of commercial paper began to skyrocket.

In the last quarter of 1980, when non-financial commercial paper outstanding totaled $63.96 billion, banks had a 32.5% share of short-term, non-financial business credit.

To recapture a share of the lending market, banks are offering low-cost lines of credit.

Jackie Dout, manager cash operations and assistant treasurer at Koppers Corp., Pittsburgh, said banks are establishing uncommitted lines of credit for some of their customers with razor-thin margins over the federal funds rate.

"The bank has an internal line set up for you and you agree to an amount," Ms. Dout said. "They give you a quote usually based on the federal funds rate with a thin profit. Banks aren't pushing that because the spreads are so thin."

She said Koppers has not used loan participations, though she sees them as "something for the future."

Demand for loan participation agreements is growing.

James E. Cotton, managing director and head of asset sales at Chase Investment Bank, New York, a subsidiary of Chase Manhattan Bank, estimates loan participation volume has grown to $50 billion or $60 billion outstanding this year from $40 billion or $45 billion last year. In 1985, loan participations outstanding totaled $30 billion.

"Banks are now more competitive," Mr. Cotton said. He predicted loan participations "won't supplant commercial paper, but will serve as a complementary product," perhaps slowing the transition to commercial paper.

Corporate finance officers who use loan participations argue participations are competitive with commercial paper and, in some cases, cheaper than paper; those who don't use syndication are convinced commercial paper is the most economical short-term financing vehicle and use bank lines of credit to support their commercial paper sales.

William E. Beyer, manager-cash and banking at Portland General Corp., Portland, Ore., is an enthusiastic supporter of the bank syndication market as a short-term financing vehicle, contending costs are lower than for commercial paper.

"It is a massive market in which the real numbers don't show up anywhere," Mr. Beyer said. "I feel it is as big as the non-financial dealer placed commercial paper market already. Many large corporations still don't understand loan participations.

"For instance, today some of my paper sold at 6.69% yield for 40 days. And I did a 30-day LPA for 6.69%. I did a 60-day loan (participation) for 6.71%. The loan market is getting more competitive daily from my standpoint as a borrower.

"The kicker is that on my commercial paper, as with anyone else, you need to add a few more basis points to cover . . . the cost of printing, issuing and paying expenses, agent fees, time-sharing costs," Mr. Beyer continued.

"In my case these costs amount to about $70,000 per year. Add seven basis points on to the interest cost of a $100 million program and you have 6.69% plus seven basis points or 6.76%.

"Now look at commercial paper in comparison to LPAs. I think there is a revolution going on. I'm excited about it."

Mr. Beyer said he did a study internally of Portland General's short-term debt and found for the first six months of 1987, commercial paper cost averaged four basis points more than for the "all-in" loan participation cost for the same period.

Mr. Beyer said the growth in loan participations "is a huge trend and one that is basically invisible . . . It's the news story of the year in short-term finance."

Portland General has about $140 million outstanding short-term debt, $100 million in commercial paper and the balance in participations.

Another disciple of loan participation deals with banks is South-

**PIPER**

*The statistical data are extracted from Pensions & Investments' Performance Evaluation Report, a quarterly performance evaluation published by* Pensions & Investment Age. *PIPER details comparative performance data on equity and fixed-income funds at more than 200 banks and insurance companies. PIPER is compiled by Rogers, Casey & Barksdale Inc., Stamford, Conn.*

# Short maturities lead fixed income

By Trudy Ring

Managers holding intermediate-maturity bonds were the best performers in periods of three years and longer covered by the Pensions & Investments' Performance Evaluation Report.

However, rising interest rates and plummeting bond prices made shorter maturities better performers in the most recent quarter. A mix of intermediate- and short-maturity managers appeared among the top performers for the past year.

United Bank of Denver once again topped the three-, five- and 10-year periods of the PIPER fixed-income survey, which covers 287 bank and insurance company pooled funds. This was the fifth consecutive quarter United Bank achieved this distinction.

Delaware Trust Co., Wilmington, was first for the year ended June 30, while Hawaiian Trust Co., Honolulu, placed first for the quarter.

Again, a majority of funds failed to outperform market indexes, except in shorter periods. For the quarter, the median PIPER fixed-income fund returned −1.6%, tying the Salomon Brothers Broad Investment Grade bond index and slightly outperforming the Shearson Lehman Government/Corporate bond index, which returned −1.9%.

For the year, the PIPER median was 5.3%, while the Salomon Brothers index returned 5.6% and the Shearson Lehman index, 4.7%. For the three-year period, the median fund was up 16.3%, while the Salomon Brothers and Shearson Lehman indexes were up 18% and 17.6% respectively. Figures for periods of more than a year are compound annual returns.

In the five years ended June 30, the median fund returned 15.3%, the Salomon Brothers index, 16.8%, and the Shearson Lehman index, 16.4%. For the 10-year period, the median fund returned 9.8% and the Shearson Lehman index, 10.1%. The Salomon Brothers index does not go back 10 years.

United of Denver achieved stellar performance in all periods of the survey. For the three-, five- and 10-year periods, its annualized returns were 27%, 21.9% and 12.7% respectively. For the year, it returned 6.5%, which placed it in the top 20% of all funds; for the quarter, its return was −1%, which kept it in the top 30%. Just more than 10% of the fixed-income funds surveyed had positive returns for the quarter.

United Capital Management, the subsidiary that manages the $3^ -illion pooled fund, invests on the basis of interest rate forecasts and sector spreads. "We've been fortunate to be anticipating interest rates pretty much correctly," said W. Lon Schreur, president.

The managers became more defensive and shortened the fund's maturity early in 1986. It had a 20-year average maturity for five years before that; the managers shortened maturities to an average of eight years and have been bringing the average maturity down gradually to the current six years.

The fund is about 90% in Treasury securities, with the rest in high-rated corporate bonds.

Another interest rate forecaster, Beverly Trust Co. (formerly Beverly Bank), Chicago, scored well with securities of intermediate maturities.

Beverly Trust was third among all funds for the 10-year period, returning 12.4%, and fifth for the year, with 9.2%. It was in the top 10% for the five- and three-year periods, with returns of 17.9% and 20.2% respectively. Performance was at the median, −1.6%, for the quarter.

The $7.5 million fund is in high-coupon, investment-grade, corporate bonds, said Ron Stajkowski, president. Average maturity is seven years. Interest rate forecasting is vital to the investment strategy, he said.

The mediocre performance for the quarter isn't meaningful, he

# Cyclicals spark equity leaders

By Hank Berkowitz

Investments in technology, paper and other out-of-favor cyclical industries fueled the portfolios of the top-performing equity managers in Pensions & Investments' Performance Evaluation Report for the periods ended June 30.

PIPER measures the performance of 310 commingled equity funds managed by bank and insurance companies.

First Fidelity Bank, Newark, N.J., was the top performing equity manager for the second quarter, returning 8.7% compared with the Standard & Poor's 500 stock index's return of 5%. Only one-fifth of the PIPER equity funds outperformed the benchmark during the quarter, with the median return being 3.2%.

First Fidelity was one of the few fundamental managers in the top 10% for the quarter, as contrarians and market timers gained top spots for the first time in several years.

Denver-based United Capital Management, the investment arm of United Bank of Denver, ranked second with a 7.8% return. It invests primarily in long out-of-favor capital goods industries like heavy equipment, machine tools, steel and aluminum.

Like many recently successful money managers, Lon Schreur, president of United Capital Management, shifted from consumer goods to capital goods. He expects the dollar's decline to benefit U.S. manufacturers, particularly **Caterpillar Inc.** and **Clark Equipment Co.**

Norstar Trust Co., Rochester, N.Y., another contrarian, ranked third at 7.5%. Norstar's $950 million portfolio is overweighted in computer technology firms and small- to intermediate-capitalized electronics companies, a sector that has lagged significantly in the bull market.

"We've been contrarians for quite some time," said Bart Feiden, senior investment officer, who places great emphasis on "finding undervalued, underfollowed situations," in the market.

Another contrarian, AmSouth Bank, Birmingham, Ala., made a remarkable turnaround during the quarter, rising to fourth position from 285th at the end of March.

"Patience is required to stick with one's investment strategy," said John Goff, chief investment officer.

Mr. Goff favors large-capitalized companies in basic industries — **Texaco Inc.**, **Exxon Corp.**, **The Dow Chemical Co.** and **Deere & Co.** — all of which he expects to benefit from the lower dollar.

While non-traditional managers generally excelled in the most re-

# For Every Investor, There's A Perfect Balance Between Risk And Return

There's an element of risk in every investment. And, from one investor to the next, the tolerance for risk varies according to his goals, philosophy and temperament.

At First Union's Capital Management Group, we understand the importance of managing risk as well as maximizing return. Very few investment managers can match our consistency of superior returns at such moderate levels of risk.

To find out more about the investment approach that helps us to strike that perfect balance between risk and return, call Debbie Tate Corson at (704) 371-5155 for a copy of our investment management brochure. What the rankings in this P.I.P.E.R. Survey don't tell you about us, this brochure will. Call today. The sooner you get our investment team working for you, the sooner you'll see the results.

# Lights burn late at Centre Square.

**To get your investment performance moving in the right direction.**

There's a new light shining on Centre Square. And a new opportunity for results-oriented investors to boost portfolio performance with a highly refined *earnings momentum* approach to investing.

Centre Square Investment Group, Inc. is a new company, staffed by a proven team of investment managers with a history of doing whatever it takes...in time or effort, to meet clients' goals by achieving consistent, long-term gains.

**It takes momentum.**

**Earnings momentum.** Centre Square Investment Group is one of only a few companies in the country whose investment managers can point to years of success using the earnings momentum approach. Improved performance. That's what our *earnings momentum* style offers for those investment funds with multiple managers. This is because earnings momentum *complements* other investment styles and may give your portfolio the "kick" it needs to move forward.

**Time is money.**

Our time. Your money. If you'd like to put earnings momentum to work in your investment portfolio, we'll put in the time—and whatever else it takes—to make your money grow. Call us at 215-786-7070 and let the lights at Centre Square burn late for you.

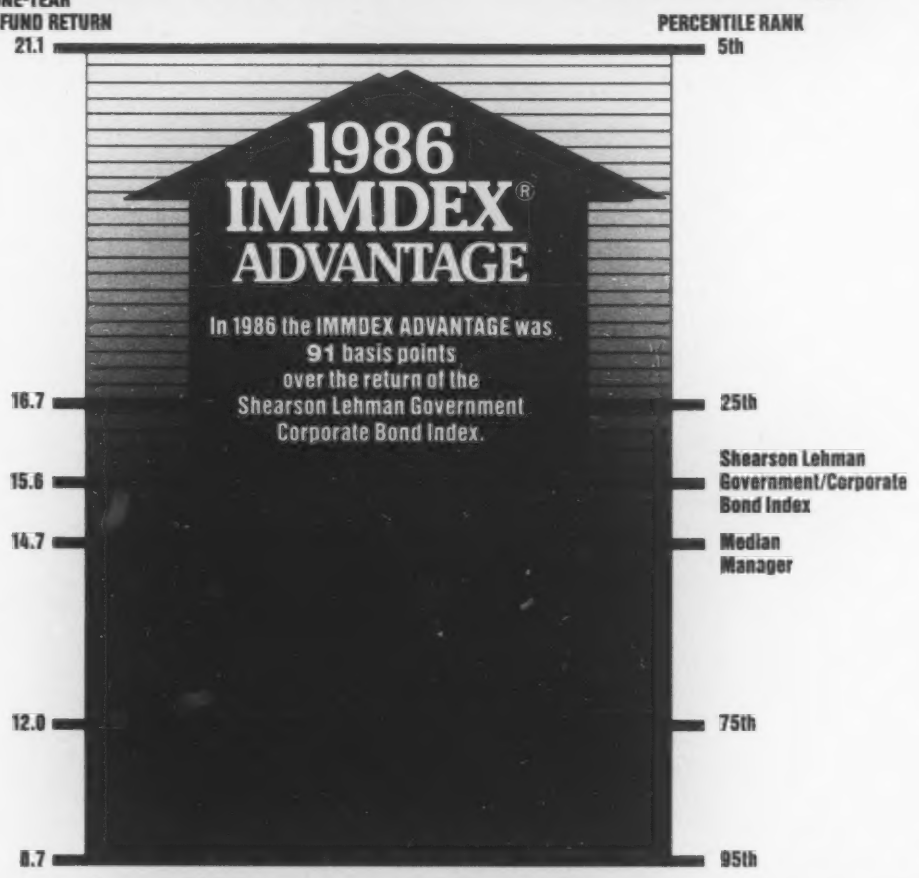
# Bond Indexation with the IMMDEX® advantage



One-year total fund rates of return for the period ended December 31, 1986. Source SEI

The Shearson Lehman Government/Corporate Bond Index has provided superior performance when compared to active fixed income managers. The Index has consistently provided first or strong second quartile returns over multiple time periods.

Immdex is a unique bond management system in which the annual return will **match** or **exceed** the index rate of return.

Immdex accomplishes this objective through two strategies:

- The index rate of return is achieved through a proprietary duration-matching strategy.
- Immdex capitalizes on market opportunities to further enhance total return.

First Wisconsin Trust Company is a leader in the area of quantitative fixed income management and we believe that the Immdex advantage will prove to be an attractive alternative to your current bond management approach.

Let us review how Immdex provides positive tracking to the Shearson Lehman Government/ Corporate Bond Index and enhanced market returns through the use of bond management techniques. Call or write Charles Groeschell at First Wisconsin Trust Company, First Wisconsin Center, Box 2054, Milwaukee, Wisconsin 53201. (414) 765-4789.

FIRST WISCONSIN TRUST COMPANY

# Cyclical . . .

*Continued from page 31*

cent quarter, fundamental managers dominated the longer-term rankings.

Once again, Sun Banks Inc., Orlando, Fla., was the top-performing PIPER equity manager in the long term, ranking first in the one-, three-, five- and 10-year periods ended June 30. Its 12-month return of 37% was nearly double the S&P's 19.5%. For the three years it returned 46.8%, vs. the S&P 500's 30.6%; for the five years, 40.8% vs. 27.9%; and for 10 years, 23.4%, vs. 17.2%. All returns for more than a year are compound annualized.

The fund also was strong in the short term, finishing in the top 10% with 5.9%.

Sun Banks' portfolio is "overweighted" in technology stocks such as **Digital Equipment Corp.**, **Tandon Corp.**, **Apple Computer Inc.**, **Computer Associates International Inc.** and **Intel Corp.**, said Elliot Perny, executive vice president of investment management.

The median equity fund returned 19.5% for the year ended June 30, compared with the S&P's 25.2%. Only one-eighth of the equity managers tracked by PIPER managed to beat the index during the period.

Norstar Trust, third-ranked during the quarter, finished second in the yearly rankings, posting a 34.4% return, despite doubling its cash position to nearly 20%.

Norstar looks for "underfollowed" small- and medium-cap companies, said Bart Feiden, senior investment officer, adding there have not been a lot of good values available in recent months.

Norstar's portfolio is weighted toward emerging growth companies in the high-tech area, like semiconductor manufacturer **Kulicke & Soffa Industries Inc.**, "which are about due" after lagging the bull market, Mr. Feiden said.

Rounding out the top five for the year were First Fidelity, with a 33.9% return; Cullen Center Bank & Trust, Houston, with 33.1%; and Irving Trust Co., New York, 31.3%.

Cullen left the consumer goods sector last year, selling **K mart Corp.**, **Southland Corp.** and **Dayton-Hudson Corp.** and increased its holdings in technology, chemicals and paper.

*Continued on page 39*

# Short maturities . . .

*Continued from page 31*

said, as the trust company manages for the long term.

The peak in interest rates likely has passed, he added, because the Federal Reserve will keep rates at the current level or lower because of concern for the financial community.

Interest rate forecasts don't figure in the strategies of some other good long-term performers, but they also did well with intermediate-maturity bonds.

Delaware Trust, the best performer of the year with 13.7%, stays fully invested in high-quality securities with a 10-year average maturity, said Kenneth L. Holmes, vice president and investment marketing manager.

"Interest rate forecasts are unreliable, so we don't take the added risk of acting upon them," he said.

Delaware Trust's bond fund, now at $21 million, also performed well in the five-year period, when it was second with 20.2%, and the three-year span, when it was fourth with 23.2%. It is too new for the 10-year period. In the most recent quarter, it slipped below the median with −2.1%.

"We have had quarters of that kind from time to time," Mr. Holmes said. That's just a function of the fund's strategy, staying fully invested and not trying to time the market, he said.

As of June 30, the fund was 91% in mortgage-related securities, with most of the remainder in municipal bonds. "We're not afraid to use a high- quality municipal in a pension account when it's the best thing around," Mr. Holmes said.

First Interstate Bank of Denver's bond fund also achieved good long-term performance with issues in the intermediate range. First Interstate's pooled fund, managed by Denver Investment Advisors Inc., placed third for the five- and three-year periods, with annualized returns of 20% and 23.9% respectively. It also was in the top 10% for the 10 years, with 11.6%.

It was just above the median for the year, with 5.5%, and slipped to the bottom 20% for the quarter, with −2.8%.

The short-term returns were a function of the fund's duration and an increase in interest rates, said Jay Barr, vice president of Denver Investment Advisors. The management firm does not try to forecast interest rates, but concentrates on security selection, he said. The $50 million fund is about 75% in corporate issues, with the remainder in Treasuries.

The holdings have an average duration of seven years; this had been longer at some points in the periods measured, leading to the good long-term performance, Mr. Barr said. He considers duration a better measure of risk than maturity; duration is the period it takes an investor to get back half of a bond's present value.

Short maturities were the hallmark of funds that did well in the most recent quarter. Hawaiian Trust's defensive fund, which topped the quarter's rankings by gaining 2.1%, has an average maturity of 2½ years, said William Barton, chief investment officer. It is 85% in "collapsible" guaranteed investment contracts, which can be redeemed on six months' notice, and 15% in money market instruments.

The fund does better in bearish bond markets than in bullish ones, he said. It was in the top 10% for the year, with a return of 9.1%, but was in the bottom 10% for the three-year period, with 10.2%. Begun in 1983, it was too new for other periods of the survey.

Trustmark National Bank, Jackson, Miss., also did well in the quarter and year with a defensive, short-maturity posture. Its bond fund was third in the quarter, with 1.5%, and in the top 10% on the year, with 8.4%. It was in the bottom 20% for the three- and five-year periods, at 12.7% and 13.3% respectively, and slightly above the median for the 10-year time frame, with 10.1%.

The fund definitely does better in down markets, said Bill Wardlaw, senior vice president and trust officer. "Our typical customer is looking more for preservation of capital than for high numbers," he said.

The $95 million fund is 70% in Treasuries and 30% in GICs. Average maturity is 2½ years, down from 3½ in the past 12 months. The fund's guidelines state it cannot have a maturity longer than five years. ■

# Cyclical . . .

*Continued from page 38*

Robert McAshan, Cullen's chief investment officer, likes **United Technologies Corp., Motorola Inc., Xerox Corp., Telex Corp.** and **IBM Corp.** and tends to stay away from smaller-cap holdings in those industries.

Cullen also finished in the top 10% for the three- and five-year periods, returning compound annualized returns of 31.6% and 29.7%.

In the three-year rankings, Sun Banks' nearest competitor was First of America Investment Management, Kalamazoo, Mich., a subsidiary of First of America Bank Corp., with 36.2%, followed by Bank of the West, San Jose, Calif., with 35.2%; Puget Sound National Bank, Seattle, Wash., 34.8%; and IDS Trust Co., Minneapolis, 34.4%. The median equity fund returned 27.2% during that period, compared with the S&P's 30.6%.

Its closest competitors in the five-year period were First Union Bank, Charlotte, N.C., with a compound annualized 32%; Bank of New England, Springfield, Mass., with 31.8%; Morgan Guaranty Trust Co., New York, 30.1%; and First RepublicBank, Dallas, 29.9%. By comparison, the median PIPER fund returned 24.7% and the S&P, 27.9%.

In the 10-year period, Sun Banks' compound annual return of 23.4% outdistanced First Union with 20.9%; First Interstate Bank of Denver, 20.7%; National Bank of Commerce Trust & Savings Association, Lincoln, Neb., 20.3%; and First Trust Corp., Denver, 20.3%. The median fund returned 16.3% and the S&P, 17.2%.

Unlike many money managers, William Hackney, First Union's chief investment officer, said his $2 billion equity portfolio is still fully invested.

Today's market is "liquidity driven, not market driven," Mr. Hackney said, adding the large volume of overseas money entering U.S. financial markets means "there's still plenty of cash to prop up stock prices."

He likes large-cap companies in the paper, chemicals, computers and industrial machinery sectors. "They're not flash-in-the-pan industries. (They'll) be leaders through the rest of the decade."

Mr. Hackney said managing money is difficult because "there are new rules to the game as far as valuation goes."

Traditional screens such as price-earnings ratios over 20, and dividend yields below 3%, for example, are no longer applicable, he said, because new depreciation schedules have surpassed reported earnings and because declining inflation rates have accelerated writeoffs in dividend interest. ■

How did the lift truck company get their Master Trust in gear?

The Clark Equipment employee benefit plan is no small load. It's really 21 different plans, designed to compensate some 13,000 employees. Clearly, no formatted Master Trust plan could meet their specific needs. So they called in Harris Bank.

With our flexible planning approach, we worked to develop a Master Trust specially designed for Clark. We consolidated and allocated their asset pool. And we helped Clark hook into our check-issuing Paymanager system. To expedite payments, and provide Clark with quick, accurate, on-line computer access to their file.

Flexible solutions from Harris Bank made the difference to the Clark Equipment Company. See if we can give your Master Trust a big lift. Call our Marketing Representative, Mr. Walter J. Kowalczyk at (312) 461-7625.

The Harris.

## S&P stocks shine; similar issues lag

**By Joel Chernoff**

BERKELEY, Calif. — Stocks included in the Standard & Poor's 500 stock index have outperformed similar stocks not included in the index by 3.25 percentage points a year since 1980, probably because of the growth of indexation, financial futures and foreign investment, according to an analysis by BARRA, a consulting firm.

What's more, other researchers are pointing to a spectacular difference of 25 to 30 percentage points in returns between S&P and non-S&P stocks in the past 12 months.

Investment experts speculate there are three factors boosting the value of S&P stocks since the beginning of the decade:

- The renewed surge of interest in S&P 500 index funds, starting in early 1980.
- The development of S&P 500 index futures in early 1982, which caused a rise in interest in all S&P 500 stocks because of emerging program trades, including dynamic hedging strategies. This caused a premium to be paid for such stocks.
- The increasing role of foreign investors, particularly the Japanese, in the equity market starting in early 1986. Many foreign investors focus on household names, which are typically S&P 500 stocks.

Pension experts differ on whether the phenomenon will continue.

**Since 1980, S&P 500 stocks have outperformed similar stocks not in the index by 3.25 percentage points a year. In the past year alone, the difference has been a spectacular 25 to 30 points.**

William Jacques, a partner of Martingale Asset Management, Boston, who came up with the idea for the research with BARRA officials, expects the 3.25-point differential will be sustained.

"My guess is it will continue, with the Japanese being the marginal investors," he said.

But Richard Grinold, BARRA's director of research, believes the trend will level off. He said the trend is "curious and I'd think about it, but I wouldn't plan the rest of my life on it."

The analysis by BARRA compared the returns of stocks in the S&P 500 index with the returns of all stocks in a universe of 1,400 high-capitalization stocks since 1980 and found the 3.25 percentage point margin compounded annually.

BARRA added a dummy variable to its uriverse to single out the S&P stocks. It found that from 1973 through 1979, performance of the S&P and non-S&P portions were virtually identical. But starting in 1980, the S&P portfolio returns dramatically increased relative to the entire universe.

In addition, BARRA demonstrated the size of the stock was not a factor. Smaller-cap stocks in the index also outperformed their non-S&P counterparts.

The index stocks had an alpha — a measure of the return in excess of the market return that is not explained by a portfolio's risk level — of 27 basis points per month for the 7½ years ended

## Funds move $8.9 billion into cash in 1st quarter

**By Jacqueline Dutton**

Pension funds liquidated a record $16.7 billion of stock and moved more than half of that amount into cash during the first quarter of 1987, and there are signs the shifts are due to increasing unease with the stock market level among pension fund executives.

According to the Employee Benefit Research Institute's Quarterly Investment Report and the Federal Reserve Board, U.S private pension funds moved $8.9 billion of the receipts from the stock sales into cash equivalents.

The report shows $7.3 billion of the proceeds was moved into other investments — such as real estate and international investments — during the first quarter. In contrast, $1.4 billion in bonds were liquidated during the period.

The massive sale of stocks in the quarter was more than double the nearly $8 billion in stock sales recorded during the first quarter of 1986.

"That's a surprisingly large number, but it's not alarming," said Donald Strazheim, chief economist at Merrill Lynch Research & Economics, New York. Mr. Strazheim said he believes the liquidation is a glitch; pension funds moved out of stocks to capture large profits in the first quarter.

"In retrospect, it was a bad time to sell stocks," he said. "But more and more people are looking at the time when the turn in the market will come."

During the first quarter of 1987, the Standard & Poor's 500 stock index returned 21.4%. The index returned 5% during the second quarter.

One of the funds cashing in on the big gains was the $3 billion General Board of Pensions of the United Methodist Church, Evanston, Ill., which sold $50 million in stocks in March, a sum that James Parker, general secretary, said is insignificant.

Mr. Parker said because of the run-up in the market, the fund took some profits, but didn't liquidate so much of its holdings as to lose ground should the market gain.

Man-Bing Sze, associate director of EBRI, a Washington-based research organization, said the huge shift out of equities and into cash comes at the tail end of a two-year trend.

"Since 1985, we have more or less seen a net withdrawal from stocks and bonds," Mr. Sze said. "A lot of it is being shifted into cash, although some of those funds may have been parked in other assets."

The EBRI study shows the fourth quarter of 1984 was the last in which there was a positive flow of funds into equities by private pension funds. A net total of $9.4 billion was injected into the stock market in that three-month period. The last quarter in which the net cash flow into bonds was positive was the first quarter of 1985, with a net total investment of $900 million.

Although many of the money managers and pension plan executives interviewed expressed surprise at the EBRI and Federal Reserve Board numbers — with some dismissing them as "suspicious" — there is an indication pension plan executives and their

# Equity group is realigned at GTE Investment

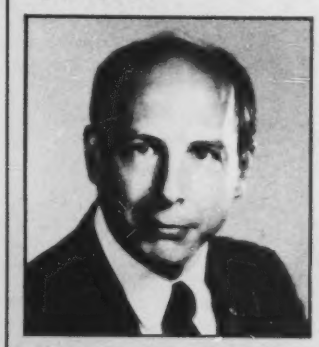
By Marlene Givant

STAMFORD, Conn. — GTE Investment Management Corp., which runs the $10 billion GTE Corp. pension fund, has realigned its equity management structure, removing the division of responsibility for traditional and non-traditional external managers and broadening internal equity management responsibilities.

The change will give several individuals more varied duties.

"I think this organization will be more directly responsive to challenges facing us in the future," said Dave Seidel, vice president-pension fund management. "It provides job enrichment and better career paths for the individuals involved."

The move follows the resignation of Greg Densmore, director of investment evaluation, who joined First Manhattan Capital Management, New York (*Pensions & Investment Age*, July 13).



*Dave Seidel says the changes will help the GTE fund cope with challenges.*

The former structure consisted of two groups, one headed by Mr. Densmore and one run by Patricia C. Doumas, formerly director of portfolio dynamics.

Mr. Densmore and three analysts were in charge of external managers, with Jayne O. Mansfield as manager of non-traditional investments.

Ms. Doumas and her staff were responsible for the internal management of less than 10% of the fund's $7 billion in equities.

In the new setup, Ms. Doumas has been named director of equities-value and real, and Ms. Mansfield has been named director of equities-growth and international.

A new position — senior analyst-international — has been created, but not yet filled.

Ms. Doumas and her staff will run internal equities using a value approach and will supervise external value equity managers and managers of real estate, oil and gas and timber equity investments.

Ms. Mansfield and her staff will internally manage growth stocks and oversee outside managers of growth stocks, international stocks, leveraged buy-outs and venture capital.

Mr. Seidel still will head both equities and non-traditional investments.

Wayne C. Hofmann, formerly the internal equities trader, who had reported to Ms. Doumas, has been named manager of equity trading and also will report to Mr. Seidel. Mr. Hofmann will retain his internal trading responsibilities, but also will start monitoring how the fund's external managers trade.

# NISF median manager hits 28.6% for 3 years

Equity managers in the National Investment Sponsor Federation performance universe had a median compound annual total return of 28.6% for the three years ended June 30, compared with 30.6% for the Standard & Poor's 500 stock index.

While the managers in the NISF universe underperformed the index, they outperformed the median of the Pensions & Investments' Performance Evaluation Report universe of bank and insurance company-managed equity funds, which was up 27.2% for the three years.

The median fixed-income fund in the NISF universe was up 18.2%, compounded annually, for the three years, compared with 18% for the Salomon Brothers Broad Investment Grade index and 17.6% for the Shearson Lehman Government/Corporate bond index. The PIPER fixed-income median for the three years was 16.3%.

The median NISF equity fund was up 3.5% in the first quarter and 24.9% in the first half, compared with 5% and 27.5% respectively for the S&P 500 index.

While the median manager in the NISF universe underperformed the S&P 500 for the shorter periods, it again outperformed the PIPER median equity manager, which returned 3.2% and 22.8% respectively for the quarter and the half.

The NISF equity returns are derived from 513 equity portfolios managed by 198 money managers for 120 pension funds representing $120 billion in assets.

The participating pension funds belong to such regional groups as the Pension Group East, the Los Angeles Pension Group, Pension Group West, Chicago Pension Forum and Pension 21 Club, all of which are NISF members.

The median fixed-income return in the NISF universe of 227 portfolios was −1.6% for the quarter, equal to the Salomon Brothers index and better than the −1.9% return of the Shearson Lehman index.

For the half, the NISF median manager had a zero return while the Salomon Brothers BIC index was −0.3% and the Shearson Lehman index was −0.4%.

The median fixed-income fund in the PIPER universe was down 1.6% for the latest quarter and 0.1% for the six months.

The NISF also reported on 75 balanced funds invested by 53 managers. The median return among those funds for the quarter was 2% and for the first half, 15.8%. ■

# Comings and goings affect 3 public funds

By Joel Chernoff and Trudy Ring

One large public pension fund lost a top executive while two others filled high-ranking spots.

● Curtis O. Townsend, deputy director of finance and pension assets manager for the $1.6 billion Philadelphia Municipal Pension Fund, is leaving the fund to join Siebel Capital Management Inc.'s New York office as a senior vice president. His last official day with the Philadelphia fund was Aug. 28, but he is staying on to help retirement board members select a successor and handle other business. He will join Siebel Sept. 14.

● In Madison, Wis., Marshall Burkes has been named executive director of the $18 billion Wisconsin Investment Board, replacing Kenneth E. Codlin, who resigned in March. Mr. Burkes, who expects to start his duties this month, has been a Washington-based consultant on international financial management for the past two years.

● Norman G. Benedict has been named deputy executive director of investments for the $7 billion Public Employees' Retirement Association of Colorado, Denver. He has been acting in that capacity on an interim basis since Norman Jaskol resigned the post in February to join Lomas Capital Management Co., Dallas.

*Curtis Townsend is leaving the Philadelphia Municipal fund for Siebel Capital Management.*

Mr. Townsend, who has spent almost four years at the Philadelphia fund, will market to public pension funds in the United States and abroad, and will help set the firm's investment strategy.

He said the move to Larkspur, Calif.-based Siebel will allow him to "expand my craft" and satisfy financial needs of his family.

Prior to joining Philadelphia, he was deputy treasurer for the state of Michigan's bureau of finance, where he oversaw the state's internally managed pension fund, which had $8.2 billion in assets when he left.

Since Mr. Townsend joined the Philadelphia fund in January 1984, it has grown tremendously and revamped its allocation strategy.

During the period, the assets rose 137%, from $675 million. In the same time, exposure to equities soared to 49.5% from 6%.

"What I tried to do was reduce our exposure" to bonds, and "cherry-pick" stocks in the uneven 1984 market, he explained.

Legal limitations restrict the fund to being 50% invested in stocks, but fund officials are seeking to boost that ceiling to at least 60%, Mr. Townsend said.

Bond investments have shrunk to 46% of the portfolio from 79% in January 1984. The fund also has added real estate and venture capital components; with cash and miscellaneous investments, they comprise the remaining 4.5% of fund assets.

An initial foray into international stocks also is "quite imminent," Mr. Townsend said. He is recommending allocating 7% to 10% of plan assets to the area during the next few years, divided among at least three types of managers: an index manager, a

# 7 leaving Rothschild Int'l

By Marlene Givant

LONDON — The chief investment officer and six of 18 members of the international equity investment team of N.M. Rothschild International Asset Management Ltd. have resigned, reportedly to set up their own shop.

In response to the departures, Rothschild International, which manages a total of $1.5 billion (about $700 million in equities) for U.S. tax-exempt clients, has consolidated investment decision-making with the fixed-income and currency group and international natural resource mutual fund management team of Rothschild Asset Management Inc., New York.

Richard Katz, head of Rothschild Asset Management's fixed-income and currency group, has been named chief executive officer of Rothschild International and will direct the merged investment management operation, which will run more than $7 billion. Rothschild Asset Management Holdings, the holding company for both firms, has about $17 billion globally under management. RAM Holdings had been planning such a consolidation for some time, although Rothschild International will continue to operate separately in line with Securities and Exchange Commission guidelines, according to Nick McAndrew, managing director of Rothschild Asset Management, London, which manages mainly U.K. money.

Those resigning include three senior officials — James Heyworth-Dunne, chief investment officer; Richard Chandler, director and senior portfolio manager covering the United States; and Andrew Baker, assistant director and portfolio manager-U.S.

Luke Nunneley, portfolio manager-Europe; Florian von Hirsch, portfolio manager-Europe; Piers Bertlin, portfolio manager-Japan; and Richard Bronk, portfolio manager-Europe, also gave notice. All had been with the firm for at least two years except for Mr. Bronk, who worked at Roths-

# Buck sets merger with European firm

By Brad Rudin

NEW YORK — Buck Consultants Inc., New York, has announced a merger with Michael Dunhill International Consulting Actuaries, Brussels, Belgium.

The merger of Buck, which employs more than 900 people, and Michael Dunhill, which employs 30, gives Buck a European presence in the actuarial arena at a time when its major U.S. competitors have offices in Continental Europe.

"This is an historic and happy occasion for Buck," said Mircea Manicatide, assistant to the company's president.

Terms of the transaction were not disclosed.

The European operation, to be known as Buck Consultants S.A., is to be headed by Michael Dunhill. It will have offices in Antwerp, Belgium; Brussels; and Paris. William E. Giegerich remains president and chief executive officer of Buck Consultants.

The merger adds to the list of financial services firms that have made trans-Atlantic mergers.

The internationalization of business calls for a presence in Europe, Mr. Manicatide said. "You want to be on the spot."

Establishing Buck offices in Europe without merging with a local firm had been considered, Mr. Manicatide said. The merger "saves us the very hard work of starting from scratch," he said.

The two firms fit well because some of Dunhill's clients in Europe are U.S. companies that require actuarial services for their domestic operations, Mr. Manicatide said.

Other overseas merger opportunities are being considered by Buck, although another transaction is not imminent, he said.

Buck's entrance onto the international playing field did not cause great concern among its competitors.

"Most of our competitors — and now Buck — have found it the best way of doing business," said H. Richard Souders, a vice president at Johnson & Higgins, New York. "We find it important to have representatives on the local scene. We get a better response by having a local presence."

"We have found that the major constraint in the consulting business is finding good people. That is the limitation, rather than another good firm in the market," said Donald Boden, deputy chairman of William M. Mercer Fraser Ltd., London, the European subsidiary of William M. Mercer Inc.

Buck, with 1986 revenue of $79 million, stands as the sixth-ranked benefit consulting firm in the United States, according to Business Insurance magazine.

Benefit consulting revenue climbed 11.3% during 1986 from $71 million, the magazine reported in its Dec. 22 issue. ■

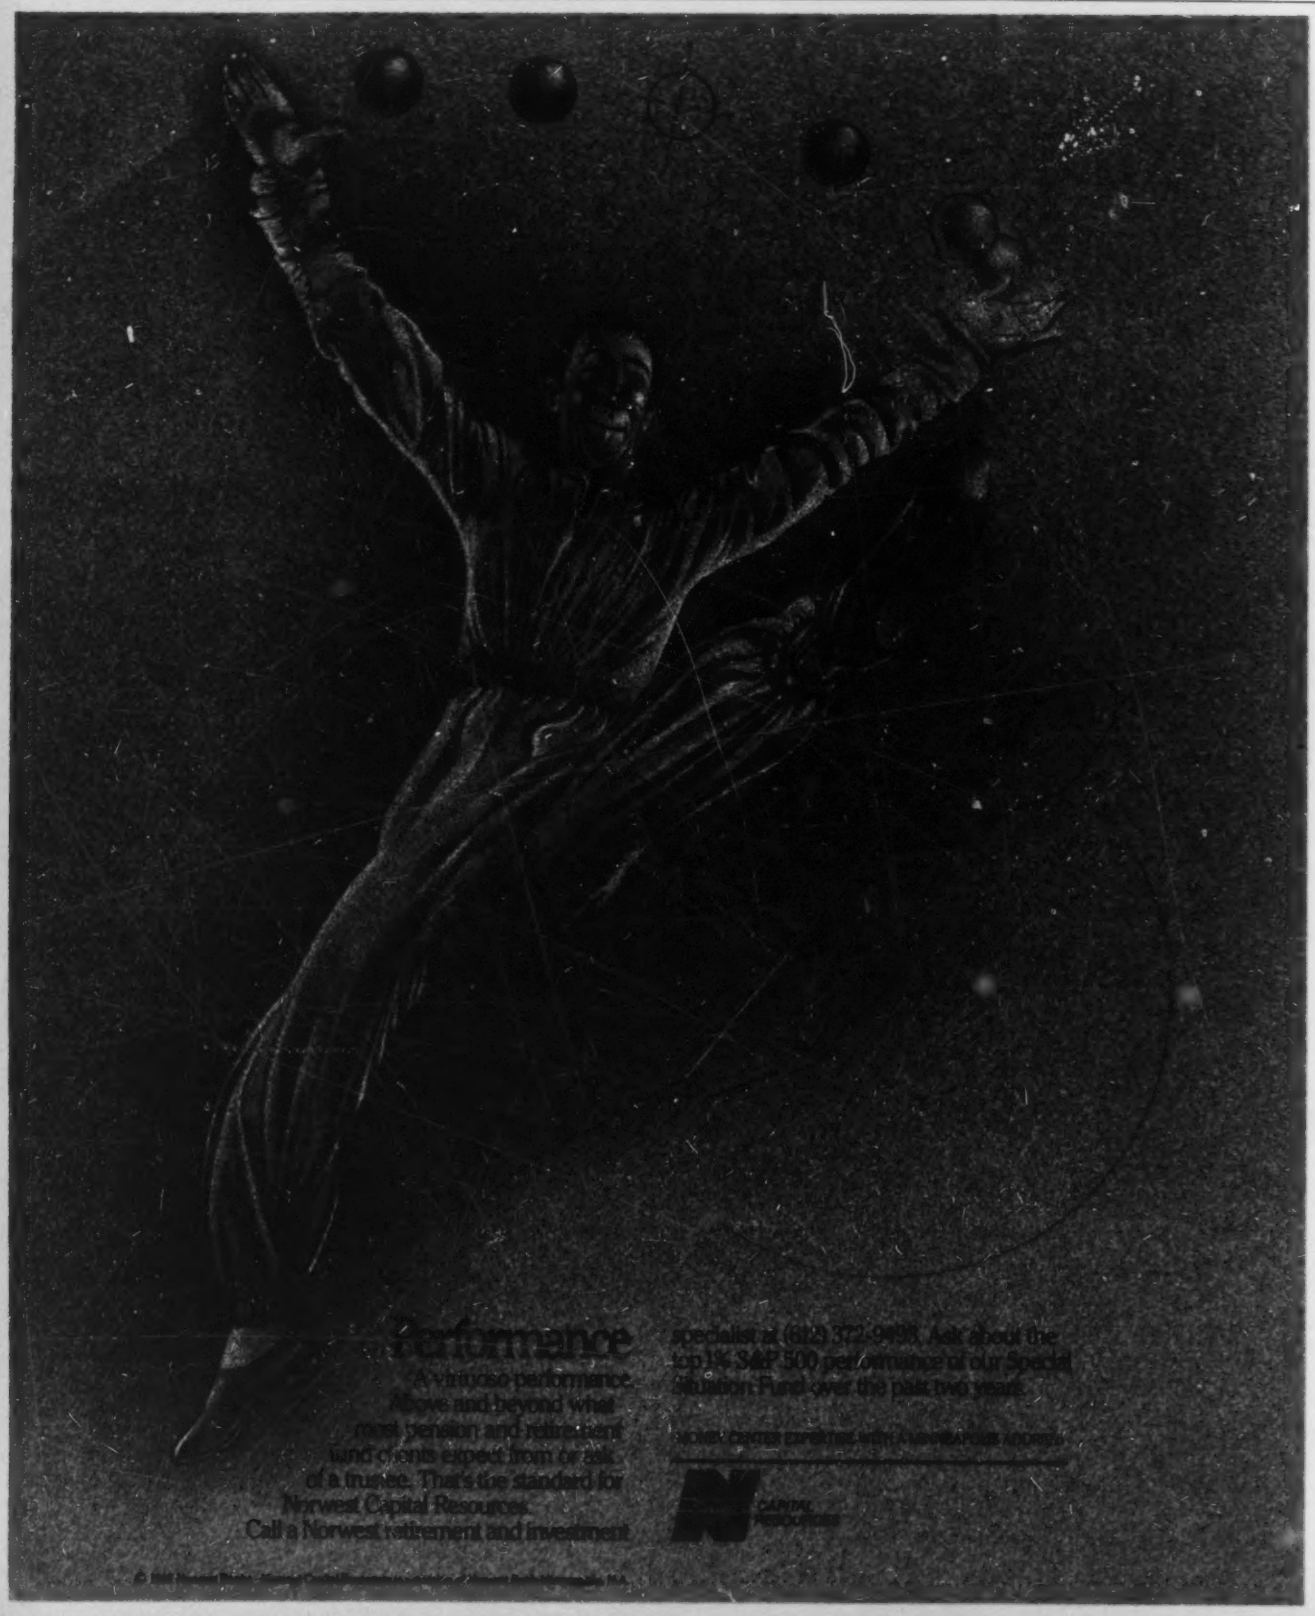
## Corrections & clarifications

• An Aug. 10 story about property writedowns made by the RREEF Funds might have given the wrong impression about remarks made by **William J. Grady,** vice president and portfolio manager for **CIGNA Investment Inc.** Mr. Grady's comments were addressed to the general process of appraising properties; he did not comment specifically about RREEF's actions.

• In the Aug. 24 PIPER equity rankings, **Meridian Asset Management,** Valley Forge, Pa., was inadvertently listed by its former name, Central Penn, Pa.

• The Aug. 24 story on the **Pitcairn family** of Philadelphia incorrectly listed the titles of John Turbidy and Dirk Junge. Mr. Turbidy is president and chief executive officer of Pitcairn Financial Services. Mr. Junge is executive vice president.

The cash management survey will be published in the Nov. 2 issue of *Pensions & Investment Age.*



## Opinion

# Pension execs want results

DURING THE FIVE YEARS through June, assets invested in the stock market grew at a 27.9% average compound annual rate. During the same period, the amount of pension fund equity assets invested through index funds grew at a 61% compound annual rate.

The amount of equity assets in index funds with investment management firms totaled $109 billion at midyear, with perhaps another $20 billion managed internally for a total of almost $130 billion.

This amounts to about 11% of pension fund equity assets. No longer can indexing be considered a fad.

Pension executives deciding to index their assets have been reacting to 10 years of poor active manager performance heightened by high active management fees at a time when corporate cost-cutting is in vogue.

In the past 10 years, only about 30% of active managers have beaten the Standard & Poor's 500 stock index, and in the past five years, only about 20%.

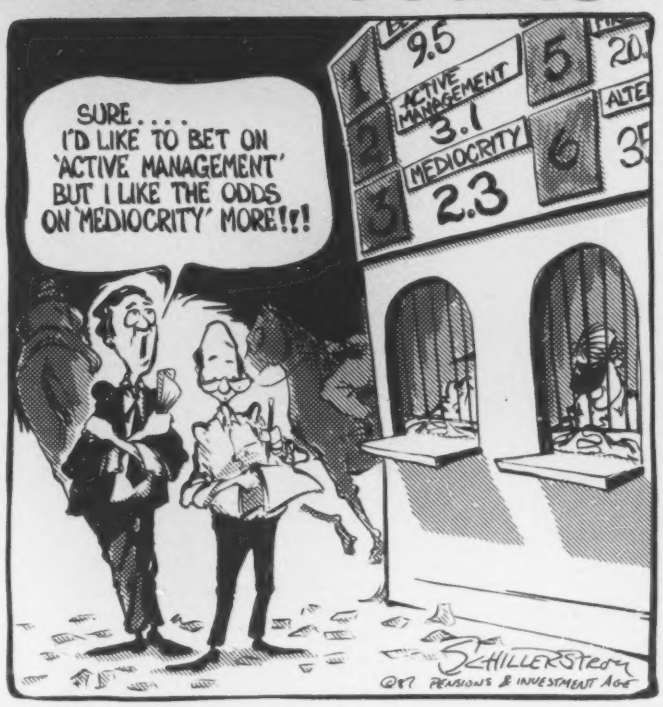
Many pension executives have decided that if they have less than one chance in three of selecting a manager who can beat the S&P 500, the expected incremental return from doing so is not sufficient to make the effort worthwhile, either for their fund, or for themselves professionally.

If these pension executives have "settled for mediocrity" as some charged in the early days of indexing, then mediocrity has paid off.

The trend to indexing will continue at a strong pace until there is a prolonged bear market, or until active managers change their ways.

A recent Trust Universe Comparison Service report showed active managers do provide incremental returns over the market in the stock selections and in their sector weightings, but give it all back through their cash positions and their trading costs and fees.

Too often, money managers who are hired to be aggressive and fully invested allow cash to build up in their portfolios,



either intentionally or unintentionally.

Often they are trying to hedge against losing their accounts by using a cash position to minimize losses if a bear market should suddenly develop.

Active managers are supposed to earn their extra fees by taking a different risk profile from the market. Offsetting that different profile by a high-cash position is trying to gain the high fees without really earning them.

At least, that's they way some pension executives have interpreted it, and they're not willing to go along any more.

# Master custody growth questioned

FOR THE SPECIAL REPORT on master trusts in this issue, *Pensions & Investment Age* asked the largest master trust banks how much they had in master trust and master custodial assets.

Master trusts were defined as providing trust, unitized accounting and reporting services, performance measurement and ancillary services to companies that have one pension plan and several managers, or several pension plans and several managers.

Master custody arrangements were defined as providing all the services of a master trust agreement, but without legal trusteeship, to such entities as public pension funds, endowments and foundations.

The master trust asset figures provided by the banks, $1.3 trillion, accounted for about 83% of all pension and profit-sharing assets, and seems to agree with estimates the master trust business is virtually saturated. The remaining assets are probably held by funds too small to have master trustees.

However, the total of master custodial assets claimed by the banks appears larger than it ought to be. With public funds totaling about $548 billion, and endowment and foundation assets totaling an additional $100 billion, the total master custody universe seems likely to total no more than $700 billion.

Thus the banks seem to have 82% of that market covered, although most experts say it is a far less mature market than the master trust assets.

Either the master custody universe is larger than *P&I Age* estimates, or it is more mature than the industry believes.

## Letters to the editor

### Information updated

To the Editor: I'd like to take this opportunity to update information The New England provided in the May 25 directory on our newest investment affiliate, Back Bay Advisors Inc.

Back Bay Advisors was formed in 1986 to capitalize on existing fixed-income management capabilities at The New England and to expand its marketing activities in the institutional marketplace.

Back Bay Advisors is a risk-control fixed-income manager with capabilities in intermediate bonds, high-yield bonds, contingent immunization, indexing and futures and options.

In addition to managing all the publicly traded securities in the corporate general account, Back Bay manages fixed-income separate accounts as well as non-insurance related assets, including more than $1.2 billion in the form of fixed-income mutual funds. Total assets under management top $3.7 billion.

Charles T. Wallis, is president and chief executive officer. Clients also may contact Antwine Jefferson III, vice president and national sales director of the institutional investment group.

**Kathleen R. Sammis**
Vice president
The New England
Burlington, Mass.

### Morley corrects data

To the Editor: We feel it is important to inform *Pensions & Investment Age*'s readers of several errors in the Aug. 24 story, "Active GIC specialists growing despite doubts."

First, Morley Capital Management was listed as having $990 million under management. The correct amount really is $1.6 billion under discretionary management plus about $550 million in non-discretionary management.

Secondly, our president, Hal Morley, actually pioneered the use of GICs in discretionary accounts in 1974 while the head of fixed-income management for First Interstate Bank of Oregon.

Thirdly, we began active GIC management in early 1983.

Morley Capital has a staff of 22 highly trained professionals, compared to an industry average of fewer than 10. The article implies it is neither possible nor important to differentiate among approaches to insurance company credit analysis.

We disagree. Credit analysis, like portfolio management, requires a thorough knowledge of the industry, a sophisticated analytical approach, and sufficient staff resources to meet fiduciary responsibilities. It cannot be done out of someone's hip pocket.

**J. Thomas Morrow**
Executive vice president
Morley Capital Management
Lake Oswego, Ore.

*Editor's note: The asset figures and year the firm was registered were obtained from a Morley executive.*

## Specialty investors post highest returns

By Steve Hemmerick

Specialty funds that invest in particular property types and small funds with as few as three properties are reporting the highest returns among commingled equity real funds, Pensions & Investments' Performance Evaluation Report shows.

The higher returns of the less diversified funds — both by property type and geographic location — coincide with the move by some investors away from the larger, broadly diversified commingled pools that are regarded to be index funds for real estate.

For the 12 months ended March 31, the report showed Metropolitan Life Insurance Co., New York, Closed End Fund II returned 17.9%, and was the top-performing closed-end fund. It has $77 million in assets and three properties.

The top-performing open-end fund, Citicorp, New York, Real Estate Equity Fund, had a 19.8% return for the same period. The $300 million fund is highly leveraged.

JMB Institutional Realty's Group Trust I, Chicago, with $390 million in assets, had about 60% invested in retail properties, far above the 25% or less usually invested in retail. It returned 16.7% for the year ended March 31.

While some of the small and specialty funds turned in high performance numbers for the past 12 months, one of the largest and most diversified funds, the $4.6 billion Prudential Realty Group, Newark, N.J., PRISA I fund had a 4.6% return, and finished in the ninth decile.

PRISA I had returned 8% for the previous 12-month period.

The PRISA fund includes office, retail and industrial property nationwide, with an emphasis on office, but it has little leverage, development or geographic concentration. PRISA I is often considered a bellwether for real estate.

While lack of appreciation is hurting most commingled fund performance, the high-scoring funds had high appreciation. This raised questions from some managers about how these funds could be scoring so high in today's depressed real estate market.

The appreciation for the Metropolitan Closed End II fund was about 9.5%, just slightly more than 50% of the fund's reported total return number, but the appreciation figure used in calculating the total return number was carried forward from the previous three months.

"Appreciation is not recalculated except at year end. Whatever the previous year's appreciation had been, calendar year 1986, plus income" is used as the total return number, said Bruce Kosakowski, national director for Metropolitan Realty.

"Until Dec. 31, 1987, they will just carry the old appreciation number because it won't be recalculated. We do not recalculate either gain or loss until each year's fourth quarter, so in calculating an annualized rate of return, what is done is the last year's appreciation is taken and the trailing four quarters of income," he said.

About whether carrying appreciation figures forward into the next year is unusual, Mr. Kosakowski said, "When we are marketing this, we are dealing with calendar years, that is what we are reflecting to our clients, and in terms of looking at current performance, we would just stress looking at the first quarter's income.

He said using an annualized return with an appreciation number that lags "is misleading to an extent because it is a snapshot of appreciation that goes back to December 1986, so we are not stressing that in terms of our closed-end funds." Met Life uses current income but appreciation that lags, in this case by a quarter but, at other times of the year, by as much as three quarters.

Many closed-end fund managers, he said, don't appraise properties every quarter "because, in effect, the closed-end structure neutralizes any appraisals. They are not unit values that you can cash in or cash out of the way you can with an open-end fund."

One or more of the three properties in the Metropolitan fund could have, in effect, more than 12 months appreciation in its total return figure, explained Mr. Kosakowski.

He said a commingled fund can commit to a new property before it is fully leased and, therefore, pay an attractive price. "By the time it came to actually fund the dollars, it (the property) was fully leased, so it was a very attractive increase in value (appreciation) as the property went from a speculative construction project to a

## $3 billion invested in multiple lender securities market

By Marcia Parker

WASHINGTON — The Federal National Mortgage Association's newest mortgage-backed securities product, multiple lender mortgage-backed securities pools, is off to a good start.

The first pools were introduced in January. The latest $315 million issue by Fannie Mae in July pushed the fledgling market past the $3 billion mark in eight months.

Dubbed Fannie Majors, Fannie Mae devised the relatively simple idea of pooling mortgages from many different lenders, in part to make the market more efficient.

Previously, loans from a single lender backed mortgage-backed securities. In the single-lender pools, lenders had to have a minimum of $1 million in mortgages to participate. In the multiple-lender pools, they need only $250,000 in mortgages.

Fannie Mae issues the securities to mortgage lenders, who either hold them or sell them through Wall Street investment houses.

Investors and securities dealers have been paying higher prices for the larger pools. The larger pools reduce their trading and transaction costs.

Wall Street dealers say the new securities have been well received in the market, and they expect the market to grow significantly in the future.

Investors are attracted to the securities because larger pools are created with greater geographical diversity, reducing the volatility of prepayments and lowering trading costs.

In addition, the seasoning requirement for mortgages means the loans have homogenous features. The mortgages in each pool carry the same coupon; must be long term; must be 25- to 30-year conventional mortgages; must be single family; must be fixed rate; and must be no more than 12 months old on the issue date.

The market for multiple lender mortgage-backed securities pools is large. More than 900 individual pools, totaling $2.5 billion, were originated each month in the fourth quarter of 1986. Those same pools could have resulted in several multiple lender pools, each as large as $400 million to $500 million.

As a result of the multiple lender pools, trading in new mortgages and the securities that back them becomes simplified. Investors then are able to combine large pieces of single pools and reduce the costs of tracking and adjusting for prepayments.

Robert J. Levin, Fannie Mae senior vice president for mortgage-backed securities, said the main difference between single-lender pools and multiple-lender pools is that mortgages are contributed by many different lenders, which makes for larger pool sizes and greater geographical diversity.

In return for providing loans for the pools, the lender gets a mortgage-backed security representing a share of a larger pool. The share is proportionate to the amount of mortgages contributed to the pool.

Lenders who have participated in the program say that it has been relatively painless and there are no new requirements.

A separate commitment is not needed and most lenders can use existing commitments. Lenders don't have to let Fan-

*MarketFair, a Princeton, N.J., mall geared to upscale shoppers, is the subject of a $41.5 million participating mortgage financed by five pension and endowment funds.*

## 5 plans back mall mortgage

PRINCETON, N.J. — The more than $6 billion U S WEST Inc. pension fund, Englewood, Colo., and the approximately $2 billion Stanford University endowment, Palo Alto, Calif., are among five pension funds and endowments that have committed a $41.5 million to a participating mortgage for a specialty store mall in Princeton, N.J.

The investors are committed subject to the mall meeting leasing and net income objectives, said Joshua M. Brown, managing partner at FS Realty partners, Houston, the investment manager for the deal. He would not disclose those objectives.

He said the mall will consist solely of specialty stores targeted to higher-income shoppers. He expects it to do well because of Princeton's strong growth rate and high income levels.

The 237,000-square-foot Princeton MarketFair, which opened in mid-August, is co-anchored by Cohoes, a Cohoes, N.Y.-based upscale department store, and SuperSports USA, a sporting goods store that represents the first move to the north by Oshman's Sporting Goods Inc., Houston.

The mall was developed by JMB Federated Realty Co., Cincinnati, in a joint venture with The Landis Group, Lawrence, N.J., which had owned the 37 acres on which the mall is built. Representatives from JMB were unavailable for comment.

Larry Owen, a real estate investment officer at Stanford, said the demographics of the Princeton area are "outstanding" for this kind of mall.

One consultant, whose clients weren't involved in the deal, said he likes the concept of an upscale shopping center, and he considers the Princeton area the right location for it. One downside, however, is the need for heavy capital improvements to maintain the mall's trendy appearance, the consultant said.

### Heitman cuts staff

CHICAGO — Heitman Financial Ltd., Chicago, trimmed its work force by about 5% after a regular staffing review, confirmed Norman Perlmutter, chairman of the board.

The reduction was "not significant," Mr. Perlmutter said, and was confined mainly to clerical positions in the property management area.

He said the cuts were made to maintain an entrepreneurial atmosphere in the firm, which employs about 400 people.

"Our business is the strongest it has ever been and I want to keep it that way," Mr. Perlmutter said.

"We just go through a regular analysis of our staffing of the departments," he said. "With all the growth we've had lately, you tend to get a little fat." The firm has added about $1 billion in new assets during the past year, he said.

Mr. Perlmutter also said while specific numbers were not immediately available, he would be surprised if the staff cuts reached the 5% level.

"We shifted some people around, too. It wasn't just letting people go," he said.

The firm also recently installed a new computer system that reduced staffing needs. "While you're developing (the computer system), you have to run the operations in tandem — both manually and on computer," he said.

Heitman Financial is the parent company of Heitman Advisory Corp., with $3.99 billion in tax-

exempt real estate assets under management. Other subsidiaries include Heitman Financial Services Ltd. and Heitman Properties Ltd.

## Investors seek niches

BALTIMORE — Look for investors to increasingly turn to specialty real estate funds to boost sagging returns from more broad-based funds, said Robert H. Gidel, president of Alex. Brown Realty Advisors, Baltimore.

This search for niche markets, he said, is the next investment wave, following earlier moves into large commingled funds and individual separate accounts.

The current move into apartment, land and rehabilitation funds is part of this larger movement into funds with narrow investment targets.

Such a movement could signal a fundamental shift among investors to picking and choosing individual properties, rather than strategies.

Pension fund investors began with broadly diversified open-end commingled funds, then moved to closed-end funds and separate accounts that invested in several geographical and property types.

For investors with have good core portfolios, Mr. Gidel sees the present movement toward highly specialized funds as a good idea.

In response, his firm is coming out with a niche fund he wouldn't describe, which will be primarily based in Washington, very near his firm's headquarters in Baltimore. Alex. Brown has also recommended the Oregon Public Employes Retirement System, one of its clients, place $10 million in assets with a retail mall fund, Retail Property Trust, in which J.W. O'Connor, New York, is the general partner.

## Developer sets sub

CHICAGO — Murdoch & Coll Inc., a Chicago developer, has formed an investment management subsidiary to manage pension assets, said Todd W. Lillibridge, executive vice president.

The subsidiary will handle separate accounts and might launch a commingled fund. Money under management will be used for acquisitions and developments by Murdoch & Coll. No commitments have been made yet, however.

Mr. Lillibridge said the firm entered the money management business because tax reform has removed much of the privately placed investments in real estate and "made it more important for us to get our arms around pension funds."

Murdoch & Coll has used pension money before, mainly channeled through Trident/Meyer Real Estate Advisors, Anaheim, Calif.

## Construction falling

HOUSTON — Construction of office space in the United States is declining, according to a semiannual survey of 2.5 billion square feet of office space by The Office Network, Houston, a real estate services firm.

Of major cities, only Los Angeles has more office construction under way than at the end of last year, said Stephen A. Marmion, president.

Eight U.S. markets have more than 5 million square feet of construction under way, and four cities — Forth Worth, Denver, New Orleans and Jacksonville, Fla. — have no office construction going on in the central business district.

Washington had the most construction, with 18.1 million square feet under way. Los Angeles had 13.8 million square feet; Chicago, 13.3 million square feet; Manhattan, 9.2 million square feet; and London, 8.2 million square feet.

Washington is down 10% from 20.1 million square feet in the second half of 1986.

"U.S. construction is obviously on a downward plane," Mr. Marmion noted.

The survey also showed office vacancy rates increased to 19.3% from 18.6% at the end of 1986.

Mr. Marmion said the vacancy rate "showed only a minor increase," and he predicted another slight increase by the end of the year, with a stabilization in 1988.

Manhattan's 11.3% office vacancy rate is the lowest rate for a major office center in the nation, the survey reported.

Chicago was the leading U.S. city in absorption rates with 6.4 million square feet absorbed, ranking second worldwide; London was first, with 6.5 million square feet absorbed.

Total U.S. absorption stood at 40.5 million square feet in the first half of 1987, compared to 77.4 million square feet for all of 1986.

Mr. Marmion explained: "U.S. absorption remains strong, indicating continued demand for office space. Nevertheless, there is a five-year supply of space on the market at current absorption rates."

Boston and Los Angeles round out the top five cities for absorption in the 42-city survey, which includes cities in the United States, Austria, Canada, England, The Netherlands and West Germany.

# Invest . . .

*Continued from page 15*
nie Mae know they are participating until they deliver their pool packages.

Because Fannie Mae uses the book-entry system and doesn't issue the securities itself, it doesn't know who is investing in the pools. However, just about any institution that invests or wants to invest in mortgage-backed securities is a potential investor in the multiple-lender pools. Investors run the gamut from insurance companies to pension funds.

Fannie Mae's first multiple-lender pools were created in January. About 60 lenders contributed almost $250 million in loans to six pools that ranged in size from $10 million to $97 million, with two pools for each coupon of 8.5%, 9%, and 9.5%.

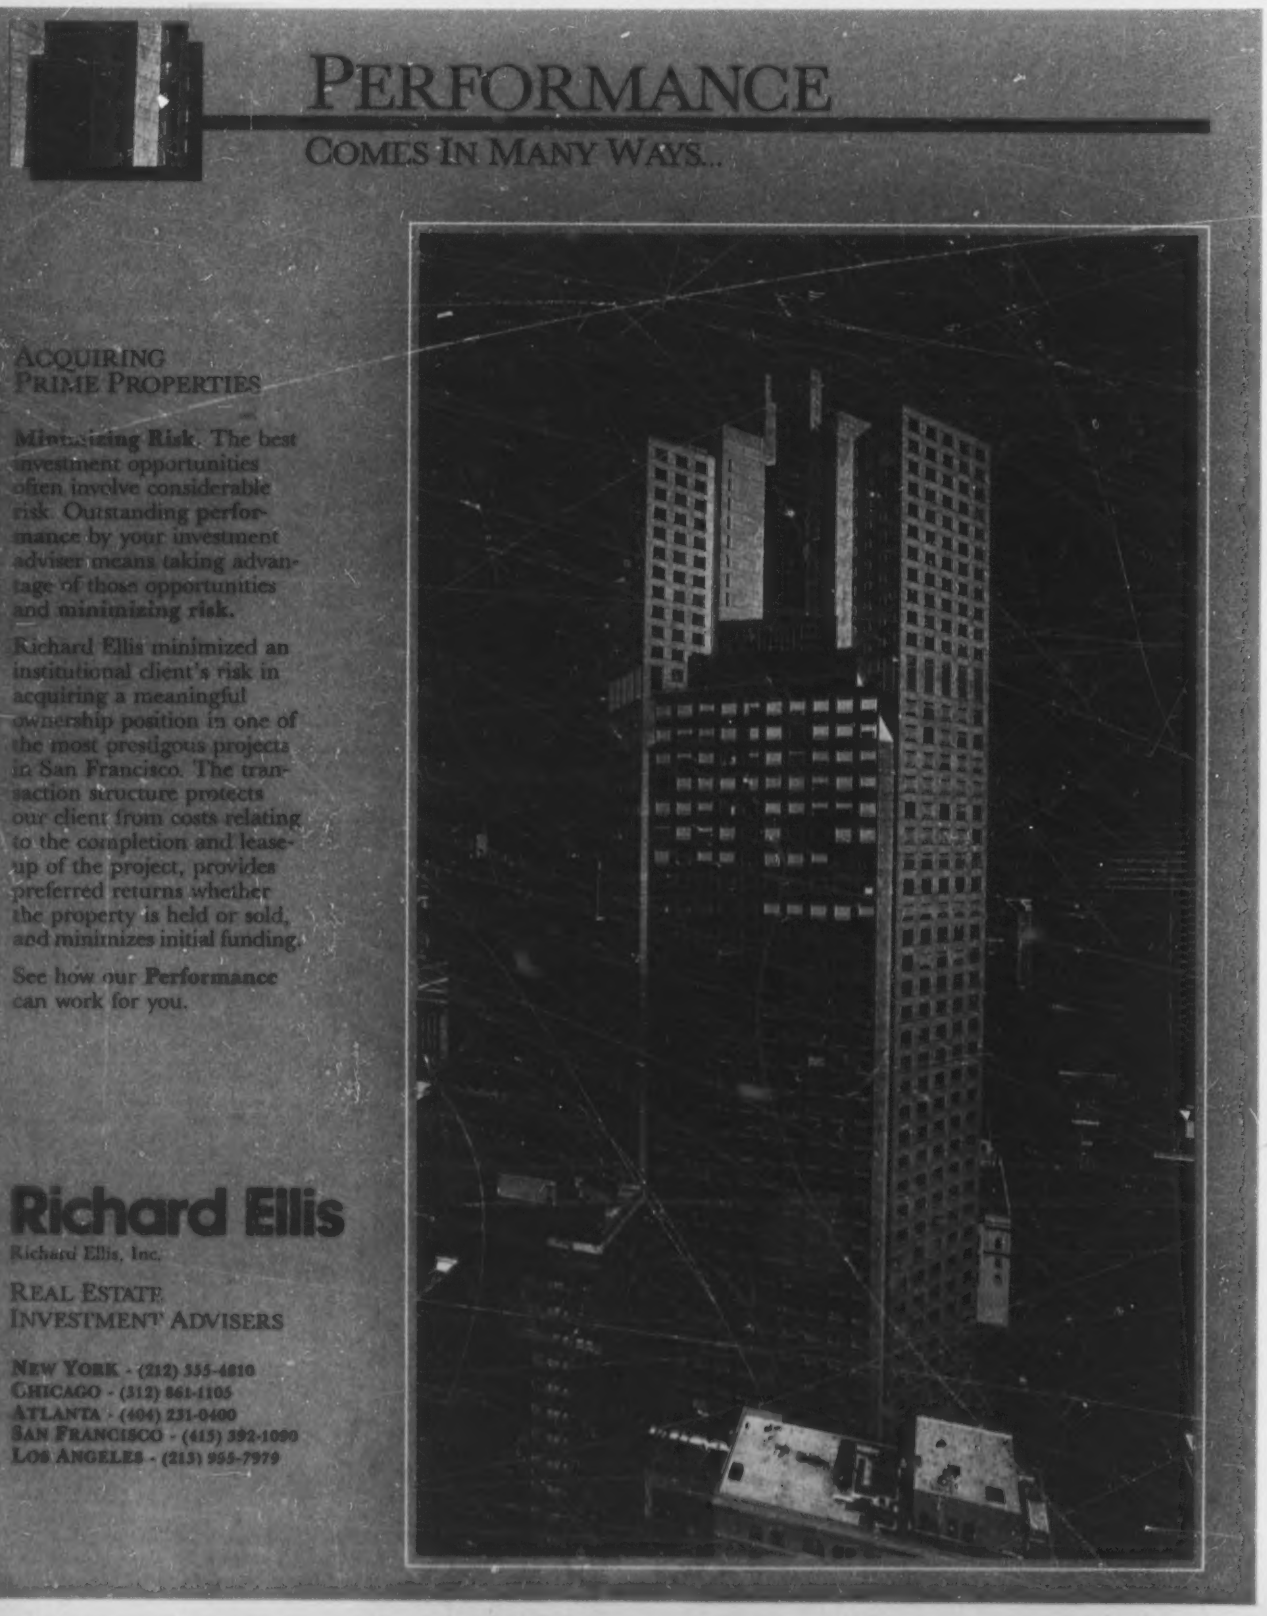
By April, 118 lenders had contributed more than $500 million in loans. In May, Fannie Mae issued some $700 million in Fannie Majors and about 150 lenders participated. July's $315 million issue attracted more than 150 lenders.

"The program is taking off. We think it's a win-win situation for lenders and investors," Mr. Levin said, adding that as the program becomes better known and understood he thinks it could develop into a "multibillion-dollar market."

Investors think the market for multiple-lender pools will increase dramatically in the years to come.

"I think it's a great deal. The potential is huge," one major insurance company executive said.

Fannie Mae is running seminars for investors to get the word out and is about to begin a major advertising campaign that will feature its newest mortgage-backed securities product. ■



# Specialty . . .

*Continued from page 15*

(fully) leased situation."

In the three properties in his fund, the appreciation component of the one-year PIPER return actually represents 18 months of appreciation.

He said he also expects appreciation will be high in 1987, though he is not able to say whether it will be as high as 1986.

The buildings in the fund are office buildings in Miami and San Diego, Calif., and an industrial building in Santa Ana, Calif.

For Chase Investors Management Corp., New York, Chase Bank Real Estate Investment Fund, the appreciation figure is carried even further forward since the last appraisal was done Sept. 30. It has $80 million in assets and six properties and returned 17% for the 12 months.

Part of the reason that the Chase fund did so well, said Fran Decker, a vice president for Chase, might be a function of that appraisal process. "As of Sept. 30 we have our properties appraised, so the March number would be a combination of our appreciation that was recognized from Oct. 30, 1985 through Sept. 30, 1986."

If there were a re-appraisal today, Mr. Decker said, he doesn't believe the total value of the fund would decrease. As with the Metropolitan fund, none of the properties is in the energy belt, where sharp writedowns are occurring.

During the last appraisal period for Chase, said Mr. Decker, property prices were generally rising because of foreign dollar investment and efforts to buy and sell properties before tax reform took effect. He thinks they are continuing to increase, though maybe not as much as in the past fiscal year for the Chase fund.

For the Citicorp fund, internal or independent appraisals are done quarterly, according to John Kemble, vice president. Of the 19.8% return, about 14.2% came from appreciation.

About 50% of the appreciation, he said, came from the sale in 1986 of two Century City, Calif., office buildings for $230 million to Japanese investors. Also, he said, rents were driven up to $27 per square foot from about $10 on an office building at 633 Third Ave., New York.

Last September, he said, the fund had seven properties, but now has 12. Cash from the sale of the Century City buildings and refinancing of the Third Avenue building was used to buy five other properties, four of which are shopping centers.

Mr. Kemble said he expects the fund to have good appreciation in the future, but not as high as it has been.

The high-scoring JMB Group Trust I also has four regional malls and no investments in the energy belt.

A key reason why the fund has done so well, said Ted Stern, JMB executive vice president, is officials saw trouble several years ago in the office market and decided to place a higher emphasis on retail.

Properties in the trust are appraised quarterly by in-house or independent appraisers, he said. ■

A Cash-Driven Approach To Real Estate Investing

In our separate account investing for pension funds, we emphasize current returns as the client's most important interest. Rather than staking a significant part of the return on projected appreciation, we believe in nurturing and increasing cash flow. Asset value and the ultimate resale value will then surely grow, with or without inflation.

We stand behind this philosophy with a cash-driven fee structure that rewards and penalizes us according to our performance.

Direct real estate investment management is our focus. We create and manage a custom portfolio of directly-owned individual assets for each client, according to a program tailored to specific objectives. Our investment policy is non-doctrinaire and flexible. We invest in both leveraged and free-and-clear equity real estate, and make creative and imaginative use of hybrid debt and other innovative investment structures.

This distinctive approach has made us one of the largest direct portfolio managers in the U.S. for corporate and public pension fund real estate investments.

Mellon Real Estate Investment Management Corporation

# Studies rap Social Security

**By Fred Williams**

DALLAS — The Social Security system is causing a massive shift of funds to whites from blacks and is draining all American workers who are paying more than they will receive at retirement, according to two separate studies by the National Center for Policy Analysis.

Both studies indicate workers would do better if they were able to invest their retirement savings privately.

Robert Myers, former chief actuary and deputy commissioner for the Social Security Administration, said the studies contained little new information and repeated frequent criticisms of the system.

He said the study regarding the impact on blacks may be based on "faulty" assumptions.

The studies were prepared by Peter Ferrara, a Washington attorney and leading critic of the system, and John Goodman, president of the NCPA, a Dallas-based public policy research organization.

The NCPA said black workers receive "far less" in benefits primarily because they have a shorter life span.

As an example, the study said a white male entering the labor market today can expect to receive 74% more in Social Security retirement benefits and 47% more in Medicare benefits than a black male earning the same wage.

The study said a white working couple can expect to receive about 35% more in retirement and Medicare benefits than a black working couple.

"In any given year, a black male worker is about twice as likely to die as a white male worker," said Mr. Goodman, NCPA president. "Among children born today, only 58% of black males and only 75% of black females are expected to reach the age of 65."

According to the NCPA, a single black male, earning the median income, can expect to receive $27,743 in total benefits, measured in 1986 prices.

A white male earning identical wages can expect $40,610 in benefits — about 50% more.

"Blacks are overrepresented among those of tax-paying age and underrepresented among Social Security beneficiaries," Mr. Goodman said.

"The effects of the welfare state are devastating for blacks in terms of the loss of Social Security benefits. In fact, the treatment of the two races by Social Security is so different, the very constitutionality of the system may be questioned."

Mr. Myers labeled this assertion "rubbish," and said race is "not always easily determinable" from Social Security rolls.

Mr. Myers said although he has not yet seen the study of black workers by the NCPA, "their work previously was faulty" and based on "common but incorrect actuarial assumptions that everyone lives to their expectations of life and then drops dead.

"They have said previously that blacks live to age 64 and then die. The assumption is an average which means half live longer and do draw extended benefits."

He said such studies also ignore survivor benefit payments.

Some organizations representing blacks have considered similar findings in the past, but after further study, agreed Social Security does indeed "help the lower-paid worker," he said.

Neither the National Association for the Advancement of Colored People nor the National Urban League offices in New York had any comment on the NCPA report.

In other findings, the NCPA said single workers earning the median income can expect to pay as much as $57,669 more than they would receive through Social Security; a working couple, both earning average incomes, can expect to "lose" $82,814; and a professional couple both earning high incomes, $200,000.

All calculations are based on persons 20 years old in 1986.

"In order to pay the benefits that have been promised to today's young people, as much as 38% of workers' incomes will have to be collected in payroll taxes during the next century," said Mr. Goodman.

He said the prediction is based on projections by the Social Security Administration.

He also pointed out there will be a dwindling supply of workers to support Social Security beneficiaries in the next century.

In 1950, there were 48 million workers and only 3 million retirees, a ratio of 16-to-1; by 1979, the ratio of workers to beneficiaries was 3-to-1; and sometime in the next century the ratio will drop to 2-to-1, or lower.

"The future financial crisis of Social Security can be averted only if we act today.

"This will require replacing the 'chain letter' approach of Social Security with a system in which each generation is committed to paying its own way," the study said.

Although Social Security is "a bonanza" for current retirees, the expected rate of return promised to workers at most age levels today "is abysmal when compared to the alternatives offered by the private capital market," the study said.

Mr. Myers said the study contains only time-worn criticisms of Social Security.

"The problem with all these studies is that they view Social Security as a system where everyone gets back exactly what he puts in and they assume people can and would go out and invest that money at 6% real interest, which I don't think is possible over any extended period of time," he said.

Mr. Myers said the real interest earned by pension plans in general has been 2% to 3% for a 20- to 30-year period.

He said such studies also usually include the costs of Medicare and label the whole package as a Social Security problem.

Mr. Myers said it is true that if the employee could invest the employer contribution as well as his or her own contribution, he or she might do well, "but who would pay for those persons who have already retired and those nearing retirement? They always answer that it would come from general revenue. What general revenue? We are operating in a deficit environment." ■

## London operation set up

BOSTON — John Hancock Financial Services has established its first overseas subsidiary, John Hancock Advisers International Ltd.

The London-based subsidiary, which opened Aug. 6, provides global investment advice and handles management of the John Hancock Global Trust fund and the John Hancock World Trust fund.

The World Trust fund, established Aug. 12, includes the Pacific Basin Equities Portfolio and the Fixed Income Portfolio, which will operate worldwide, according to Bob Young, a spokesman for Hancock.

R. Bruce Oliver, the vice chairman and president of John Hancock Advisers Inc., is chairman of the new company, which is an SEC-registered investment adviser. John Hancock Financial Services has $42.2 billion of assets under management.

# Pension execs say fees are fair

By Jacqueline Dutton

Pension fund executives generally believe they are paying a reasonable price for master trustee services even though those fees have increased over the past five years, a *Pensions & Investment Age* survey shows.

In an anonymous survey that drew responses from 75 pension executives overseeing a combined $107.5 billion in assets, the executives were asked if their annual master trustee fees increased and whether they considered fees high, average or low.

Although 60% of the respondents reported a median fee increase of $100,000 over the past five years, only 12% considered fees high.

Furthermore, while only two respondents reported a decline in fees over the past five years, 13 respondents, or 17%, believed the fees they paid were low.

Not only are the executives content with the fees charged, the survey showed, they also generally are pleased with the service the master trustees are providing. When asked if a change in master trustee was under consideration, 86% responded no.

The survey also showed 32% of the plans have had the same master trustee for 10 years or more, and 67% for five years or more.

The annual fees paid by the funds ranged from $50,000 for a client of Northern Trust Co., Chicago, to $10.5 million for another Northern Trust client. The median annual fee was $250,000.

When asked who pays the fees, 70% of the respondents said fees are paid by the fund, while 30% said fees are paid by the plan sponsors.

Very few of the respondents — six of the 75, or 8% — reported paying fees in soft dollars.

In general, the largest fees reported in the survey were paid by those funds with the largest amounts of employee benefit assets. But for annual fees of less than $850,000, there was no clear correlation between the size of the fees paid and the size of the account. Instead, other variables — number of plans, number of money managers and type of services provided — seemed to play a greater role in the amount paid.

The size of master trust assets ranged from $230,000 to $15.2 billion; the median was $575 million.

The range for the number of defined benefit plans in a master trust was zero to 250, and the range for number of defined contribution plans was zero to 10. The median number of defined benefit plans in a master trust was two, and the median number of defined contribution plans was one.

The number of money managers under the master trust ranged from one to 35; the median was nine.

In some cases, the difference in complexity of the respondents' master trusts — number of plans and money managers incorporated — accounted for discrepancies in the size of fees paid. For example, two of the respondents each reported total master trust assets of $300 million. One, with almost 30 plans and five money managers, paid $270,000 in annual master trust fees, while the other paid, with one plan and three money managers, paid $50,000.

But the surface comparisons did not fully explain the discrepancies in fees charged. Thomas W. Kimen, a senior vice president at Northern Trust Co., Chicago, said every master trust account is different and requires a different blend of services.

"In some cases fees differ because of the types of securities used," Mr. Kimen said. "Other times operating costs are different. Then there are differences in the money managers; some are high-volume traders and other low-volume. Their are differences in accounting requirements with various plans. Some want performance evaluation and benefits payment." ■

# The cost of competing

## Solving some problems creates others

By Trudy Ring

Bank of America is shelling out $25 million to fix a $20 million computer system — the most glaring but by no means only example of the problems master trust banks face in remaining competitive.

Many banks are battling to improve — through new technology — such master trust services as reporting and handling mortgage-backed securities, but some still have lost clients to the fight.

Bank of America, San Francisco, invested $20 million to create and install MasterNet. Now, it has set aside another $25 million because of significant delays in monthly statements produced by the new system.

Peter Magnani, a public relations officer with Bank of America, confirmed the bank's problems with MasterNet, but wouldn't say what caused them. "We've just characterized it as a conversion problem," he said.

In interviews, Bank of America clients acknowledged they haven't been receiving monthly statements on time, but they stopped short of revealing any intentions of firing the bank. "Anyone utilizing any service should analyze where it stands in relation to the market," one client explained.

Another client said the system appears to record and report fund activities accurately; it's just the delay that's a problem.

Mr. Magnani said the bank is in the process of catching up on all accounts. No customer information has been lost, he said.

When MasterNet is fixed, he added, it will have more capacity than the previous data processing system and will allow customers to link up with the bank through personal computers, he said.

The $380 million Bush Foundation, St. Paul, Minn., dropped First Trust Co., St. Paul, because of difficulty in obtaining timely, accurate reports, said Gerald M. Skogley, the foundation's business manager.

"The service at First Trust was not as good as it had been earlier in our relationship," he said of the decision to replace First Trust with Boston Safe Deposit and Trust Co., Boston.

He noted First Trust had undergone some internal restructuring, which bank officials said occurred during the consolidation of its trust services with those of First Bank Minneapolis and First Bank St. Paul. All are part of First Bank System, Minneapolis.

The consolidation took about two years and is largely complete now, said Michael W. Kellogg, assistant vice president of First Trust.

Mr. Kellogg declined to offer any details of the problems that arose during the consolidation process, but he said they are over now.

"We're very pleased that the overwhelming majority of our clients stayed with us," Mr. Kellogg said.

The merger actually will

# Assets hit $1.32 trillion

## Custodial increase outstrips master trust hike

By Hank Berkowitz

Tax-exempt assets held by the nation's master trust and custodial banks grew 46% to almost $1.32 trillion for the 12 months ended June 30, up from $903.8 billion a year ago, according to a *Pensions & Investment Age* survey.

Assets held in master trust accounts of those banks grew 36.5% to $743.5 billion, and assets held in master custodial accounts grew 59.6% to $573.3 billion, according to *P&I Age* data.

(These statistics exclude Security Pacific, Los Angeles because the bank was not included in the 1986 *P&I Age* master trust directory. Security Pacific had $3.2 billion in master trust and $35 billion in master custody assets as of June 30.)

The growth was triggered primarily by stock market appreciation — 25.2% for the Standard & Poor's 500 stock index during the period — and, secondarily, by new business.

According to data compiled by Greenwich Associates, Greenwich, Conn., 73% of pension funds with assets greater than $10 million now use master trustees. That number is significantly higher than the 49% level recorded in 1980.

"That (growth) game's over," said Ronald Golz, executive vice president of State Street Bank & Trust Co., Boston, explaining the corporate pension side of master trust has been saturated.

"It's a mature business," agreed Eileen Sherman, a Greenwich Associates partner, noting there are few pension funds without master trustees.

To obtain a new client, she said, "you've got to win that business away and convince them to switch."

Greenwich Associates compiled its data from a survey of 1,046 major pension funds whose assets exceeded $20 million as of October 1986.

It's really a matter of "musical chairs now," with pension funds more likely to change master trustees than they were a few years ago, said Ron Jones, a partner at Hewitt Associates, a Lincolnshire, Ill.-based consulting firm.

Changes often result from "the timeliness and accuracy of the reports they're getting," Mr. Jones said.

Master trust banks are legally responsible for multiple plans with multiple managers, and for single plans with multiple managers. Master trustees provide unitized reporting, accounting and performance measurement services for their clients, which are primarily corporate employee benefit plans.

Master custodians provide the same services, but their clients — primarily public employee plans, endowment funds and foundations — retain legal trusteeship.

Larger pension funds, which often have multiple managers, most often use master trust banks.

Greenwich's data show that 94% of funds with assets greater than $1 billion use master trust and master custodial services, up from 89% in 1985. That proportion drops to 87% for funds in the $250 million range and to 67% for funds in the $20 million range (*see table below*).

**Percentage of funds using master trusts as determined by fund assets**

| Assets | % |
|---|---|
| $1 billion or more | 94 |
| $501 to $1 bil. | 91 |
| $250 to $500 mil. | 83 |
| $200 to $250 mil. | 87 |
| $150 to $200 mil. | 71 |
| $50 to $100 mil. | 63 |
| $40 to $ 50 mil. | 63 |
| $30 to $ 40 mil. | 58 |
| $20 to $30 mil. | 53 |
| $20 or less | 67 |

While some smaller players, particularly regional banks, have made impressive inroads in the trust and custody universe, large banks continue to dominate the market.

Regional banks run into problems when clients want to diversify into more complicated areas like international investments and Government National Mortgage Association Securities, said Mr. Golz of State Street, the nation's largest provider of master trust and custody services. "Regionals still have to subcontract out those services."

The 10 largest master trust banks service 76.5% of the market, according to *P&I Age*'s data.

State Street amassed a $48.3 billion gain in master trust assets during the year, replacing Bankers Trust Co., New York, as the largest provider of master trust services, the *P&I Age* data indicated.

State Street has capitalized on "synergy" Mr. Golz said, with its market share at 12.5%, the *P&I Age* data showed. "When clients select us for participatory recordkeeping, they also tend to select us as master trustee," he said.

Mr. Golz also said the rising popularity of group trust services — which State Street pioneered three years ago — has fueled its rise to the top of the master trust market.

"Conceptually, we're like a manager of managers," Mr. Golz said of banks that provide group trust services — essentially pooled funds of money that give pension funds access to a variety of different management styles under a single, economical umbrella.

Banker's Trust is now the second largest provider of master trust services, with $91 billion under trusteeship, up from $74 billion a year ago, the *P&I Age* data showed. Its market share is 12%. Mellon Bank, Pittsburgh (11.3%); Northern Trust Co., Chicago (8.8%); and Chase Manhattan Bank, New York (8.3%), rounded out the top five providers of master trust services.

State Street is also the largest provider of master custody services, with $97.7 billion under management, up from $65.4 billion a year ago, according to *P&I Age* data.

As opposed to the corporate side of the master trust market,

*Continued on page 52*

*Ronald Golz of State Street Bank says the master trust market has been saturated. Ron Jones of Hewitt Associates says timeliness and accuracy are reasons funds usually change master trustees.*

# Solving some problems . . .

*Continued from page 35*

produce improved service because of economies of scale, he said.

A common problem for master trust banks has been contending with the variability of payments from mortgage-backed securities.

The $7.3 billion Los Angeles County Employees' Retirement Association, had problems with Security Pacific National Bank's recording of mortgage-backed securities payments. The fund eventually reached a settlement with the Los Angeles Bank and kept it as custodian.

C. Rodney Cooper, first vice president of Security Pacific, said the problems surfaced two years ago and have been corrected.

"We have, in the meantime, built what we consider one of the best Ginnie Mae processing systems around," he said.

State Street Bank and Trust Co., Boston, lost the custodial account of the $8.6 billion Teamsters, Central States, Southeast & Southwest Areas pension fund, Chicago. Fund officials said they dropped State Street and hired Mellon Bank, Pittsburgh, because of mortgage-backed securities problems.

State Street officials, however, contend the problem was more a difference of opinion over how things should be done than a lack of service. Indeed, other State Street clients said they have had no problems with the bank's accounting for mortgage-backed securities or any other investment transactions.

State Street officials said they made no changes as a result of the Teamsters' defection, but acknowledged the importance of continually upgrading master trust systems and services.

Officials of the $33 million Bergen Brunswig Corp. pension fund, Orange, Calif., saw problems with the timeliness of reporting by Security Pacific, Los Angeles, and tried without success to get them corrected, said George E. Reinhardt Jr., vice president-finance and chief financial officer. Another official of Bergen Brunswig declined to say whether the problem involved mortgage-backed securities. The fund hired Bankers Trust Co., New York, to replace Security Pacific as master trustee.

But other clients of Security Pacific and State Street expressed nothing but satisfaction with their banks. "We haven't had problems with our account," said an officer of the $1.2 billion Southern California Edison Co. pension fund, Rosemead, Calif., a Security Pacific client.

"Security Pacific is the best that I've ever dealt with," added Tom Friery, Sacramento city treasurer, who runs the $300 million Sacramento City Employees' Retirement System.

"Any issues that have come up have been resolved before they got to the problem stage," said Robert Evans, assistant treasurer of Xerox Corp., Stamford, Conn. State Street is master trustee of Xerox's $2.8 billion in pension and profit-sharing assets; Mr. Evans credited the success of the relationship to good communication and regular meetings with bank officials.

"We've been more than happy with our relationship with State Street, and we've never encountered any problems," said Sunny Oberoi, director-pension fund management at Pacific Gas & Electric Co., San Francisco. State Street is master trustee of the utility's $2.5 billion in pension assets.

Many banks are investing in new master trust technology, and State Street has even established the State Street Institute, a continuing professional education program for master trust personnel.

First Pennsylvania Bank, Philadelphia, spent $8 million over the past four years to develop and install a new system that recently began operating.

With the system, large, multimanager funds likely will get their monthly reports no later than the 15th business day after the end of the month; a week earlier than under the old system, officials said.

Trust One, which can be accessed by personal computers, will be easier to adapt to various kinds of securities, such as mortgage-backed and futures and options, and will permit customization of client reports.

A commitment to upgrading technology "is really essential in this business," said Maureen E. Pugh, senior vice president-trust operations at First Pennsylvania.

Bankers Trust has budgeted $10 million a year for the next several years to upgrade its master trust technology, said Carter Reynolds, vice president. The system has been in place for about 10 years and doesn't need a major overhaul, just continual fine-tuning to meet customers' increasingly sophisticated needs, she said. Those needs include dealing with an ever-expanding variety of securities.

"The investment structure of benefit plans is becoming and will continue to become increasingly complex," Xerox' Mr. Evans said. Vendors of securities generally don't think about accounting and reporting considerations, he said.

"The master trust industry is being challenged and it's only going to get worse," he said. "From a customer standpoint, I think it's essential that you sit down and go over what they're going through."

From a trustee standpoint, making a commitment to understand and be able to deal with new securities is essential, said Bob Mainer, senior vice president of Boston Safe Deposit. Pension fund officers don't want their ability to use futures, options, mortgage-backed or international securities constrained by their trustees' capabilities, he said.

Also, as important as timely, accurate reporting is, pension funds need more than that, Mr. Mainer said. Trustees need to provide means, such as PC access, to help fund officers analyze how their fund is meeting its goals.

Meeting pension funds' demands for service takes time, personnel and, above all, money — sometimes more money than small, regional master trust banks can spare.

"There appears to be a consolidation going on, specifically because of the more sophisticated requirements today," Ms. Reynolds said. "It's becoming increasingly difficult for the smaller banks to justify the cost." ■

## Directory

### AmeriTrust Co.

*900 Euclid Ave., Cleveland, Ohio 44101; (216) 687-4089*

| | |
|---|---|
| Master trust assets | $4,044,000,000 |
| Master custodial assets | $3,286,000,000 |
| Master trust clients | 48 |
| Master custodial clients | 13 |
| Account supervisors | 3 |

AmeriTrust Co.'s master trust assets rose $470 million as of June 30 from the previous year; master custodial assets increased $781 million.

The size of the largest master trust account is $688 million; the smallest is $1.5 million.

The primary accounting method is trade date; accrual also is offered.

Basic master trust services include automated cash management system; pension benefit payments; securities processing; performance measurement; and custody services.

Optional services include TUCS and AmeriScan, an on-line client inquiry system.

Monthly transaction reports and asset and liability reports are available five business days after the end of a period; performance measurement reports are available in 15 calendar days. All reports are available on-line.

New features include client PC download capability and on-line client inquiry for pension payment systems.

Fees are based on market value of assets and individual services provided.

The client contact is Gary W. Queen, senior vice president.

Would You Really Trust Your Company's Master Trust To Someone Who Didn't Make It A Top Priority?

You know a Master Trust can save your company time, money and headaches by pooling investments and consolidating administration of all your employee benefit funds. But at a lot of trust companies, you risk getting lost in the shuffle instead of getting the attention you need.

The solution? Centerre Trust Company of St. Louis.

At Centerre, we make it a top priority to treat every client as a top priority. No matter how big or small. And frankly, this approach works so well that we're a bit surprised our competition hasn't caught on.

A Centerre Master Trust gives you everything you'd expect from a full-service Master Trustee: A comprehensive accounting and reporting system that includes financial analysis and investment performance measurement. An on-line inquiry system for timely information about your account. A cash management system that generates income from dividends, interest and securities sales proceeds which might otherwise sit temporarily idle. And a securities lending system to boost your return on assets even further.

Along with the attentive, personal service you deserve.

Call Centerre about a Master Trust or Master Custody agreement today at (314) 436-9673. It's the only number we'll ever ask you to take.

CENTERRE TRUST COMPANY
510 Locust Street, St. Louis, MO 63101

creased $1.13 billion.

The primary accounting method is accrual, trade date. Asset valuations and transaction statements reflect pending transactions, and accrued interest and dividend income are reported on an accrual basis.

Basic master trust services include custody of assets; collection of any dividend or interest income; cash management; record maintenance; production of required statements; on-line access to trust accounting; periodic review of administrative matters and investments; personal contact with a certified employee benefit specialist; direction from authorized investment managers; and participant record-keeping. Optional services include international securities; options and futures; performance measurement; TUCS on-line; seminars; bulletins; legislative and regulatory affairs department; global custody; real estate services; multicurrency accounting; and on-line access to the trust accounting system.

Monthly transaction and asset reports are available within five business days after the end of a period; performance measurement reports are delivered within 10 days. All reports are available on-line.

Fees are based on market value of assets and individual services provided.

The client contact is Edgar R. Smith, vice president.

### Continental Illinois National Bank and Trust Co. of Chicago

*30 N. LaSalle St., Chicago, Ill. 60697; (312) 828-3560*

Reports available on-line are assets, transactions, cash management and

**How this leisure products corporation chose Philadelphia as home base for its benefit plans...**

***And scored with Master Trust services as individual as an autograph.***

In 1978, Leisure Corporation† moved into the majors as a manufacturer of sports equipment, accessories, and clothing.

Early in the game, Leisure Corporation knew that what they needed for their burgeoning pension plan was a Master Trustee that could provide convenience, control, consistency, and cost effectiveness.

And they needed a Master Trustee who offered the full range of sophisticated services, because they knew a single provider would be the key to the most consistent, cost-effective service.

They chose First Pennsylvania Bank.

***The starting lineup.***

When Leisure Corporation and First Pennsylvania became a team, things were simple: one plan, one trustee, and two outside investment advisors. First Pennsylvania provided monthly reports on an *accrual* and consolidated basis.

What is more, the reports gave Leisure Corporation the essential details in a uniform, easy-to-comprehend format.

And as they added other managers, they got both absolute performance measurements and Wilshire TUCS® comparisons customized by portfolio type, size, style, and risk exposure for each manager.

***Mid-season form.***

Leisure Corporation made a long series of changes and diversifications to its plan between 1979 and 1986, using a total of eight different investment managers. But with constant consultation and a clear understanding of Leisure Corporation's goals, First Pennsylvania has been determining and filling every need as it arises—quickly, easily, and cost effectively.

***The top of the ninth.***

Very soon, Leisure Corporation plans to add a ninth investment manager. And First Pennsylvania will bring another of its special tools into play by providing fully collateralized Securities Lending.

If you need convenience, control, consistency, and cost-effectiveness for your investments, learn how First Pennsylvania Bank can give you a program that's as individual as an autograph. Call or write James F. McHale, Senior Vice President, Packard Building, Philadelphia, PA 19101; (215) 786-7946.

†Leisure Corporation is a fictional entity, but all services provided and manner of provision are based on actual cases.

Norwest Bank Minneapolis' master

# Whatever their size, our clients receive more Master Trust services than most Fortune 500 companies.

At Citizens and Southern Trust Company, when we brag about our services, we're not just talking about expanding data bases and improving software, we're talking about the entire network of services we offer our clients.

Services that offer personalized accounting and administrative reports in an arrangement that's specially developed to handle *all* of your employee benefit and administrative needs, no matter how small or large your organization.

A staff of Certified Employee Benefit Specialists that's bigger than that of any other bank in the country.

Services that, in a nationwide survey by a leading industry magazine, earned C&S the rating of *first* in the southeast and *second* in the nation for keeping managers up-to-date on cash and transaction activity; automatically investing cash balances; prompt crediting of cash (principal and income); reporting accuracy; capabilities of account representatives; cooperativeness of the institution; and an overall rating simply for satisfying our customers.

You'll also have access to reports from the TUCS® system, the most extensive and flexible manager comparison data base available for monitoring investment performance in a timely, accurate manner.

And if you're considering major strategic changes, such as a merger, acquisition or leveraged buyout, C&S even offers you the services of objective consultants who can advise you on the variety of options available.

Best of all, you don't have to be as big as a Fortune 500 company to benefit from the services of one of the highest rated Master Trust organizations in the nation.

For more information about our Master Trust services, call (404) 897-3083. Or stop by the nearest Citizens and Southern Trust Company office.

## Assets hit . . .

*Continued from page 36*

the "public side is still bubbling," Mr. Golz said.

In April, State Street was named custodian for the $25.6 billion California State Teachers' Retirement System, Sacramento, as part of the fund's three-year investment management plan.

"We wanted a large custodian whose system wouldn't be overstressed by an account of our size," said Sandra Martin-King, assistant chief executive officer-investments of the California fund.

As in the master trust arena, the 10 largest master custodians control most of the market — 86.7%, the *P&I Age* data indicated.

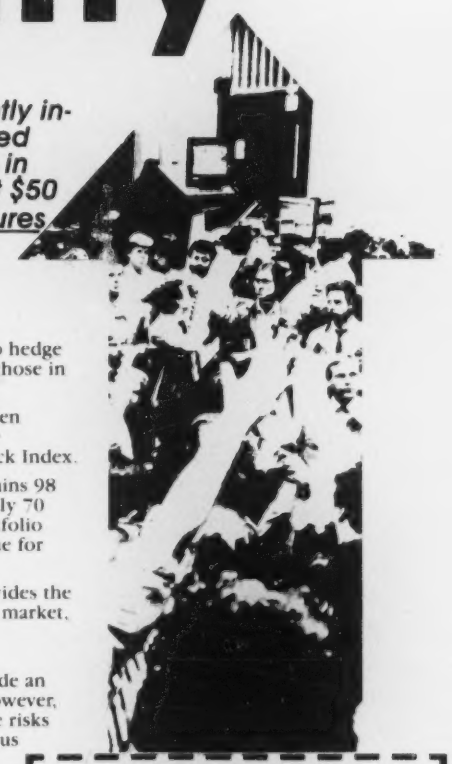
State Street's market share is 16.1%. Chase Manhattan (14%); Citibank, New York, (12%); Boston Safe Deposit & Trust Co. (8.7%); and Bank of New York (8.5%), rounded out the top five.

Meanwhile, regional banks have been making inroads in the master custody market, according to James F. McHale, senior vice president of First Pennsylvania Bank, Philadelphia. First Pennsylvania is prepared to take business away from the larger players, particularly big New York banks, Mr. McHale said.

Boston Safe Deposit was the fastest growing master custodian during the period, however, amassing $53.2 billion is assets, up from $5.6 billion a year ago.

Boston's rise into the upper echelon of master custody banks was fueled by its December acquisition of the $30 billion California Public Employees' Retirement System account. ■

Nifty fifty



More than $50 billion is currently invested in index funds composed entirely of stocks not included in the S&P 500®. For much of that $50 billion, Russell Stock Index futures can provide a better hedge.

RUSSELL STOCK INDEX FUTURES BEGIN TRADING SEPT. 10

Until now, there has been no effective way to hedge these stocks, which behave differently from those in the market's blue-chip sector.

But all this changes September 10. That's when NYFE begins trading futures contracts on the **Russell 3000®** and the **Russell 2000®** Stock Index.

***Russell 3000***—This composite index contains 98 percent of large institutional holdings, vs. only 70 percent for the S&P 500. This improved portfolio tracking translates into significant added value for institutional hedgers.

***Russell 2000***—This small stock index provides the first proxy for the low-cap end of the equity market, which accounts for 10-20 percent of large institutional holdings.

Russell Stock Index futures trading can provide an added dimension to money management. However, futures trading does involve risk so know the risks before you trade. For more information, call us toll-free at 1 (800) 221-7722. In New York, (212)656-8896.

**PIPER**

*The statistical data are extracted from Pensions & Investments' Performance Evaluation Report, a quarterly performance evaluation published by* Pensions & Investment Age. *PIPER details comparative performance data on special equity and international funds at more than 50 banks and insurance companies. PIPER is compiled by Rogers, Casey & Barksdale Inc., Stamford, Conn.*

# Oil price hike heats up special equities

**By Jacqueline Dutton**

A $2-per-barrel boost in crude oil prices during the second quarter provided the fuel for the top special equity fund return in Pensions & Investments' Performance Evaluation Report for the period ended June 30.

The $35 million Citicorp Investment Management Inc. Resources Fund, which invests in natural resource companies, also had the second-best performance for the year ended June 30.

"Basically we positioned ourselves so we could take advantage of the appearance that OPEC was pulling itself together and effectively managing its output," said Richard Collins, manager of the resource fund. "We were also becoming concerned with the rising tension in the Middle East and had the perception that a cutoff of supply there could lead to higher prices."

The timing paid off for the fund — which returned 8.3% for the second quarter and 39.2% for the 12-month period — as oil prices climbed from $18 a barrel on April 1 to $20 a barrel June 30.

The fund's performance was more impressive when compared with the market benchmark than the returns generated by the median manager in PIPER's universe of 102 managers. In all periods measured except the 10-year period, fewer than 10 money managers were able to beat Standard & Poor's 500 stock index.

The median manager in the PIPER universe returned 0.3% for the second quarter, while the S&P returned 5%. For the 12-month period, the median return was 13.4%, compared to 25.2% for the S&P index.

Along with the Citicorp Resources Fund, funds beating the index in the second quarter were: E.F. Hutton Trust Co., Wilmington, Del., Growth Fund B, 7.6%; Citicorp Special Situation Fund, 5.6%; Shawmut Bank of Boston, Target Equity Fund, 5.5%; First National Bank of Chicago, Institutional Special Fund, 5.5%; Chemical Bank, New York, Value Fund, 5.4%; and First National Bank of Boston, Equity Yield Fund, 5.3%.

Mr. Collins said because the fund's managers believed oil prices were climbing, they acquired stocks in companies they believed would benefit from the gains. Some of their picks were **Atlantic Richfield Co.**, **British Petroleum Co. PLC**, **Royal Dutch Petroleum Co.**, and **Anadarko Petroleum Corp.** The fund also benefited from investments in **Standard Oil Co.**, which was taken over by British Petroleum during the period, and **Schlumberger Ltd.**, in the oil service sector.

In addition, the fund held stock in both **Pennzoil Co.** and **Texaco Inc.** to hedge against the outcome of the legal battle between the two companies.

But a positive outlook for oil prices — which have since plummeted — wasn't the only factor behind the stock selections made for the fund over the past 12 months. Mr. Collins said a belief that inflation would cause an increase in the price of mineral stocks led to investments in **Alcan Aluminum Ltd.**, **Reynolds Metals Co.**, **LAC Minerals Ltd.** and **American Barrick Resources Corp.**

Another Citicorp fund was also a top performer for the second quarter. The $125 million Special Situation Fund returned 5.6% to place third.

Ted Ujazeowski, Citicorp vice president and manager of the fund, said the diversified, value-seeking fund did especially well during the second quarter with its mix of 25 stocks because of weightings in the media and entertainment industry. Among the holdings were: **Time Inc.**, **LIN Broadcasting**, **Warner Communications** and **Tele-Communications**, the cable TV giant.

"There was an awful lot of inherent value in the cable industry," Mr. Ujazeowski said. "The cash flows that are being generated by cable television networks are very large right now, and there is a scarcity in the number of franchises."

He said franchise dominance was also a factor in selection of two gaming industry stocks **Bally Manufacturing Corp.** and **Resorts International Inc.**

The only fund that outperformed Citicorp's resource fund for the one-year period was First RepublicBank's $12 million select equity fund, which returned a whopping 80.8%. Much of the Dallas-based fund's gain came during the first quarter of 1987 when it returned 55.8%; its return for the second quarter was y023.2.2%. The fund's return for the year ended March 31 was 108.9% (*Pensions & Investment Age*, June 1).

Edward Anderson, chairman of the bank's investment arm, First Republic Asset Management Co., said the fund's recent choices have been. **Ashton-Tate**, a software and data processing firm; **Old Republic International Corp.**, an insurance firm; **American Bankers Insurance Group**; and **Shearson Lehman Brothers Holdings Inc**.

Citicorp wasn't the only firm with two funds topping the PIPER returns charts. E.F. Hutton Trust Co.'s Growth Fund B and Emerging Growth B fund were leading performers in the second quarter, one-year and the three-year periods.

The emerging growth fund placed third for the one-year period with a 34.8% return. Other funds beating the S&P 500 for the 12 months ended June 30 were First National Bank of Boston, Equity Yield Fund, 29.6%; and Society National Bank of Cleveland, Ohio Regional Equity Fund, 26.5%.

The two E.F. Hutton funds came in first and second in three-year returns, as the growth fund returned 50.6% compound annualized and the emerging growth fund returned 45.9% compound annualized. First RepublicBank's Select Equity fund rounded off the top three with a 44.3% compound annualized return.

The PIPER median return for the three-year period was 23.7%, and the S&P 500 returned 30.6%. Other funds beating the

# Weak-currency markets a strong play

**By Marlene Givant**

Concentration on such fast-growing, weak-currency markets as the United Kingdom and Hong Kong aided managers' returns during periods ended June 30, according to the Pensions & Investments' Performance Evaluation Report.

Yet low inflation/strong currency markets such as the Netherlands and West Germany still are favored by many firms.

For the quarter ended June 30, top managers championed Japan's 5.8% correction in June, which dragged down the return of the Morgan Stanley Capital International Europe Australia Far East index. Fifteen of 33 international managers were able to beat the 7.1% return of EAFE, which had 57% in Japan.

The $37 million International Low P/E Fund of Provident Capital Management Inc., Philadelphia — ranked first for the quarter with a 14.2% return — gained 20.1% in the Japanese portion of its portfolio while the Japanese market rose 7.3% in the second quarter. Among the holdings of the firm, which invested 38% in Japan, were **Matsushita Reiki**, the country's largest refrigerator manufacturer, and **Kureha Chemical**.

Provident has since raised Japan exposure to 42% using profits taken in the U.K. market, which comprises 15% of assets as compared with 19% in July, said Sandor Cseh, vice president-international investments.

Ranked second for the quarter with a 14% return, the $130 million International Equity Fund of Bankers Trust — Investment Management Group, New York, was heavy in Japan compared with other managers, with a 30.2% weighting.

The firm is beginning to overweight "hard currency" markets such as Germany and Switzerland and heavily overweights the Pacific Basin markets of Hong Kong, Singapore and Malaysia.

Because it expects oil prices to rise, BT invests in Australia and Canada for natural resource stocks. It also likes oil-related chemical stocks like Belgium's **Solvay** and Italy's **Montedison**.

The International Equity fund of CIGNA Corp., Hartford, Conn., ranked third for the quarter with an 11.9% return. The asset size was unavailable.

For the year ended June 30, the top fund was the passively managed $140 million International Equity Fund of American National Bank & Trust Co. of Chicago, which earned 65.7% vs. the EAFE's 58.7%.

The top actively managed fund, Marine Midland's $40 million International Equity Fund managed by Wardley Investment Services International Ltd., London, returned 62% for the year.

Wardley had 35% in Japan in domestic demand-oriented sectors such as chemicals, cement and real estate because it believed those industries would gain from the then-decreasing interest rates. Stocks include **Nihon Cement** and **Tokyu Corp.**

Using assets from small Far East markets, it plans to raise its Japan allocation to 50% in the third quarter and raise U.K. exposure to 24%, said Ian Henderson, director.

The firm boosted West Germany's weighting to 10% from 2% during the quarter because it believed the dollar would firm. Now, as the deutsche mark strengthens, it plans to eliminate German exposure and reduce the allocation to hard currency markets like Switzerland and the Netherlands.

Wardley invests 4% in New Zealand largely because of low price-earnings ratios and good growth prospects.

Ranked third for the year with a 60.2% return was the passively managed $470 million International Equity Market Fund of Wells Fargo Investment Advisors, San Francisco.

The top manager for the three years with a 61.6% compound annualized return vs. EAFE's 55%, BA Investment Management International Ltd., London, got clobbered in the second quarter with a 2.7% return because it had no Japanese exposure.

It has been out of that market for a year.

# For Every Investor, There's A Perfect Balance Between Risk And Return

There's an element of risk in every investment. And, from one investor to the next, the tolerance for risk varies according to his goals, philosophy and temperament.

At First Union's Capital Management Group, we understand the importance of managing risk as well as maximizing return. Very few investment managers can match our consistency of superior returns at such moderate levels of risk.

To find out more about the investment approach that helps us to strike that perfect balance between risk and return, call Debbie L. Tate at (704) 371-5155 for a copy of our investment management brochure. What the rankings in this P.I.P.E.R. Survey don't tell you about us, this brochure will. Call today. The sooner you get our investment team working for you, the sooner you'll see the results.

# Oil . . .

*Continued from page 61*

benchmark for the period included: Fidelity Management Trust Co., Boston, Aggressive Equity Fund, 36.2%; Trust Company of the West, Los Angeles, Special Equity Fund, 34.5%; and Security Pacific National Bank, Los Angeles, Growth Fund G, 33.4%.

The $20 million Growth Fund B, which generally seeks high-quality, Fortune 500 stocks, and has an average portfolio of 25 stocks with an annual turnover rate of 300%, favored tobacco and drug companies during the past year.

Steven Kroll, chief executive officer of E.F. Hutton Asset Management and adviser to the trust company fund, said the fund invested 20% of assets over the past year in such tobacco stocks as **Philip Morris Cos. Inc.**, **American Brands Inc.**, **RJR Nabisco Inc.** and **Loews Corp**. Another 25% was invested in drug stocks, including **Squibb Corp.**, **Merck & Co.** and **Schering-Plough Corp**.

Other stock choices were: **F.W. Woolworth**, **Goodyear Tire & Rubber Co.**, **Eastman Kodak Co.**, **USAir Group Inc.**, **Raychem Corp.**, **Colgate-Palmolive Co.**, and **Gillette Co.**, Mr. Kroll said.

The E.F. Hutton Trust Co. Emerging Growth B Fund also goes after high-earnings stocks, but differs in that it targets small-capitalization stocks. Mr. Kroll said the $10 million fund did well in the 12-month period on such diversified stocks as **Integrated Resources Inc.**, a financial services and insurance concern; **Nike Inc.**, a footwear retailer; **Petrie Stores Corp.**; **Budget Rent A Car Corp.**; and **Echo Bay Mines Ltd.**, a gold miner.

The Fidelity Management Trust Co. Aggressive Equity Fund, which had the fourth-highest return over the three-year period, took top honors in the five-year period ended June 30 with a compound annualized return of 38.2%. Right behind was Security Pacific's Growth Fund G, which had a compound annualized return of 37.6%. Third was Citicorp's Real Estate Stock Fund which returned 32.9% compound annualized.

The median fund in the PIPER universe returned 23.5% compound annualized for the five-year period, and the S&P 500 returned 28% compound annualized.

Other funds which outperformed the S&P 500 for the five-year period include: California First Bank, San Diego, Supplemental Equity Fund, 31.6%; Citicorp Special Situation Fund, 30.8%; and The Chase Manhattan Bank, New York, International Capital Equity, 30.4%.

California First Bank's fund scored the highest return over the 10-year period ended June 30, 28.2% compound annualized.

MTrust, Dallas, followed with a 26.4% compound annualized return, and Bankers Trust Co., New York, was next in line with a 25.4% compound annualized return.

The median fund returned 20.1% for the 10-year period, and the S&P 500 returned 17.2%, both annualized.

Other top performers over the 10-year period include the annualized returns of: Northern Central Bank, Williamsport, Pa., Special Equity Fund, 23.3%; First National Bank of Maryland, Baltimore, Special Equity Fund, 23%; Chase Manhattan International Capital Equity Fund, 22.6%; and Equitable Bank, Baltimore, 22.4%. ■

# Play . . .

*Continued from page 61*

"Clearly the surprising strength of Japan vs. continental Europe in the second quarter was a disadvantage to us. It was part of the reason for our underperformance," said Chris Carter, senior investment manager-equities for the $50 million Employee Benefit Equity Fund.

In addition, a number of medium-term trends the firm has been playing — such as the dollar's weakness, fairly weak oil prices and rising interest rates — turned against it.

Because BA officials think in 12 months oil will remain steady to weak and the dollar will drop to about 135 against the yen from about 140 currently, it expects downward pressure on interest rates in Europe and Japan.

The firm emphasizes interest rate-sensitive stocks — the Spanish insurance company **Mapfre** and the French insurer **Victoire Drouot**. BA invests 15% in Spain, 12% in France, and 30% to 35% in the United Kingdom with the rest of the portfolio split fairly evenly between West Germany, the Netherlands, Belgium, Hong Kong and Australia.

Markets prices are looking better in Italy. In particular, BA is looking at clothing manufacturing and publishing sectors. On further market weakness, BA is looking to increase Hong Kong exposure since the market's gross domestic product and corporate profit growth estimates are high.

Over five years, commingled funds of IDS International Inc., Minneapolis, Bankers Trust and BA were tied for first place with a 39.6% return, slightly trailing the EAFE's 40.4%.

IDS, seeking "faster-growing economies with high profits growth" has been overweighting U.S. dollar-linked Singapore and Hong Kong whose export industries benefit from their weak currencies and builds competitiveness with Japan, South Korea and Taiwan, said Peter Lamaison, chief executive officer of IDS in London, which runs the $78 million IDS Collective Equity Fund.

The firm invests 14% in Australia, mostly in commodities stocks. Japanese exposure has dropped to 32% from 48% since April on a valuation basis.

Of the three managers included in PIPER for at least 10 years, only U.S. Trust beat the index

# Futures set for Russell indexes

## Director believes appeal broader for new product

By Hank Berkowitz

NEW YORK — Futures contracts on the broad-based Russell 1000, 2000 and 3000 stock indexes will begin trading on the New York Futures Exchange Sept. 10, making it the first exchange to offer three indexes "side by side," said Lewis J. Horowitz, president of the exchange.

The exchange is the wholly owned subsidiary of the New York Stock Exchange Inc., which trades futures and options on the NYSE Composite Index. It also trades commodity futures based on the Commodity Research Bureau Index.

Russell indexes comprise a broader universe of stocks than the traditional Standard & Poor's 500 stock index, including many more undervalued, small-capitalization companies. And unlike the S&P, Russell indexes are not artificially weighted toward certain industries like technology and high-yield stocks.

Both active and passive managers find Russell indexes attractive because they provide "a much more complete representation of the total U.S. equity market," said Kelly Haughton, director of research and development for The Frank Russell Co., Tacoma, Wash.

Russell indexes enable active managers to duplicate their core portfolios. Also, since tracking errors with Russell indexes are lower than the S&P's, Mr. Haughton said, passive managers find Russell indexes improve their ability to replicate the active portfolios for which they're substituting.

But Rob Meyncke, a member of the index committee of Standard & Poor's Corp., New York, said there's almost no difference between the Russell 1000 and the S&P 500, so "there's almost no advantage to having an index" with the 500 additional stocks that comprise the Russell 1000 index.

Russell statistics for the five years ended June 30 show 72% of the 104 managers in its equity pooled accounts universe were more highly correlated with the Russell 1000 than with the S&P 500.

Mr. Meyncke said, however, there is a 99.5% correlation between the Russell 1000 and the S&P 500. Furthermore, the S&P 500 also tracks the New York Stock Exchange better than the Russell 1000 despite the small composition of stocks in the S&P index. He said the S&P 500 has a 99.9% correlation with the NYSE; the Russell indexes are about one percentage point less on average.

Rick Nelson, vice president of passive management at Bankers Trust Co., New York, said one-half of his firm's $24 billion indexed equity holdings are in non-S&P securities.

"Russell (indexes) futures would really fit a niche that hasn't been filled so far," Mr. Nelson said.

Mr. Haughton said as more money managers use Russell indexes as performance benchmarks, they'll need Russell-based futures contracts to better hedge and insure their portfolios.

He said the indexes include 95% to 99% of investment-grade stocks held by institutional money managers, while the S&P 500 includes 75%.

"Generally with Russell, you're going to get a more precise hedge," said Mr. Nelson, who added he plans to use the Russell 2000 to complement Bankers Trust's anticipated move to an "ultrasmall" index that would only include stocks in the smallest 5% of publicly held companies. The Russell 2000 is composed of companies ranked 1,001 to 3,000 by capitalization.

Futures contracts on the 2000 would provide the first proxy for the low-cap end of the equity market, which now accounts for 10% to 20% of large institutional holdings, the NYFE said.

Mr. Meyncke said his firm believes the S&P 500 is a "pretty good index," but admitted there may be a possibility for the Russell 2000 because of the need for a small-cap index. But he cautioned futures on other small-cap indexes — including an S&P over-the-counter 250 index — failed in the past. ■

with a 25% compound annualized return vs. the index's 24.9%. But over one-, three- and five-year periods it underperformed, returning 43.4%, 44.4%, and 36.1%.

Other underperformers over periods of more than a year include Morgan Guaranty's $840 million International Equity Fund which returned 21.4% over 10 years and 38.2%, 41.9% and 32.9%, respectively, over one-, three- and five-year periods; the $50 million International Stock Portfolio of Wellington Management Co./Thorndike, Doran, Paine & Lewis, Boston, which returned 43.6%, 45% and 33.3%; the International Stock fund of First RepublicBank Corp., Dallas, which earned 39.2%, 44.3% and 39.2%; and the International Equity fund of HT Investors Inc., Providence, R.I., which returned 41.2% over one year and 39.3% over three years.

Morgan's fund has underperformed recently but since its 1974 inception has exceeded the EAFE while maintaining a beta, which is a measure of volatility, of only 0.94 vs. the index, according to Adrian Lee, vice president, J.P. Morgan Investment Management Inc., London.

The Wellington fund's infrequently traded quality growth stocks "don't necessarily do better in runaway bull markets," said Jerrold Mitchell, senior vice president.

The HT fund's performance has improved recently as the firm has built its investment staff, relying less on advice from brokers, said J. Richard Schroder, vice president-director of marketing/sales.

Also better — since a new investment was set up three years ago — are the returns of the Global International Equity fund of Chase Investors Management Corp., New York, which underperformed most funds over five years with returns of 33.4% and 29.6%, said Mary Ellen Weissinger, sales director. ■

# Cash Management

*Diamond Shamrock R&M, whose Maxus Energy Corp. operates this oil field in Williston, N.D., moved its cash concentration and controlled disbursement accounts.*

## *Diamond Shamrock pockets savings by switching two banks*

**By Barry B. Burr**

SAN ANTONIO, Texas — Diamond Shamrock R&M Inc., one of the two companies created from the former Diamond Shamrock Corp., expects to save upward of $30,000 a year in banking fees by changing the banks handling its major cash management services, said John E. Griffin, supervisor-cash operations.

Citing pricing as a principal reason for the changes, he said the company is moving its cash concentration account and controlled disbursement to Chase Manhattan Bank, New York, from Mellon Bank, Pittsburgh, and its payroll disbursement to Frost National Bank, San Antonio, from First RepublicBank Dallas.

Chase beat out First National Bank of Chicago and Chemical Bank, New York, the other bidders for the account.

Frost topped MBank, Texas Commerce Bank and First RepublicBank's San Antonio offices.

He said the prices are significantly lower than those the company now pays.

Chase, from its Syracuse, N.Y., office, will process disbursements at 12½ cents a check, while Mellon was charging 15 cents.

Frost will charge 8 cents a check, compared to First RepublicBank's 13 cents.

He said moving to Chase would save the company $15,000 to $18,000 annually, while Frost would save $13,000 to $15,000.

The company has about 15,000 controlled disbursement items, valued at some $60 million, processed monthly, while it has another 15,000 payroll checks, valued at $4 million.

# New rules might cause wire transfer problems

**By Chuck Paustian and Sheryl Cohen**

*Sheila Dilson and Richard Richardson of Hardee's will be watching for changes or delays in wire transfers under the new daylight overdraft rules.*

Corporate cash managers could face more wire transfer problems as a result of tighter daylight overdraft rules, despite efforts by the National Corporate Cash Management Association.

Norman Appelman, vice president and director of banking activity, ITT Financial Corp., St. Louis, and chairman of the NCCMA's government relations committee, suggested the tighter rules will cause companies and banks to adjust their wire transfer activity to avoid further payment delays.

Mr. Appelman said the association is asking corporate executives to monitor their wire transfers more closely now so they'll be able to determine the effects of the tighter daylight overdraft restrictions when they go into effect in January.

Before the Fed's most recent action, a number of companies, including Hardee's Food Systems Inc., Pepsico Inc. and Shell Oil Co., already had experienced some delays in wire transfers under less restrictive rules.

"We have had some delays with incoming wires and outgoing wires," but no critical problems, said Richard Richardson, manager-cash management at Hardee's, Rocky Mount, N.C.

Sheila Dilson, cash manager at Hardee's, said, however, the newest policies could affect the company more. "When the ruling gets tighter, we probably will feel some effect," she said. "Everyone will probably feel it at some point or another and to some extent."

The overdraft policies, adopted July 24 by the Fed's Board of Governors, are somewhat less strict than its proposals released in December (*Pensions & Investment Age*, July 27).

The NCCMA, one of many groups commenting on the Fed's proposals, was partially successful in its efforts to mitigate the new rules, even though they further tighten daylight overdraft restrictions first adopted in March 1986, association officials said. Proposed measures the association supported were adopted, while policies the group opposed either were eased by the Fed or postponed for further review.

"We think the Fed has been and continues to be sensitive to public comments," said David L. O'Brien, manager of banking at Best Products Co. Inc., Richmond, Va., and president of the NCCMA.

"I think (the Fed has) been very appreciative of the input and we've been appreciative of them turning to us as a resource. We hope that will continue," added Mr. Appelman.

Two major aspects of the new policies are:

- A two-step reduction of banks' net debit caps for daylight overdrafts — a 15% reduction to take effect in January, with an additional 10% reduction scheduled for the following May unless subsequent problems develop.

The Fed initially proposed a straight 25% reduction in the net debit caps, which determine the extent to which banks can overdraw their Federal Reserve accounts through wire transfer activity. The NCCMA had opposed any further reduction.

- A more liberal de minimis, or lower level, cap for small depository institutions, an amount equal to the lesser of 20% of primary capital or $500,000.

Originally, the Fed proposed a de minimis cap equal to the lesser of 10% of primary capital or $500,000. The NCCMA had supported the concept of de minimis caps for smaller banking institutions.

Two other policies adopted by the Fed place a $50 million limit on book-entry government securities transfers and permit wire transfers between affiliated depository institutions in a daylight overdraft position.

The Board of Governors postponed action on automated clearinghouse transactions that would have delayed posting and finality of payment. The NCCMA had expressed concern the proposed policies might constrain or discourage use of the ACH system.

## Scudder matrix debuts

Beginning with this issue, *Pensions & Investment Age* will publish Scudder, Stevens & Clark Ltd.'s corporate cash matrix, a group of indexes designed to provide benchmarks for cash management executives investing taxable treasury cash.

The matrix will run every month. *P&I Age* will continue to run Payden & Rygel's index of short maturity assets, another measure of market returns for corporate treasury executives, each month in alternating issues.

The Scudder matrix contrasts both yield and total return on a pretax and after-tax basis of four different instruments in various maturities. It is prepared by Glen Murphy, principal in Scudder's Boston office.

Because of the different tax status of some instruments, Mr. Murphy noted that for treasury investment portfolios, the after-tax measures translate to the bottom line.

Yield measures income over current price. Total return measures income and price changes. "Total return is the true measure of economic benefit," Mr. Murphy said.

The matrix is at a constant maturity, meaning all the instruments are rolled over every 30 days.

To calculate after-tax returns, Scudder uses the maximum corporate tax rates. For income, they are 40% this year and 46% last year; for capital gains and losses, 34% this year and 46% last year.

### Scudder, Stevens & Clark corporate cash matrix

# Pan Am may contribute JFK lease

**By Joel Chernoff**

NEW YORK — Trying to husband needed cash reserves, Pan Am Corp. last week proposed contributing to its pension fund a $200 million-plus lease on its passenger terminal at John F. Kennedy International Airport.

The contribution of the leasehold interest would strengthen the pension fund, which is underfunded by at least $385 million. The contribution would involve five of the company's 10 defined benefit plans for management and union employees. Benefit accruals in all of Pan Am's defined benefit plans were frozen as of Dec. 31, 1983.

The long-term lease on the Worldport facility is valued at more than $200 million, according to an independent appraisal conducted for the company, which is the parent of Pan American World Airways Inc. Roughly 1,000 Pan Am employees work at the 800,000-plus-square-foot terminal; the facility has gates for 16 long-range jets and eight commuter planes, plus two helicopter and six mobile plane mate docks.

"The company feels that a good, quality piece of property with assured income over many years is an appropriate asset for a pension plan, even though the immediate tenant is the plan sponsor," said Pamela Hanlon, Pan Am's system director-corporate communications.

But contribution of the leasehold interest is contingent upon approval by the Department of Labor and the Port Authority of New York and New Jersey, which owns the terminal.

In addition, Margaret Brennan, head of the Pan Am Joint Labor Council, an organization of four of the five unions representing Pan Am workers, threatened to file a grievance at the very least.

"I can't comment because it's so strange, bizarre and unusual," said Ms. Brennan, who also is president of the Independent Union of Flight Attendants, New York.

For the interim, Pan Am received last week a waiver of its $48 million pension contribution, which was due Sept. 15. As collateral, the company put up $75 million of stock in Pan Am World Services Inc., a subsidiary that primarily services commercial and military installations.

Regardless of the decisions by the Labor Department and Port Authority, Pan Am plans to free the interest in the service subsidiary, which has proved to be consistently profitable and accounted for 15% of the company's $3.039 billion in total operating revenue in 1986.

If approvals are granted, Pan Am will be relieved of making pension contributions for three or four years and the funding waiver will be unwound. If not, Pan Am will contribute enough cash to cover both its 1986 and 1987 plan contributions, again releasing the stock.

Pan Am declined to reveal the amount owed for 1987, but based on recent years, the total contribution would approach $100 million.

The lease, which expires in 1998, includes passenger facilities, rentals and all-important airline gates. Under terms of the

# PBGC moves toward reinstating LTV plans

**By Nicky Robertshaw**

WASHINGTON — The Pension Benefit Guaranty Corp. might take steps as early as this week to return to The LTV Corp. four terminated steel-unit pension plans, government sources told *Pensions & Investment Age*.

The agency is taking the unprecedented step of restoring the plans to the company, which dumped $2.3 billion in liabilities onto the PBGC, because Dallas-based LTV agreed to a follow-on plan — a plan that is started after a termination.

The PBGC sees this plan as evidence that, in contrast to its position last January, LTV can — and has demonstrated that it will — meet pension obligations.

A spokeswoman for the PBGC said no decision had been made, although restoring the plans is one of several options being considered.

The spokeswoman would not comment further.

Although it is unclear how the PBGC would proceed, the issue is certain to end up in court.

LTV officials already have vowed the company will sue immediately in an attempt to block the move, which the company believes to be unlawful.

"It's one thing to say on Friday that you're going to do it, but it's another thing to win the court case that starts on Friday afternoon," said an LTV source, who doesn't believe the PBGC threat will hold up in court.

PBGC officials had said in June the agency might restore the four plans to LTV if a contract between the company and the United Steelworkers of America giving participants supplemental benefits went into effect.

In July, the supplemental benefits became a reality.

As a result, the PBGC has been considering several options, including restoring the plans to LTV or reducing payouts to participants in the amount of the supplemental benefits in an "equivalent offset" arrangement. Restoration is seen as being better to legally defend than the equivalent offset arrangement.

The PBGC has the authority under Section 4047 of the Employee Retirement Income Security Act to restore a plan terminated on a distress basis to its pre-termination status, if it determines such an action would be appropriate.

In addition, Section 4047 was amended, under the Single Employer Pension Plan Amendment Act of 1986, to apply specifically to plans terminated involuntarily in a distress situation, according to the PBGC.

"I don't believe 4047 ever contemplated the restoration of a plan where the original finding was that the company could not afford to maintain the plan," the source at LTV said, pointing out it never has been done. "Nobody in their right mind believes that LTV can afford those four plans," he said.

He pointed out that by reinstating the plans, the PBGC would be in violation of the automatic stay under the federal Bankruptcy Code that forbids increasing liability except by filing a proof of claim, and is not in keeping with the federal court decree ordering the termination.

The first of LTV's plans was terminated involuntarily Sept. 30, 1986; three more were terminated in January 1987. The PBGC took the initiative in terminating the plans when it learned LTV could not meet its benefit obligations.

# Fiduciary rule clarified

**By Nicky Robertshaw**

WASHINGTON — Sponsors of defined contribution plans that allow participants control over their individual accounts may have to change their menu of investment options to avoid incurring fiduciary obligations, under a proposed Department of Labor regulation.

This long-awaited proposal clarifies section 404(c) of the Employee Retirement Income Security Act, which states that when a participant exercises control over assets in an individual account, neither the participant nor a person who otherwise would be the fiduciary — such as a pension ex-manager — can be held responsible, if, for example, the participant loses money as a result of an investment decision.

However, the burden is on the sponsor to prove the plan meets the qualifications for this relief, which includes showing the plan offers the "broad range" of investment options called for by the statute.

Attorneys familiar with the proposed regulation said fiduciaries have some responsibility to monitor the choices to meet the standard for 404(c) protection, but it's unclear just what would be expected of them. The attorneys said the rule is directed primarily at sponsors.

"It's likely that a lot of (sponsors) who thought their plans satisfied this rule are going to find that their options don't fit," said Seth H. Tievsky, a lawyer with Wyatt Co.'s Research and Information Center, Washington.

Mr. Tievsky pointed out sponsors will have to revise plans to either add options or replace cur-

# Rorer restructuring, adds 2 asset classes

By Trudy Ring

FORT WASHINGTON, Pa. — Rorer Group Inc. has restructured its $85 million pension fund, moving from balanced management and making its first allocations to real estate and international.

The moves demonstrate the pension committee's desire to control the asset mix and invest more aggressively, said Mark W. Sickles, director-compensation and benefits.

A new committee was appointed after Rorer, a maker of over-the-counter drugs such as Maalox and Ascriptin, acquired the Tarrytown, N.Y.-based prescription pharmaceutical business of Revlon Inc., New York, in January 1986.

Mr. Sickles, who had been director of international personnel at the Revlon Health Care Group, of which the prescription drug business was a unit, assumed the newly created compensation and benefits position at Rorer.

About $25 million in pension assets, which had been part of the Revlon master trust, were combined with the Rorer assets for investment purposes, Mr. Sickles said. About two-thirds of the combined fund were in a balanced account with Dreyfus Management Inc., New York, and one-third in growth-oriented equities with Thorndike, Doran, Paine & Lewis, Boston.

Mr. Sickles said he didn't know who managed the assets at Revlon, as he wasn't in the pension area there.

Reviewing this arrangement with Rorer's consultant — Butcher Consulting Group, Pittsburgh — committee members decided they wanted to get away from balanced management and to diversify asset classes. Butcher's study indicated diversification could produce better returns with less risk, Mr. Sickles said.

*Rorer Group Inc., which manufacturers over-the-counter drugs such as Maalox Plus, is altering its pension fund asset mix to invest more aggressively, according to Mark W. Sickles, benefits director.*

With the restructuring, Rorer will retain Thorndike in its equity assignment, change Dreyfus' assignment to fixed income alone and take on additional managers for value-oriented equities, real estate and international equities. The transfer of assets will be effective Oct. 1.

Newbold's Asset Management, Philadelphia, and Thorndike will split about $55 million in equities, Mr. Sickles said. Thorndike already had a little more than half that amount, and will retain that allocation, he said.

Newbold's has a value-oriented strategy; the equity portion of the balanced fund also had been value-oriented. Newbold's started its assignment with a Rorer stock contribution of about 125,000 shares, valued at $5.5 million.

Rorer has instructed Newbold's to sell the stock as soon as it can do so without harming performance, Mr. Sickles said. Rorer pension officials don't want the fund to hold company stock because they don't want fund performance tied to corporate performance, he said.

This was Rorer's first stock contribution to the pension fund, made to help its cash flow after the merger, Mr. Sickles said. He's not sure if the company will make more contributions. The company also made a cash contribution, less than $50,000, to one plan.

Dreyfus will manage about $17 million in fixed income.

J.P. Morgan Investment Management Inc., New York, will manage real estate, and Nomura Capital Management Inc., New York, will handle international

## Consultant questionnaires out

Questionnaires for *Pensions & Investment Age*'s annual directory of investment management consultants are in the mail. The deadline for the return of completed questionnaires is Oct. 12. Completed questionnaires must be received by Oct. 12 to be included in the directory.

Consulting firms that have not received a questionnaire and would like to be listed in the directory should call Carol Wiley, directory coordinator, at (312) 649-5486.

# Funds putting excess cash in currency pool

By Marlene Givant

NEWARK, N.J. — Reflecting a desire to maximize returns on cash reserves, four tax-exempt funds recently invested in a high-interest global currency fund and a fifth started a separate account.

Managed by PCM International, the Prudential Trust Global Yield Fund has a total of $27 million from four clients, one of which, the nearly $1.2 billion pension fund of the Army and Air Force Exchange Service, Dallas, just committed $10 million to the fund.

Other clients are the pension funds of the World Bank, Washington; the Western Co. of North America, Houston; and National Automobile Dealers Association, McLean, Va., according to Barry Gillman, managing director of PCM.

The $3.2 billion Hawaii Employees Retirement System, Honolulu, one of the product's first clients, opened a $30 million global yield separate account last spring to earn high returns while parking its excess cash.

The combined cumulative return of the pooled vehicle was 20.5% in the 12 months ended July 31, substantially higher than the 5.76% unannualized returns on 90-day U.S. Treasury bills during the same period, according to the Payden & Rygel index of short maturity assets. The fund's performance includes the six-month return on the closed-end mutual fund, Global Yield Fund Inc., from which it was spun off in January.

"We were looking for something to diversify our cash asset class. Global yield seemed like a product we could use to add some value because it's investing in sound investments overseas," said Ken Weaver, assistant comptroller-insurance for the AAFES fund.

"We're hoping it'll add up to 400 basis points over comparable U.S. instruments. They have had excellent performance. The 1987 projected annual yield is about 13%," Mr. Weaver said.

Assets came from a reduction in a fixed-income mutual fund (called the Fixed Income Fund) managed by Dimensional Fund Advisors, Santa Monica, Calif.

AAFES also selected two small-cap managers, Nicholas-Applegate Capital Management, San Diego, Calif., and Westwood Management Corp., New York, to run $40 million each. Assets for these hires, additions to several existing accounts and May appointments of a domestic equity index fund

# *Interlake gets nod to terminate 6 plans*

By Barry B. Burr

OAK BROOK, Ill. — The Interlake Corp. has received approval to terminate six pension plans, allowing the company to recapture nearly $100 million in surplus pension assets and use the proceeds to help finance an announced $50 million stock repurchase program.

The company also is preparing a request to repurchase an undisclosed number of additional shares beyond the announced program, a corporate spokesman said.

The terminations affect plans of discontinued operations, covering only retirees and former employees, a treasury executive said, adding the plans didn't covered active employees.

The executive, who asked not to be named, said the company wouldn't release any further information, making it unclear whether the action involved a spinoff-termination — separating the plans into active and inactive employees. He declined to identify the operations discontinued, or details on how the operations were discontinued, whether through sale or liquidation.

The terminated plans had total assets of $177.2 million and total discounted liabilities of $79.7 million, according to Interlake's filing with the Pension Benefit Guaranty Corp.

The terminations will greatly reduce Interlake's pension assets and liabilities.

As of Dec. 28, the company had total pension assets of $211 million and liabilities of $85 million. Interlake executives generally have been reticent about the reversion, although it is more than three times larger than the company's entire net income of $32 million reported last year.

The corporate spokesman de-

# Workout pros busy despite boom

By Brad Rudin

Wall Street's workout specialists, thriving despite the economic boom, are concerned the next recession will sink some of the more fragile leveraged buy-outs and could bring a surge in failures among companies taken private in more ordinary buy-outs.

Because leveraged buy-outs often are financed through the sale of some of the companies' most valuable assets, the now-private firms could face problems when they have no "crown jewels" to sell as part of a workout or reorganization.

"In the next economic downturn, there will be a whole new category of companies called LBOs," said Ralph O. Hellmold, head of the financial restructuring and reorganization group at Prudential-Bache Securities Inc., New York.

The decline in energy prices, oversupply in the steel industry, unexpected costs at nuclear generating plants, international competition, bad luck and bad management all have contributed to the demand for workouts.

"It's scary right now — we're very busy given the cycle we're in," said James W. Harris, the head of the financial restructuring group at Shearson Lehman Brothers Inc., New York. "What would happen if we really had a recession?"

Even with the recovery chugging along, the number of business failures recorded by Dun & Bradstreet almost doubled in 1986 to 61,232 from 31,334 in 1983.

In a workout, distressed companies often use exchange offers, pledges of collateral, renegotiated supply contracts, pension plan terminations, asset sales and securities offerings, among other strategies.

These, in turn, will lead to operational improvements, to a restructured balance sheet and to a refocused business strategy as well.

*An economic downturn could damage several LBOs, says Ralph Hellmold of Pru-Bache, left; Donald Dietz of First Boston points out there are plenty of overleveraged companies in troubled industries.*

Workout specialists work for debtors in out-of-court and Chapter 11 reorganizations, as well as provide advice to creditor committees in reorganization plans that take place under bankruptcy court supervision.

"All you have to do is to read the papers," said Donald E. Dietz III, a senior member of the reorganization group at First Boston Corp., New York. "There are lots of companies with problems; they're overleveraged, they're in industries with problems."

The normal course of business generates demand for workout specialists, said Daniel G. Gruber, national director of the reorganization advisory services group at Touche Ross & Co., the Big Eight accounting firm in New York. "In every industry there's a company on the top and a company on the bottom. Very few industries are so good that the company on the bottom doesn't have a problem."

# The proxy pressure's on

## Managers admit to more than fund execs

By Marcia Parker

WASHINGTON — Sixty-five percent of pension fund investment managers, but only 25% of corporate pension executives have felt pressure to direct their proxy votes in favor of corporate management, a comprehensive study has found.

Only 28% of investment managers reported pressure frequently, however, while 37% said they experienced pressure rarely and 34% said never.

The study seems to indicate pressure is not pervasive and that many on the receiving end have developed written policies to deal with it. But the Employee Benefit Research Institute, which sponsored the study in cooperation with two other groups, acknowledged how hard it is to determine the intensity of the pressure.

The study co-sponsors were the Association of Private Pension and Welfare Plans, Washington, and the Financial Executives Institute's Committee on the Investment of Employee Benefit Assets.

"Because the experience of financial pressure may be a sensitive topic for some plan sponsors, its occurrence may not be recorded as accurately as other survey information," the long-awaited EBRI study said.

"Some sponsors may be anxious to reveal any unwanted pressure, while others may try to hide its occurrence. Nevertheless, those who admit to being pressured also tend to have written policies to deal with that contingency."

Most pension fund executives, money managers, proxy solicitors

# *Global bond use up 24.5%*

By Marlene Givant

To diversify from domestic fixed income, U.S. tax-exempt funds committed at least $1.472 billion to international and global bond accounts in the first six months of 1987, a *Pensions & Investment Age* survey of eight industry leaders shows.

That's an increase of 24.5%; assets held in international and global bond accounts totaled $6 billion at year-end 1986, according to a spokesman at Salomon Brothers Inc., New York.

The spurt of interest in foreign fixed income might be greater than for any other asset class. "It's probably been one of the hottest areas we've seen come along in some time, in terms of new interest in an asset class," said S.A. "Sandy" Lincoln, managing director in the Deerfield, Ill., office of William M. Mercer-Meidinger-Hansen Inc.

While pension plans are investing in foreign bonds chiefly to diversify over the long term, many have chosen to invest now to benefit from an expected decline in the dollar against other currencies.

There is overall risk reduction despite currency risks because foreign markets diversify themselves, managers said.

Fixed-income markets also are 50% larger, in terms of money worldwide, than equity markets and are more liquid.

Some officials also are lured by enhanced returns.The Salomon Brothers World Bond index returned a compound annualized 18.9% in the five years ended June 30, while the Salomon Brothers Non-U.S. Bond index returned a compound annualized 20.4% for the same period. The Salomon Brothers U.S. Government Bond index returned a compound annualized 17.6% for the period.

The $1.5 billion ITT Corp. pension fund, for example, is moving to make international bonds fully 25% of fixed-income assets by year end, or roughly 4% to 5% of total plan assets, said Edwin J.

# Tax advantages spur offering of stock to GM plan

By Brad Rudin

NEW YORK — General Motors Corp.'s $1.04 billion stock contribution to its pension plan has drawn praise from analysts and refocused attention on the tax advantages created by contributions made for the 1986 tax year.

Because the company made extra contributions in previous years, it had no obligation for the 1986 plan year that ended this month, said W. Gordon Binns Jr., chief investment funds officer.

Of course, the retirement fund's performance during the bull market helped to reduce the company's contribution.

General Motors contributed $1.6 billion to the retirement fund in the 1985 plan year.

Tax planning, rather than pension fund obligations, shaped GM's decision to contribute 19.6 million preference shares to the plan, which has $33 billion in assets.

"The contribution, which took place Sept. 14, allows the corporation to generate significant incremental tax benefits in that the contribution is deductible for federal income tax purposes for the 1986 tax year," according to a company letter to investors.

General Motors will save $125 million for the 1986 tax year, while the annual dividend payments generated by the preference shares will amount to about $12 million, according to a company spokesman.

Contribution of the preference shares could satisfy contribution requirements in future years, said the letter to investors.

Stock and credit analysts praised GM's contribution because the move conserves corporate cash and reduces federal tax liability.

David Healy, an analyst at Drexel Burnham Lambert Inc., New York, put the annual preference share dividend at $15 million, $3 million more than the company's estimate, saying the dividend payments on income attributable to the 1⅔ par value common stock will dilute GM earnings about a nickel a share.

General Motors 1⅔ par value common stock earned $2.80 a share in the second quarter of 1987.

Terry R. Holmes, an assistant treasurer at GM, disputed the view that the stock contribution would reduce earnings attributable to the 1⅔ common stock, saying investment of the funds saved by the tax deduction would yield a return that would actually add 2 cents to earnings per share.

The stock contribution will not dilute earnings attributable to Class E and Class H common shares because "the Class E and Class H dividend bases used for the purposes of determining earnings per share and the per share amounts available for dividends will not be impacted," according to a statement issued by the company.

Dilution is a relatively minor factor given the benefits, Mr. Healy said. "I think it makes sense for tax reasons to make the contribution."

At Salomon Brothers Inc., New York, Jean-Claude Gruet said, "General Motors is a company that needs cash, and given that their earnings are under pressure, it's an extremely cheap source of cash."

Some of GM's need for cash stems from the company's decision in March to repurchase up to 20% of its 1⅔ par value common stock — about $5.6 billion at current prices — by 1990.

The company's net income dropped 14.2% to $1.9 billion on sales of $52.8 billion for the first half of 1987 from net income of $2.22 billion on revenue of $54.45 billion in the first half of last year.

## Opinion

# Time for trial-by-leaks to end

THE CHINESE WATER TORTURE of Drexel Burnham Lambert and Michael Milken, head of Drexel's junk bond operations, has got to stop.

Drops of information, hinting at improprieties by the firm and Mr. Milken, have been allowed to leak to the press at regular intervals, apparently by federal investigators.

The stories sparked by the leaks give an impression of investigators finding intriguing leads that have made action against Drexel and Mr. Milken a foregone conclusion in the near future. But the near future never comes.

Indeed, 10 months after the names of Drexel Burnham and Mr. Milken were first mentioned as targets of investigations by the Securities and Exchange Commission and the Justice Department, federal officials still are rummaging through files searching for evidence of illegal behavior on the part of the investment banking firm and its junk-bond pioneer.

Perhaps the stories are part of a campaign to try to induce Drexel and Mr. Milken to make a deal with the prosecutors, whether they are guilty of criminal offenses or not. Certainly, the investigation and the continuing stories rehashing government suspicions must be hurting Drexel's and Mr. Milken's business operations, and must be costing both inordinate amounts in legal fees.

At times, both must be tempted to plead guilty to some minor infraction just to end the legal hassles.

While most stories absolve federal officials of responsibility for the leaks, most also quote "sources close to the investigation." And the stories serve federal purposes so well, the absolution is less than wholly credible.

At the very least, federal officials must know who is leaking information and are in a position to stop it, if they really want to.

If Drexel Burnham Lambert and Michael Milken have breached federal securities laws, they should be tried in court — not in the press. And they should be tried expeditiously.

If federal investigators, after 10 months of digging, have not found enough evidence to prosecute, perhaps there is no evidence.

# Labor provisions offer safe harbor

THE LABOR DEPARTMENT has issued a long-overdue clarification of the fiduciary responsibility requirements of ERISA in plans where employees exercise control over investment of assets.

While some might have preferred increased reporting as a way to ensure policing such plans, the Labor Department provisions are not particularly onerous.

Employers may have to add more investment options for their employees to fulfill the requirements of the proposal.

However, employers that offer sufficient investment options for employees to choose from, and that can prove the plan meets the qualifications specified in the proposal, will have, in effect, a safe harbor from fiduciary liability.

The new proposal, in effect, encourages employers to offer employees a wide range of investment alternatives in defined contribution plans, such as profit-sharing plans and 401(k) plans.

In addition, employees must be given enough information to make an "informed" decision.

These are things that employers should have been doing in the past, and many were.

That the proposal will encourage other employers to do so is a positive development for defined contribution plans, their beneficiaries and even the employers.

## Letters to the editor

### PIPER data missed

To the Editor: In your second-quarter PIPER survey, the investment results of Manufacturers Life's Equity Fund A were not included.

As this fund has been one of the best-performing funds in the survey, your readers may wish to know the results: 10-year return, 23.7%; five-year return, 31.1%; and one-year return, 7.2%.

Manufacturers Life markets a number of pension fund investment vehicles and related services.

Manufacturers Life Insurance
Toronto

### Great-West Life info

To the Editor: As agreed, I am sending you a completed 1987 investment adviser questionnaire.

Great-West Life Assurance Co. is at 8505 E. Orchard Road, Englewood, Colo. 80111; (303) 889-3000.

Total assets managed as of Jan. 1 were $12.966 billion. The tax-exempt assets totaled $5.3 billion.

Of that tax-exempt total, pooled separate accounts made up $188 million; GICs, $843 million; pension-related annuities, $384 million; and other general account pension-related products, $3.885 billion.

It managed $1.043 billion for 485 401(k) and 457 savings plan clients; and $18 million in mortgages.

Its tax-exempt accounts are for corporate, educational endowment, government and jointly trusteed clients.

It has five portfolio managers and a research staff of 240.

It is an equity, fixed-income, balanced and real estate manager.

In equities, it offers passive management as well as an active, growth-stock approach.

Its fixed-income approach uses mortgages as the core holding, supplementing it with an aggressively managed bond portfolio.

In real estate, the firm manages both open- and closed-end pooled and separate real estate funds.

The asset mix of separate accounts Jan. 1 was 87% stocks, 3% cash and 10% mortgages.

It follows 120 stocks closely and 300, generally; more than half of the research is generated internally.

The parent company is Power Corp. of Canada.

Assets under management by the parent, subsidiaries and affiliates total $25.05 billion.

Clients include American Dental Association, Colorado National Bank, State of South Carolina and City of Seattle.

Marshall Smith, executive vice president-investments, is chief investment officer.

Graham R. McDonald, vice president-group pension, is client contact.

Thank you for your assistance in getting this matter resolved.

**John T. Ferla**

### Society Bank GICs

To the Editor: Fred Williams' article on active GIC specialists in the Aug. 24 issue was very interesting; however, he did not mention one of the largest and most experienced GIC managers.

Society National Bank's Trust Department has been actively using GICs as an investment vehicle since 1980.

Presently, we have more than $900 million under management. This includes a $215 million GIC common trust fund.

This is a unique fund that has tremendous appeal to 401(k) plan participants.

We also manage a GIC fund that is used by other banks for their clients. This fund totals $40 million and was started about a year ago.

We have analyzed a whole array of contracts and negotiated bullet, open-end and window placements.

We do credit analysis on many insurance companies and have 35 companies that meet our credit criteria now.

**Donald Cruse Jr.**
Senior vice president
Society Bank
Cleveland

### IDS and GICs

To the Editor: The Aug. 24 article, "Active GIC Specialists Growing Despite Doubts," by Fred Williams was an interesting account of the current GIC investment environment.

In 1981, IDS Trust pioneered in the challenging area of active GIC management. Located in Minneapolis, we manage more than $400 million for over 150 fixed-income clients.

The IDS Trust Income Fund, a diversified pool of GICs and money market investments, was our initial GIC investment product.

The fund has grown to over $350 million while consistently achieving competitive yields.

Recognizing that some qualified plans have very specific and unique fixed-income needs, IDS Trust also provides individual GIC management. Our individually managed accounts are designed to meet clients' unique liquidity, yield and credit quality needs.

As a large GIC manager, it was disappointing to be excluded from your article.

We welcome the opportunity to talk with one of your writers and hope to be included in subsequent GIC articles.

**Robert A. Rudell**
IDS Trust
Minneapolis

### Centerre data wrong

To the Editor: Somehow there was an error in communications regarding the asset value of the master custody assets (for the Sept. 7 master trust directory). The number should have been $2.753 billion, not the figure which was sent inadvertently.

In addition, there was an error in the figures sent on the increase in master custodial assets from last year, which should have been $700 million. This figure is made up of our new client and additions to existing master custodial client accounts.

Thank you for your assistance in this matter.

# Japan cuts deals with U.S. help

Nissei Realty owns the Texas Commerce Bank Building, Dallas, a joint venture with Equitable Real Estate and Trammell Crow.

**By Barry B. Burr**

Japanese companies own more than $4.9 billion of U.S. equity real estate purchased through their still-infant relationships with American real estate companies, PROPERTY has learned.

Although the Japanese also invest in U.S. real estate on their own, the Japanese-U.S. relationships are the favored means for investors in Japan to buy U.S. property.

Such arrangements give Japanese investors access to U.S. real estate expertise, and open the door for American companies to new sources of foreign financing.

The relationships take a variety of forms, both formal and informal, such as outright purchases of U.S. real estate companies, contractual agreements or deal-to-deal transactions.

Some notable examples of the ties:

• Nomura Babcock & Brown Inc., a joint venture of Nomura Securities Co. Ltd., Tokyo, and Babcock & Brown Co., San Francisco, bought 50% of Eastdil Realty Inc., New York. Although the dealmaking is just beginning, the Eastdil-Nomura partnership is expected to invest $2 billion to $4 billion by the end of 1988, Roy March, Eastdil vice president, said during an Urban Land Institute Conference in May.

If Mr. March's predictions are accurate, Eastdil quickly would become the biggest U.S. dealmaker with Japan.

• Sumitomo Trust and Banking Co. Ltd., Tokyo, has a five-year contractual relationship with Richard Ellis Inc., to seek the New York-based real estate company's advice on U.S. property acquisitions. So far, they've done nine ventures, totaling $800 million.

• Equitable Real Estate Investment Management Inc., New York, a unit of Equitable Life Assurance Society of the United States, has engaged in a number of joint purchases of U.S. real estate with Japanese companies, for an amount approaching $1.5 billion. The Japanese companies include units of Nippon Life Insurance Co., Asahi Mutual Life Insurance Co. and Daiei Inc., a major consumer goods retailer, although it has no contractual ties to make further acquisitions.

• Balcor International Realty Investment Corp., a unit of Balcor Co., Skokie, Ill., recently formed a joint venture with three Japanese companies and a unit of American Express Bank to market U.S. real estate investments in the form of limited partnerships to investors in Japan.

The venture expects to place $200 million in Japanese investment in U.S. property by the end of this year and another $350 million to $500 million next year.

The relationships, in whatever form, are an indication of the growing presence of the Japanese in the U.S. real estate market.

Data gathered by PROPERTY from interviews with U.S. and Japanese companies found Japanese owned $5.7 billion to $6.2 billion in U.S. real estate investments, including about $1 billion in mortgage investments.

Other real estate experts give different estimates.

Kenneth Koplow, real estate consultant, Windsor Associates, Cambridge, Mass., estimates Japanese have invested $5 billion to $10 billion in equity and equity-oriented debt in U.S. real estate through such relationships.

"Virtually every time a Japanese institutional investor invests in real estate in the United States, it is using some sort of U.S. real estate adviser," Mr. Koplow said.

According to David Shulman, vice president at Salomon Brothers Inc., New York, Japanese held $5.5 billion in U.S. real estate for investment purposes at year-end 1986. His estimate is similar to data of the U.S. Department of Com-

# Washington fund will finance piece of Cadillac buy-out

**By Steve Hemmerick**

The $10 billion Washington State Investment Board, Olympia, is putting up 80% of the money to finance the buy-out of Cadillac Fairview Corp. Ltd.'s non-retail properties in the United States, PROPERTY has learned.

The all-but-completed deal, the smaller of the two pieces in the acquisition of Canadian developer Cadillac Fairview, has inspired confidence in JMB Realty Corp.'s ability to acquire the remainder in a $1.5 billion transaction.

The smaller buy-out is being led by Copley Real Estate Advisors, Boston, one of Washington's real estate advisers, and Michael Prentiss, the Cadillac official who oversees the bulk of Cadillac's U.S. holdings.

"Our commitment, give or take, is going to be about $400 million, and we will be roughly 80% of the deal," confirmed John Hitchman, executive director of the Washington board. An unnamed investor is buying the rest.

"We are very enthusiastic about it, and think Copley has done a first-rate job on it in respect to valuing the properties," Mr. Hitchman said.

The assets in that part of the deal include offices, industrial properties and land proposed for long-term development properties, and the Washington board believes it got the properties on a volume and cash discount basis.

"For those properties where there is an element of risk present, we have priced those properties accordingly and have done extensive diligence, and we think that it is an excellent way to acquire a portfolio at a fair price. These opportunities don't come along very often, and we think the acquisition of the urban industrial properties

## Tax-exempt investors hold $5 billion in 5 cities

**By Chuck Paustian**

Tax-exempt institutional investors own more than 35.7 million square feet — with an appraised market value of $5.09 billion — in the central business districts of the nation's five largest cities, a PROPERTY survey shows.

PROPERTY surveyed 396 pension funds and 186 real estate investment management firms to determine the degree of tax-exempt institutional ownership (as of March 31) of office, retail and industrial properties in the central business districts of the U.S. Census Bureau's five largest cities.

The survey showed tax-exempt institutions own, on an equity basis, 18.7% of the 15.2 million square feet of total office space in downtown Los Angeles; 12.7% of 60.3 million square feet in Chicago; 11.9% of 40 million square feet in Philadelphia; 5.6% of 28.9 million square feet in Houston; and 3.4% of 305 million square feet in New York.

On a debt basis, they hold mortgages on 7.9% of the office space in Los Angeles, 4.1% in Chicago, 1.9% in Houston, 0.7% in Philadelphia and 0.6% in New York.

According to PROPERTY data, the appraised market value of the downtown office holdings of the tax-exempt institutions surveyed totaled more than $4.88 billion.

## News & briefs

# Thrifts sell Dallas office for $36 million to family

DALLAS — Maxine and Morris Stone of Cleveland's Stone family acquired One McKinney Plaza, a 250,000-square-foot office building in Dallas, from a group of thrifts led by Commerce Savings Association, San Antonio, for $36 million in equity and debt.

The thrifts, which acquired the building last year in lieu of foreclosure on its developer, Murray Development Co., Dallas, made an estimated $500,000 profit after paying expenses and outstanding notes, said Barry Davidson, vice president of Swearingen Co., Dallas, broker in the deal. The thrifts had provided Murray a $35 million permanent mortgage.

The Stones put up between $3.6 million and $7 million in equity and financed the remainder in a 10-year mortgage from Commerce Savings at a rate below 10%, said Mr. Davidson.

## Utility is negotiating sale-leaseback

LOS ANGELES — Executives of Southern California Gas Co. are negotiating a sale-leaseback of the company's headquarters building and the sale of the underlying land and two adjacent parcels of land, reportedly to a subsidiary of Shuwa Corp., Tokyo. The Los Angeles properties are jointly owned by Southern California Gas and its parent company, Pacific Lighting Corp., which recently moved from the building to new offices in the Chase Plaza Building.

## Zeckendorf's bid fails in New Jersey

NEW YORK — Manhattan's William Zeckendorf Jr. apparently has been beaten at his own game in a bid to develop a big piece of prime Hudson River waterfront. Murray M. Connell, a little-known real estate investor from Hoboken, N.J., reportedly offered a higher price than Mr. Zeckendorf for a massive mixed-use project on a 44-acre abandoned shipyard in the area known as New Jersey's Gold Coast.

## Investor buys business for real estate

NEW YORK — The purchase of scandal-ridden Wedtech Corp.'s core business by Bronx real estate investor Abraham Sobel appears to be as much a real estate speculation play as it is an attempt to revive a failing manufacturing business. Mr. Sobel, through Five Oceans Realty Corp., is paying $4.2 million for Wedtech's headquarters in the Bronx, a site that includes a parking lot within walking distance of Yankee Stadium.

## Joint venture pays $23.5 million cash

DALLAS — A joint venture between C. Itoh & Co., Tokyo, and C.H. Beazer PLC, London, paid $23.5 million cash for Chateau Plaza, a Dallas office building. A joint venture of the Dallas developers of the property, J.L. Williams & Co. and Randy Heady, sold the building. The headquarters of Gifford Hill & Co. Inc., a Texas construction materials manaufacturer owned by Beazer, will be relocated to Chateau Plaza from Irving, a Dallas suburb.

## Inside

### There's no place like home— P. 11

Developer Bud Hansen of Hansen Properties, PROPERTY's Up and Comer, won't venture from his suburban Philadelphia back yard for new projects, even though he's about to develop office buildings 10 times more costly than those he previously has built.

### Waikiki Center sold for cash — P. 12

Japanese investor Ching Ming Wang paid $44.8 million, all cash, to an Integrated Resources limited partnership for Waikiki Trade Center, said to be the finest office property in that area.

### Managers record 27% gain — P. 19

Even though real estate money managers profiled in PROPERTY's directory reported a healthy increase in assets under management, their tax-exempt clients seem more interested in changing how and where they invest that money.

Southland Corp.'s Cityplace Center in Dallas was financed with $290 million in eight-year notes. The deal was put together by Goldman, Sachs and secured with a letter of credit provided by a syndicate of banks.

# Innovative financings prevail in 1987's deals

By Steve Hemmerick

New pools of capital and unusual combinations of financing tools characterized the innovative real estate deals so far this year, with Japanese buyers continuing to play key roles.

Among the significant deals:

• The $287 million financing of 75 State St. in Boston's financial district, one of the year's major securitizations of a commercial mortgage. In the deal, a commercial paper issue was securitized by third-party credit enhancement with interest-rate swaps to fix the rate.

The deal allowed a limited partnership to proceed with the development of the 31-story office building. Equitable Real Estate Investment Management Inc., New York, and The Beacon Cos., Boston, are general partners, each with 40% ownership. A small group of other investors owns the remaining 20%.

The deal includes commercial paper backed by a letter of credit from Citibank and interest rate swaps and various interest rate hedging devices, said Robert J. Perriello, a senior vice president with Beacon.

All the elements had never before been combined to finance a to-be-built office building with no pre-leasing, he said. Traditionally, such ventures would be financed with construction and long-term loans.

Mr. Perriello said the project's total interest cost is about 9.5%, equivalent to a bullet loan rate on an already-constructed building.

He said the financing was ar-

# Developers plan resorts

LAGUNA NIGUEL, Calif. — Two developers — Hemmeter Corp., Honolulu, and Irvine Co., Laguna Niguel, Calif., are working on deals that could turn Orange County's southern coastline into an international resort stop.

Hemmeter executives are quietly negotiating with officials of Stein-Brief Group for the development of an approximately $250 million, 1,000-plus-room resort, sources said. Hemmeter is known for its hugely successful string of Hawaii destination resorts; Stein-Brief is a development company that owns one of two remaining undeveloped long stretches on the Orange County coastline.

Hemmeter reportedly has acquired a one-year option on a hotel site at Monarch Beach, just up the coast from Dana Point and the city of Laguna Beach, both popular tourist resorts.

If officials from Hemmeter and Stein-Brief can work out an amicable plan, sources said, Hemmeter will buy an interest in the site and Hemmeter and Stein-Brief will seek third-party financing.

Sources have said the two developers already put together a conceptual plan that, so far, has not met with any local government opposition.

# Consultants are crucial, and know it

By Steve Hemmerick

Some consultants have "virtual control" over pension funds, says James Nugent of Coldwell Banker; consultant-turned-manager John McMahan notes the "short list" is one of their most powerful tools.

Consultants wield immense power over the more than $90 billion in tax-exempt assets, sometimes being courted like kings and queens by real estate managers and deeply depended upon by pension committees and boards that are more comfortable with stocks and bonds.

Without the help of consultants, the amount of new money invested in real estate each year might slow to a trickle, real estate investment managers contend.

Although part of their task is to try and quantify real estate, consultants acknowledge the numbers are much less dependable than they are for financial assets.

Consequently, reality in the world of real estate is what the consultants say it is, and many of the decisions pension committees and boards make are based on reality that is given to them.

That power is sharply recognized by real estate

# Forecasts put real estate on shaky ground

By Nancy White Norkus

PROPERTY'S
## Crystal Ball
### The economy

Inflation will climb as little as 2.75% or as much as 5% by the end of 1988, prompting skepticism about the performance of real estate as an asset class, PROPERTY's Crystal Ball survey of economists showed.

In addition, short-term interest rates will be between 5.25% and 6.7% in 15 months, the survey predicted.

Economists were asked to predict inflation as measured by the overall Gross National Product deflator, a price index based on domestically produced goods; interest rates as measured by 90-day Treasury bills; and employment growth. Economist also used permit values and housing starts to draw some conclusions about future real estate performance.

The slight hike in interest rates will bring up cap rates and make investment classes more competitive with real estate, explained David Shulman, vice president-real estate research, Salomon Brothers Inc., New York.

"We expect interest rates to rise from current levels — the three-month T-bill could move up another half a point — but rates will fall as the Fed is accommodative because of a weakening economy and the upcoming election," said Jesse M. Abraham, manager-economic forecasting at Dodge/DRI Construction & Real Estate Information Service, Lexington, Mass.

A slowdown in the general economy will bring down demand for real estate, said Robert A. Frank, senior real estate analyst at Alex. Brown & Sons Inc., Baltimore. "We expect real estate to continue to underperform stocks and bonds next year," he said.

Adjustments in permit values of non-residential properties also affect the real estate market, said Richard Kateley, executive vice president of Real Estate Research Corp., Chicago.

And, "Contract starts (not building permits) in square footage declined by some 7% — from 1.3 billion square feet (worth $79.18 billion) to 1.2 billion square feet (worth $78.97 billion) in 1988," said Mr. Abraham.

"More buildings are coming onto the market, but many of these are projects started years earlier that are just reaching conclusion." He predicted further slowdowns in the next two to five years.

Synchronized with the downturn in non-residential buildings, housing starts are predicted to fall to 1.6 million in 1988 from 1.63 million in 1987, said Gopal Ahluwalia, director of research with the National Association of Home Builders, Washington.

"A slight drop in construction starts won't do enough to help raise real estate value," reasoned Mr. Kateley. "I'm surprised it isn't going down more — we should see a halt in commercial development. We don't need any new space."

There is no indication that employment figures will help trim the supply gap. "Non-agricultural employment grows 2.2% for the next four quarters, keeping the unemployment rate below 6%," said DRI's Mr. Abraham. "But this is not enough to make a significant difference in many markets."

Philadelphia-based Wharton Econometrics Senior Economist John M. Savacool predicted "the job creation rate will rise only 2.3% for the next 12 months."

Wells Fargo Investment Advisors, San Francisco, predicted an even smaller growth in employment than DRI — 1.1% by Dec. 31, 1987; 1.7% through 1988, said Harold Nathan, senior economist.

The only positive news might come from inflation, where a rise in 1988 would boost property values, Mr. Abraham noted. "We expect inflation to pick up from its current rate, as import prices rise and filter through the price structure."

Expected to lag stocks and bonds into 1988, real estate is still finding its way back into institutional portfolios.

"Over the past two years we have had no real estate in our asset mix. About a month ago we shifted to include a 5% component in real estate," explained John S. Hekman, senior economist at The Claremont Economics Institute, Claremont, Calif. The firm recommends asset mixes in its investment newsletter, The Main Street Journal.

"We don't think the returns will be as strong as other vehicles over the next few years, but prices have bottomed out and we see it as a good time to buy in real estate," he said.

"I would say we're in a real estate liquidation phase now, but we do see a long-term favorable outlook, three to five years out," said Mr. Frank. "It's a good time to buy for value, but we're being very choosy, buying only public securities, REITs. We want the liquidity."

Mr. Abraham concluded: "As we enter the latter half of the 1980s, the factors which spurred real estate investment will not be prevalent. Real interest rates are high, inflation has decreased sharply, and the labor force growth will be below historical trends." ■

### What the experts predict

Management agents of Class A Office Buildings in the Mid Atlantic States

# Waikiki Center snagged

By John Covaleski

A Japanese investor paid $44.8 million in cash to a limited partnership sponsored by Integrated Resources Inc., New York, for Waikiki Trade Center, considered the finest office property in the Waikiki area of Honolulu County.

Ching Ming Wang, through his Yamate Real Estate Co. Ltd., Tokyo, acquired the property for about $11.3 million more than Integrated paid for it in 1985.

The center, which opened in 1980, is reportedly the only Class A office built in Waikiki in the 1980s. With 191,000 square feet of offices and retail space, the selling price of about $235 per square foot is the most ever paid for a building there.

Integrated Resources originally acquired the center in early 1985 for $33.5 million, financed through a $15.5 million first mortgage, a $9 million purchase money mortgage and $9 million in equity. The seller was a subsidiary of MEPC PLC of the United Kingdom.

Later that year, the limited partners and Waikiki Partners Corp., an Integrated subsidiary and general partner, acquired the property from Integrated, reportedly by taking out a $2 million third mortgage, assuming the equity position and agreeing to pay off Integrated's mortgages.

Some brokers were surprised Mr. Wang bought the property because Waikiki's office market vacancy rate, now at virtually zero, is expected to increase to 17% to 25% in early 1989 upon completion of an office project owned by Mutual of New York.

"It was very prudent of Integrated to sell when it did," commented Andrew D. Friedlander, president of Monroe & Friedlander Inc., a Honolulu-based brokerage firm. He predicted Waikiki's office vacancy rate will reach at least 25% in spring when MONY completes the conversion into offices of a 150,000-square-foot retail center it owns.

Benjamin D. Fein, executive vice president of Integrated, said his firm originally felt Waikiki Trade Center was a strong property. He said Integrated structured the 1985 acquisition largely as a tax-advantaged deal, but those advantages were wiped out with tax reform. He said he decided to sell this year when Japanese investors began approaching him about the property.

The sale will give the limited partners almost triple their net investment in the property, according to Mr. Fein. He said the group of high net-worth individuals collectively will receive at least $6 million in the sale. They put $2.5 million to $3 million into the deal, and saved $1.5 million in tax breaks, for a net investment of about $1.5 million, he said.

Integrated's sub, the general partner, will receive about $120,000 on its investment of about $90,000, Mr. Fein said.

Another $20 million from the sale will pay off the two mortgages (one held by Integrated and one by the limited partnership) and pre-payment penalties, and $800,000 is being set aside to make good on a two-year cash flow guarantee Mr. Wang received as part of the deal.

Linda Wu, president of LNW Investments, Honolulu, which represented Mr. Wang in the deal, said her client bought the Waikiki Trade Center because "he wanted the best office building in Waikiki, and that's what this is."

Mr. Wang's other holdings in Honolulu are the 245,000-square-foot Pioneer Plaza in the central business district, and the 90,000-square-foot Kapiolani Center.

Mr. Fein said the property generated a great deal of buyer interest this year, partly because of almost $1 million in improvements, mostly to the heating and air conditioning system.

Since the Integrated-led group acquired the center, occupancy of its 114,000 square feet of offices increased to 100% from 90% and occupancy of its 76,000 square feet of retail space increased to almost 90% from about 60%. ■

# Managers' assets up 27%

By Nancy K. Webman

Tax-exempt assets under management by 100 leading U.S. real estate money managers — including the 50 largest — grew a healthy 27% in the year ended June 30, while tax-exempt investors were making fundamental changes in how and where they invest their money.

Thanks, largely, to a steady flow of new commitments from public pension funds, tax-exempt real estate assets under management increased to $77.613 billion as of June 30, from $61.113 billion a year earlier, PROPERTY's survey shows.

(That $61.1 billion was revised from the $73.3 billion published in the Sept. 15, 1986, issue of Pensions & Investment Age because Aetna Life & Casualty incorrectly included almost $12.2 billion of general account mortgage assets in response to last year's survey.)

Total real estate assets held by the 100 managers increased 12% to $265.3 billion as of June 30, from $236.7 billion a year earlier. More than half of the total — almost $140 billion — was in mortgages and hybrid debt, the favored forms of investment for insurance company general accounts.

Because the 27% increase in tax-exempt assets comes at a time when the real estate industry is undergoing a downturn, the growth appears to be the result of new commitments from public funds that previously had been lagging their corporate counterparts in moving into real estate, consultants said.

But Bill Cottle, a real estate consultant with Callan Associates, San Francisco, said his firm also has had "a fair number of corporate clients who have added real estate, who were basically at zero (allocation) and committed, maybe 5% of assets."

Whether new contributions or old, tax-exempt investors — through their real estate managers — are making significant changes in their strategies for investing those assets:

- Pension funds and other tax-exempt institutions are putting more money into multifamily housing, hotels and resorts, mixed-use developments and other property classes, and less into office buildings and retail, their former mainstays.
- Tax-exempt institutions are increasing their investments in developmental deals, committing 11% of their assets to developmental projects as of June 30, vs. 7% a year earlier.
- Investors increasingly are turning to direct, separate account management and away from commingled funds.

Of the $77.6 billion in tax-exempt assets under management by the firms surveyed, 45.4% is in separate accounts, compared with 32% as of June 30, 1986.

Pension funds will continue to increase their commitments to separate accounts, said Catherine Janson, a real estate consultant with Buck Consultants, New York. Minimum account sizes are dropping because managers are co-investing the assets of several clients' separate accounts, she noted.

- Institutional investors are continuing to increase their investments in equity real estate.

The amount of money pension funds, foundations, endowments and other investors commit to equity real estate grew to more than $57 billion as of June 30, from $45.2 billion a year earlier. Equity investments represent 73.5% of tax-exempt assets under management by the 100 real estate firms in the survey, about the same percentage as the year before.

Three factors are most responsible for these evolutionary shifts.

First, tax-exempt investors are becoming more knowledgeable about, and more comfortable with, real estate as an asset class.

The increase in developmental deals is "a function of being better educated in the real estate market and being more willing to accept more risk," said Callan's Mr. Cottle.

That growing level of comfort and sophistication also leads to a willingness to venture away from commingled real estate pools. The jumbo commingled funds, broadly diversified by property type and geographic location, have been viewed as benchmarks for the institutional real estate market, functioning similar to index funds.

Investors' desire to outperform the market likely has led to their increased commitments to what had been less traditional avenues, such as separate accounts and investments in developmental properties.

Second, returns on some office and retail properties, the traditional havens for tax-exempt real estate money, are suffering. Buck's Ms. Janson said part of the decline in assets in offices results from writedowns by managers on office properties in weak markets, including the oil patch. In retail, she said, strip shopping centers are overbuilt, though regional malls are doing well.

Third, competition for trophy properties from foreign investors, especially the Japanese, is forcing U.S. institutions to diversify into other areas (both by property type and geography).

Changes in investments by property type, while not glaring, are significant.

According to PROPERTY's survey of 100 real estate money managers, tax-exempt investors had 39% of their assets in office/commercial properties as of June 30, down from 40% a year ago and 20% in retail, down from 22%; 18% industrial, down from 20%; and 3% in land, down from 6%.

Assets were moved into what last year's survey referred to as "other" property types, among them hotels/resorts, mixed-use developments, multifamily housing, congregate care and health-care facilities. The 100 managers surveyed had 20% of their assets in those areas as of June 30, up from 12% a year earlier.

Specifically, the managers reported they had 9% of their assets in multifamily housing as of June 30; 2% each in hotels/resorts and mixed-use developments; and 7% in other property types, mostly research and development.

(If research and development properties are

## Aetna Life & Casualty

151 Farmington Ave., Hartford, Conn. 06156; (203) 636-6226

| | |
|---|---|
| Tax-exempt real estate assets | $4,065 million |
| Equity | $2,937 million |
| Hybrid debt | $1,091 million |
| Mortgages | $37 million |
| Commingled or pooled funds | |
| Equity | $2,537 million |
| Hybrid debt | $1,052 million |
| Direct, separate accounts | |
| Equity | $399 million |
| Hybrid debt | $40 million |
| Mortgages | $37 million |
| Total real estate assets | $23,683 million |
| Equity | $4,058 million |
| Hybrid debt | $1,099 million |
| Mortgages | $18,526 million |

As of June 30, the tax-exempt equity assets of Aetna Life & Casualty had a market value of $2.172 billion. Contributions received by not invested were $115 million; contributions committed but not received were $650 million.

The hybrid debt holdings had a market value of $987 million. Contributions received by not invested were $104 million. The market value of the mortgages was $7 million; contributions committed but not received were $30 million.

Of the total under management, $121 million was for foreign clients.

For tax-exempt assets, the mix by property type was 44.4% commercial; 15.1% retail; 6.2% hotel/resort; 12.3% mixed use; 10.6% industrial; 11.2% multifamily housing; and 0.2% single family mortgages.

For taxable assets, the mix by property type differs little; however, taxable clients are more likely to be involved in development investments at the early stages such as land acquisition or zoning approval.

During the next year, the firm expects to be a net buyer of retail, apartments and industrial properties and a net seller of office, hotels, and office/R&D and mixed-use properties.

Aetna expects to be a net buyer in the Northeast, Pacific, North Central and Southeast regions and a net seller in the South Central and Mountain regions.

The concentration during the next year will be on property management through tenant retention, new leasing and improving and repositioning investments by expansion and/or renovation.

Aetna offers open- and closed-end funds, including specialty (one property type) and participating mortgage funds; individual separate accounts; and single-property separate accounts.

Open-end funds are the $1.779 billion Real Estate Separate Account, which invests, nationwide, in all property types, either existing, well-leased or to-be-built properties, with investments structured either as joint ventures or wholly owned ones; the $985 million Participating Mortgage Separate Account; the $49 million Union Separate Account, which invests in participating mortgages in union-built properties.

Aetna's Institutional Investors I limited partnership closes Sept. 30; it will invest primarily in apartments, retail centers and industrial properties.

Aetna handles property management for 35% of the properties it owns; Lincoln Property Co., Rouse, Coldwell Banker and Rubloff are among those managing property for Aetna.

The parent company is Aetna Life and Casualty Co. Its subsidiary is Aetna Realty Investors Inc.

William M. Russell, senior vice president-equity real estate investments, and Blake W. Irons, senior vice president-mortgage financing, are in charge of making property investments. T. Jerald Moore, vice president-employee benefits division, is client contact.

## Aldrich, Eastman & Waltch

265 Franklin St., Boston, Mass. 02110; (617) 439-9000

| | |
|---|---|
| Tax-exempt real estate assets | $2,007 million |
| Equity | $232 million |
| Hybrid debt | $1,535 million |
| Mortgages | $240 million |
| Direct, separate accounts | |
| Equity | $232 million |
| Hybrid debt | $1,535 million |
| Mortgages | $240 million |
| Total real estate assets | $2,007 million |

Aldrich, Eastman & Waltch Inc.'s asset mix by property type as of June 30 was 37% office/commercial; 41% retail; 1% hotel/resort; 12% industrial; and 9% development.

The property mix by location was 43% East, 12% South, 31% West and 14% Midwest.

The concentration during the next year will be on acquisition and property management and, when appropriate, sales and refinancing.

Aldrich, Eastman & Waltch offers separate accounts. It serves as investment adviser to State Street Bank & Trust Co.'s series of closed-end commingled funds, which have $293 million in equity and hybrid debt.

The firm doesn't provide property management.

Six of the firm's principals are in charge of making property investments. Robert J. Hannan, vice president, is client contact.

## Alex. Brown Realty Advisors

225 E. Redwood St., Baltimore, Md. 21202; (301) 727-3884

| | |
|---|---|
| Tax-exempt real estate assets | $797 million |
| Equity | $153 million |
| Hybrid debt | $612 million |
| Mortgages | $32 million |
| Direct, separate accounts | |
| Equity | $153 million |
| Hybrid debt | $612 million |
| Mortgages | $32 million |
| Total real estate assets | $1,397 million |
| Equity | $753 million |
| Hybrid debt | $612 million |
| Mortgages | $32 million |

As of June 30, the tax-exempt equity assets of Alex. Brown Realty Advisors Inc. had a market value of $91 million. Contributions committed but not received were $62 million.

The hybrid debt holdings had a market value of $412 million. Contributions committed but not received were $200 million. Mortgages had a market value of $32 million.

For tax-exempt assets, the mix by property type is 60% office/commercial, 14% retail, 20% hotel/resort, 3% industrial, 2% multifamily housing and 1% health care.

Investments for taxable clients typically are in multifamily and retail properties.

The firm expects to be a net buyer of retail, office and industrial properties during the coming year.

The total property portfolio is 10% in the North Central region; 15%, Northeast; 13%, South Central; 24%, Southeast; 6%, Mountain and 32%, Pacific. The firm expects to be a net buyer in the Northeast, Southeast and Pacific regions.

The concentration during the next year will be on acquisition to fulfill client objectives.

The firm offers separate accounts and closed-end funds.

Alex Brown does no property management. For property management, its hires Cushman & Wakefield and Norris, Beggs & Simpson.

Clients include Oregon Employes and Texas Teachers.

The parent company is Alex. Brown & Sons. Robert H. Gidel, president, is in charge of making property investments. William K. Morrill, vice president, is client contact.

## August-Am Cal Advisors Inc.

4730 Woodman Ave., No. 220, Sherman Oaks, Calif. 91423; (818) 990-3250

| | |
|---|---|
| Tax-exempt real estate assets | $1,035 million |
| Equity | $387 million |
| Hybrid debt | $293 million |
| Mortgages | $355 million |
| Direct, separate accounts | |
| Equity | $387 million |
| Hybrid debt | $293 million |
| Mortgages | $355 million |
| Total real estate assets | $1,194 million |
| Equity | $387 million |
| Hybrid debt | $293 million |
| Mortgages | $514 million |

As of June 30, the tax-exempt equity assets of August-Am Cal Advisors Inc. had a market value of $352 million. Contributions received but not invested were $35 million. The hybrid debt holdings had a market value of $293 million. The mortgage assets had a market value of $341 million. Contributions committed but not received were $13 million.

For tax-exempt assets, the mix by property type is 14.4% office/commercial, 17.5% retail, 10% hotel/resort, 10% mixed use, 16.8% industrial, 29.5% multifamily housing and 1.8% congregate care and senior housing.

The firm expects to be a net buyer of apartments, retail shopping centers, garden-type office buildings, senior housing and congregate care.

The total property portfolio is located 10% in the North Central region; 2% Northeast; 5% South Central; 8% Southeast; 9% Mountain; and 66% Pacific. August-Am Cal expects to be a net buyer in all regions.

The concentration during the next year will be on acquisition and foundation loan commitments, based on client guidelines.

August-Am Cal offers separate accounts and an open-end fund.

Building for America Fund is a group trust for Taft-Hartley pension plans. Union-built apartments will be purchased at completion, with a pre-set occupancy level, under contract with developers/builders.

It does property management for 60% of the properties it owns. The firm also does workouts on specific properties from FSLIC.

Investment clients include Hawaii Development Foundation; Southern Electrical Retirement Fund and Carpenters Pension Trust for Southern California.

The parent company is August Financial Corp., a subsidiary of GLENFED Inc.

A company investment committee of senior managers is in charge of making property investments. S.Q. Della-Grotta, executive vice president, is client contact.

## Balcor Institutional Realty Advisors Inc.

4849 Golf Road, Skokie, Ill. 60077 (312) 677-2900

| | |
|---|---|
| Tax-exempt real estate assets | $2,083 million |
| Equity | $351 million |
| Hybrid debt | $1,732 million |
| Commingled or pooled funds | |
| Equity | $351 million |
| Hybrid debt | $1,732 million |
| Total real estate assets | $6,370 million |
| Equity | $3,733 million |
| Hybrid debt | $1,732 million |
| Other | $905 million |

As of June 30, the tax-exempt equity assets of Balcor Institutional Realty Advisors had a market value of $281 million. Contributions received but not invested were $70 million.

The hybrid debt holdings had a market value of $1.588 billion. Contributions received but not invested were $144 million.

In its taxable portfolio, Balcor has $905 million invested in short-term and interim construction loans.

For tax-exempt assets, the mix by property type is 36% office/commercial; 13% retail; 1% hotel/resort; 8% industrial; 35% multifamily housing; and 7% mobile home communities.

Taxable accounts have a greater emphasis on multifamily housing and mobile homes.

During the next year, Balcor expects to be a net buyer of office, retail and apartment properties.

Balcor's total portfolio is invested 18% in the West; 9%, East; 53%, South; and 20%, Midwest. The firm expects to be a net buyer in the Midwest, East and West.

The concentration during the next year will be on property management and acquisition.

All of Balcor's institutional assets are in commingled funds run by The Balcor Co. The institutional group plans to launch its own commingled funds as well as separate accounts.

Balcor handles property management for 94% of its commercial properties and 80% of its apartments.

Clients include Michigan Municipal Employees, Minneapolis Employees and Iron Workers Local No. 16.

The parent company is Shearson Lehman Brothers Inc., which also owns Boston Co. Real Estate Counsel.

Richard B. Stern, first vice president, is in charge of equity acquisitions. Gregory S. Miller, first vice president, is in charge of participating mortgages. John L. West, president, is client contact.

## The Boston Co. Real Estate Counsel Inc.

1 Boston Place, Boston, Mass. 02106; (617) 722-7102

| | |
|---|---|
| Tax-exempt real estate assets | $2,104 million |
| Equity | $286 million |
| Hybrid debt | $1,818 million |
| Commingled or pooled funds | |
| Equity | $20 million |
| Hybrid debt | $85 million |
| Direct, separate accounts | |
| Equity | $266 million |
| Hybrid debt | $1,733 million |
| Total real estate assets | $2,104 million |

All of The Boston Co. Real Estate Counsel's assets are tax exempt. As of June 30, the market value of equity assets was $286 million.

The hybrid debt had a market value of $1.631 billion. Contributions received but not invested were $187 million.

The property type mix is 66% office/commercial, 17% retail, 4% industrial, 6% mixed use, 3% multifamily housing and 4% research and development.

Its geographic mix is 11% North Central; 39% Northeast; 4% South Central; 16% Southeast; 30% Pacific states.

The firm expects to be a net buyer of apartments, office, industrial and retail properties during the next year, especially in the Northeast, Pacific states and North Central regions.

The concentration during the next year will be on property management because of the lack of attractively priced, high-quality investments and because more competitive leasing markets will necessitate active management of existing investments.

The firm offers separate account investments and closed-end funds.

The firm doesn't handle its own property management; it usually hires the developer/owner to do so.

Clients include AT&T, General Motors and Rockwell International.

The parent company is The Boston Co. Inc.

Mary L. Johnston, senior vice president, is in charge of making property investments. Robert A. Radloff, president, is client contact.

## CIGNA Asset Advisers Inc.

Hartford, Conn. 06152; (203) 726-6000

| | |
|---|---|
| Tax-exempt real estate assets | $1,326 million |
| Commingled or pooled funds | |
| Equity | $1,213 million |
| Direct, separate accounts | |
| Equity | $113 million |
| Total real estate assets | $11,735 million |
| Equity | $2,454 million |
| Mortgages | $9,281 million |

As of June 30, the tax-exempt equity assets of CIGNA Asset Advisers Inc. had a market value of $1.031 billion. Contributions received but not invested were $140 million; contributions committed but not received were $155 million.

Of the total under management, $42 million was for foreign clients, all pension clients.

For its tax-exempt assets, CIGNA's property mix is 32.6% office/commercial; 22.6% retail; 4.1% hotel/resort; 4.3% mixed use; 4.2% industrial; 10.1% multifamily housing; and 22.1% research and development.

It is placing greater emphasis on retail, research and development and apartment properties and less emphasis on office buildings and hotels.

Its total property portfolio has a geographic mix of 23.4% North Central; 6.7% Northeast; 24.7% South Central; 25.1% Southeast; 0.6% Northwest; and 19.5% Southwest. The firm expects to be a net buyer in the Northeast, Midwest and Florida, and some sales in the Northeast.

During the next year, CIGNA will concentrate on acquisitions, followed by property management because the current, difficult market has undervalued properties worth purchasing and makes aggressive property management a high priority.

CIGNA offers open- and closed-end funds, direct separate accounts and limited partnerships.

Fund T, a closed-end limited partnership, and CERF II, a closed-end fund, both are accepting subscriptions. Both funds will have relatively short lives of about seven years. They will invest in properties requiring rehabilitation or upgrading with the potential for high capital appreciation.

Separate Account R, an open-end fund, consists of moderate, existing and to-be-built properties, diversified by property type and location. Investments can be 100% equity, construction loans convertible to equity and joint ventures.

Property management is often handled by joint venture partners. Other firms hired include Trammell Crow, R&B, PCA, Koll and Chasewood.

Investment clients include Kellogg, New York Common, Ford and Salt River Project.

The parent company is CIGNA Corp. CIGNA Investments Inc. handles real estate management.

Thomas P. Mahoney, vice president, has chief responsibility for making

property investments. Richard R. Anderson, senior vice president, is client contact.

### Citicorp Real Estate Investment & Management

153 E. 53rd St., 15th Floor, New York, N.Y. 10043 (212) 559-9332

| | |
|---|---|
| Tax-exempt real estate assets | $634 million |
| Equity | $500 million |
| Hybrid debt | $93 million |
| Mortgages | $41 million |
| Commingled or pooled funds | |
| Equity | $299 million |
| Hybrid debt | $93 million |
| Mortgages | $41 million |
| Direct, separate accounts | |
| Equity | $201 million |
| Total real estate assets | $779 million |

As of June 30, the tax-exempt equity assets of Citicorp Real Estate Investment & Management had a market value of $500 million. The hybrid debt holdings had a market value of $93 million; the mortgages, $41 million.

Of the total under management, $145 million was for foreign pension funds.

For tax-exempt assets, the mix by property type is 71% office/commercial, 24% retail, 2% hotel/resort and 3% industrial.

The firm expects to be a net buyer of retail, office and industrial properties during the coming year.

The total property portfolio location is 45% in the West; 9% Midwest; 38% East; 8% South.

It will be a buyer and a seller in the East in the coming year.

The concentration during the next year will be on acquisitions satisfying the investment requirements of clients; property management because of the current weakness in the real estate market; and property sales because good prices in the marketplace will permit sales at premium prices.

Citicorp offers open-end funds and direct separate accounts. Its $299 million Citicorp's Real Estate Equity Fund emphasizes properties with management and/or leasing enhancement opportunities, and has a diversified assets mix and moderate risk assumption with the objective of preservation of capital through current income and capital appreciation.

The firm does not do property management.

The parent company is Citicorp.

Michael Vitale, vice president, is in charge of making property investments. H. Piper Andrews Jr., vice president, is client contact.

### Coldwell Banker Capital Management Services

533 Fremont Ave., Los Angeles, Calif. 90071; (213) 613-3123

| | |
|---|---|
| Tax-exempt real estate assets | $716 million |
| Equity | $716 million |
| Commingled or pooled funds | |
| Equity | $528 million |
| Direct, separate accounts | |
| Equity | $188 million |
| Total real estate assets | $716 million |

As of June 30, the tax-exempt equity assets of Coldwell Banker had a market value of $716 million.

The mix by property type is 35.7% office/commercial, 25.1% retail, 17% industrial and 22.2% mixed use.

The firm expects to be a net buyer of industrial, retail and office properties.

The mix by location is 20.4% North Central, 23.1% Northeast, 12.6% South Central, 8.9% Southeast and 35% Pacific.

Coldwell Banker expects to be a net buyer in the Northeast, Pacific and North Central regions.

The concentration during the next year will be on property management because it is necessary in soft markets.

Coldwell Banker offers separate accounts and closed-end funds, which are structured as limited partnerships. The funds are basically equity funds with some development and convertible mortgages.

The firm does property management for 65% of the properties it owns.

Clients include AT&T, ITT, Alcoa, and Atlantic Richfield.

The parent company is Sears Roebuck. Another subsidiary is Homart.

Tad Jones, president, is in charge of making property investments. James G. Nugent, senior vice president, is client contact.

### Copley Real Estate Advisors

399 Boylston St., Boston, Mass. 02116; (617) 578-1200

| | |
|---|---|
| Tax-exempt real estate assets | $3,870 million |
| Equity | $3,870 million |
| Commingled or pooled funds | |
| Equity | $3,184 million |
| Direct, separate accounts | |
| Equity | $686 million |
| Total real estate assets | $7,900 million |
| Equity | $7,900 million |

As of June 30, the tax-exempt equity assets of Copley Real Estate Advisors had a market value of $3.489 billion. Contributions received but not invested were $207 million; contributions committed but not received were $174 million.

For tax-exempt assets, the mix by property type is 20% office/commercial, 5% retail, 4% hotel/resort, 8% multifamily housing, 43% industrial and 20% research and development.

The firm expects to be a net buyer of industrial, research and development, retail and residential properties during the year.

The total property portfolio location is 17.1% East; 7.9% South; 5.7% Midwest; 69.3% West.

Copley expects to be net buyers on the West and East coasts during the year.

Its concentration will be on development/management. Because of the developmental nature of Copley's strategy, to increase the value of properties the firm needs to emphasize management of its investments.

The firm offers open- and closed-end funds and separate account management. Its Developmental Properties Account is an open-fund with $731 million in net asset value.

Property management is handled by the firms' local developer partners.

Investment clients include AT&T, Blue Cross/Blue Shield Association and Boston Edison.

Its parent company is The New England, which also is a taxable client.

Kevin M. Mahony, principal, is in charge of making property investments. John C. Phillips Jr. is client contact.

### Corporate Property Investors

305 E. 47th St., New York, N.Y. 10018; (212) 421-8200

| | |
|---|---|
| Tax-exempt real estate assets | $2,400 million |
| Equity | $2,400 million |
| Commingled or pooled funds | |
| Equity | $850 million |
| Direct, separate accounts | |
| Equity | $1,550 million |
| Total real estate assets | $3,200 million |
| Equity | $3,200 million |

As of June 30, the tax-exempt equity assets of Corporate Property Investors had a market value of $2.4 billion. CPI manages a total of $3.2 billion for tax-exempt and taxable clients, of which $800 million is for foreign clients.

The asset mix by property type is 14% office/commercial 83% retail and 3% industrial.

The asset mix by location is 40% Northeast, 35% South, 7% Midwest and 18% West.

The concentration during the next year will be on property management because retail properties are overpriced.

The firm offers real estate investment trusts.

Corporate Property Investors does property management for 65% of the properties it owns. It hires Rouse, DeBartolo and Cadillac Fairview for property management.

Investment clients include GM, Pennsylvania Employees, Yale and Ford Foundation.

The parent company is Corporate Realty Consultants.

G. Martin Feli, senior vice president, is in charge of making property investments. Warren Hamer is client contact.

| Equity | $3,080 million |
| Hybrid debt | $120 million |

As of June 30, the tax-exempt equity assets of Richard Ellis Inc. had a market value of $820 million. Contributions committed but not received were $370 million.

The hybrid debt holdings had a market value of $120 million.

Of the total under management, $1.89 billion was for foreign clients, including $1.31 billion for foreign pension funds.

The asset mix by property type is 68% office/commercial, 30% retail and 2% industrial. During the coming year, Richard Ellis expects to be a buyer of office buildings, regional malls and industrial type properties, and a seller of industrial and office buildings.

The total property portfolio is located 11% in the North Central region; 43%, Northeast; 3%, South Central; 4%, Southeast; and 39%, Pacific. During the next year, the firm expects to buy properties in the Northeast, Pacific, Southeast and South Central regions and sell in the Northeast and South Central regions.

The firm offers separate accounts, and property manages 35% of its investments.

Clients include San Bernardino County and California Employees.

Christopher D. Budden, president, is in charge of making property investments. David R. Hodes, senior vice president, is client contact.

### Equitable Real Estate Investment Management

787 Seventh Ave., 46K, New York, N.Y. 10019; (212) 554-4213

| | |
|---|---|
| Tax-exempt real estate assets | $6,887 million |
| Equity | $6,365 million |
| Hybrid debt | $153 million |
| Mortgages | $369 million |
| Commingled or pooled funds | |
| Equity | $4,555 million |
| Hybrid debt | $132 million |
| Mortgages | $12 million |
| Direct, separate accounts | |
| Equity | $1,810 million |
| Hybrid debt | $21 million |
| Mortgages | $357 million |
| Total real estate assets | $26,644 million |
| Equity | $13,472 million |
| Hybrid debt | $1,721 million |
| Mortgages | $11,451 million |

As of June 30, the tax-exempt equity assets of Equitable Real Estate Investment Management Inc. had a market value of $5.738 billion. Contributions received but not invested were $405 million; contributions committed but not received were $222 million.

The hybrid debt holdings had a market value of $153 million, the mortgages, $369 million.

Of the total under management, $585 million was for foreign, non-pension clients.

For tax-exempt assets, the mix by property type is 44.1% office/commercial, 30.2% retail, 8.2% hotel/resort, 14.2% industrial and 3.3% special purpose/land.

The firm expects to be a net buyer of shopping centers, industrial and office properties and a net seller of hotels during the next year.

The total property portfolio is located 38.8% in the Northeast; 27.5%, Southeast; 13.4%, Midwest; and 20.3%, West.

Equitable offers open and closed-end separate accounts, single client separate and advisory accounts and direct investments.

The Prime Property Fund is an open-end commingled account that invests in high-quality, income-producing real property purchased for the long term. Existing, fully leased properties are emphasized, but in some cases Equitable will forward commit to acquire properties yet to be built. The fund has 229 participants and a value of $4.565 billion.

The Asset Enhancement Fund is a closed-end fund that will invest in a select group of existing, well-located, commercial properties with substantial potential for additional development through renovation and expansion. There are six participants to date and $91 million committed.

Equitable does property management for 18.5% of the properties it owns. Among the property managers it uses are Tishman Speyer, Trammell Crow, Oliver T. Carr and KRAVCO.

Investment clients include Exxon, California Employees, North American Philips and Westinghouse.

The parent company is Equitable Life Assurance Society of the United States. Subsidiaries include Equitable Agri-Business Inc., Equitable Mortgage Resources Inc. and EQK Partners.

Bruce Moulthrop, executive vice president, is in charge of making property investments. Joyce R. Frater, senior vice president, is client contact.

### F.I.A. Associates

1601 Response Road, Suite 300, Sacramento, Calif. 95815; (916) 920-4051

| | |
|---|---|
| Tax-exempt real estate assets | $2,421 million |
| Equity | $1,058 million |
| Hybrid debt | $1,206 million |
| Mortgages | $157 million |
| Commingled or pooled funds | |
| Equity | $89 million |
| Hybrid debt | $14 million |
| Direct, separate accounts | |
| Equity | $969 million |
| Hybrid debt | $1,192 billion |
| Mortgages | $157 million |
| Total real estate assets | $2,421 million |

At F.I.A. Associates, where all assets are tax exempt, the equity assets had a market value of $849 million as of June 30. Contributions committed but not received were $209 million.

The hybrid debt holdings had a market value of $830 million. Contributions committed but not received were $376 million. The market value of the mortgages was $157 million.

The mix by property type is 47.3% office/commercial; 17.5% retail; 2% hotel/resort; 8.4% mixed use; 15.2% industrial; 3% multifamily housing; 0.24% land; 6.36% income-producing land.

The total property portfolio is located 6.3% in the East; 12.7% Midwest; 31.4% South; 49.6% West.

During the next year, F.I.A. will concentrate on acquisitions.

Investment products include closed-end funds and separate accounts.

The firm's F.I.A. Profile Fund I, which has four investors and more than $101 million invested, is still open. The fund primarily invests in fully built and fully leased properties, forward commitments on substantially pre-leased properties and convertible participating mortgages.

Most will be acquired for cash, but leverage may be used by taking over an existing debt.

F.I.A. Associates does not handle property management of the properties it owns.

Investment clients include Texas Teachers, California Public Employees, Utah State and Illinois Teachers.

The parent company is MeraBank.

Stephen A. Rosenthal, vice president-acquisitions is in charge of property investments. David Bonuccelli and James Sublett, senior executive vice presidents, are client contacts.

### First Chicago Investment Advisors

# *The Creation of Extraordinary Value is the Result of Extraordinary Vision*

- - the Rembrandt Philosophy

A profitable investment portfolio, like the great artist's work on canvas, is rarely the consequence of whim or chance. At Tomlin Properties, we have that extraordinary vision to create extraordinary value with exceptional returns through *17 years of investing in Predevelopment Land.*

***"Heaven forbid that I should ever see things the way they do!"***

Rembrandt worked to see what few around him saw. And he created masterpieces. At Tomlin Properties, we've created an approach that looks beyond what "conventional wisdom" might suggest. While some view land as risky business, our approach proves this is a bit short sighted. With over *eighty investments* in predevelopment land, we've seen an *average compounded annual return in excess of 40%.*

***"Secret... fiddlesticks! I start with a formula, and work to prove that it is correct."***

Don't misunderstand. When we speak of "vision" we're not referring to some nebulous "feeling" we get about a parcel of land. The Tomlin formula is based on *detailed research, intensive management and hard work.* Experience has been the cornerstone of our success. With a keen eye on the nation's prime growth markets, we begin with the parameters of a cautious investment clearly in focus: location of the land, and timing of the acquisition. Assessed correctly, these are the factors which *minimize risk* and maximize return. Time and time again our clients have enjoyed the fruits of this approach.

***"Perhaps 400 years from now, if any of my pictures are left, they will say, 'this fellow was going in the right direction'."***

Rembrandt knew that time was the ultimate test of the value of his art. Fortunately we're not looking at a 400 year waiting period, as *our average is 3.8 years.* History tells us that land has been profitable for the patient sophisticated investor. And while not all land is suitable for capital growth investments, we live in a world where predevelopment land in ideal locations is a diminishing resource. Its appreciation potential is great, while the measured risks are comparable to the most traditionally conservative portfolio components. And Tomlin investments in predevelopment land continually outperform other forms of real estate, stocks, bonds, and treasury bills. Our clients agree — *we've passed the test of time.* And the result is extraordinary value.

As of June 30, the tax-exempt equity assets of Karsten Realty Advisors had a market value of $373 million; the hybrid debt, $67 million; mortgages, $146 million.

For tax-exempt assets, the mix by property type is 48% office/commercial, 15% retail, 16% hotel/resort, 13% industrial, 5% land and 3% special use. Karsten expects to be a net buyer and seller of office, retail, industrial/research and development and special use properties.

The total portfolio's mix by location is 1% North Central, 21% South Central, 36% Southeast, 2% Mountain and 40% Pacific. The firm expects to be a buyer in the Pacific, South Central and Mountain regions, and a seller in the South Central and Southeast regions.

Its emphasis during the next year will be on property management in preparation for property dispositions.

Karsten Realty Advisors offers direct separate accounts.

The firm property manages 50% of the properties it owns.

Investment clients include Ohio Teachers, Nevada Employees, LTV and Lockheed.

First Interstate Bancorp is the parent company.

A. Redmond Doms Jr., managing principal, is in charge of making property investments. John M. Lundsten and Hugh G. Hilton, principals, are client contacts.

### Kennedy Associates Real Estate Counsel Inc.

2400 Financial Center Building, Seattle, Wash. 98161; (206) 623-4739

| | |
|---|---|
| Tax-exempt real estate assets | $718 million |
| Equity | $411 million |
| Hybrid debt | $264 million |
| Mortgages | $43 million |
| Commingled or pooled funds | |
| Equity | $241 million |

### Lehndorff & Babson Real Estate Counsel

2501 Cedar Springs, Dallas, Texas 75201; (214) 855-5600

| | |
|---|---|
| Tax-exempt real estate assets | $845 million |
| Equity | $845 million |
| Commingled or pooled funds | |
| Equity | $75 million |
| Direct, separate accounts | |
| Equity | $770 million |
| Total real estate assets | $1,962 million |
| Equity | $1,962 million |

As of June 30, the tax-exempt equity assets of Lehndorff & Babson Real Estate Counsel had a market value of $503 million. Contributions received but not invested were $17 million; contributions committed but not received were $325 million.

Of the total under management, $1.095 billion was for foreign clients, including $179 million for foreign pension funds.

For tax-exempt assets, the mix by property type is 56% office/commercial, 40% retail and 4% mixed use.

The firm expects to be a net buyer of retail, office and industrial properties.

The total property portfolio is located 10% in the Northeast; 30%, South Central; 22%, Southeast; 10%, Mountain; and 28%, Pacific.

Lehndorff & Babson expects to be a net buyer in the West and the East.

The concentration during the next year will be on acquisition because of the attractive opportunities.

Lehndroff & Babson offers closed-end funds and direct separate accounts. The Lehndorff & Babson Property Fund III is a closed-end group trust that will invest in scarce, built and leased properties, typically shopping centers or office buildings, that have the opportunity for enhancement of value. The Lehndorff & Babson Retail Property Fund is a closed-end limited partnership that will invest in regional malls and other substantial retail properties in prominent U.S. metropolitan areas, where land is adequate to support expansion.

It does property management for 90% of the properties it owns.

Investment clients include Ameritech, California Teachers, Eastman Kodak and United Technologies.

M. Thomas Lardner, chairman, general manager and chief investment officer, is in charge of making property investments. James S. White, executive vice president, is client contact.

### The Lomas & Nettleton Advisory Group Inc.

2001 Bryan Tower, Suite 3900, Dallas, Texas 75201; (214) 746-7111

| | |
|---|---|
| Tax-exempt real estate assets | $664 million |
| Hybrid debt | $501 million |
| Mortgages | $163 million |
| Commingled or pooled funds | |
| Hybrid debt | $54 million |
| Direct, separate accounts | |
| Hybrid debt | $447 million |
| Mortgages | $163 million |
| Total real estate assets | $664 million |

As of June 30, the hybrid debt holdings of The Lomas & Nettleton Advisory Group Inc. had a market value of $323 million. Contributions received but not invested were $3 million; contributions committed but not received were $175 million.

The market value of the mortgages was $163 million.

The mix by property type is 68.68% office/commercial, 7.9% retail and 23.42% industrial.

The firm expects to be a net buyer of office and apartment properties.

The total property portfolio is located 22.66% in the North Central region; 63.82% South Central; 0.78% Southeast; 7.11% Mountain; and 5.63% non-U.S.

Lomas & Nettleton expects to be a net buyer in the North Central and Northeast regions.

The concentration during the next year will be on financing because of the favorable market.

Lomas & Nettleton offers closed-end funds, separate account management and REITs.

Clients include Texas Teachers, city of Boston, Leland Stanford Jr. University and Barnett Banks.

**Real Teamwork +**

At National Property Advisors Corporation, our team of professionals is experienced and resourceful.

National Property Advisors

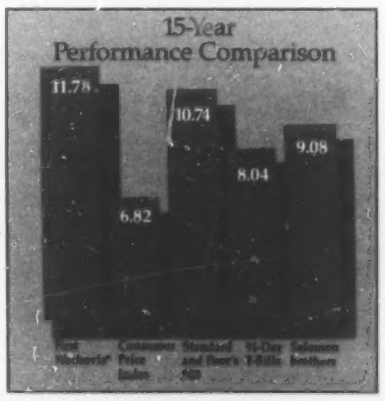
# Beat The Cycle.

**First Wachovia's counter-cyclical approach to real estate investing out-performs the competition.**

At First Wachovia, we recognized the benefits of real estate in the portfolio almost two decades ago. We saw positive real rates of return, diversification and low volatility.

So we developed a unique long-term formula for dealing with changes in the marketplace and shifting supply and demand.

Our counter-cyclical policy is simple but effective. In certain economic climates we buy quality land slated for development and assume the role – and the profits – of the developer. At other times we are better served by acquiring attractive, mature properties.



*Net of management fees

This approach allows our customers to take advantage of any phase of the real estate cycle, with the staying power for long-term performance. And it brings them a return that consistently outpaces the leading investment indices.

Our 15-year record speaks for itself. If you'd like to know more, call Nick Verano or Cindy Christopher at (919) 770-5906.

FIRST WACHOVIA

The parent company is Lomas & Nettleton Co. Its subsidiaries are Lomas Mortgage Corp., Lomas & Nettleton Mortgage Investors and L&N Housing Corp.

David A. Ridley, executive vice president, is in charge of making property investments and is client contact.

### McMahan Real Estate Services Inc.

201 California St., Suite 400, San Francisco, Calif. 94111; (415) 433-7770

| | |
|---|---|
| Tax-exempt real estate assets | $383 million |
| Equity | $301 million |
| Hybrid debt | $82 million |
| Commingled or pooled funds | |
| Equity | $50 million |
| Hybrid debt | $9 million |
| Direct, separate accounts | |
| Equity | $251 million |
| Hybrid debt | $73 million |
| Total real estate assets | $400 million |
| Equity | $318 million |
| Hybrid debt | $82 million |

As of June 30, the tax-exempt equity assets of McMahan Real Estate Services, Inc. had a market value of $128 million. Contributions committed but not received were $173 million.

The hybrid debt holdings had a market value of $36 million. Contributions committed but not received were $46 million.

Of the total under management, $17 million was for foreign clients.

For tax-exempt assets, the mix by property type is 62% office/commercial; 27% retail; and 11% industrial.

The firm expects to be a net buyer of retail, office and industrial properties.

The total property portfolio is located 17% South Central; 10% Mountain; and 73% Pacific. The firm expects to be a net buyer in all three regions.

The concentration during the next year will be on property management because of difficulty in managing in soft markets.

McMahan Real Estate Services offers separately managed accounts and closed-end pooled funds.

McMahan Equity Real Estate Fund-II (MEREF-II) has $22 million in commitments and is accepting subscriptions. The fund acquires equity and quasi-equity interests in well-diversified portfolios of high-quality, income-producing properties.

McMahan does property management for 20% of the properties it owns.

Investment clients include Southwestern Bell, Contra Costa Employees and Western Airlines Pilots.

The parent company is McMahan Financial Services Inc.

Steven M. Brabant, senior vice president, is in charge of making property investments. Frank C. Harding Jr. and Jean C. Hurley, vice presidents, are client contacts.

### McMorgan & Co.

201 Spear St., No. 1700, San Francisco, Calif. 94105; (415) 777-9300

| | |
|---|---|
| Tax-exempt real estate assets | $1,300 million |
| Equity | $300 million |
| Mortgages | $1,000 million |
| Direct, separate accounts | |
| Equity | $300 million |
| Mortgages | $1,000 million |
| Total real estate assets | $1,300 million |

As of June 30, the tax-exempt equity assets of McMorgan & Co. had a market value of $300 million; mortgages, $1 billion.

The mix by property type is 10% office/commercial, 10% retail, 1% hotel/resort, 1% mixed use, 5% industrial, 5% multifamily housing and 68% residential.

The firm expects to be a net buyer of office, industrial and retail properties.

The total property portfolio is located in the Pacific region. McMorgan & Co. expects to be a net buyer in the Pacific, Mountain and Southeast regions.

The concentration during the next year will be on acquisition because of the excellent opportunities for prime properties.

McMorgan & Co. offers separate and direct accounts.

Michael T. Fry, executive vice president, is in charge of making property investments. William O. Sumner is client contact.

### Mellon Real Estate Investment Management

551 Madison Ave., New York, N.Y. 10022; (212) 702-4040

| | |
|---|---|
| Tax-exempt real estate assets | $1,100 million |
| Equity | $500 million |
| Hybrid debt | $370 million |
| Mortgages | $230 million |
| Direct, separate accounts | |
| Equity | $500 million |
| Hybrid debt | $370 million |
| Mortgages | $230 million |
| Total real estate assets | $1,100 million |

As of June 30, the tax-exempt equity assets of Mellon Real Estate Investment Management Corp. had a market value of $413 million. Contributions committed but not received were $87 million.

The hybrid debt holdings had a market value of $298 million; contributions committed but not received were $72 million. The market value of the mortgages was $210 million; contributions committed but not received were $20 million.

Of the total under management, $31 million was for foreign clients.

For tax-exempt assets, the mix by property type is 64.15% office/commercial, 5.68% retail, 26.42% industrial and 3.77% mixed use.

The firm expects to be a net buyer of shopping centers, research/development facilities and office buildings.

The total property portfolio is located 20.3% in the East; 17.1% South; 36.9% Midwest; and 25.7% West. The firm expects to be a net buyer in the Northeast and Midwest and a net seller in California because of the cost of earthquake insurance.

The concentration during the next year will be on acquisition and property management, the latter because overbuilt markets have forced emphasis on property/asset management.

The firm offers direct separate accounts.

It does property management for 17.55% of the single financial properties it owns.

Investment clients include Westinghouse, Bell Atlantic and Detroit Retirement System.

The parent company is Mellon Bank Corp. A subsidiary is Mellon Participating Mortgage Trust.

Arlen R. Dahlquist, senior vice president, is in charge of making property investments. Karen E. Shewer, vice president, is client contact.

### L.J. Melody & Co.

5847 San Felipe, Suite 4400, Houston, Texas 77057; (713) 787-1900

| | |
|---|---|
| Tax-exempt real estate assets | $815 million |
| Hybrid debt | $483 million |
| Mortgages | $332 million |
| Direct, separate accounts | |
| Hybrid debt | $483 million |
| Mortgages | $332 million |
| Total real estate assets | $2,254 million |
| Hybrid debt | $802 million |
| Mortgages | $1,452 million |

As of June 30, the hybrid debt holdings of L.J. Melody & Co. had a market value of $368 million. Contributions committed but not received were $115 million. The market value of the mortgages was $290 million. Contributions committed but not received were $42 million.

For tax-exempt assets, the mix by property type is 46% office/commercial, 34% retail, 3% mixed use, 7% industrial and 10% multifamily housing.

For taxable assets, the firm emphasizes hotel investments.

The firm expects to be a net buyer of multifamily, industrial and retail properties.

The total property portfolio is located 3.5% in the North Central region; 5.5% Northeast; 56% South Central; 10% Southeast; 10% Mountain; and 15% Pacific.

L.J. Melody expects to be a net buyer in the Pacific, Northeast, South Central and Southeast regions.

The concentration during the next year will be on acquisition because there are regions with certain property types that possess attractive opportunities.

The firm offers separate accounts.

Clients include Texas Teachers.

Lawrence J. Melody, president, is in charge of making property investments. Robert D. Barkley, vice president, is client contact.

### Top 10 real estate managers ranked by tax-exempt assets in mortgages

### Metropolitan Life Insurance

1 Madison Ave., New York, N.Y. 10010; (212) 578-8637

| | |
|---|---|
| Tax-exempt real estate assets | $865 million |
| Equity | $599 million |
| Mortgages | $66 million |
| Commingled or pooled funds | |
| Equity | $574 million |
| Mortgages | $66 million |
| Direct, separate accounts | |
| Equity | $25 million |
| Total real estate assets | $19,200 million |
| Equity | $6,500 million |
| Mortgages | $12,700 million |

As of June 30, the tax-exempt equity assets of Metropolitan Life Insurance Co. had a market value of $534 million. Contributions received but not invested were $45 million; contributions committed but not received were $20 million.

The market value of the mortgages was $66 million.

For tax-exempt assets, the mix by property type is 54% office/commercial; 19% retail; 4% hotel/resort; 1% mixed use; 10% industrial; 1% land; and 11% research and development.

The firm expects to be a net buyer of retail, office, apartment and warehouse properties.

The total property portfolio is located 18% in the East; 19% Central; 15% South; 11% Southeast; 31% West; 6% Southwest.

Metropolitan Life expects to be a net buyer in the Central, Southeast and East regions.

The concentration during the next year will be on property management first because plans to recognize short-term profits, the firm plans to improve existing properties. The firm plans to concentrate on acquisitions second because many good investment opportunities are available.

Metropolitan Life offers open- and closed-end funds, separate accounts and guaranteed real estate contracts.

Account RE, an open-end fund, has $240 million in assets. It invests in high-quality existing and leased properties of $30 million or more, with an emphasis on R&D/industrial, regional malls and office buildings. Tower Fund, an open-end fund with $167 million, invests in wholly owned properties of $5 million to $15 million. Purchases are concentrated on fully built and leased properties.

Closed-End III, which is open for subscription, has $20 million committed. The Guaranteed Real Estate Contract, which is designed for non-ERISA plans, requires a minimum investment of $500,000; subscriptions are still open.

Investment clients include American Can, Crown Zellerbach, IT&T and M&T Chemicals.

Subsidiaries are Metmor Financial, Cross & Brown, Century 21, Met First Financial and Farmers National.

Principals are in charge of making property investments. Bruce Kosakowski, national director, is client contact.

Balcor Institutional Realty Advisors: Portfolio Strategies

Quality Real Estate Investments to Meet Your Objectives

The Balcor Company recently arranged an all-cash purchase of the 1275 K Street office building in the Franklin Park district of Washington, D.C., as a joint venture between two of its investment partnerships.

This submarket is on the fringe of the downtown office market and investments in this area have generally been considered pioneering. Balcor assessed the risk and potential return, analyzed the forces at work in the area and concluded that this building could meet the objectives of its investors.

The experience and expertise of Balcor in analyzing and placing real estate investments is available directly to institutional investors through Balcor Institutional Realty Advisors, Inc.

For more information on *Balcor Institutional Realty Advisors, Inc.*, and how we may be able to help fine-tune your real estate investment policies and guidelines, call John West, President, at 312/676-6980.

*Smart Thinking in Real Estate*

Balcor

Balcor Institutional Realty Advisors, Inc. 4849 Golf Road Skokie, Illinois 60077

cial, 29% industrial, 6% multifamily housing, 41% land. Another 14% of assets are in cash.

The firm expects to be a net buyer of office/business park properties.

The total property portfolio is located 96% in the Southeast and 4% outside the United States.

NCNB expects to be a net buyer in the Southeast during the coming year.

The concentration during the next year will be on acquisition/development due to above average investment opportunities in the Southeast.

NCNB offers open- and closed-end funds and separate accounts. NCNB Real Estate Fund, with $301 million, is an open-end fund that buys income-producing property and development land in the Southeast.

The firm hires Charter Properties, Carolantic Realty and Adams/Cates for property management.

Investment clients include Ohio Schools, Volvo-White, Publix and TWA.

The parent company is NCNB Corp. Floyd T. Boyce, senior vice president, is in charge of making property investments. Mark S. Coltrin, vice president, is client contact.

### J.W. O'Connor & Co. Inc.

200 Park Ave., New York, N.Y. 10166; (212) 687-7420

| | |
|---|---|
| Tax-exempt real estate assets | $683 million |
| Equity | $604 million |
| Hybrid debt | $79 million |
| Commingled or pooled funds | |
| Equity | $260 million |
| Direct, separate accounts | |
| Equity | $344 million |
| Hybrid debt | $79 million |
| Total real estate assets | $743 million |
| Equity | $664 million |
| Hybrid debt | $79 million |

As of June 30, the tax-exempt equity assets of J.W. O'Connor & Co. Inc. had a market value of $300 million. Contributions committed but not received were $304 million.

The hybrid debt holdings had a market value of $79 million.

Of the total under management, $14 million was for foreign pension funds.

The mix by property type is 10% office/commercial, 75% retail and 15% industrial.

The firm expects to be a net buyer of regional shopping centers, office and industrial properties.

The mix by region is 40% North Central; 25% South Central; and 35% Southeast.

The concentration during the next year will be on property management because relative yields on expansions and renovations are attractive when compared with acquisitions.

J.W. O'Connor offers closed-end funds and direct separate accounts to tax-exempt clients.

It does property management for 50% of the properties it owns.

Investment clients include AT&T and Kansas Employees.

Its subsidiaries are O'Connor Realty Advisors and O'Connor Management Inc.

J.W. O'Connor Jr., chairman of the board and president, is in charge of making property investments. Nancy I. Lashine, vice president, is client contact.

### The Phoenix

1 American Row, Hartford, Conn. 06115; (203) 275-5658

| | |
|---|---|
| Tax-exempt real estate assets | $472 million |
| Equity | $123 million |
| Hybrid debt | $131 million |
| Mortgages | $218 million |
| Commingled or pooled funds | |
| Equity | $123 million |
| Hybrid debt | $131 million |
| Direct, separate accounts | |
| Mortgages | $218 million |
| Total real estate assets | $2,080 million |
| Equity | $406 million |
| Hybrid debt | $216 million |
| Mortgages | $1,428 million |
| Cash | $30 million |

As of June 30, the tax-exempt equity assets of The Phoenix had a market value of $98 million. Contributions received but not invested were $25 million.

The hybrid debt holdings had a market value of $131 million, and mortgages, $218 million.

For tax-exempt assets, the mix by property type is 50% office/commercial; 11% retail; 18% industrial; and 21% multifamily housing.

The firm expects to be a net buyer of office/industrial, retail, residential and office. Properties that have matured to the point where sales value has reached expectations will be sold.

The total property portfolio is located 30% in the North Central region; 3% Northeast; 10% South Central; 26% Southeast; and 31% Pacific.

The concentration during the next year will be on acquisition because new cash will be invested.

The Phoenix offers an open-end real estate account (RESA), which invests in developmental properties and has a net value of $207 million; a closed-end real estate account (CEREA I), which invests in developmental properties and has $30 million committed; and individual separate accounts.

Investment clients include Armstrong Rubber, Virginia, Goya Foods and Connecticut.

The parent company is Phoenix Mutual Life Insurance Co. Its subsidiaries are Phoenix Founders and Phoenix Realty Management Inc.

Teresa A. Clements and Charles W. McMullin are in charge of making property investments. Kathy Addis is client contact.

### PMRealty Advisors Inc.

800 Newport Center Drive, Suite 300, Newport Beach, Calif. 92660; (714) 721-5000

| | |
|---|---|
| Tax-exempt real estate assets | $335 million |
| Equity | $335 million |
| Commingled or pooled funds | |
| Equity | $135 million |
| Direct, separate accounts | |
| Equity | $200 million |
| Total real estate assets | $661 million |
| Equity | 661 million |

As of June 30, the tax-exempt equity assets of PMRealty Advisors Inc. had a market value of $154 million. Contributions received but not invested were $9 million; contributions committed but not received were $172 million.

For tax-exempt assets, the mix by property type is 29% office/commercial, 30% retail and 41% industrial.

The firm expects to be a net buyer of neighborhood shopping centers and multitenant industrial/distribution facilities.

The concentration during the next year will be on acquisition to complete portfolios for some funds and property management.

PMRealty offers closed-end funds and individually managed accounts. PMRA III, a closed-end fund, has $27 million so far. It will invest in retail and industrial properties in high-growth corridors of major U.S. metropolitan areas.

The firm does property management for 50% of the properties it owns. It hires Coldwell Banker, CBS Property, Centra Group, Collins and R.J.Hallissey for other property management.

Investment clients include Nevada Employees, Hewlett-Packard, Kaiser Aluminum & Chemical and Boise Cascade.

The parent company is Pacific Mutual Life Insurance Co.

James G. McWalters, managing director, is in charge of making property investments. Pete Hammer, managing director, is client contact.

### Property Capital Associates

200 Clarendon St., Boston, Mass. 02116; (617) 536-8600

| | |
|---|---|
| Tax-exempt real estate assets | $744 million |
| Equity | $744 million |
| Commingled or pooled funds | |
| Equity | $659 million |
| Direct, separate accounts | |
| Equity | $85 million |
| Total real estate assets | $744 million |

As of June 30, the equity assets of Property Capital Associates had a market value of $599 million. Contributions committed but not received were $185 million.

Of the total under management, $15 million was for foreign clients; $10 million of that for foreign pension funds.

The mix by property type is 36% office/commercial; 17% retail; 27% hotel/resort; 7% industrial; and 13% multifamily housing.

The mix by geographical region is 40% North Central; 20% Northeast; 5% South Central; 5% Southeast; 10% Mountain; and 20% Pacific.

The concentration during the next year will be on acquisition because of difficulty in finding properties that meet the investment criteria.

The firm offers closed-end funds, separate account management and real estate investment trusts.

Outside property management is handled by joint venture-developer partners.

Investment clients include Allied Signal, Eastman Kodak, Harvard University and The World Bank.

Anthony D. Fox, director, is in charge of making property investments. Thomas J. Mizo, vice president, is client contact.

### The Prudential Realty Group

3 Prudential Plaza, Newark, N.J. 07101; (201) 877-7544

| | |
|---|---|
| Tax-exempt real estate assets | $5,709 million |
| Equity | $5,476 million |
| Mortgages | $233 million |
| Commingled or pooled funds | |
| Equity | $5,476 million |
| Mortgages | $233 million |
| Total real estate assets | $33,937 million |
| Equity | $9,601 million |
| Hybrid debt | $5,293 million |
| Mortgages | $19,043 million |

As of June 30, the tax-exempt equity assets of The Prudential Realty Group had a market value of $5,333 million. Contributions committed but not received were $143 million.

The market value of the mortgages was $156 million. Contributions received but not invested were $77 million.

Of the total under management, $374 million was for foreign clients.

For tax-exempt assets, the mix by property type is 51.9% office/commercial, 17.1% retail, 8.4% hotel/resort, 15.8% industrial, 4.8% multifamily housing and 2% land and agriculture.

For taxable assets, there is a higher percentage of agricultural properties and more property development.

The general account portfolio is located 23.5% in the East; 20.8% Midwest; 21.1% South; 31.8% West; and 2.8% Canada. The separate account portfolio is located 32.7% in the East; 14.9% Midwest; 18.7% South; and 33.7% West.

The Prudential Realty Group, through its marketing partner, Prudential Asset management Co., offers the $4.4 billion PRISA, $459 million PRISA II and $214 million PRISA III open-end real estate separate accounts, and the $82 million PRIMOR and $75 million MORISA open-end participating mortgage separate accounts. The $77 million Union Mortgage account is the newest open-end separate account, which invests in loans on properties built or improved with union labor.

Direct investment in properties also is offered through the Realty Group.

Prudential does property management for 7% of the properties it owns for the general account and 3% for the separate account; Property Management Systems, LaSalle Property Management and Rubloff Property Management are frequently used to manage the remaining properties.

Clients include Campbell Soup, Exxon, Lenox and Sun Co.

The parent company is Prudential Insurance Co. of America. Its subsidiaries include Prudential Realty Advisors Inc. and The Prudential Property Co.

Claude Zinngrabe, executive vice president, is in charge of making property investments. Christine N. Brownlie, director, Prudential Asset Management Co., is client contact.

### PSI Institutional Realty

1015 Grandview Ave., Glendale, Calif. 91201; (818) 244-8080

| | |
|---|---|
| Tax-exempt real estate assets | $555 million |
| Equity | $555 million |
| Commingled or pooled funds | |
| Equity | $486 million |
| Direct, separate accounts | |
| Equity | $69 million |
| Total real estate assets | $2,200 million |
| Equity | $2,200 million |

As of June 30, the tax-exempt equity assets of PSI Institutional Realty, a division of Public Storage Inc., had a market value of $380 million. Contributions received but not invested were $92 million; contributions committed but not received were $83 million.

Of the total under management, $182 million was for foreign clients.

All tax-exempt assets are in mini-warehouses. Taxable assets are invested in mini-warehouses and the development of business parks.

The firm expects to be a net buyer of mini-warehouses and business parks.

The total property portfolio is located 13% in the North Central region; 9% Northeast; 16% South Central; 17% Southeast; 6% Mountain; 37% Pacific; and 2% non-U.S properties.

PSI expects to be a net buyer in the Northeast, Pacific, North Central and Southeast regions.

The concentration during the next year will be on property management because the firm believes its system, which operates facilities in a standard fashion and employs innovative techniques, is the key to providing superior returns.

PSI offers closed-end funds and

### TCW Realty Advisors

400 S. Hope St., Suite 600, Los Angeles, Calif. 90071; (213) 683-4200

| | |
|---|---|
| Tax-exempt real estate assets | $1,419 million |
| Equity | $1,080 million |
| Hybrid debt | $339 million |
| Commingled or pooled funds | |
| Equity | $875 million |
| Hybrid debt | $233 million |
| Direct, separate accounts | |
| Equity | $205 million |
| Hybrid debt | $106 million |
| Total real estate assets | $1,419 million |

As of June 30, equity assets of TCW Realty Advisors had a market value of $642 million. Contributions received but not invested were $59 million; contributions committed but not received were $379 million.

The hybrid debt holdings had a market value of $339 million.

The mix by property type is 35% office/commercial, 19% retail and 46% industrial.

The firm expects to be a buyer of industrial, shopping centers and office properties and a seller of offices.

The mix by geographic region is 2% North Central; 10% Northeast; 5% South Central; 20% Southeast; 12% Mountain; and 51% Pacific.

TCW expects to be a buyer in the Pacific, Northeast, Southeast and South Central regions and a seller in the Mountain and Pacific states.

The concentration during the next year will be on acquisition because through selective strategies, based on its in-house research, unique opportunities can be developed.

TCW offers direct separate account investment management and closed-end commingled funds.

It does property management for 100% of the properties it owns.

Investment clients include Pacific Telesis, U S WEST, McDonnell Douglas and Kodak.

TCW is a joint venture with Trust Co. of the West.

Roger C. Schultz, senior partner/director of acquisitions, is in charge of making property investments. Bruce Ludwig, senior partner, is client contact.

### The Travelers

1 Tower Square, Hartford, Conn. 06183; (203) 277-0111

| | |
|---|---|
| Tax-exempt real estate assets | $507 million |
| Equity | $422 million |
| Mortgages | $85 million |
| Commingled or pooled funds | |
| Equity | $399 million |
| Mortgages | $85 million |
| Direct, separate accounts | |
| Equity | $23 million |
| Total real estate assets | $18,809 million |
| Equity | $1,403 million |
| Mortgages | $17,406 million |

As of June 30, the tax-exempt equity assets of The Travelers had a market value of $422 million; the mortgages, $85 million.

Of the total under management, $200 million was for foreign clients.

For tax-exempt assets, the mix by property type is 52.6% office/commercial; 9.4% retail; 3.8% hotel/resort; 10.6% industrial; 11.1% multifamily housing; and 12.5% timberland/agriculture.

The total property portfolio is located 16% in the North Central region; 13% Northeast; 13% South Central; 27% Southeast; 20% Mountain; and 11% Pacific.

The concentration during the next year will be on property management because it encompasses managing existing properties to maximize return as well as actively reviewing opportunities for possible sales and acquisitions.

The firm offers open and closed-end funds and separate account management.

Separate Accounts R is an open-end fund with equity, debt and balanced components. The equity portion invests in recently constructed, income-producing properties and has $356 million in assets; the debt portion invests in first and junior mortgages and has $85 million; the balanced portion invests in the equity and debt portions on a 70/30 ratio and has $233 million.

Separate Account T-II is a closed-end fund, open for contributions, that will invest in timberland properties.

Investment clients include Consolidated Edison, Pennsylvania Blue Shield and Sisters of Holy Cross.

Travelers' subsidiaries include The Prospect Co. and Travelers Mortgage Services.

Raymond Morgan, vice president, is in charge of making property investments. B. Thomas Willison, vice president, is client contact.

### The Union Labor Life Insurance Co.

111 Massachusetts Ave., N.W., Washington, D.C. 20001; (202) 682-0900

| | |
|---|---|
| Tax-exempt real estate assets | $324 million |
| Mortgages | $324 million |
| Commingled or pooled funds | |
| Mortgages | $324 million |
| Total real estate assets | $324 million |

As of June 30, the market value of the mortgages held by Union Labor Life Insurance Co. was $110 million. Contributions received but not invested were $214 million.

The mix by property type is 63% office/commercial; 12% retail; 3% hotel/resort; 18% industrial; 3% multifamily; and 1% single-family.

The mix by geographic region is 5% South, Southeast and Southwest; 18% Midwest; 18% West; 51% Northeast; and 8% Alaska.

The concentration during the next year will be on long-term first mortgages.

Union Labor Life offers open-end funds. Mortgage Separate Account J — "J for Jobs" — is an open-ended account with a market value of $110 million and contributions received but not yet invested of $214 million. It invests in first mortgages made pursuant to forward commitments negotiated and issued at market rates on to-be-built residential and income-producing properties. Projects must be constructed or rehabilitated by union labor.

Edgerton R. Saathoff, vice president, and Leland A. Harrs, second vice president, are in charge of making property investments. Robert C. Cassin, director of group pension, is client contact.

### Wells Fargo Realty Advisors

330 Washington St., Marina del Rey, Calif. 90292; (213) 822-2032

| | |
|---|---|
| Tax-exempt real estate assets | $866 million |
| Equity | $222 million |
| Hybrid debt | $297 million |
| Mortgages | $347 million |
| Commingled or pooled funds | |
| Equity | $222 million |
| Hybrid debt | $119 million |
| Mortgages | $4 million |
| Direct, separate accounts | |
| Hybrid debt | $178 million |
| Mortgages | $343 million |
| Total real estate assets | $3,263 million |
| Equity | $325 million |
| Hybrid debt | $297 million |
| Mortgages | $2,641 million |

As of June 30, the tax-exempt equity assets of Wells Fargo Realty Advisors had a market value of $169 million. Contributions received but not invested were $53 million.

The hybrid debt holdings had a market value of $119 million. Contributions committed but not received were $178 million. The market value of the mortgages was $347 million.

For tax-exempt assets, the mix by property type is 5.2% office/commercial; 50% retail; 36.9% industrial; and 7.9% residential.

The firm expects to be a net buyer of retail, industrial, apartment and office properties.

The total property portfolio is located 10% in the North Central region; 20% South Central; 10% Southeast; 15% Mountain; and 45% Pacific.

Wells Fargo expects to be a net buyer in the Pacific, Northeast and North Central regions and a net seller in the South Central region.

The concentration during the next year will be on development of joint ventures, because the firm believes it is an opportunistic time to selectively develop properties with major developers.

Wells Fargo offers an open-end fund, separate accounts and a REIT.

The Wells Fargo Realty Advisors fund is an open-end fund with assets of $166 million. It invests in development property and opportunities where existing real estate can be upgraded, expanded or renovated. Transactions are typically joint ventures or participating mortgages.

It does property management for 15% of the properties it owns.

Investment clients include Ohio Public Employees, General Motors, Avon Products and Frank Russell Trust.

The parent company is Wells Fargo & Co. Subsidiaries are Wells Fargo Realty Finance and Wells Fargo Asset Management Co.

Doug Hayek, director of acquisitions, is in charge of making property investments. J. Michael Johnson, director of marketing, is client contact.

# Assets up 27%

*Continued from page 19*

included in the industrial total, however, the percentage of tax-exempt assets in industrial properties actually would be higher this year, probably by about two percentage points.)

At the same time the managers are seeking to diversify their clients' real estate holdings, they are grappling with trying to add value to their existing portfolios. To do so, they are working the properties they already own for their clients — often through more intensive property management and/or rehabilitation or renovation.

Indeed, said one consultant, the ability of the real estate investment manager to manage the property has become a key acquisition criteria.

Of the managers surveyed, 57 said acquisition is the primary area they will concentrate on during the coming year and 38, property management.

PROPERTY also found changes in rankings of the 10 largest managers in all categories surveyed.

Among the top 10 ranked by combined tax-exempt assets in equity real estate, hybrid debt and mortgages, Equitable Real Estate Investment Management Inc., Atlanta, jumped to the top spot from third last year. Equitable had about $6.9 billion in tax-exempt real estate assets under management as of June 30, an increase of about 25% from the $5.5 billion under management a year earlier.

George R. Puskar, president of Equitable Real Estate, said the most important reason for his firm's gain is "consistent long-term performance of our pension vehicles."

"Since becoming a separate company three years ago, it has been Equitable Real Estate's top priority — and we have made the organizational commitments — to expand our service to pension clients, and to diversify our products in closed-end and single clients accounts and vehicles tailored to public funds," Mr. Puskar said.

Equitable traded places with Aetna, which, because it incorrectly included its general account assets in last year's statistics, reported a drop of about $12.2 billion in tax-exempt assets.

Prudential Realty Group, Newark, N.J., retained its second-place ranking.

Boston Co. Real Estate Council Co., Boston, recorded a substantial gain; tax-exempt assets under management increased 23.8%, vaulting the company to 10th from 13th a year earlier.

RREEF, San Francisco, dropped to sixth place from fourth, and Balcor Institutional Realty Advisors Inc., dropped to 11th from its anchor spot on last year's top 10.

Among the top 10 ranked by tax-exempt assets in equity real estate, Equitable and Prudential traded places. Top-ranked Equitable recorded a 21.9% gain in equity real estate, to $6.365 billion as of June 30 from $5.222 billion a year ago. There were no new entries in the top 10 equity real estate managers; only their order was reshuffled.

In the top 10 by mortgage assets under management, Aetna dropped off the listing, although it previously had been ranked first. A newcomer — McMorgan & Co., San Francisco — took the No. 1 spot, reporting $1 billion in mortgages under management as of June 30 for tax-exempt clients. Another first-timer, Latimer & Buck Inc., Philadelphia, was ranked second, with $646 million. Also new to the rankings of the 10 largest mortgage managers were Equitable; Eastdil Realty Inc., New York; and Fayez Sarofim & Co., Houston.

In hybrid debt (debt financing with some of the attributes of an equity investment, such as a participating mortgages), Boston Co. moved to first place from fourth, with more than $1.8 billion in hybrid debt as of June 30, vs. almost $1.3 billion a year earlier. Balcor dropped a spot to second, and F.I.A. Associates, Sacramento, Calif., moved down to fourth place from second.

Latimer & Buck and Lomas & Nettleton Advisory Group, Dallas, were ranked in the top 10 in hybrid debt for the first time; they replaced Kennedy Associates Real Estate Council Inc., Seattle, and TCW Realty Advisors, Los Angeles, both of which dropped off the top 10.

# Survey determines ownership

*Continued from page 1*

For retail properties, the survey showed tax-exempt institutions owned, on an equity basis, 613,703 square feet in Chicago and 171,464 square feet in Philadelphia, but nothing in the downtowns areas of New York, Los Angeles or Houston.

Only Houston had tax-exempt institutional investments retail mortgages, with 133,409 square feet.

The retail properties identified in the survey had a total appraised market value of more than $161.2 million.

Jonathan D. Miller, a vice president with Equitable Real Estate Management Inc., New York, said the opportunities for institutional retail investments are outside the central business districts.

"Most of our retail investments are in big, regional shopping centers that are located in suburban areas," said Mr. Miller.

He also said institutions might own retail space in mixed-use projects. In this survey, respondents were asked to categorize properties by their primary use.

The survey also found little tax-exempt institutional ownership of downtown industrial property on an equity basis — 50,000 square feet in Los Angeles and 14,000 square feet in Chicago, but none in New York, Los Angeles or Philadelphia. Mortgages were held on 817,525 square feet of industrial space in downtown Houston and 229,000 square feet in Chicago.

The total appraised market value of the industrial properties identified in the survey was $51.9 million.

"In a lot of major cities, the view is industrial will be driven out (of the downtown area) by the high costs," said Van J. Stults, a vice president of LaSalle Advisors Ltd., Chicago.

Only 27 institutions (or 10.8% of the 249 respondents) said they own office, retail or industrial property in the five CBDs, showing they generally avoid investments in the central business districts of major metropolitan areas.

And when they do buy properties there, they almost always do so through investment management firms. Only four pension funds reported they made the property decisions themselves.

Real estate experts said tax-exempt institutions generally avoid investments in the downtowns of major metropolitan areas because of lofty price tags.

Peter A. Peyser, senior vice president of Landauer Advisors Inc., New York, said many tax-exempt funds aren't large enough, or don't have enough assets committed to real estate, to consider such investments.

Nathan Schloss, senior vice president and corporate economist of Real Estate Research Corp., Chicago, agreed. "You're talking about buildings that are high priced and in good locations," he said, adding part of the reason prices are high is many downtown properties have the characteristics institutional investors emphasize.

Many tax-exempt funds funnel their downtown real estate investments through commingled funds run by an investment management firm. By pooling their assets, these funds can take significant position in central business district properties and achieve the desired diversification. Even then, some commingled funds lack sufficient dollars to seriously consider the downtown market, Mr. Peyser said.

"We're talking about (the need for) diversification by both property type and geography," he said.

"You can't have geographical diversification and distribution in a $150 million fund and be talking about downtown areas because the property costs are too high."

For those that have the money, however, the central business districts of major cities offer some strong advantages.

"If you look at the major cities, one of the things you'll find is the demand for space in a major urban area is much more significant than in a smaller urban area or a suburban area," said Michael Herzberg, senior vice president of acquisitions for JMB Realty Corp., Chicago. He said the high demand places a premium on space available to be leased.

JMB, through JMB Institutional Realty Corp., manages 695,000 square feet of offices in downtown New York and 318,000 square feet of offices in downtown Los Angeles for tax-exempt clients. The market value of those properties represents about 7% of JMB's $1.7 billion tax-exempt institutional portfolio.

The attractiveness of the demand for space in major downtown areas also is enhanced by the likelihood these cities will not suddenly become overbuilt.

"What you look for is growth. No one likes Houston anymore because the growth ended," said Paul Sack, a principal of The RREEF Funds, San Francisco.

He said institutional investors want "a combination of growth in demand and some restriction on future supply." He said the lack of undeveloped land in CBDs sometimes prevents overcapacity. ■

## Square footage owned by tax-exempt institutions

| City | Equity basis: Office | Equity basis: Retail | Equity basis: Industrial | Mortgage basis: Office | Mortgage basis: Retail | Mortgage basis: Industrial | Total appraised market value: $ millions |
|---|---|---|---|---|---|---|---|
| New York | 10,519,417 | 0 | 0 | 1,851,128 | 0 | 0 | 2,280.3 |

Properties owned by institutional investors, through their real estate investment advisers, in the five downtowns surveyed include those shown above: 800 Wilshire Blvd., Los Angeles, Richard Ellis; LaSalle Bank Building, Chicago, LaSalle Advisors; 2 Wall St., New York, RREEF; 3 Penn Center, Philadelphia, Richard Ellis; 33 N. Dearborn, Chicago, Richard Ellis; 120 Broadway, New York, J.P. Morgan Investment; 1 Financial Place, Chicago, Lomas & Nettleton; 30 Wall St., New York, Richard Ellis.

# L.A. shedding 'non-city' image

By Steve Hemmerick

Los Angeles, the trading hub of the Pacific Rim, is developing a major downtown area, a significant portion of which Japanese investors already own.

In the past, Los Angeles has been described as a non-city or a giant suburb, even though its 3.1 million population is second only to New York.

Sol Rabin, a partner in TCW Realty, Los Angeles, said almost 20% of the about 120 million square feet of office space in the city is in the downtown area. In most cities, he said, 30% to 50% of total office space is downtown.

But real estate experts believe Los Angeles' downtown area will grow significantly in the coming years.

According to Mr. Rabin, the Japanese own about one-third of the office space in downtown Los Angeles and, other experts agree, the Japanese presence as owners and tenants will grow.

In September 1986, the Japanese firm Shuwa Investments Corp. made a major purchase, paying $620 million for the twin towers and the below-ground shopping center of the Arco Plaza.

Because of changes in banking laws, many Eastern banks are expected to establish a presence in Los Angeles in the next few years, creating a demand for space.

Another factor helping to build the downtown area is increasing anger among city residents at commercial construction in West Los Angeles and the San Fernando Valley.

As politicians block growth in suburban areas, developers will focus increasingly on development in the downtown area, say experts.

Politicians in Los Angeles aren't anti-growth, said Gerald Parkes, a Los Angeles-based director with Richard Ellis Inc., New York. But they are "much more sensitive as to where the growth occurs. I think the focus (for development) is now and will continue to be on downtown Los Angeles. I think we will see more corporations see downtown Los Angeles as a viable location, not just the banks and various service companies."

Also, Los Angeles is the trading hub of the western Pacific region. It receives substantial imports from Japan, South Korea, Taiwan and Hong Kong and is used as a funnel for exports to Japan, South Korea, and Australia.

As downtown Los Angeles develops as the center of the city, say the experts, it will have one of the strongest metropolitan economies in the world behind it.

According to an economic report for Security Pacific Bank, Los Angeles, metropolitan Los Angeles has the second largest concentration of population, employment, business, industry and finance in the United States, exceeded only by the New York area.

Downtown Los Angeles already has some tall buildings, the tallest being the 62-story, 1.1-million-square-foot First Interstate Bank Tower. By 1989, downtown Los Angeles will have the tallest building west of Chicago — the 73-story, 1.5-million square-foot Library Tower.

"That building is going to be the biggie. It is going to put the downtown on the map," said Clay Hammerstein, a real estate broker in the Los Angeles office of Julien J. Studley Inc., a real estate services firm.

Including the Library Tower, downtown Los Angeles will be adding another 10 million to 13 million square feet of office space over the next seven years or so, said Mr. Rabin.

"Between 1988 and 1993 there is going to be an influx of 13 million square feet of office space" and 18 new buildings, said Mr. Hammerstein.

Growth in the downtown area will be helped by mass transit. Los Angeles officials expect to open a heavy rail system that will funnel traffic into the downtown area in the 1990s, and a light rail system is planned between the downtown area and Long Beach.

In addition to office construction in the downtown area, more residential and hotel construction is planned.

Retail space was added as part of the first phase of the Citicorp Plaza in downtown Los Angeles.

As new buildings are completed, downtown Los Angeles will be a renters' market, but for the investor, downtown Los Angeles may be too important a market to avoid. ■

Sol Rabin of TCW Realty notes Los Angeles' downtown holds only 20% of the area's office space.

# Banks favored for underwriting paper

GREENWICH, Conn. — An increasing number of institutional fixed-income investors favor allowing commercial banks to act as dealers for corporate commercial paper issues, according to a new survey.

The survey by Greenwich Associates, Greenwich, Conn., also ranked 21 instruments used by corporations in their money market portfolios, finding the most popular are time deposits, domestic commercial paper and repurchase agreements.

Greenwich found demand for three major types of foreign currency-denominated commercial paper — sterling, French franc and European currency unit — is expected to about double in the next year among European money market investors.

In interviews with 2,142 major domestic institutional buyers, the report shows a majority support bank entry into commercial paper underwriting.

The survey found 38% of money market investors and 31% of corporate bond buyers strongly agree on allowing banks as dealers, and 50% of money market investors and 38% of corporate bond buyers agree somewhat.

The support by those surveyed has been growing since 1985, according to previous Greenwich surveys.

Over the same time, the study found a decreasing number oppose banks as dealers. In the latest survey, only 3% of money market investors and 5% of corporate bond buyers disagree strongly in allowing bank entry, while 6% of money market investors and 14% of corporate bond buyers disagree somewhat.

The interviews for the recently released survey were conducted in February and March.

Among other findings, the survey ranked the use of instruments in money market portfolios of corporations, showing that, including ties, 79% use time deposits; 71% commercial paper of domestic issuers; 60% repurchase agreements; 54% direct-issue commercial paper and Eurodollar certificates of deposit; 50% bankers' acceptances, money-center bank CDs, commercial paper of foreign issuers and auction-rate preferred stock; 42% letter of credit-supported commercial paper; 37% regional bank CDs; 31% Yankee CDs; 21% whole loans or loan participations; 17% floating-rate CDs; 13% term CDs and Eurocommercial paper; 12% non-dollar instruments; 6% continuously offered medium-term notes; and 4% mortgage- or other asset-backed securities and stripped Treasury securities.

The survey didn't include Treasury bills, nor did it ask the aggregate composition of portfolios.

In a separate survey of 95 European money market investors, Greenwich found:

- 34% of the European investors plan to use sterling commercial paper in the next year, up from the current 18%;
- 16% plan to use French franc commercial paper, up from 8%; and
- 30% plan to use commercial paper denominated in ECUs, or European currency units, up from 14%. ■

# Consultants list is being compiled

A list of investment management consultants who serve the small and medium-size fund market is being compiled in Consultant Compendium II.

The original Consultant Compendium dealt with the largest investment consultants and was published by F. Jerome Grimm and Charles C. Thomas. Aiding them is James P. Owen, managing director of NWQ Investment Management Co., Los Angeles, and executive vice president of Investment Management Consultant Association. IMCA members should call Messrs. Grimm or Thomas at (617) 235-3151; Mr. Owen at (303) 321-7955. ■

# Pressure . . .

*Continued from page 3*

and shareholder rights groups praised the survey for going a long way toward demystifying the proxy process. But they were evenly divided on whether there was more pressure than was cited in the responses.

A few of the players interviewed by *Pensions & Investment Age* doubted many managers or executives would admit to experiencing pressure and thus they felt the pressure may be more intense and frequent than the survey reported. Others said the results were on target, and the existence of pressure had been blown out of proportion during the 1987 proxy season.

Some said the results were skewed because the question to sponsors asked specifically about financial pressure, while the question managers and trustees were asked used only the undefined word pressure. They also noted the survey was done before the 1987 season heated up.

"At one point, it (the existence of pressure) was almost like folklore. This is the first attempt to measure it," said Hazel Witte, senior technical associate at the FEI's Washington office, who helped draft the questions.

"For a first effort, the survey is pretty good. It adds a little depth to the discussion about the proxy process," Ms. Witte said.

Don Carter, president of The Carter Organization, a New York proxy solicitation firm, and Jamie Heard, deputy director of the Investor Responsibility Research Center, Washington, both said they have little doubt there is more pressure than was reported.

"There's a built-in bias that they don't want to feel like there's pressure and that they aren't doing their fiduciary duty," he said.

Mr. Heard, whose organization has been closely tracking proxy voting issues, said if anything, the EBRI survey numbers underrate the pressure. "That's been my experience. People aren't going to put it down on paper," he said.

The survey, which is the most comprehensive examination of the voting practices of private pension plans that has been done, offers new information on whether pension funds vote their proxies and who votes; whether there are written guidelines for voting, and whether pressures are experienced according to particular interests.

The survey findings, however, do not provide clear policy guidelines on whether plan executives under current practices meet their fiduciary responsibilities under the Employee Retirement Income Security Act or whether external pressure on plan executives or investment managers affect their proxy votes.

EBRI raised several public policy questions: Should sponsors be required to vote all their shares either directly or indirectly? Are some sponsors small enough to vote with their feet, i.e. sell the stock rather than vote against management? Does direct or indirect pressure affect the votes of internally or externally voted ERISA shares? And, if so, is new legislation needed to curb abuses? Finally, is legislation needed on anti-takeover proposals, or will the market work effectively without legislation?

When EBRI, a public policy research group, announced earlier this year it would conduct the survey, it was blessed by the Department of Labor and welcomed by chief executives, corporate and public pension fund executives, investment managers, master trustees and corporate governance and shareholder rights groups. The survey, conducted in late February and March, includes data on 334 plan sponsors, 134 investment managers and 25 master trustees.

Pension fund voting practices grabbed headlines during the 1987 proxy season, which was dominated by the anti-takeover debate. It became clear that corporate executives, investment managers and policy-makers knew little about those practices. Questions were raised about whether private pension funds vote their proxies, whether they support management in anti-takeover votes and whether they are subject to pressures to vote with management.

A tug of war over pension fund proxy votes seemed to heat up in April when a letter-writing campaign was launched by some chief executives asking their counterparts at other corporations to use their influence with pension fund managers (*Pensions & Investment Age*, April 6).

Policy-makers wondered whether proxy voting activities were conducted within the constraints set by ERISA's fiduciary requirements. The complexity and effectiveness of voting also was challenged.

All of these concerns spurred a wide-ranging discussion and examination of pension plan voting practices.

While the question of pressure was not the only issue, interest was especially keen because of the sensitivity.

The EBRI study found only one quarter of pension plan executives voting themselves reported financial pressure to influence their proxy votes. Financial pressure to capture votes was more likely on plan executives with large equity investments of more than $100 million. But fully 75% of plan executives reported they never had experienced financial pressure.

The EBRI survey also found:

- Nearly 64% of plan executives reported voting some of their proxies. Plans with equity investments of $500 million or more, representing 82.6% of equity held by pension funds surveyed, almost always voted their proxies.
- Smaller plans were much less likely to vote proxies themselves. Less than 40% of executives whose plans had equity assets of less than $25 million report any voting. But some plans — 31% — did not know whether they had voted or not. These plans tended to have lower assets. More than one-half of plans with assets of less than $10 million did not know whether they had voted their proxies. A large majority — 90% — of those who did not know whether they had voted had all of their assets managed externally.
- Plan sponsors are more likely to have written policies for proxies voted by the fund than for those voted by an investment manager or master trustee. When proxies are voted internally, 43% of executives are guided by a written policy. When proxies are voted externally, 21% of plan sponsors provided written guidance on voting. Among plans without a formal written voting policy, 88% always gave external managers full voting discretion, and rarely monitored the managers' votes. More than 60% of external investment managers have a formal written policy to guide them on proxy issues.
- The EBRI survey found more than 51% of plan sponsors with written policies for internal voting on specific proxy issues, such as anti-takeover devices, and 61% of external managers had guidelines on such issues. Nearly 42% of plan sponsors and more than 60% of external managers had written policies for recapitalization strategies, which include anti-greenmail provisions or preferred stock transactions.

The EBRI survey concluded "anti-takeover activities are a serious concern to those institutional investors who specifically include written guidance on voting proxies for specific issues. Furthermore, a sizable minority of plan sponsors also mention that they have been pressured to vote. These flags suggest that continued public policy interest in these issues is not unwarranted." ■

**Direct or indirect pressure on investment managers**

# Global bond use . . .

*Continued from page 3*

Ehrlich, director of pension fund trusts.

Earlier this month, the New York-based fund appointed BA Investment Management International Ltd., London, to run a global bond account. The fund also moved 4% to 6% in non-U.S. bonds from a domestic bond portfolio managed by J.P. Morgan Investment Management Inc., London, to a new international bond account, also run by Morgan. Proceeds from maturing guaranteed investment contracts also were used to fund both accounts, and additional GIC assets will bring the accounts up to target.

Other funds that invested in foreign bonds recently include the $3.1 billion Kansas Public Employees' Retirement System, Topeka, and the $3.4 billion Illinois Municipal Retirement Fund, Chicago, both of which appointed Julius Baer Investment Management Inc., New York, to run $20 million and $90 million, respectively (*P&I Age*, Aug. 24); and the $500 million Cincinnati Bell Inc. pension fund, which hired Warburg Investment Management International, London, to run $50 million (*P&I Age*, June 29).

But not all funds believe international bonds are the place to be. In May, American Information Technologies Corp., Chicago, reduced its international bond holdings to 1.5% of its $11.5 billion fund from 5%. The money was placed in cash, real estate and small-capitalization stocks.

James A. Kujaca, director, said the shift was made because fund executives believe international interest rates are likely to rise in the near term and the dollar is likely to be stable at 130 to 150 against the yen. The fund also took some profits. Noting the move was a tactical one, Mr. Kujaca said the fund may return to the area if the outlook changes.

But armed with neatly packaged versions of their "Case for International Bonds" reports, managers are raking in new foreign fixed-income business.

In terms of commitments from new or existing accounts in the first half of 1987, BA was on top with $280 million. Following were Fiduciary Trust Co. International, New York, with $268 million; N.M. Rothschild International Asset Management Ltd., New York, with $250 million; and J.P. Morgan with $200 million.

The firms manage $1.3 billion, $466 million, $800 million and $900 million, respectively, in foreign fixed income for U.S. tax-exempt clients.

First Chicago Investment Advisors added $186 million; Julius Baer added $110 million; Baring International Investment, London, added $100 million; and PCM International, Newark, N.J., added $77.5 million. The firms manage $1.3 billion, $375 million, $400 million and $380 million, respectively, in foreign bonds for U.S. tax-exempt clients.

Not included in the totals were large portions of foreign fixed income managed for foreign-based insurance companies established by U.S. corporations.

Bruce M. Dresner is director of investments of the $600 million Dartmouth College endowment, Hanover, N.H., which has invested in foreign bonds through Warburg for several years. He believes plan executives should determine whether they want international fixed income for high income or a total return; executives also should determine the degree of discretion to give managers for achieving objectives.

For instance, coupons vary widely among markets with Japan and West Germany at the low end and the United Kingdom and Australia at the upper range, said Mr. Dresner.

"Whether to go non-U.S. or global is another question. For many, investing internationally is a relatively new idea . . . You should look at diversification and high returns relative to risk," he said.

Dartmouth chose a non-U.S. strategy because the program more easily fit into the asset mix, Mr. Dresner said.

Executives also must decide between dollar- and non-dollar-denominated bonds. Dollar-denominated accounts include U.S. Treasury securities and Eurodollar bonds; non-dollar securities include other bonds.

The ITT fund invested in foreign bonds "because Salomon Brothers shows that more than 50% of fixed income in global markets is outside the U.S. so it would make sense to have a certain portion outside the U.S.," said Mr. Ehrlich. He also said an inverse correlation between U.S. and non-U.S. securities allows for incremental returns at a lower risk profile.

Cincinnati Bell invested in foreign fixed income without ever having invested in foreign equities.

"A study we've done shows it adds diversification away from domestic bonds and the portfolio in general and adds some return. "We wanted to be somewhat on the cutting edge by getting into bonds . . . rather than on the tail end of (investing in) international equities. I believe it's a coming trend. A lot of the play is already out of equities," said Len Haussler, pension fund manager.

"We don't believe in currency or interest rate forecasting. We believe in international bonds as a diversifier," Mr. Haussler said. "We were not trying to catch the dollar falling more, but that did make it more enticing for us. The dollar could just as easily turn around in the next year, week or day."

The $1.089 billion Young Men's Christian Association retirement fund, New York, has been internally managing global fixed income for 10 years. "It has helped to protect the purchasing power of our fund. So, if the dollar is devalued, our participants are protected against a purchasing power loss," said Harold Smith, president.

About 26%, or $280 million, of the YMCA fund's total assets are in foreign assets of which about $178 million, or 16%, is foreign bonds. Foreign equities total $102 million.

While most fund executives interviewed said they allow foreign currency hedging, the YMCA fund avoids it, relying entirely on the fund's top-down approach, he said. "We start with basic assumptions about markets and that's worked very well for us," Mr. Smith said.

From a long-term standpoint, the correlation between domestic and international fixed income has been historically lower than the equivalent correlation between U.S. and international stocks, said Adrian Lee, J.P. Morgan's vice president responsible for product development and business development.

Most of Morgan's fixed-income clients have gone global, unlike on the foreign equities side in which the vast majority of commitments are non-United States. That's mainly because "clients don't want to make U.S./non-U.S. allocations decisions," Mr. Lee said. In addition, clients believe it might be easier to compare fixed-income markets than equity markets.

# Interlake . . .

*Continued from page 2*

clined to specify how the reversion proceeds would be used, although the company treasury's domestic cash position apparently isn't sufficient to finance the repurchase without the excess pension assets.

Interlake expects to complete the recapture of an estimated $97.5 million, before taxes, in excess pension assets sometime later this year, according to several company executives. In addition to any corporate income tax, the reversion apparently will be subject to a new 10% excise tax. Corporate executives declined to comment on the issue.

They also declined to give further details on the reversion or the insured annuities the company would have to buy to cover the accrued benefits as required under pension rules.

The board of directors approved in August a program to buy back 915,000, or 7.8%, of the company's 11 million outstanding shares. The repurchase may begin this month and will take place in the open market and in negotiated trades with large shareholders, a spokesman said.

At a recent price of $49 a share, the program would cost less than $50 million.

Depending on when the company receives the proceeds from the reversion and the timing of the stock buyback program, another treasury executive said the company might have to borrow for two or three months.

He suggested borrowing would be done in the commercial paper markets.

In addition to its expected reversion, Interlake holds about $25 million domestically and $40 million internationally in cash equivalents in its corporate treasury, according to the treasury executive. ■

# Pension surplus to lift earnings

By Barry B. Burr

A $300 billion surge in the surplus assets of corporate pension funds in the first half of 1987, should translate into a 6% to 8% increase in corporate earnings.

The surge in the surplus resulted when the the value of assets increased by $200 billion while liabilities fell by $100 billion, according to Robert D. Arnott, vice president and equity strategist at Salomon Brothers Inc., who produced the estimates.

"Nobody is factoring that into earnings" estimates, Mr. Arnott said. "This growth in pension surplus and its effect on corporate profitability reinforces one view that a market top is not likely to occur before early 1988," Mr. Arnott notes in a research report.

The longer term impact of the huge surplus is more difficult to estimate, especially as two other new studies have thrown doubt on the long-term stability of the pension surplus and have overturned the long-held, comforting perception of a steady growth of excess pension funding.

The studies by executives of Salomon Brothers and Morgan Stanley & Co. show that only after the second quarter of this year has corporate pension surplus reached a level similar to that of the early part of the decade.

As Mr. Arnott points out, "Reduced pension contributions and larger surpluses should mean that net selling of stocks by pension sponsors will con-

# Investors cool to LDC debt

By Marcia Parker

NEW YORK — Institutional investors are wary of efforts to involve them in the solution of the Third World debt crisis.

Wall Street investment bankers are counting on the institutions to snap up Third World debt once they fashion the products to make the investment feasible, but a survey of more than 30 institutional investors, including corporate and public pension fund officials, global money managers, insurance company executives and high-yield bond managers, found little enthusiasm and lots of skepticism about Third World debt investments.

Across the board, investors expressed strong skepticism of what they view as "extremely risky" and "inappropriate" investments for themselves and their clients.

They cited a litany of worries about Third World debt investments, and indicated their concerns were so keen they would not feel comfortable investing corporate, public or client money.

While most investors said they were intrigued intellectually by the idea and would take a look at Third World debt as they would any new investment, their immediate reaction is "hands off."

"There's been a lot of talk about what it would take to get us (institutional investors) interested," said Charles H. Salisbury Jr., vice president and director at T. Rowe Price Associates, Baltimore, which has more than $20 billion in assets under management. "Here's what we think: It's going to be a tough sell."

"It's a scary thing. Nobody wants it," said David Seidel, vice president-pension fund management at GTE Investment Management Corp., Stamford, Conn., which runs the $10 billion GTE Corp. pension fund.

"It's killing the banks. Those countries have too much debt and they can't afford to pay it. How can anyone guarantee it? How can they fashion an instrument to eliminate the risks in Third World debt?" Mr. Seidel said, summing up the views of many investors.

Jim Sullivan, president of Sullivan Money Management, a Houston-based high-yield bond

# *Proposed funding change could flow to bottom line*

By Nicky Robertshaw

WASHINGTON — Corporate pension contributions could be whipsawed year to year under a revenue-raising option expected to be taken up by the House Ways and Means Committee, possibly this week.

Such whipsawing of pension contributions, in turn, could cause dramatic swings in corporate earnings.

The panel is trying to drum up $12 billion in revenue for next year as it struggles to comply with the Gramm-Rudman-Hollings Act's deficit reduction targets.

The pension proposal would tax contributions made to defined benefit pension plans that already are funded by 150% or more of termination liability, under a proposed redefinition of full funding.

The current full funding standard is 100% of accrued and future liabilities, which includes all benefits projected to accrue until employees reach retirement age as well as projected salary increases. Contributions beyond the full funding limitation are subject to a 10% excise tax.

If 110% of termination liability becomes the minimum funding standard — as is proposed by the Reagan administration — and 150% of termination liabilities becomes the maximum, employers would have a relatively narrow range to hit each year, pension experts pointed out.

"I think there is potential for cutting down the flexibility too much," said Ethan E. Kra, principal and actuary for William M. Mercer-Meidinger-Hansen Inc., New York. "Budgeting cash flow could become a real problem," he added, pointing out a primary reason for current pension surpluses is the bull market.

"You might be OK at the beginning of the year and not be OK by the end of the year," Mr. Kra said, noting the employer could have problems whether the market went up or down. He cited one employer portfolio that this year experienced a 40% increase between Jan. 1 and Aug. 31.

A plan that had been 110% funded at the beginning of the year on a termination basis now would be 156% funded because of the market. Barring any market downturn by the end of the year, a contribution made for that plan year would be taxable.

On the other hand, a repeat of the 1973-'74 market drop — when the stock market lost 50% of its value — could cause a plan funded at a 150% level to decline to, say, a 90% funding level, meaning the company would have to come up with a large contribution.

"Companies will get into a situation where they are be-

# Seix leading shake-up as MacKay CEO

By Marlene Givant

NEW YORK — After years of poor equity performance, losses of equity clients and personnel changes, MacKay-Shields Financial Corp. has decided to overhaul its equity department.

To execute the changes, Christina Seix, former president of the firm and head of its high-performing bond department, has been promoted to chairman and chief executive officer, replacing William R. Grant, who has been named chairman of a new international subsidiary of New York Life Insurance Co., the investment firm's parent company.

MacKay-Shields, which manages $5.5 billion about evenly split between equities and fixed income, will undergo a major equity restructuring to get that department up to speed with the top-notch fixed-income department Ms. Seix will continue to lead.

However, there will be no change in MacKay-Shields basic equity investment approach, which is growth-oriented. It will continue to offer value investing and indexing as options.

As part of the changes, four individuals have resigned or soon will leave the equity department. Bill Feick Jr., managing director and senior investment manager, and James Cowperthwait, who also was a managing director, have joined other firms. William H. Todd, managing director-equities, will leave to join another firm by year end. And John McNamara, a research analyst, will leave the firm shortly but his plans are not known.

The aim is to keep a core of equity investment professionals and hire additional staff, Ms. Seix said. She added the departing staff members in recent years had assumed more service- than investment-oriented responsibilities. The firm has 11 equity portfolio managers.

In addition to implementing sweeping changes, Ms. Seix will pioneer a position held by few women. Pointing out the business is dominated by men, Mr. Cowperthwait said, "I can't think of a major firm that has had a woman in charge ever, especially one who's 37 years old."

"She has a very risk-averse bond policy aimed at positive real returns every quarter. She's brought in a lot of business and packs a lot of power at that firm," he added.

The streamlining of staff will aid in the firm's revamping, according to the new chairman.

"Basically, the chronology of events is we've had a lot of growth in fixed income and not as much on the equity side," Ms. Seix said. "The reason is not investment skills at all; we have some of the smartest stock pickers in the business. But we need a fine-tuning in terms of (investment) disciplines and a more defined investment process."

Clients contacted by *Pensions & Investment Age* were confident of Ms. Seix's abilities.

The $800 million pension fund of Dana Corp., Toledo, Ohio, which has had a "substantial size" equity account with MacKay-Shields for five years, has been satisfied with the firm's performance and expects little impact from the changes.

"The implications of the departures aren't evident until time has passed," said Ralph Lipford, vice president-investment management. "The individuals we deal with have not departed . . . I don't really view those results as significant."

Fieldcrest Mills Inc., Eden, N.C., has had $5 million in equities of its $10 million supplemental retirement plan with MacKay-Shields for at least 10 years. The company has total retirement assets of $175 million.

"We think it will have very little effect. We've been with them 10 years through various (person-

# GTE loses Seidel to manager

*David Seidel is becoming president and chief operating officer of Management Asset Corp.*

David A. Seidel, vice president of pension fund management for GTE Investment Management Corp., Stamford, Conn., is leaving to become president and chief operating officer of Management Asset Corp., a Westport, Conn., money management firm with more than $900 million in assets.

Mr. Seidel, who has been at GTE for more than two years, will take over day-to-day operations at Management Asset Oct. 19. Those duties were handled by Leonard Heine, Management Asset's chairman and chief executive officer. Mr. Heine will concentrate on broader complex strategies of financial investments.

Messrs. Seidel and Heine confirmed the move, but would not comment further. John Carroll, president of GTE Investment Management, said he would fill the position as soon as possible; he also declined to comment further.

Mr. Seidel's move comes shortly after GTE Investment Management, which runs the $10 billion GTE Corp. pension fund, realigned its equity management structure.

Under the new system, responsibility for traditional and non-traditional external managers was changed and internal equity management responsibilities were broadened, giving more individuals more varied duties (*Pensions & Investment Age*, Sept. 7). Mr. Seidel still headed equity and non-traditional investments. ■

# LTV dispute spurs review of plan to boost premium

By Nicky Robertshaw

WASHINGTON — Congressional proposals for pension insurance premiums may be trimmed sharply if the Pension Benefit Guaranty Corp. wins the first round in court on restoration of three pension plans to The LTV Corp.

The absence of a premium in a Senate Labor and Human Resources Committee draft proposal aimed at shoring up the struggling agency sparked rumors the Congressional Budget Office may be revising its estimate of the amount of revenue needed to be raised in the budget from the pensions area.

Capitol Hill and Reagan administration sources suggested the budget office may be changing its figures in light of the PBGC's Sept. 22 move to return three terminated plans to Dallas-based LTV. If the restoration sticks, it would cut the agency's $4 billion unfunded liability in half (*see story, Page 21*).

"We're still doing estimates in the same manner as before, but we're waiting to see what happens in court," a budget office source said. He added the office is preparing revised figures in case the PBGC wins the first round. Requests for revised figures were made by all four congressional committees that have or will have proposals dealing with the pension issue.

If the PBGC's unfunded liability is reduced, a smaller premium would be needed to come up with the same amount of federal revenue.

It is a policy decision, however, as to whether the premium would be reduced or the amount of revenue would be increased.

The congressional tax-writing committees are looking for $500 million in revenue from the pensions area for the next three fiscal years. Under a Ways and Means Committee proposal, for example, $1 billion in increased premiums would be offset by $500 million in money "lost" because of new minimum funding standards and reduced transfers from the PBGC trust fund.

The Congressional Budget Office source pointed out reducing the PBGC's unfunded liability postpones the need for a higher premium, but not for long.

When the PBGC moved to restore the three LTV plans, Executive Director Kathleen P. Utgoff stressed it would not solve the agency's problems. "The need to reform pension funding, to improve the PBGC's premium income and to address treatment of its claims in bankruptcy court has not changed," she said.

The agency charges an annual premium of $8.50 per participant, which had been more than tripled from $2.60 just last year.

*Trustees of two plans of the International Organization of Masters, Mates and Pilots union, whose members work as deck officers on ships such as the one above, won one suit but still face others.*

# Court backs union claim

By Joel Chernoff

NEW YORK — Two maritime union retirement plans lost $34.1 million from the investments of a money management firm that channeled plan assets into speculative start-up companies, according to a federal magistrate.

While the trustees of the two International Organization of Masters, Mates and Pilots plans recently won both an appeals court victory and the hefty damages recommendation against their former manager, they still are at sea: They face lawsuits from plan participants and the Department of Labor over their role in the investment of $31.5 million in assets.

One of the major issues is whether the manager, New York-based Tower Asset Management Inc., acted at the direction of plan trustees in investing substantial amounts into maritime-industry start-up companies with the aim of creating new jobs for union members.

While court battles likely will go on for years, the investments appear to have the hallmarks of a social investing scheme gone awry.

Robert Hayes, union vice president-Atlantic ports, said, "My personal theory is the president of the union (Capt. Robert Lowen) was interested in improving membership during the worst period (in the maritime industry) since the Great Depression," he said. "My personal hunch is he was duped."

But another union source denied the investments were targeted

# 'Quant' norm hard to find

By Barry B. Burr

Investment returns, turnover and price of brokerage commissions vary widely among quantitative equity managers, a *Pensions & Investment Age* survey shows.

The telephone survey focused only on assets 16 quantitative managers run for tax-exempt clients in unhedged portfolios containing domestic and generally larger-capitalization stocks.

The results show the managers, by and large, have outperformed the Standard & Poor's 500 stock index over the years.

Returns for any one year, however, vary widely among managers.

The year ended June 30 was tough on most managers' performance, with only three bettering the S&P 500's return of 25.2%. Returns ranged from 11.1% for Denver Investment Advisors Inc., Denver, to 29.9% for Disciplined Investment Advisors Inc., Evanston, Ill.

By contrast, all but one manager outperformed the index's 35.9% return for the 12 months ended June 30, 1986. Even then, returns varied, ranging from 21.5% for Trinity Investment Management Corp., Boston, to 51.8% for Advanced Investment Management Inc., Pittsburgh.

For the 12 months ended June 30, 1985, only 12 of the 16 managers surveyed were running money in the quant strategy; and of those managers, two-thirds bettered the market. For the five years ended June 30, five of the six managers running money in business that long beat the S&P.

Portfolio turnover ranged widely among the managers. In the 12 months ended June 30, the average trading ranged from 35% by Gradison & Co., Cincinnati, to 125%-150% by Denver Investment Advisors.

The average price paid per share in brokerage commissions ranged from 2.6 cents by Aronson & Fogler Investment Management, Philadelphia, to 9 cents by Gradison. The average of the 15 managers reporting costs is nearly 5.5 cents per share.

Steven Pisarkiewicz, vice president and senior consultant at SEI Corp., New York, said the equity managers paid 7.05 cents to 7.1 cents on average in the 12 months ended June 30. In the second quarter alone, he said the price dropped to 6.98 cents.

In interviews, some managers, pension executives and consultants said per-share commissions for quantitative managers should be lower than for typical equity managers because of the nature of the investment strategy.

But Mr. Pisarkiewicz disagreed. "My experience doesn't point me to any direct relationship" between equity investment style and brokerage commissions per share.

"The cost of commissions tends to be a function of the relationship of a money manager and his brokers," Mr. Pisarkiewicz said. "A money manager negotiates with a broker. It's like any business relationship. If you put through a lot of business, you probably would be able to negotiate a lower rate."

> "I would expect quant managers to trade for below average (in terms of cost of commissions per share), because they don't get the benefit of research."
>
> **Gerald J. Paolini**
> **Xerox Corp.**

He said commissions were only part of the cost of trading stock. An important part of the cost also is execution impact, he added.

At Rosenberg Institutional Equity Management, Marlis S.S. Fritz, director-marketing, said its commission average of 5 cents a share "isn't particularly low. We don't care about paying low commission costs. We don't want to nickel-and-dime brokers. We're more concerned about market impact (trading execution) than commission costs."

SEI has no breakdown of the price per share quantitative managers pay. SEI's aggregate commissions statistics comes from its plan sponsor data base, containing 600 equity portfolios of about $90 billion, run by some 250 different managers.

Mr. Pisarkiewicz said SEI is planning to break down data from its stock trading research by investment style to see if there is any correlation with the price each manager type pays per share. He expects SEI to have such a breakdown available next year or in 1989.

*Continued on page 51*

*Ceco Industries Inc., which erected the addition to this Texas hospital, plans to use surplus pension assets to pay down $108.5 million in debt incurred as a result of a leveraged buy-out when senior management took the company private in 1986.*

# Ceco reversion to aid debt load

By Marlene Givant

OAK BROOK, Ill. — Ceco Industries Inc. will terminate its $90 million overfunded salaried defined benefit plan and use the asset reversion to pay down debt it assumed when it was taken private in a leveraged buy-out late last year.

After the termination, the company will form a new, uncommon account-based defined benefit plan, purchasing annuities to satisfy benefit obligations.

The asset reversion is expected to allow the corporation to pay down the $108.5 million in senior bank debt assumed when it was taken private by senior management in December 1986. The amount of reversion, however, is undetermined.

As of July 31, 1986, the salaried plan had an estimated surplus of $18.2 million on a pre-tax basis. During the 12 months following the leveraged buy-out, the company expects there will be approximately $15 million of excess assets before taxes and $7 million of excess assets on an after-tax basis.

Because the amount of surplus depends on such factors as the timing of the reversion, performance of the salaried plan's investment portfolio and the actuarial assumptions for the computation of benefits at the time of the termination, "there can be no assurance that excess funds will be available to reduce the senior bank debt," according to the prospectus on the leveraged buy-out.

The company expects to file for the termination with the Pension Benefit Guaranty Corp. in the next week or two. The actual reversion will take place in early 1988.

"There was a sizable surplus in the plan and the company went through a leveraged buy-out. The surplus, once recaptured, will be used to pay down corporate debt," said Stanley Rohwedel, manager of corporate finance.

Ceco has purchased non-participating single-premium group annuity contracts for participants in the terminated plan.

To help fund the purchase of the annuities, equity managers Sanford C. Bernstein & Co. Inc. and MacKay-Shields Financial Corp., both of New York, were terminated. Mr. Rohwedel could not provide the size of each account because assets frequently were switched among equity accounts. But he said the fund had about $60 million in equities in early 1987; now it has none.

Ceco will retain Chase Investors Management Corp., New York, which has managed an immunized bond portfolio since 1984. The size of that account was not available "because we're in the midst of selling off bonds to pay for the annuities," he said.

It also will retain Dimensional Fund Advisors, Santa Monica, Calif., but will switch the firm's $12 million equity account to a fixed-income account.

So far, the plan has purchased $45 million in annuities including $35 million from New York

Numbers in parentheses indicate the firm's second-quarter 1987 ranking
Source: IDD Information Services Inc., New York

By Brad Rudin

NEW YORK — First Boston Corp. pushed past Salomon Brothers Inc. to emerge as the top-ranked underwriter of taxable securities in the third quarter.

Salomon, however, remained No. 1 in underwritings completed during the first nine months of the year, according to IDD Information Services Inc., New York.

Total taxable third-quarter underwriting volume rose 6% to $70.23 billion from $66.14 billion in the second quarter. Debt volume increased to $56.76 billion from $49.4 billion, a gain of 15%, while equity volume sank 19% to $13.47 billion from $16.74 billion.

Debt volume, buoyed by the strong economy, contended with

# Citicorp action may spark others

By Brad Rudin

NEW YORK — Rising interest rates and robust stock market gains make it likely increasing numbers of corporations will follow Citicorp in settling a portion of their pension obligations with the purchase of annuity contracts.

Relying on a pension accounting rule, Citicorp settled part of its approximately $1 billion pension obligation by buying a $400 million annuity from Metropolitan Life Insurance Co., New York. The plan has assets of about $1.5 billion.

The annuity purchase added $1 a share to third-quarter earnings and boosted shareholders' equity.

Citicorp announced the annuity purchase Sept. 24, a week after raising $1.1 billion in a public stock offering. Both moves were taken to repair the balance sheet damage that resulted from the corporation's decision in May to boost its loan-loss reserve $3 billion. The special provision brought to $4.9 billion the amount reserved for potential loan losses.

Several Citicorp competitors later announced similar moves, making some of them candidates for annuity purchases, including Chase Manhattan Bank, Chemical Bank and Bankers Trust Co, all of New York.

Interest in annuities is expected to increase along with interest rates. When interest rates rise, corporations are able to purchase annuities more cheaply. The decision to buy an annuity becomes still more attractive when a pension surplus swollen by stock market gains can be converted into higher current earnings through the use of the settlement rule established by Financial Accounting Standards Board Statement 88.

The pension accounting rule allows the immediate recognition of a deferred gain or loss.

Citicorp's announcement of the annuity purchase could be the start of a revival of this practice, said James P. Klein, a vice president at Towers, Perrin, Forster & Crosby, a New York-based actuarial and consulting firm.

CITICORP

"You can start to sense it when people are finding the annuity purchase rate to be pretty good. I haven't really seen it yet. Citicorp is the first one," Mr. Klein said. "A couple more points and people will start looking at it and say 'not a bad deal.' "

Rising interest rates have boosted the annuity business at Metropolitan, said Anthony Amodeo, an actuary for the insurance company. The internal rate of return of annuities is well above Treasuries, Mr. Amodeo said, declining to give additional information about rates.

The incentive to record an earnings gain from the settlement of pension obligations seems particularly powerful for money-center banks, which have been plagued by problem loans to developing countries.

Because earnings and the capital base have been under pressure, bankers have been trying to realize gain from undervalued assets, said Paul H. Baastad, an analyst at S.G. Warburg & Co., San Francisco.

"It seems likely that other money-center banks with overfunded pensions would certainly think seriously about using (the pension plan) as a source for strengthening their capital base," he said.

"It's very hard to say," said Andrew M. Aran, an analyst at Standard & Poor's Corp. "I'm sure they are all considering it."

Executives at other money-center banks, however, declined to say whether they would buy annuities.

Manufacturers Hanover Corp. benefited from FASB 88 in 1986 and 1985 when it recognized gains of $18.7 million and $53.5 million, respectively, as a result of its settlement of pension obligations with annuity purchases.

"It's not a new idea and not unanticipated," said Jeremy Gold, a principal with the pension group at Morgan Stanley & Co. "We advise banking clients to consider (settlement) as one source of equity capital."

The settlement of part of its pension obligation will enable Citicorp to record a $160 million after-tax gain in the third quarter. On a pre-tax basis, the gain is $300 million.

FASB 88 "creates a major opportunity for companies with substantially overfunded plans, because overfunding at the date of compliance with FASB 87 is treated as an actuarial gain," according to a recent Salomon Brothers Inc. publication. Under Statement 87, actuarial gains and losses are normally deferred and amortized over the average service period of employees.

"By purchasing annuities for some or all of their obligations, these companies can bring into current earnings the gains that would otherwise have been recognized only over an extended period of time," according to the Salomon report.

As a result of the charge against earnings, Citicorp reported a $2.3 billion loss for the first six months ended June 30, 1987, or negative $17.12 a share, on revenue of $5.7 billion.

Without the charge and related tax benefits, the bank would have earned $552 million, or $3.59 a share, in the first half of 1987.

The bank earned $505 million, $3.47 a share, on revenue of $4.9 billion in the first half of 1986. ■

## Corrections & clarifications

• A profile of **Crestar Bank**, Richmond, Va., should have been included in the Sept. 7 master trust directory. The bank, with $151 million in master trust assets for nine clients and $5.7 billion in master custodial assets for 191 clients as of June 30, would have ranked 24th.

• Equity managers in **Evaluation Associates Inc.**'s universe posted first-quartile returns of 27.3% for the half, median returns of 23.8% and third quartile returns of 21.2%. Balanced managers in EAI's first quartile had returns of 2.2% in the second quarter and 16.4% for the half. The figures were reported incorrectly in the Sept. 21 issue.

• **Wachovia Bank & Trust Co.** is handling fixed-income investment for the Wake County Hospital System and **Wedge Capital Management Inc.** is handling part of the system's equity investments. The investment type each is handling was switched in the Sept. 21 issue.

*Stanley Works, which offers a wide variety of tools for both "do-it-yourselfers" and professionals, now has settled into integrating the businesses it acquired in the past few years.*

## Stanley Works slows buzz-saw acquisition pace

**By Marcia Parker**

NEW BRITAIN, Conn. — The Stanley Works is taking a breather after a two-year acquisition binge of 14 businesses and a restructuring effort that has reshaped the well-known maker of hand tools into a major consumer and industrial products company with a growing presence overseas.

"This year we're settling things down, integrating the businesses we've acquired," Richard H. Ayers, Stanley president and chief operating officer, said during a break in a recent conference on corporate restructuring in New York.

In the past few years, Stanley has sharpened its focus in two areas: supplying products and services to do-it-yourselfers and supplying professionals with tools and other quality specialty products.

The three-pronged strategy involving acquisitions, divestitures and cost-cutting has essentially been completed. A key element has been to meet low-cost foreign competitors head-on by setting up manufacturing facilities overseas and marketing products in many countries.

Fourteen acquisitions — including seven in 1986 and two in 1987 — have been in the core business lines where Stanley is market leader or No. 2. Most were paid for with internal cash flow, and the rest came from increased borrowings, according to R. Alan Hunter, vice president-finance and chief financial officer.

The acquired businesses — including the Bostitch fastening tool and fastener business Stanley bought from Textron Inc. and the hand tool business of the Peugeot group of France — are already contributing to the Stanley bottom line. The businesses are relatively free from low-cost foreign competition, which has been a troublesome matter for Stanley and its other American competitors.

"We are starting to use some of our overseas facilities to source some goods for the U.S. and that helps us compete," Mr. Hunter said. "The change in currency (softening of the dollar makes U.S. exports more attractive) has also helped."

Stanley has manufacturing sites in Taiwan, Brazil and Mexico.

## Investment banks retain dominance

**By Brad Rudin**

NEW YORK — Commercial banks took eight of the top 20 places in the private placement league tables for the first half of 1987, two more than in 1986, according to data compiled by IDD Information Services Inc.

That gain overall was somewhat offset by the commercial banks' loss of one place — down to two — in the top 10.

Although the private placement market continues to be dominated by debt offerings, equity-linked deals have shown some growth, said Marc Dash, head of the private placements group at Goldman, Sachs & Co., New York. Debt with warrants in the high-yield market have gained acceptance because the equity link provides an added incentive to investors, but equity deals account for a small proportion of total volume because they come in much smaller sizes than debt transactions, he said.

Chemical Bank, New York, and Security Pacific National Bank, Los Angeles, made their way to the the top 20 in the first half of 1987. They were not on last year's list.

Three New York-based investment banks — Bear, Stearns & Co., Dean Witter Reynolds Inc., and Lazard Freres & Co. — disappeared from the top 20 after making it to the upper end of IDD's private placement league tables last year.

## Securitized loans attracting ESOPs

**By Brad Rudin**

NEW YORK — A growing number of ESOP sponsors, attracted by lower borrowing costs, are financing their employee stock ownership plans with securitized loans rather than conventional term debt.

In addition, securitized ESOP loans — now being marketed aggressively by several money-center banks — could boost the number of companies sponsoring ESOPs because the loans maximize the tax advantages available to the companies.

Securitized ESOP loans are floating-rate notes sold to investors who qualify for the 50% interest income exclusion established by Congress in 1984. Banks, thrifts, savings and loan associations, insurance companies, mutual funds, finance companies and the domestic finance subsidiaries of foreign banks qualify for the exclusion under the Internal Revenue Code.

Like the standard ESOP term loan, proceeds from the sale of the ESOP notes are used to buy employer stock. From the plan sponsor's view, the primary difference between the ESOP term loan and the ESOP note is the price.

"You're talking about saving some 40 basis points off commercial paper with a traditional loan, if you structure it as a (securitized loan) you should almost double those savings," said Patricia A. Lynott, vice president in the ESOP financing unit of Chase Manhattan Bank, New York.

While an ESOP term loan carries a coupon between 80% and 85% of prime, the securitized ESOP loan would be priced about 75% of prime, said Kim M. Chandler, vice president at Bankers Trust Co., New York, a leader in the securitization of ESOP loans.

Because of their lower rates, securitized ESOP loans have potential as a refinancing vehicle for companies that have financed employee stock ownership plans with more expensive term loans.

For example, in August, Duff & Phelps Inc., Chicago, refinanced its 2-year-old ESOP with a $34 million securitized ESOP loan. "We're looking forward to interest savings as a result," said Karen W. Brown, a vice president at the financial services firm.

Corporate interest in securitized ESOP notes is likely to grow as interest rates rise, said James H. Zukin, a partner with Houlihan, Lokey, Howard & Zukin Inc., Los Angeles, a national valuation advisory firm.

"So far, the major banks in this field have been developing ESOP financing vehicles in a laboratory environment," said Mr. Zukin, referring to the relatively small size of securitized ESOP loans and the companies that have used them as a financing vehicle. The average size of the five securitized ESOP loans done to date is slightly less than $23 million.

"If and when they take it to the megamerger ESOP marketplace, then it should have a profound effect. Assuming a 2% saving, (securitization) eliminates the need for significant equity relative to a non-ESOP (leveraged buy-out) bidder," he said.

Strong demand for low-cost capital and a healthy investor appetite for tax-advantaged securities mean a bright future for securitized ESOP loans, said Ms. Chandler.

Bankers Trust, which has sold $65.5 million of securitized ESOP loans to date, expects its volume will reach $500 million by November. "We're expecting a couple of billion dollars by the end of 1988," Ms. Chandler said.

"If you feel that the trend toward employee ownership will continue or increase, then I think you have to believe that a securities market for this type of financing will develop," said Kenneth Winslow, a vice president at Chemical Bank, New York.

Chemical, which has not sold any securitized ESOP loans, is working on a second-generation product that will allow a deeper market than now exists, Mr. Winslow said.

Dividing the securitized ESOP loans into securities for the taxable and tax-exempt market is one possibility Chemical is considering. Pooling and packaging of several ESOP loans into a note that resembles a security based on lease receivables is also under consideration, he said.

The flow of tax-advantaged capital into ESOPs gives management a low-cost means of financing leveraged buy-outs, putting stock into friendly hands and financing acquisitions, Ms. Chandler said. "ESOP debt is at the heart of what's going on in corporate finance today," she said.

The advantages inherent in securitized ESOP loans build on the deductibility of principal and interest payments that are made to repay the loan to the plan. Corporations favorably regard this tax treatment because ordinarily only interest payments are deductible.

Securitized ESOP loans offer intermediate-term financing with notes that float on the short end of the yield curve because they can be put back to the plan sponsor at par after a short period, typically seven or 30 days. The notes are repriced on a schedule that coincides with the put periods.

Because investors look at the notes as short-term investments, they demand a rate that is lower than what would be required by the security's intermediate-term maturity.

If the remarketing agent fails to sell the notes that are put to the plan sponsor, those securities are bought by the bank providing a letter of credit. That bank, in turn, would seek reimbursement from the plan sponsor at the end of the financing period.

In cases in which the ESOP notes are sold without credit enhancement, the investors would present a direct claim against the plan sponsor if the remarketing failed.

A failed remarketing would not create a solvency issue for the plan sponsor in a deal without credit enhancement because the size of the loan would be small relative to the borrower's capitalization and ability to buy back the notes, said Ms. Lynott.

Bankers Trust calls its securitized ESOP loan a FRESOP, or floating-rate employee stock ownership plan. At Chase, the product is called TREND, for tailored-rate ESOP notes on demand. Manufacturers Hanover Trust Co., New York, refers to its product simply as ESOP notes.

"It's a marketing pitch," said one official at a bank that does not offer securitized ESOP loans. "It adds to the cachet of the bank that has them, but because they

# Banks . . .

*Continued from page 17*

Although the investment banks are facing more competition in the private placement business, they still have a solid grip on the top of the league tables.

Goldman, Sachs & Co., Salomon Brothers Inc., and Merrill Lynch & Co., all of New York, took the top three places in the league table for the first half of 1987.

Goldman, which took the top spot in overall private placement volume last year, owes its strong first-half showing this year to the diversity of its private placement business, said Mr. Dash. Goldman survived a decline in its leveraged buy-out business "because other areas continue to be very strong for us," Mr. Dash said. Traditional private placements as well as transactions relating to leveraged leasing and project finance contributed to Goldman's showing.

Goldman also took first place in the private placement of mortgage-related private placements. First Boston Corp. and Citicorp, both of New York, took the next two places. Salomon Brothers, First Boston and Citicorp took the first three places last year.

The top spot in lease-related private placements in the first half was held by Goldman, followed by First Boston and Bankers Trust Co., New York. Goldman, Salomon and Merrill took the first three places in the lease category in 1986.

Total private placement volume stood at $56.7 billion in the first half of 1987, compared with $40.5 billion in the first half of 1986.

Investment bankers seemed respectful of the gains commercial bankers have made in the private placement business during the past few years.

"I think they're in the business, will stay in the business and will emerge as a major competitive force in the business," said Ralph H. Fletcher Jr., a Salomon vice president and head of the firm's private placement group. "You can't ignore them."

But displacing the bulge-bracket Wall Street firms from the top three or four places will be a tough task for commercial banks, both sides agree.

"The sledding gets tougher as you get closer to the top," said Neil H. Powell, managing director and head of private placements at Bankers Trust. "I don't see any reason we won't continue to climb up the league tables. We're getting better but the competition gets tougher. We find we're competing with the best in the business."

Commercial bankers value their private placement business because it is an arena in which they are not restricted by the Glass-Steagall Act, said Robert A. Lawrence, vice president in charge of Citicorp's long-term finance department.

Because private placements allow commercial banks to become identified with an investment banking product, the business has a strategic value if new legislation gives commercial banks a wider franchise in investment banking, he said. "Building successful relationships and market share provides a good fulcrum to lever us into the public markets business."

Commercial bankers have made their greatest strides in placing traditional deals that need to be shown to a relatively small group of investors, said Stephen Newhouse, principal and head of private placements at Morgan Stanley. But their competitive thrust dissipates in transactions in which a wider distribution network is needed, he said.

Commercial bank private placement executives have yet to take full advantage of their banks' contacts with corporate borrowers because of a lack of coordination between the commercial loan operation and the capital markets group, Mr. Newhouse said.

Still, the close contact between borrowers and commercial banks is a plus for private placement officers at commercial banks, both investment bankers and commercial bankers agreed.

"There's a warmer feeling when you walk into that (client's office) than when you're an investment banker and you're walking in cold," said Arthur G. Kearney, managing director and head of private placements at Chase Manhattan Bank. Before joining Chase last year, Mr. Kearney worked with PaineWebber Inc.'s private placement unit for 15 years.

Loan officers at commercial banks are in a position to suggest longer maturity debt for corporate borrowers, who are then referred to the banks' private placement department, said Arthur A. Sharples, managing director and head of private placements at PaineWebber.

Because commercial banks provide a variety of services for corporate clients, bankers see the private placement fee in the context of other client revenue, Mr. Sharples said. "In many cases their (private placement) fees are aggressive." ■

# Management firm created in Florida

JACKSONVILLE, Fla. — Florida National Banks of Florida Inc. has created an investment management company to seek fully discretionary clients and emphasize balanced portfolios.

The new unit, Florida Investment Management Co., contracted with the bank's trust department, its only client so far, to run $595 million in tax-exempt assets from eight accounts. John P. Willoughby, FIMC president, said the accounts serve as a seed to get the new company started.

He said FIMC will remain distinct from the trust department and will seek its own clients. The trust department will continue to run about $1.6 billion, excluding the accounts contracted to FIMC.

FIMC expects to start marketing in October, focusing mainly in Florida, said Mr. Willoughby.

"We're not attempting to go national at this point," he said, noting, however, the firm will seek some accounts from other states.

He said FIMC is considering offering performance fee-based accounts, although it isn't now prepared to offer them.

On brokerage, he said FIMC will stress execution, but will use some outside research, paying for it in soft dollars. FIMC has one research professional on staff.

FIMC will run only fully discretionary accounts, and plans to especially seek balanced accounts, Mr. Willoughby said. The unit set $1 million as the account minimum for both tax-exempt and individual clients.

FIMC has four portfolio managers. Two of them, including Mr. Willoughby, who was head of the Florida National's trust investment department, were longtime bank employees. The other two recently joined the trust department in anticipation of moving to the new investment unit, he added.

The four will jointly make investment decisions and policy, he said.

Their style is active, value- and growth-oriented.

He said FIMC plans to limit its clients to a small, still undefined, number to maximize service to each. ■

## Ratings put kick in Euro-offerings

By Fred Williams

NEW BRUNSWICK, N.J. — One of the primary motivations corporations have for turning to the Eurocommercial paper market — the absence of investor demand for a credit rating — may have lost some of its attractiveness.

Johnson & Johnson's $100 million Eurocommercial paper offering, originated in February, met with slow response. Investor interest picked up only after the company received prime ratings of A-1 and P-1 from Standard & Poor's Corp. and Moody's Investors Service Inc., respectively, when it began a domestic commercial paper program in July, said Andrew Markey, treasurer at the New Brunswick, N.J.-based health-care products company.

He said the company sought the rating because interest rates are better domestically.

The Europaper offering by Johnson & Johnson was the company's first publicly traded debt, said Mr. Markey.

"We had expected a little more interest," he noted. "I don't know whether it was due to market conditions or because we were not rated, but we didn't get as much action in the Euromarket as we had expected.

"The absence of a rating does limit the amount you will sell" in the Europaper market, he added.

"It is true that two or three years ago you didn't need to have a rating, but . . . as time goes on, the discipline and structure of the market is changing and it is now more important to have a rating (to enter the Europaper market)."

Mr. Markey said the response was so slow to the Johnson & Johnson Europaper offering that he put off issuing additional paper. "I would have gone another $100 million," he said.

Johnson & Johnson now has about $1 billion in short-term debt, practically all of it commercial paper, he said.

Johnson & Johnson is working with the commercial paper dealing units of Chase Manhattan Bank and J.P. Morgan & Co.

Johnson & Johnson is not the only company that has found a commercial paper rating valuable to its Euromarket efforts. Brian Clarke, Chicago-based vice president for First Chicago Clearing Center in London, said many U.S. Euromarket issuers are finding ratings helpful.

"We are seeing more and more U.S. companies getting rated before entering the Euromarket. It is becoming a more competitive market and many issuers are not household names," he explained.

"A rating is a quick and easy way for investors to grade an investment — one way to determine the quality of an investment. We are even seeing a little more pressure on non-U.S. issuers to consider ratings," said Mr. Clarke.

"If the investor is given a choice between rated and non-rated paper, he will more than likely take the rated because it does give the investor a basic way to assess

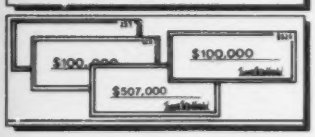
## ARA looks at banking services

**Cash accounts**



PHILADELPHIA — ARA Services Inc. bought an account analysis evaluation program from Treasury Strategies Inc., Chicago, to analyze prices and services of 60 banks it uses for cash management, said Susan Hardy, treasury analyst.

"It makes it easier to spot errors and overcharges," she said of the Treasury Strategies product.

She said the company paid $6,000 to $7,000 for it.

The company also looked at an account analysis product of Phoenix Hecht, Northfield, Ill., she said.

ARA had been doing its evaluation manually. It uses 900 banks in all for cash management services.

### *Analysis adopted*

HOUSTON — Houston Industries Inc. contracted with Phoenix Hecht, Northfield, Ill., to evaluate its bank account analysis statements by computer, said Margo Whitt, supervisor-cash management for the energy company.

The company will analyze the statements of 25 to 30 accounts from its major cash management banks: Texas Commerce Bank, First City National Bank, MBank and First RepublicBank Dallas.

She said the computer evaluation will enable Houston Industries to more closely examine individual bank prices and services as well as comparing banks.

"We were looking at it by hand," said Ms. Whitt of the way the company formerly evaluated its account analysis statements.

"We weren't even entering it into a data base."

She noted the company still receives separate statements from RepublicBank and InterFirst Bank, the two predecessor banks that form First RepublicBank. She said First RepublicBank will eventually merge the two accounting systems and send one statement.

The company hasn't used the Phoenix Hecht evaluation much, although it has had it for several months, because of other projects and because the program has been slow when used with spreadsheet analysis, said Ms. Whitt and Rebecca McCulloch, treasury analyst.

They said they expect Phoenix Hecht to improve the program to make it easier and faster to use for spreadsheet analysis and able to accommodate more data.

With the program, the company sends its bank statements

## Bayer mulls changes in bank set-up

By Barry B. Burr

PITTSBURGH — One of Bayer USA Inc.'s units, Mobay Corp., plans to re-evaluate its lockbox banks as a result of its switch to receive payments electronically instead of by check from General Motors Corp.

Bayer, in a separate evaluation, has bidding under way for several other cash management services provided for its subsidiaries to decide if a restructuring of its bank relationships is necessary.

The services involve cash concentration, wire transfer, payroll controlled disbursement and collection provided to six units — Miles Inc. (formerly Miles Laboratories Inc.) of Elkhart, Ind.; Mobay Corp., Pittsburgh; Deerfield Urethane Inc., Deerfield, Mass.; Haarmann & Reimer Corp., Springfield, N.J.; NRC Inc., Newton, Mass.; and Wyrough & Loser Inc., Trenton, N.J.

Bayer USA, formerly based in New York and called Rhinechem Corp., is a unit of Bayer AG of Leverkusen, West Germany. NRC is a joint venture between Bayer and Hermann C. Starck Berlin KG.

R.W. Heins, treasury analyst, said Bayer USA retained Pittsburgh National Bank to conduct a lockbox study for Mobay. The other cash management evaluations are being done in-house, he added.

He said Mobay, a plastics supplier, recently agreed to receive payments electronically from its major customer, General Motors, based in Detroit and New York.

Mobay hired Pittsburgh National Bank to receive the electronic payments. As a result, General Motors' payments will no longer go to Mellon Bank in Pittsburgh, one of Mobay's lockbox banks.

He said the lockbox study will also look at the possibly of Mobay receiving electronic payments from other vendors, such as those in the chemical industry.

"We do anticipate it (electronic payments from vendors) will be growing, in addition to the GM and the federal government's vendor express programs," he said. The Treasury Department recently announced plans to begin paying vendors to some government departments through the automated clearinghouse.

Mr. Heins expects General Motors to begin the electronic payments to Mobay soon.

Mr. Heins said Mobay decided to use Pittsburgh National, a bank on General Motors' disbursing network for the electronic payments, although Mobay could collect the receipts at any bank.

"If you don't go with a network bank, you're asking for problems," he said.

He said the company looked at other banks on General

# Pension . . .

*Continued from page 1*

tinue." He estimates net corporate pension contributions fell to $5 billion last year from $48 billion in 1983 and that further growth in surplus could lead to negative net contributions in 1988, that is, when annual benefit payouts exceed cor- porate contributions.

But he notes a major offset to the selling of stocks by sponsors has come from corporations buying back their stock or buying shares in other companies. "Indeed, the boost in corporate profits may accelerate this trend," he states in the report.

The first eight months of this year witnessed two divergent market movements — a dramatic rise in the equity markets and a substantial decline in fixed-income securities' prices — to produce an ideal environment for nurturing pension plan surplus, according to the Salomon report.

In an interview, Martin L. Leibowitz, managing director at Salomon Brothers in New York, calls the huge surplus a "corporate treasure chest."

One investment implication, he said, is that sponsors with huge surplus ratios might seek to reduce their risk tolerance to a very low level to avoid losing the "prize" that already has been won, so the surplus ratio isn't a hostage to market forces as it has been.

Some sponsors might look for an investment strategy to insulate the surplus ratio as much as possible from changes caused by the effects of rising and falling capital markets on pension assets and liabilities. Such strategies might include hedging techniques like surplus insurance or bond portfolio immunization. The authors, although not recommending any investment course, said such a policy depends on a sponsor's tolerance on risking the surplus.

But both studies show the volatility of pension surplus since 1980 and demonstrate how vulnerable the surplus is to capital market movements and can radically change from month to month.

They upset previous research conclusions made by investment banking analysts and pension consultants that corporate pension surplus has grown steadily in this decade as soaring investment returns dramatically increased pension assets.

"The sense of comfort in the stability and growth of funding ratios is unfounded," the Salomon study reports.

Both studies retroactively reexamine corporate pension liabilities under market interest rate assumptions required under the Financial Accounting Standards Board's Statement 87.

Going back to 1980, the studies recalculate accrued pension liabilities using the FASB 87 market interest rates, instead of the more conservative actuarial interest rate assumptions of the Accounting Principal Board's Rule 8.

Their findings show that for most of the years since 1980 the rise in pension liabilities caused by falling interest rates has outpaced the dramatic rise in pension assets caused by exceptional investment returns.

Mr. Leibowitz, along with two Salomon colleagues, Lawrence N. Bader, vice president, and Ardavan Nozari, analyst, re-examined on a FASB 87-equivalent basis the pension liabilities and assets of the Fortune 500 companies. The study accepts asset values as reported by the companies, but adjusts liabilities with market interest rates as the discount factor instead of the non-market actuarial rates used by the group.

Jeremy Gold, principal in the New York office of Morgan Stanley, has a more abstract analysis, although it uses a similar methodology. It computes the changing pension surplus of a fictitious "typical plan," showing only the capital market effects on pension liabilities and assets. To arrive at asset value, Morgan Stanley assumes the typical plan has kept an asset mix of 60% in the Standard & Poor's 500 stock index, 30% in 10-year government bonds and 10% in three-month Treasury bills. Pension liabilities represent those of a typical sponsor, Mr. Gold added.

Both studies show surplus ratios — the market value of pension assets to the discounted value of accrued liabilities — have been highly erratic rather than the smooth growth as perceived.

The aggregate Fortune 500 ratio for year-end 1980, as actually reported by the companies using non-market, pre-FASB interest rate assumptions, was 99%, meaning the pension plans were slightly underfunded.

By contrast, the Salomon study discounted the same liabilities using FASB 87 market interest rates, finding the ratio in 1980 was 186%, meaning the plans actually had nearly double the assets over liabilities.

Morgan Stanley's market-adjusted data puts the 1980 surplus ratio at 157.22% for a typical plan.

"People didn't recognize the (huge surplus) ratio in 1981," Mr. Bader said in an interview.

"FASB is the key issue," said Salomon's Mr. Arnott.

"In the absence of FASB, this (surplus) would have disappeared in a myriad of amortization schedules."

Mr. Leibowitz said the significance of the findings is that the true market value ratio is now visible. In 1980, under the old non-market assumptions, the huge surplus remained hidden. As a result, sponsors were unable to comprehend its significance and accordingly revise their investment objectives and corporate finance activities.

Their objectives had been to protect the pension liabilities when they should protect their surplus, he added.

The studies, however, don't account for any reductions in pension contributions sponsors conceivably might have made in the early 1980s had they reported such huge market-adjusted surpluses.

Despite the growth in assets, the studies show the huge market-adjusted surplus was erratic and declined by year-end 1986. As of the end of December, Salomon put it at 147%, while Morgan Stanley placed it at 132.96%.

But the past eight months witnessed a favorable rebound in the ratio. Salomon put it at 197 as of Sept. 1 and Morgan Stanley, at 167.05 as of Aug. 31.

The surplus ratio shows the extent the market value of pension assets exceed the accrued pension liabilities, discounted at current market interest rates. Mr. Leibowitz said the study didn't examine the liabilities of projected benefits, or those that take into account future service and salary increases because such data weren't disclosed by corporations before FASB 87.

An actuary consultant not involved in either studies, William Partridge, Wyatt Co., Chicago, was less sanguine about the huge surplus ratios, pointing out they show overfunding on a termination basis, not on a projected obligation basis, which considers a plan on an ongoing basis.

"On a termination basis, it's a very healthy plan," one with a ratio above 175%, he said. "But I wouldn't say the game's won."

"You need to understand the industry and particular company and look at (employment) growth prospects," he added.

He agreed, however, that companies with ratios above 175% reach or approach the point of not having to make contributions, though he noted that contributions are based on different actuarial methods than FASB's.

The intent of the studies is to get sponsors to focus on the surplus caused by changes in both pension assets and liabilities, the authors said.

The Salomon data, using Fortune 500 sponsors, takes into account other changes, such as in pension plan design, as well as capital market factors that cause the asset-to-liability ratio to rise and fall.

Mr. Gold noted the Morgan Stanley index identifies only the capital market forces that influence the surplus ratio.

He said Morgan Stanley plans to update its surplus ratio monthly and publish it as the Morgan Stanley Pension Surplus Index. Morgan Stanley set the initial ratio at 125% as of Jan. 1, 1980.

Mr. Gold said the new index will allow a sponsor to compare the performance of its own plan and analyze the reason for any difference.

The Salomon study noted a sponsor with a high ratio — one greater than 175% — has met all the objectives of funding and "has the prospect of not having to contribute to its plan, even allowing modest plan improvements, such as cost-of-living increases for retirees.

"Apart from cashing in on its surplus through a plan termination, the company has little tangible benefit to be gained by further surplus growth. At this point, the sponsor may view the rewards of extending the surplus as minimal (or possibly even negative). The sponsor's risk tolerance may, therefore, drop to an extremely low level, as the goal becomes to avoid losing the prize that has already been won."

The Salomon study projects year-end 1987 ratios, based on the current ratios and various market scenarios. Essentially, it shows that if both S&P 500 and interest rates fall during the next four months, the surplus ratio will erode significantly. If both rise, the ratio will increase accordingly. If the S&P 500 falls but interest rates rise, the ratio could be unaffected, depending on the amount of the market changes. But if the S&P 500 rises and interest rates fall, the ratio could erode somewhat.

Besides the 60-30-10 equity-bond-cash asset mix, the Morgan Stanley index shows the performance of the surplus ratios based on other investment strategies — all equities, all bonds, all cash or all immunized bonds. Those aggressive strategies produced highly erratic ratios as well since 1980.

For example, the Morgan Stanley index 100% invested in equities, since Jan. 1, 1980, would have seen the surplus ratio change from 174.37% at year-end 1980 to 172.42% at 1981, to 150.59% at 1982, to 179.36% at 1983, to 161.06% at 1984, to 155.19% at 1985, to 146.34% at 1986, to 209.65% Aug. 31.

The all-bond and all-cash investment strategies produce similarly erratic ratios, rising to respective highs of 134.81% and 184.8% and ending, respectively, at 115.68% and 103.93% Aug. 31.

The all-immunized strategy showed the ratio stayed at 125%, where it initially was set. ■

## Pension surplus ratios

| Year-end | Market adjusted: Salomon Brothers[1] | Market adjusted: Morgan Stanley[2] | Pre-FASB 87 Fortune 500[3] |
|---|---|---|---|
| 1980 | 186% | 157.22% | 99% |

MORE POWER TO YOU

Introducing Utility Index Options At The PHLX

The Philadelphia Stock Exchange announces an electrifying new contract—Utility Index Options. This European-style contract, consisting of 20 geographically diverse NYSE electric utility stocks, allows investors to plug into a wide range of opportunities. Now, more than ever before, the PHLX is *the* international market for creativity, flexibility and convenience.

Put more power into your trading strategies. Contact your broker or the PHLX for full information on trading Utility Index Options.

PHLX Utility Index Contract Specifications

| | |
|---|---|
| Symbol | UTY |
| Exercise Price and Premium Quotations: | Dollars/Cents 1 point = $100 |
| Expiration Cycles: | Five expiration months—two nearby months plus three successive months from the Mar. Jun. Sep. Dec cycle |
| Position Limits: | 8000 Contracts on same side of market |
| Issuer and Guarantor: | Options Clearing Corporation |
| Principal Amount: | 1 Contract = $100 x Index Value |
| Trading Hours: | 9:30 AM to 4:10 PM Eastern Time |
| Delivery Procedure: | European-style exercises are restricted until the last trading day prior to expiration Saturday |

# 'Quant' . . .

*Continued from page 3*

At Xerox Corp., Stamford, Conn., Gerald J. Paolini, manager-trust investment strategy, said, "I would expect quant managers to trade for below average (in terms of cost of commissions per share), because they don't get the benefit of research."

Xerox uses a quantitative approach in investing some of its $2.3 billion in employee benefit assets with outside managers.

Theodore R. Aronson, partner at Aronson & Fogler, agreed with Mr. Paolini.

He reasoned commissions paid per share should be lower for quantitative managers because they are buying a widely diversified portfolio of stocks, whose trading isn't driven by current events.

Stock "picking and trading are all done by machine," he added. "It's usually a machine-to-machine transaction. If that isn't worth some saving, then what are all these cuts on Wall Street?" He was referring to recent personnel cuts at brokerage firms.

Typical equity managers generally pay higher commissions because they seek analysts' opinions, first calls on new issues and other research advantages, he said. "All that has costs attached to it," Mr. Aronson added.

"Aronson & Fogler totally unbundles trading from fees," he added. "We don't do anything for soft dollars."

Daniel J. Schweihs, principal, Disciplined Investment Advisors, said his firm doesn't buy outside research, "so we should have lower commission costs."

He suggested quant managers paying higher-than-average commissions might be paying for marketing assistance or other services.

"I don't think they will do it long term," he added. "Their plan sponsors will require them to lower their commissions."

At Mellon Equity Associates Corp., Pittsburgh, Geoffrey Gerber, senior vice president, said, "We're lucky to have a very good trading desk." He said his firm's trades are pooled with all trades of all Mellon Bank's other investment affiliates, excluding Mellon Capital Management Corp., San Francisco, which runs indexed funds, to reduce costs through economies of scale.

Mr. Aronson suggested sponsors not let the price of commissions override all other investment considerations.

"I don't think sponsors should be uptight if commissions are 8 cents or a dime," he said. "If (total) fees" — trading costs plus investment management fees — "are lower, it all comes out of the same pocket, so what's the difference?"

He noted although his commissions are lower per shares, Aronson & Fogler's investment management fees "are high," 1% of assets run. Even so, he said, Aronson & Fogler's total costs — commissions plus fees — ought to be about as low as those quantitative managers that charge low fees but pay high commissions.

The use of quantitative strategies is relatively new but growing rapidly (*P&I Age*, Sept. 21).

About one-third of the managers surveyed entered the field in the past two years.

Fewer than half have been running money in the strategy for at least five years.

Some of the biggest managers, in terms of assets in the strategy, are among the newest, including Rosenberg Institutional Equity Management, Orinda, Calif., which was started by Barr Rosenberg two years ago and now has $2.3 billion from 19 tax-exempt clients.

Trinity Investment Management Corp., the largest quant manager, with $4.7 billion from 89 tax-exempt clients, is one of the oldest, begun in 1981.

Other data were more difficult to compare. For example, methods for calculating betas, a measure of volatility, varied among managers.

Some calculate their beta on a prospective basis; some run a regression, based on their actual portfolios to arrive at it; and some use historical data. As reported by the managers using varying methods, betas ranged from 0.88 to 1.2. ■

# Reversion . . .

*Continued from page 3*

Life Insurance Co., New York, and $10 million from Lincoln National Pension Insurance Co., Fort Wayne, Ind. It will purchase more annuities in January.

After reviewing eight or nine competing bids from 15 different insurance companies, Ceco chose "the highest quality companies that offered to do it for the lowest premium," Mr. Rohwedel said.

There will be no changes in pension staff as a result of the termination.

The new plan will be an account-based defined benefit plan in which each employee has an account earning a fixed, guaranteed rate of return. Bank of America Corp., San Francisco, is among the small group of companies using the new type of plan.

"It combines the best worlds of a defined benefit and defined contribution plan. Usually those plans are pretty expensive to provide if the (employee) population is a mature group," said Gary Montesano, a consultant at William M. Mercer-Meidinger-Hansen Inc., New York.

But in the case of Ceco, the plan "will provide some cost savings and it's more flexible and easier to administer" than ordinary defined benefit plans, said Nancy Nasser, manager of corporate pension administration.

The new salaried account-based defined benefit plan will credit to each employee's account 4% of FICA-taxable earnings and 8% in excess earnings of the taxable wage base at the end of each year, Ms. Nasser said. ■

# LDC debt . . .

*Continued from page 1*

manager with about $130 million in assets, declared: "I'm not sure anyone can make it attractive enough. You can't pay me enough to compensate for the risk. American institutions can't make a case for us that we've made a prudent investment."

Institutional investors view the risk inherent in Third World debt as mind-boggling and very hard to assess.

"It's a different ball game," said Landon Thomas, vice chairman of Fiduciary Trust Co. International, a New York global manager with $17 billion under management. Mr. Landon, who thinks the idea of selling Third World debt to investors has merit, nevertheless, cites the need for a "whole different kind of country analysis."

Institutional investors say they aren't equipped with the expertise or analytical tools to examine and quantify the risk associated with rampant economic and political instability, gyrations in foreign currencies and hard currency availability in a given country, and the potential for default in the developing world.

Many investors also questioned how soon the liquidity of the relatively small market would increase and attract more participants.

"You need people to make markets in these things," said Richard Lindquist, assistant vice president at T Rowe Price Associates.

Investment bankers expect the secondary trading market in less developed countries' bank loans to grow rapidly during the next few years and to begin to attract non-financial institutions.

Today, trading volume is relatively small, at more than $8 billion, compared with the $350 billion potential size of the market, according to Salomon Brothers Inc., New York. Trading is dominated by banks, which use the technique to make portfolio adjustments.

Salomon Brothers predicts trading volume may reach $10 billion to $15 billion face amount by year-end 1987.

Active participants today are about 250 banks and 50 non-financial institutions, up significantly from only 50 banks a few years ago.

Corporate pension fund executives and money managers with fiduciary responsibility for the investments they make on behalf of their companies or clients said they don't consider Third World debt a prudent investment. Managers of pension funds that fall under the Employee Retirement Income Security Act, including corporate pension funds, must meet the "prudent man" rule. "As a fiduciary I have a real problem with this," Mr. Sullivan said.

Leonard Chaikind, administrator of the $5.8 billion pension fund of Shell Oil Co., Houston, said he thinks Third World debt would be too risky for a pension fund. "It wouldn't be a prudent investment," he said.

These investors think it would be hard to make a convincing case for Third World debt to their bosses or the investment committees that oversee investment plans.

Investors also worry there is no way to adequately guarantee countries will make their payments, not default on their payments or unilaterally decide to stop making payments.

Nor do they see Third World debt investments in the same light as straight equity investments in a private-sector business in a particular country. For them, a debt investment is viewed as much riskier than the more common investments in the stocks of companies in developing countries that are traded on foreign stock exchanges. They see Third World debt investments as a big jump from pure equity investments, not necessarily a logical next step in line with the globalization of the market.

* Yields calculated assuming average LIBOR of 8.125% and average spread of 1%, equals a 9.125% current coupon
Source: Shearson Lehman Brothers, N.Y.

"I'm leery of the debt side," said Dan Jacobs, vice president at Templeton International, Fort Lauderdale, Fla., which has about $9.6 billion under management. "We'd rather buy stocks in these countries than debt."

Investors also said current yields, which range from 10% to 23%, aren't high enough to attract them. They agree yields would have to be in the 25% to 30% range to bring them in as buyers.

"The yields haven't gotten to the right level yet," said David Fisher, chairman at Capital International Ltd., a subsidiary of The Capital Group Inc., which manages more than $35 billion. "But they will."

Some investors said there are plenty of solid, lower-risk foreign investment opportunities for them to tap than investing in Third World debt.

And there are other more incidental concerns, including worries that such investments would mean administrative nightmares. For many global investors, investing in foreign equities has meant major administrative headaches. They worry Third World debt investments will mean more of the same.

While most institutional investors will clearly be a hard sell when it comes to buying Third World debt, there are a few exceptions.

"This is the same way people reacted to securitization of the mortgage market a few short years ago," said David G. Bronner, chief executive officer of the $5.4 billion Retirement Systems of Alabama, Montgomery.

"But then the spreads got right and the AAAs came," he said, and the unconverted "started listening."

Mr. Bronner said if Third World debt investments were structured properly, offering protections investors desire such as letters of credit, they eventually will attract investors to the market.

"It'll take time, but we (institutional investors) will one day be an important factor in the market," Mr. Fisher of Capital International said. ■

# Bankers hard at work

NEW YORK — Lured by the potential of a largely untapped multibillion-dollar mound of Third World debt, just about every major Wall Street investment bank is working on a way to transform the debt into bonds and other securities that will attract institutional investors.

Drexel Burnham Lambert Inc., Merrill Lynch & Co., Salomon Brothers Inc. and Shearson Lehman Brothers Inc., all of New York, and others are putting lots of time, effort and money into figuring out how to package the loans and sell them to investors in the form of high-yield, high-risk bonds and other securities. A few countries also are promoting their own ideas.

Bankers and developing country finance ministers agree on two things: the effort calls for a new way of thinking about a very old crisis, and institutional investors are not going to take the plunge easily.

"Saying there is broad-scale institutional investor interest in acquiring these assets is whispering in the wind," said Jay H. Newman, senior vice president at Shearson Lehman.

"This is an emerging market. It'll take time. These have to be made attractive to lure them in."

Still, the bankers are confident they can devise various instruments to transform debt into securities in such a way that investor concerns will be eased and they will view the investments as attractive.

"What will make institutional investors buy? Stability in the Third World first and foremost," said John Heimann, vice chairman of capital markets at Merrill Lynch. "The problem won't be solved by innovative financial instruments. It will be by stabilizing payments and building confidence. Then the new instruments will flow and the investors will be there."

In the meantime, Wall Street bankers are trying to adapt standard financing techniques for sovereign debt and develop totally new structures for Third World debt instruments.

Salomon Brothers officials are studying how exchange offers used for corporate restructurings, an as-yet untried technique for restructuring less-developed countries' sovereign debt, might be applied. In exchange offers, existing loans are exchanged for new securities.

Stephen W. Dizard, vice president and senior trader in Salomon Brothers' international loan trading group, said sovereign and corporate exchanges share certain characteristics, although each has distinctive features. He said the characteristics of the less-developed countries' restructuring process indicates this type of refinancing has important but limited applications.

Drexel Burnham Lambert junk-bond king Michael Milken is hard at work on a scheme to securitize Third World debt. Bank debt would be purchased and traded for an equity investment in a solid revenue generator like a hydroelectric plant. Then the equity investment in essence would be used in fashioning an asset-backed security. Revenue from the plant backs the security.

At Shearson, Mr. Newman said the firm is focusing on equity, not debt, by syndicating projects like hotel resorts in Mexico. So far banks have been the main players, but he expects other non-financial institutions to be drawn to the idea later on.

"We think the first investments by institutional investors will be in equity investments, not high-yield instruments," Mr. Newman explained. "With equity deals, you can devise attractive structures and there are plenty of attractive equity investments in countries."

Meantime, teams of Wall Street professionals are working on ways to evaluate, measure and quantify country risk, which would go a long way toward alleviating perhaps the biggest concern of investors.

"It's hard to analyze the risk, but it can be done," said John F.H. Purcell, vice president-corporate bond research at Salomon Brothers.

Mr. Purcell is spending a good deal of time thinking and working on country risk analysis.

"We have to start from scratch. There are some truths about the risk that we can tell," he said. "We can isolate the variables that impact value; we can explain the characteristics of sovereign debt; we can quantify ability to pay."

Also on the drawing board are pools of Third World debt designed to spread the risk that would be somewhat similar to emerging markets growth funds.

Solutions to the Third World debt crisis have surfaced and faded for years on Capitol Hill, in banking and academic circles, and among developing country leaders and experts.

But in recent weeks, spurred by a host of developments on Third World debt, the issue is back at the forefront. The debt crisis and possible solutions were predominant topics at the International Monetary Fund's annual conference in Washington last week.

Ever since Citicorp took the bold step this summer of boosting its loan loss reserve by $3 billion and said it would reduce its loans to less developed countries by a third during the next three years through debt-to-equity swaps, attention has turned to the innovative ideas coming from Wall Street and borrowing countries.

Several securitization ideas have been floated by countries. Mexico and Brazil are looking at commodity-linked securities, which could be tied to oil revenue for major producers. Brazil has mentioned performance-related securities. Various countries have cited zero-backed securities. Credit-enhanced instruments, perhaps with a role for the World Bank, also have been suggested.

Debt-equity swaps also are generating some attention from multinational companies that may consider using the swaps as a way to capitalize the operations of overseas affiliates.

# Claim . . .

*Continued from page 2*
at creating jobs.

The assets under Tower's management included $25 million from the union's individual retirement account plan and $6.5 million for the much larger defined benefit plan, now exceeding $600 million in assets.

The 2nd U.S. Circuit Court of Appeals upheld Sept. 17 a ruling that Tower Asset funneled those assets into 26 companies for which its investment banking parent, Tower Capital Corp., and broker-dealer unit, Tower Securities Inc., were arranging financing. (The firms are not related to Tower Capital Management Inc., Avon, Conn.)

In addition, the three principals of the firms — Andrew A. Levy, Samuel Kovnat and W. Randolph Wheeler — were found to have had equity stakes or controlling interests in some of the companies.

However, the three companies and their principals denied having fiduciary responsibility for the investments, saying they had made some of the investments at the direction of some of the labor trustees. In particular, they argued Mr. Lowen directed the firm to invest in certain projects that would create jobs for union members.

Mr. Lowen's court papers denied those charges, as well as others made by the Labor Department and by plan participants. He declined to comment on the litigation.

Attorneys for Tower and the Labor Department also declined to comment.

But it is all bad news for the Linthicum Heights, Md.-based union, which represents some 10,000 members who work as deck officers on oceangoing vessels, tugboats, barges and other ships.

Like the rest of the merchant marine industry, the Masters, Mates and Pilots union has fallen on hard times. Oceangoing ships under contract have declined to 100 from 340 in 1982 and about 1,000 in 1968, said Mr. Hayes.

Mr. Hayes, who was involved in filing one of two class-action suits against the trustees, claims he was thrown off the retirement plans' board of trustees in June 1985 after he questioned Tower's investment activities. In addition, he won reinstatement to his union post earlier this year after he was discharged for circulating among union members an article on the Labor Department's lawsuit against the trustees and Tower.

Mr. Lowen — who also serves as chairman of the investment committee — with perhaps the help of one or two other union officials, arranged for Tower Asset Management to invest defined contribution plan assets in maritime-industry companies, according to Mr. Hayes, Tower defendants and the Labor Department.

The contract was approved in 1983 by the board of trustees; sources claim management trustees were unaware of the arrangement to focus investments on the maritime industry.

An initial allocation of $15 million of the defined contribution plan was boosted to $25 million before Tower took control of the assets April 14, 1983.

A second contract with Tower, involving some $6.5 million of the defined benefit plan's assets, was executed Nov. 9, 1984, to help finance the "acquisition of seven more ships which the trustees had already determined to acquire in a joint venture" with another individual, Tower defendants allege.

Tower invested a total of $9.15 million in American Heavy Lift Shipping Co., which then bought five tankers and two heavy-lift cargo ships from Gulf Oil Corp.

In June 1985, Mr. Lowen reportedly directed Tower Asset to stop making investments except in government securities or to protect existing holdings, and alerted the Labor Department the firm might have violated ERISA.

The trustees fired Tower Asset Nov. 4, 1985, transferring the assets to 655 Associates, a subsidiary of The Gabelli Group Inc., New York. A Nov. 22, 1985, report to Mr. Lowen from a Gabelli subsidiary cited concern "that a number of the portfolio companies have either gone out of business or are insolvent with substantial current liabilities."

In particular, four companies of which the plans owned 100% of the common stock lacked money to cover their interest payments, the report said. Three of those companies were in the maritime area — including American Heavy Lift — and the fourth was a real estate concern.

In December 1985, the union plan trustees sued the Tower companies and principals, charging them with violations of their fiduciary obligations under ERISA.

However, publicity of the investments led to two class-action suits by plan participants against both the Tower defendants and the plan trustees. The suits later were consolidated.

In February 1987, the U.S. District Court for the Southern District of New York held the Tower defendants had received fees and commissions totaling $1,087,787 or stock interests or both from at least 26 companies in which plan assets were invested. The court ordered the defendants to turn over the fees plus the plans' then-undetermined investment losses.

In March 1987, the Labor Department separately filed suit against the trustees and Tower defendants. In an amended complaint filed in June, the department claimed the trustees did not conduct any independent investigation of the money manager, failed to monitor the investments and did not solicit bids from other investment advisers.

The department further charged Tower had failed to adequately diversify the investments, noting 20% of the defined contribution plan's total assets were invested in risky maritime-related ventures, while virtually the entire $6.5 million pension plan account was invested in such companies.

Echoing charges made by Tower, the department also said Mr. Lowen and trustees Allen Scott and Lloyd Martin directed some of the investments and participated in negotiations concerning the investments.

The Labor Department alleged that as of Tower's termination, the value of the defined contribution plan account was down to $7.7 million from $25 million, while the pension plan account had shrunk to $1.8 million from $6.5 million.

In a strongly worded decision, the appellate court held Tower defendants could not avoid fiduciary responsibility: "Under ERISA, an investment manager's fiduciary obligations may not be turned on and off like running water."

Five days later, a federal magistrate concluded the plans had incurred damages of $34.2 million in lost principal and income stemming from Tower's management. Some of the assets, however, have appreciated substantially since Tower was fired.

# First Boston . . .

*Continued from page 3*
the bond market slump, which kept some issuers on the sidelines. The bond market's lack of direction proved to be vexing to issuers, said Robert G. Scott, a managing director at Morgan Stanley & Co.

"The market was difficult in that it was dominated by technical considerations like the dollar and the trade balance," Mr. Scott said.

"We had many weeks during the third quarter when the market was very focused on a particular technical situation like the trade deficit and in many cases these announcements turned out to be inconclusive and just didn't provide direction to the market."

Drexel Burnham Lambert Inc., jumped to fifth place overall after ranking seventh in the second quarter.

Drexel made its gain despite speculation about a federal inquiry into some of the firm's dealings.

"As time goes on, it's less of an issue in terms of soliciting business," said Gerald L. Brodsky, a managing director at Drexel.

The firm's ranking among bulge-bracket firms resulted in part from the $1.5 billion high-yield debt deal for E-II Holdings, a newly formed company that operates businesses formerly owned by BCI Holding Corp.

PaineWebber Inc. made the biggest move in the overall rankings, catapulting to 10th after placing 20th in the second quarter.

Jack Perkowski, PaineWebber's director of investment banking, played down the jump, saying 20th place was an aberration for the firm.

The firm's third-quarter decision to start underwriting closed-end funds accounted for some of its rise in the tables, Mr. Perkowski said.

A $1.26 billion high-yield debt offering for Harcourt Brace Jovanovich Inc. helped put First Boston in the top spot.

"It was kind of our turn to come to the party," said Robert L. Cooney, a managing director. "We have continued to penetrate new sections of both the equity and high-yield markets."

He attributed some the firm's strong third-quarter showing to its merchant banking activities.

In the HBJ recapitalization, First Boston provided a $901 million bridge loan that was repaid with part of the Sept. 18 high-yield debt offering.

Merchant banking, in which investment banks make short-term loans to speed completion of a buy-out, also contributed to heavy volume at Merrill Lynch Capital Markets, which was sole manager of a $1 billion debt transaction for Borg-Warner Holdings Corp. and a $700 million deal for Supermarkets General Holdings Corp.

"Those financings are a reflection of our success in proposing leveraged buy-outs and then refinancing the bridge loans," said Barry S. Friedberg, director of investment banking at Merrill.

Acknowledging the risks involved in merchant banking, he said careful management and sound credit analysis are "what the control and measurement of risk is all about. We feel comfortable with what we are doing."

Merrill Lynch's role as the book manager in the $1.2 billion Citicorp equity offering — the biggest sale of stock in the quarter — also ensured its position among the bulge-bracket firms.

A merchant banking relationship in the buy-out of Burlington Industries Inc. helped Morgan Stanley & Co. become the sole manager in the $1.3 billion sale to the public of Burlington Holdings Inc. high-yield debt Sept. 23. Burlington Holdings also sold $384 million of debt to The Equitable Life Assurance Society of the United States.

"One of the things you notice when you look at the quarter is there was a lot of high-yield financing," said Morgan's Mr. Scott. "A lot of that financing was in the pipeline, basically associated with transactions earlier in the year."

The underwriting business looks strong for the fourth quarter, he added.

"More and more economists and market strategists are becoming pretty negative about the prospects for rates in 1988 and we are beginning to have conversations with issuers about pre-funding their 1988 requirements now. That could result in pretty substantial additional volume in the fourth quarter," he said.

Drexel officials expect a busy fourth quarter in the high-yield business, Mr. Brodsky said. "We see a tremendous inventory and volume that has to get done before the end of the year."

Much of the the fourth-quarter volume depends on the markets, Mr. Friedberg noted.

"Our fourth-quarter volume could be better than our third-quarter volume if the markets will let us get all the business off that we have in front of us." ■

# Bottom line . . .

*Continued from page 1*
tween 110% of termination liability and 150%, but once those liabilities and assets start to move around, it's going to be difficult for companies to maintain that level," said Richard Raskin, consulting actuary with The Wyatt Co., New York.

For some companies this will mean slower funding — at least at first.

"Companies with a lot of assets won't be hurt right away because they aren't going to contribute anything," Mr. Raskin said. "But at some point they are going to have to pay the piper."

The bill's provision, which would raise $3.9 billion during the next three fiscal years, is the most likely from among a list of revenue-raising options in the pensions area expected to be taken up the Ways and Means Committee this week.

The panel already has signaled its disapproval of employers using pension plans as a tax shelter. Earlier this year it approved a proposal doubling the 10% tax on reversions of excess pension funds to 20%. This adds to the probability the measure will be taken up.

Observers expect the Senate Finance Committee to hold off taking action on any similar pension proposal.

"The Finance Committee doesn't want to play 'Profiles in Courage' until they see what Ways and Means is going to do," said Stuart Brahs, executive director of the Association of Private Pension and Welfare Plans, Washington.

The Ways and Means Committee met behind closed doors Oct. 1, but did not vote on any proposals because of disagreements between Democratic and Republican members. At press time, the committee still was scheduled to reconvene on Oct. 7.

Both the House Ways and Means and Senate Finance committees are looking at a list of more than 200 revenue-raising options suggested by the Ways and Means and Joint Committee on Taxation earlier this year (*Pensions & Investment Age*, July 13).

The full-funding limit is considered vulnerable because it would raise $600 million in 1988 and $3.9 billion during the next three years and hasn't been as vociferously opposed as other options, according to sources on Capitol Hill and within the administration.

The measure is being opposed by the APPWP, which warned Ways and Means Chairman Dan Rostenkowski, D-Ill., in a Sept. 29 letter that "it is counterproductive to make arbitrary changes in limits for well-funded plans that could have a negative impact on their long-term financial security."

Companies with new pension plans and young work forces could be hit particularly hard by this change. Employers, in order to avoid being taxed, would inadequately fund their plans during the early years and would be forced to back fund as their work force grows older.

There could be problems in later years when the employer must contribute a much larger amount if for some reason it can't afford those payments.

Another disadvantage is the money wouldn't be there early to collect investment income.

"This increases employer real costs as well as shifting more of the costs to future years," not to mention further discouraging the establishment of defined benefit pension plans, according to APPWP's letter.

Last week, the Ways and Means Committee had been expected to close the loophole in the Tax Reform Act of 1986 that allowed an estate to exclude from taxation 50% of the sales of the stock of an ESOP. This option, which is not controversial even to the Employee Stock Ownership Plan Association, is still seen as a shoo-in.

This change would generate $1.3 billion in fiscal 1988 and $4.8 billion in the next three fiscal years.

Other options previously listed by the tax committee staff affecting pension funds and ESOPs, including a possible 5% tax on investment income of pension trusts and other tax-exempt organizations, are still on the table, but aren't seen as being in grave danger of making it into the budget reconciliation bill. ■

# Fund managers flee bonds

By Jacqueline Dutton

Pension funds moved a record amount of money out of bonds and into cash equivalents during the second quarter, a reaction to rising interest rates that, in turn, weakened institutional demand for bonds and fueled additional rate hikes.

Rising rates then increased the cost of capital for corporations and government.

In data gathered for its quarterly investment report to be released Oct. 26, the Employee Benefit Research Institute, Washington, said the bond market lost a net total of $5.9 billion during the second quarter, surpassing the record of $4.7 billion in the second quarter of 1985.

In addition, private pension funds liquidated $4.4 billion in stocks during the second quarter, only a fourth of the record net total of $16.7 billion in stocks they sold during the first quarter.

"It's not an incidental blip," Thomas Heneghen, director of Prudential Fixed Income Advisors, Newark, N.J., said of the bond shift. "It's part of an ongoing trend."

Mr. Heneghen said the EBRI numbers don't mean bond managers lost business. "We are seeing more and more portfolios reconfigured into dedicated and immunized bond portfolios," he said. With a rise in rates predicted and consciousness of the provisions of Financial Accounting Standards Board Statement 87 increasing, executives are more interested in covering long-term pension liabilities.

But Mr. Heneghen said pension fund executives aren't about to put all of their money into long-term, liability-oriented portfolios. The remainder of their bond assets have moved out of the intermediate- to long-maturity range and into short-term securities, because "this is where real returns will be made."

The tendency to move into short-term issues explains, in part, the outflow of funds in the bond segment of the EBRI data. According to Joe Piacentini, an EBRI researcher, the institute considers issues with maturities of less than one year to be cash, not debt, instruments.

Fixed-income managers at Oppenheimer Capital Corp., New York, have been finding more relative value in short-term bonds and have been moving money in that direction for six to eight months, said Robert Bluestone, director of fixed income.

Paula Trenier, senior vice president and director of fixed-income research at Frank Russell Co., a Tacoma, Wash.-based consulting firm, said Russell's clients are hiring short- and intermediate-term fixed-income managers. Although motives vary, she said, fund executives generally are shifting into shorter maturities for strategic purposes, including building up a reservoir of funds that can be liquidated easily to pay for unanticipated and constantly growing retirement

Corporate borrowers and their investment bankers, confronted with the highest interest rates in two years, are scurrying to fashion strategies that reduce the risks and costs of borrowing in a bear market.

Interest swap is becoming a more entrenched part of the new-issue debt market because of the rising rates.

"In a bull market when the 30-year (Treasury) note yields are attractive and industrial companies are using the public new-issues market because they see that long-term rates are attractive, a much lower propor-

# Bill boosts ESOP role

By Nicky Robertshaw

WASHINGTON — Employee stock ownership plans would become powerful defensive weapons in the corporate anti-takeover arsenal under a bill reported out by the Senate Banking Committee.

The bill contains two key provisions enhancing the attractiveness of ESOPs in takeover situations:

- A company with at least 10% of its stock in an ESOP for at least six months would have 95 days — nearly triple the time that would be allowed other target companies — to fight off an outside takeover bid.
- ESOPs could tap surplus pension assets to launch a defensive bid; otherwise, surplus assets couldn't be used to finance takeovers by either management or corporate raiders.

"The lawyers will find a way to use the ESOP abusively," said Robert A.G. Monks, president of Institutional Shareholder Services Inc., Washington. If the bill becomes law, companies will set up "closet ESOPs" that will be activated in the event of a takeover bid so the company or an outside raider can reap the advantages, he said.

Mr. Monks noted members of management also serve as trustees for ESOPs in many cases, increasing the potential for abuse.

"I feel confident that the courts would not allow the ESOP trustee to do the wrong thing with the funds," said Leigh B. Trevor, a partner with the Cleveland law firm of Jones, Day, Reavis & Pogue and head of Stakeholders in America, a group of corporate executives.

While noting he had not yet studied the provisions of the bill, Mr. Trevor said because of the fiduciary requirement that trustees act in the interest of participants, any potential for abuse would be accompanied by scrutiny in the courts.

The two provisions were included in S. 1323, the Tender

# PBGC 'security interest' bid

By Nicky Robertshaw

WASHINGTON — Employers with severely underfunded pension funds would have to put up a security interest under a proposal intended to reduce the Pension Benefit Guaranty Corp.'s risk.

The proposal is one of six Assistant Secretary of Labor David Walker, the Reagan administration's top pension official, has vowed to push as pension reform legislation enters the final stages.

His other priorities:

- Establishing a variable-rate premium to ensure the agency can cover both current and future guaranteed benefit liabilities.
- Setting minimum funding standards and related transition rules to prevent the gross funding deficiencies that have resulted in significant losses to both participants and the PBGC.
- Preventing surplus pension funds from going to participants. Under proposals by the Senate and House labor committees, a cushion of 25% of termination liability goes to the participants if a plan terminates and the company would recoup more than 25% of the assets.
- Funding shutdown benefits, perhaps in a separate trust rather than through the minimum funding standards intended for basic guaranteed pension benefits.
- Clarifying the rules for floor-offset arrangements — the most hotly lobbied part of the legislation — to enforce diversification requirements that limit how much employer stock can be held in these plans.

The administration's hit list emerges as it becomes clear the conference committee will be the final battleground for working out differences among four different bills.

The last of the four is expected to be reported out of the Senate Finance Committee before the end of the month. That proposal is said to be a simplified version of the House Ways and Means Committee proposal, as the committee saves its real fire for conference. Earlier this month, the Senate Labor and Human Resources Committee completed work on its bill, which is similar to that of the House Education and Labor Committee.

Still uncertain is when the conference committee would meet. The only sure things are that it will occur after budget reconciliation bills are completed by the tax committees and approved by their respective houses and by Nov. 20. That's when a budget reconciliation bill must be completed, approved by Congress and signed by the president, or provisions of the Gramm-Rudman-Hollings Act would kick in, requiring automatic across-the-board budget cuts.

The little-noticed requirement that employers with plans funded at less than 70% of termination liability pay some sort of security interest as a "safety net" is part of the administration's attempt to reduce employers' ability to transfer — or "put" — their pension liabilities to the PBGC.

That proposal also includes a provision in which filing for reorganization under Chapter 11 of the federal Bankruptcy Code will not be sufficient grounds to prove distress and, therefore, to dump the unfunded pension liability on the PBGC.

"Reduction or elimination of the put option and improvements in the bankruptcy treatment of pension and other employee benefit claims are essential if we are to provide meaningful benefit security, ensure the credibility and equity of the current system and the long-term financial integrity of the PBGC," Mr. Walker said.

He said the amount of the security interest would be the difference between the current level of funding and 70% of termination liability. He did not specify what form this security interest might take.

This proposal echoes part of an amendment by Rep. John J. Duncan, R-Tenn., contained in the House Ways and Means proposal that gives the PBGC an automatic lien against the assets of a company if its defined benefit plan funding level falls below 70%.

This approach is opposed by the Association of Private Pension and Welfare Plans, Washington.

"In our view, nearly all of the changes you'll be asked to approve will undermine, rather than strengthen, defined benefit plans," APPWP Secretary David G. Marshall said in a letter to Senate Labor and Human Resources Chairman Edward M Kennedy, D-Mass. "We urge the committee limit its action to the two issues which we can all agree are related to the financial soundness of the PBGC: a PBGC premium increase and simple rules to strengthen the minimum funding standards."

"We think this would be damaging to companies and it would change the rules of the game," said Alan Reuther, associate general counsel for the United Auto Workers. Such a law would limit a company's ability to get credit, Mr. Reuther said, which ultimately could put companies out of business and eliminate jobs.

Of the proposal to give the 25% cushion

# *Wary managers up cash reserves*

By Fred Williams

Concern about rising short-term interest rates and moves to protect market gains caused some institutional investors to raise cash reserves in their equity portfolios in the third quarter.

Cash reserves as measured by INDATA, a Southport, Conn., investment analysis service, increased slightly to 7.4% Sept. 30 from 7.1% June 30. But most of the managers tracked by *Pensions & Investment Age* held substantially more cash.

The wisdom of this was proved in early October when the market dropped 244 points.

"In retrospect, institutional portfolio managers probably wished they had been holding more than the 7.4%," said William T. Kennedy, an Atlanta consultant interpreting the INDATA survey. "They are taking it on the chin with this."

At press time, the Dow Jones industrial average had tumbled 390 points since the second week of August when it hit a high of 2722.

The INDATA universe measures 1,202 institutional equity portfolios totaling more than $153.6 billion. INDATA's equity cash reserves have held almost constant from the 7.3% at the end of 1986.

Among managers tracked by *P&I Age*, Hibernia National Bank, New Orleans, began the third quarter fully invested, but ended the quarter with 10% cash reserves, said Robert Rust, vice president and trust investment officer.

"The move up in short-term rates has had us nervous. We've made a lot of money in the market in the first nine months and, on a fundamental basis, it's hard to make a case for the market now. With the direction in interest rates being higher, we decided to hedge our bets and move toward a little cash," he said.

"Unless we see a change in the direction of interest rates, there's not a lot to push this market much higher." Hibernia manages about $1 billion in equities.

The cash position at Lincoln Capital Management Co., Chicago, also was increased substantially, to 10.6% from 2.9% June 30. Lincoln has about $3 billion in equities.

Most of the increase took place in August, said J. Parker Hall III, president: "It's hard to describe, but we raised cash because we felt the market had been so strong and the bond market so weak it was prudent to raise cash reserves modestly."

Equity cash reserves at Sun Banks, Orlando, Fla., increased slightly to 9% Sept. 30 from 8.8% three months earlier. In October,

# Active management outdraws indexing

By Trudy Ring

Active equity managers outpaced indexers in attracting assets in the third quarter, but one huge account pushed bond index funds past active fixed-income firms.

In moves of money reported in *Pensions & Investment Age* during the quarter, $1.07 billion went to active equity managers, while $338 million flowed to stock index funds. Figures are based only on what was published in *P&I Age*; managers may have attracted other accounts.

The equity numbers were similar to those of the second quarter, when active management attracted about three times the amount of assets as index funds (*P&I Age*, Aug. 10). At that time, some consultants said the moves might indicate a belief in value-added management and a suspicion that the period of outperformance by index funds was ending.

Still, a few consultants stressed there's a great deal of interest in passive and semipassive strategies. Quantitative equity manag-

# Defined Contribution

# Smaller funds take reins

By Jacqueline Dutton

The growth of defined contribution plan assets continues to outpace that of defined benefit assets despite indications the market for new plans is becoming saturated.

While consultants interviewed said most of the larger plan sponsors already have set up defined contribution plans, data from the Employee Benefit Research Institute, Washington, shows the asset base of defined contribution plans is growing at a significantly higher rate than defined benefit plans, even though market returns on assets have been at the same level for both types of plans.

Based on figures provided by EBRI, defined contribution plans grew at an annualized 18.7% for the four years ended March 31, compared with 11.8% for defined benefit plans.

Employee benefits consultants interviewed said the growth is coming from the small- to midsize funds that are setting up 401(k) plans as their primary retirement plans, setting up such plans to supplement defined benefit plans, or replacing defined benefit plans with defined contribution plans.

They said many of these new clients held back from starting 401(k)s until this year because they feared the plans might lose their appeal as tax shelters during the course of tax reform. After tax changes were final and the 401(k) emerged as an attractive alternative to the individual retirement account, they said, those fears were wiped out and telephones started ringing (*see accompanying story*).

"We have not seen a decrease in participation in 401(k) plans as a result of tax reform," said Melvin Borleis, managing director-central region in the Deerfield, Ill., office of William M. Mercer-Meidinger-Hansen Inc.

The interest among plan sponsors for starting defined contribution plans reflects an ongoing trend.

Aetna Life Insurance Co., Hartford, Conn., for example, has experienced a dramatic shift in assets from defined benefit to defined contribution plans during the past three years. T. Jerald Moore, vice president-employee benefits division, said in that time total deposits moved from one-third in defined contribution accounts to two-thirds in defined contribution accounts today.

Mr. Moore said most of the new defined contribution plan business came from 401(k)s. Especially popular were 401(k) products that allow employees to choose their investments, and guaranteed investment contracts were a very popular option for those products, Mr. Moore said.

EBRI reports that while the amount of assets in defined benefit plans is greater than the amount of assets in defined contribution plans, the assets of the latter are expanding at a much faster rate.

At the end of the first quarter, there was $644.4 billion in assets for defined benefit plans compared with $395.5 billion for defined contribution plans. But defined benefit plans grew 56%, or 11.8% compounded annually, since March 31, 1983, while defined contribution plans grew 99%, or 18.7% compounded annualized.

Joe Piacentini, an EBRI research analyst, said the reason for these trends is complex. He said some explanation can be found in defined benefit plan terminations, but that's not the whole story.

For instance, he speculated the percentage of defined benefit plan assets being paid out in the form of benefit payments was much higher than that for defined contribution plans. Defined benefit plans are more mature than defined contribution plans, and as defined benefit plans mature, so do their participants, creating a larger population of retirees.

Paul Troup, a consultant with Mercer-Meidinger-Hansen in Atlanta, said he believes defined contribution plan assets will continue to increase at a faster rate than assets of defined benefit plans. But at the same time, defined contribution plan start-ups will slow to a trickle.

"In the past few years we set up hundreds and hundreds of 401(k) plans," Mr. Troup said. "By now almost everyone who was going to get one has got one."

Mr. Borleis said data from a study on defined contribution plans conducted at the end of 1986 reveals more than three-quarters of plan sponsors have set up defined contribution plans.

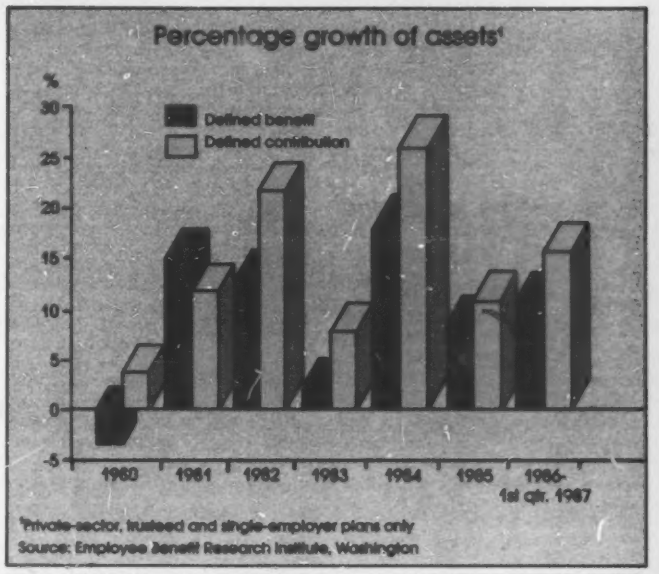
"In 1986 when we did one study covering 824 companies, out of those, 63% had (defined contribution) plans and another 19% were considering them," Mr. Borleis said. "We did another survey at the end of 1986 of 771 public and private plans, and that showed 82% already had some type of defined contribution plan."

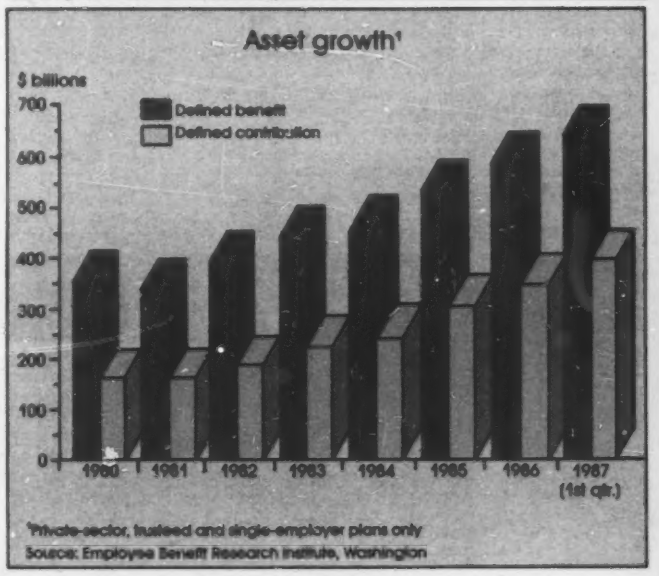
That latter study showed 401(k) plans were by far the most popular defined contribution plan. According to the study, 56% of all defined contribution plans were 401(k) plans, with profit-sharing plans a distant second at 16%. Fewer than 10% of companies with defined contribution plans had established other types of plans.

Employee benefits consultants agree the large-company market for defined contribution plans is saturated. But they said there is room for growth among the small- to intermediate-size companies.

Prudential Asset Management Co., Florham Park, N.J., is getting activity from hospital and union funds that want to set up 401(k) plans. Steve Benson, vice president, said the saving plan is appealing to hospitals because they urgently need to cut costs but fear

*Continued on page 21*





## Managers get crack at assets

By Trudy Ring

Independent investment advisers and internal staff are increasingly popular as managers of profit-sharing plans, while insurance companies' guaranteed investment contracts continue to attract the biggest share of 401(k) money.

Few profit-sharing plans allow employees to direct investments, so those plans' officers tend to pick much the same managers as they do for their defined benefit plans.

"What we've been seeing there for some time is what we've seen for defined benefit plans," said Noel Feldman, consultant in Hewitt Associates' Santa Ana, Calif., office, explaining the growing popularity of non-bank, non-insurance company managers.

While comprehensive data on defined contribution plans are not available, studies have been done on profit-sharing plans.

*Continued on page 20*

## 401(k)s surviving tax reform

By Fred Williams

The Tax Reform Act of 1986 has not had the dampening effect on 401(k) plans many benefits experts once feared, but some believe the law's full effect is still to be felt.

One year after the tax system overhaul, 401(k) plans remain as popular as ever, despite operating under significantly different rules.

Surveys of large corporate 401(k) plans by two major benefits consulting firms have found tax reform has had little impact on employee participation, insignificant disruption caused by the $7,000 annual limit on elective deferrals (from $30,000 under previous law) and minimal hardship withdrawal problems because of enhanced loan activity.

*GRACO Inc., Minneapolis, where this worker stands watch at the controls of a parts machining center, will have to lower the maximum contribution allowed higher-paid employees to pass the new non-discrimination test brought on by the Tax Reform Act*

The changes in 401(k) provisions were designed to generate an estimated $3.4 billion for the U.S. Treasury between 1987 and 1991.

The new non-discrimination test, designed to reduce the disparity in deferrals between highly paid employees and moderate- to low-income workers, has caused some reaction in the $15 million 401(k) plan at GRACO Inc., Minneapolis.

Karen Chapin, benefits manager, said the plan has passed the tests in the past and has allowed contributions of up to 15% of salary, but that will have to be lowered this year to 8% to 10% for the higher-paid employees (those paid more than $50,000) in order to comply.

She said GRACO management also has given some consideration to establishing a non-qualified plan for higher-paid employees.

GRACO has had a loan provision since the plan was established in 1972 and "that has helped us and is part of the reason we have done as well as we have on the non-discrimination tests," Ms. Chapin said.

The $5 billion American Telephone &

# Managers . . .

*Continued from page 15*

According to a study by Hewitt and the Profit Sharing Council of America, Chicago, these managers increased their portion of the profit-sharing market to 35.8% in 1986 from 29.7% in 1985. The study covers more than 400 profit-sharing plan sponsors.

Internal management's share rose to 24.8% from 18.3%. Mr. Feldman said that may be due in part to increases in the value of company stock held by internal management staffs. Not every plan investing in company stock keeps it in-house, however; some have independent managers or banks hold the stock.

Banks and insurance companies' market shares also rose in the survey, but not at the pace of the investment advisers and internal managers. Banks' share rose to 17.5% from 16.2% and insurance companies' portion grew to 16.8% from 14.2%.

Mutual funds had only 1.9% of profit-sharing assets in 1986; they were not given a separate category in the 1985 survey, but were grouped with "other" investment arrangements. That category had only 3.2% in 1986, down from 21.6% in 1985; however, the 1985 figure may have been inflated by some respondents' confusion about what went into that category.

Not surprisingly, the survey also indicates the larger the plan, the greater the percentage of its assets with independent managers; the smaller the plan, the greater the percentage with banks, said David L. Wray, president of the Profit Sharing Council.

Money management for 401(k) plans is a different creature. While survey data similar to that on profit-sharing plans is not available, most industry sources estimate 70% of the assets of these plans, which tend to be employee-directed, goes into GICs.

"I think you're always going to see (GICs) in defined contribution plans, especially where employees have the choice of where their money goes," said William E. Heisler, vice president and director of marketing for Capitoline Investment Services Inc., Richmond, Va.

However, the presence of Capitoline and other active GIC managers in this market indicates that while the insurance companies remain the sellers of GICs, other types of firms can claim market share for GIC management. Capitoline and several other non-bank managers have made significant inroads in this area, and banks are getting into the act, too.

First Wachovia Corp., Winston-Salem, N.C., and Atlanta, recently has begun offering a pooled GIC fund. "We've found that to be absolutely indispensable," said Dick Burgin, vice president and sales manager in the Atlanta office. First Wachovia is signing up clients for the fund now and expects to have it operating in January.

IDS Trust Co., Minneapolis, which puts itself in the independent manager category, has found its combination GIC and money market fund to be successful in attracting 401(k) assets. The fund, which is always 75% in GICs and 25% in money market instruments, is popular because it's easy to administer and to explain to participants, said Gailen Krug, vice president-client services.

About $300 million of IDS Trust's $1 billion under management is in this fund.

Some mutual fund companies have begun to offer GIC funds, Hewitt's Mr. Feldman added. "Mutual funds use it as one extra arrow in their quiver," he said.

*Noel Feldman has tracked the growth in defined contribution plans' use of independent firms.*

The Vanguard Group of Investment Cos., Valley Forge, Pa., offers a commingled GIC fund through a division, Vanguard Fiduciary Trust Co. It is not a publicly traded mutual fund, but is available only to plans that offer other Vanguard funds as investment options. "The existence of that pool has been very important to our overall success," said Ben Bowditch, senior vice president-investment marketing.

The fund has been operating for four years; since then, it has placed more than $500 million in GICs, Mr. Bowditch said.

For equity options offered in 401(k) plans, sponsors usually choose mutual funds and bank-managed stock index funds.

"Where active management has been the vehicle, mutual funds have been used," said Catherine Higgins, president of Buck Pension Fund Services Inc., New York. "For passive management, banks have been used."

Both types of managers have their appeal for participants — mutual funds, because they can follow the publicly traded funds' performance daily; stock index funds, because they promise to match market returns.

As investment options in 401(k) plans proliferate, mutual funds will benefit, Mr. Feldman said. "I haven't seen any industry benefit more from any law than the mutual fund industry under section 401(k)," he said.

Recently proposed Department of Labor regulations, which would require sponsors of employee-directed plans to provide a broad range of investment choices, may benefit mutual funds further (*Pensions & Investment Age*, Sept. 21). The proposal would put into law what sponsors always have found attractive about mutual funds — the availability of a family of diversified funds, Vanguard's Mr. Bowditch said.

Organizations that can provide trusteeship and participant record-keeping as well as money management for 401(k) plans have an edge in attracting business. "We find that many of our prospects find a lot of value in all services under one roof," Ms. Krug said.

"Increasingly, plan sponsors would like to have it all in one place," Mr. Bowditch added.

While some large companies do their 401(k) record-keeping in-house, many sponsors find it too much of a headache.

"It's absolutely the Achilles' heel of these plans," Mr. Burgin said.

It also can be problematic to have different firms as trustees and record-keepers. Having one provider perform both services "eliminates a lot of the administrative functions," said Sook-Kuen Chang, vice president of Bankers Trust Co., New York.

Banks tend to be the trustees of 401(k) plans, while those sponsors who don't do record-keeping in-house may hire either banks, insurance companies, mutual funds, specialized money management firms or benefit consultants. ■

# Insurer survey shows no pause for 401(k)s

The Tax Reform Act of 1986 has had a minimal impact on 401(k) plans, according to a survey released by Massachusetts Mutual Life Insurance Co., Springfield.

The average deferral percentage of higher and lower-paid employees generally was expected to decline because of the changes in tax laws. However, the survey showed that tax reform had very little impact on deferral rates, said Edmond F. Ryan, pension vice president of the Mass Mutual Group.

The survey also shows tax changes had much less than the expected impact on the establishment of 401(k) plans. Seventy-two percent of those companies polled that did not have a 401(k) plan indicated tax reform would not affect the possibility of their starting one in the future, Mr. Ryan said.

A copy of the survey can be obtained by writing to B.J. O'Keefe, director of group pension marketing, at Massachusetts Mutual, 1295 State St., Springfield, Mass. 01111. ■

# International

# Path to Third World rocky

By Marlene Givant

NEW YORK — While most executives investing fund assets abroad are concerned about portfolio allocations among the world's largest stock markets, the smaller group of institutions investing in Third World markets has much wider-ranging concerns.

Members of that group include the $7.4 billion United Nations Joint Staff Pension Fund and the $34 billion Teachers Insurance and Annuity Association — College Retirement Equities Fund, both of New York, the $2.6 billion Common Fund endowment, Fairfield, Conn., and Yale University's endowment, New Haven, Conn.

Among the complaints are roller-coaster price fluctuations, a lack of company information and research, restrictions on foreign investment, poor liquidity, high execution costs, securities settlement difficulties and currency instability.

U.S. investors also must muddle through different accounting and tax laws and reports written in foreign languages.

In many emerging countries the government controls most companies, either directly or indirectly, said Vinod B. Bavishi, founder and executive director of the Center for International Financial Analysis and Research Inc., Princeton, N.J.

So local analysts working for government-owned financial institutions may not have an arm's-length assessment of the companies they research. Also, investment researchers in most countries don't get rewarded for good recommendations as they do here, he said.

The center has developed the Worldscope international financial data base in conjunction with Wright Investors Services, Bridgeport, Conn.

Helping to fill the information void, it plans to expand Worldscope by including the past seven years of financial information on the 500 largest companies in 10 emerging markets. And the International Finance Corp., Washington, a division of the World Bank, will release for institutions its IFC Emerging Markets Data Base, covering more than 300 stocks in 20 Third World countries.

Despite the information problems, investors expect the markets' potential to offset the risks.

Emerging countries have a gross national product per capita of $5,000 or less, according to the IFC.

The 20 most developed of the developing countries represent 15% of world GNP and their stock market value is 2% of GNP, said David Gill, director-capital markets department of the IFC.

"Hypothetically, for 2% you buy 15% of the world. (Price-earnings) and book-to-price ratios are lower than Organization for Economic Cooperation and Development stock markets, and economic growth rates and real GNP growth rates are two percentage points higher on average than those in mature economies. In addition, some of these markets have negative correlations with (markets of) mature economies," Mr. Gill said.

While liquidity of emerging markets is a far cry from that in the United States, it is in many cases comparable to that of European markets, said Antoine van Agtmael, author of "Emerging Securities Markets," which has become an industry textbook since its publication several years ago.

Taiwan's $22 billion 1986 trading volume exceeded that of Spain, Belgium and Denmark. Brazil's $29 billion volume exceeded Australia's $26 billion during that period.

The leading stocks in larger emerging markets have a float — or percentage of shares available to the public — of 25% to 60%, which is comparable to that of the U.S. over-the-counter market and midsize European markets.

Market turnover ratios in Taiwan, South Korea, Mexico, Thailand and Brazil were between 20% and 124% in 1986, compared with 20% to 60% in major international markets.

"Relative to the size of the markets, these turnover ratios are comparable," said Mr. Agtmael, who is president of the newly launched registered investment adviser, Emerging Markets Investors Corp., an affiliate of the World Bank spin-off Strategic Investment Partners.

But investments in these small markets must be small and staggered.

*CREF's Virgil Cumming says the fund invests in South Korea and Taiwan.*

Pierre Henchoz, chief of the investment management section of the United Nations, said "We think for each emerging market investment, we should have at least 0.5% to 1% of equities. That's a big amount, although a relatively small percentage of equities.

"You can't put $50 million in a certain market when the market cap is very small. I'm concerned everyone is just looking to invest (for the short term). The day the investment community will sell at the same time, we might have a severe correction. But as long as we're long-term investors, sooner or later liquidity and market capitalization will be tremendously greater than today."

"The market capitalization of LDCs — $130 billion — is expected to exceed $500 billion by the end of the century. That's where you have to look," he said.

Because portfolios investing in emerging markets and emerging companies usually contain a large number of stocks, the Common Fund and Yale University endowments formed a partnership fund

## Funds provide execs the most for the least

Given the limitations of investing in Third World markets, pension executives are using mutual funds and country funds for high performance with minimal hassles.

These funds free institutions from responding to foreign investment regulations and tackling the exhaustive research emerging markets demand.

Developing countries, such as Taiwan, South Korea, India and Brazil, like the control afforded them by country funds.

"Their main concern is if they let you take money out tomorrow, then their currencies will collapse," said Vinod Bavishi, executive director and founder of the Center for International Financial Analysis and Research, Princeton, N.J.

"They could limit the amount taken out each month. They're worried that companies will be vulnerable to foreign control.

"Country funds (and emerging-market mutual funds) would not like to own companies and are more positively received. Some countries (such as India and South Korea) are allowing managers to selectively come in through funds. That gives them better control so they can set ground rules to their liking."

A problem with country funds in popular emerging markets is that premiums tend to be quite high. Such is the case in South Korea.

"The Korean outlook is attractive but we have not found an attractively priced way into the market," said Laura Luckyn-Malone, vice president of the New Asia Fund managed by Scudder, Stevens & Clark, New York.

Launched in June, the New Asia Fund invests 78% in Japanese and Hong Kong emerging growth companies and in Southeast Asian emerging markets. India is one of the most attractive markets, she said.

The International Finance Corp., Washington, a division of the World Bank that is advising 20 of its 132 member governments on international investing, and underwrites and invests in several country funds and private placements, recently launched the Emerging Markets Growth Fund, managed by Capital Research & Management

# *Institutional influence to grow in Japan*

By Joel Chernoff

NEW YORK — Institutional investment managers will show a much stronger influence on Japanese stock prices during the next five years, according to Anne Cabot, international marketing manager for Sanyo Securities Co. Ltd., Tokyo.

Conventional wisdom suggests the "Big Four" Japanese securities firms have an undue influence on stock price moves, but the situation actually is more subtle and complex, she said.

Four external factors exert pressure on stock prices in Japan: government and financial regulatory agencies; securities firms; investment networks; and speculators, Ms. Cabot said at a recent Institute for International Research conference.

The Tokyo market is roughly where the U.S. market was 20 years ago. While institutional investors accounted for a majority of trading in the United States since the late 1960s, it was only last year that institutional managers crossed the 50% of trading threshold.

Government influence on the Japanese stock market is subtle, often coming through suggestions or oral communications, Ms. Cabot noted. The government also can shift tax and monetary policy to encourage investment policy.

In addition, the Tokyo Stock Exchange has either eased or toughened margin requirements to stimulate or dampen market movement at key times, she said.

The Big Four securities firms — Nomura Securities Co. Ltd., Daiwa Securities Co. Ltd., Yamaichi Securities Co. Ltd. and Nikko Securities Co. Ltd., all of Tokyo — traditionally have had a strong effect on individual stock practices.

Because Japanese salesmen have lifelong employment, they adhere to company directions on selling stocks to their retail customers, Ms. Cabot said.

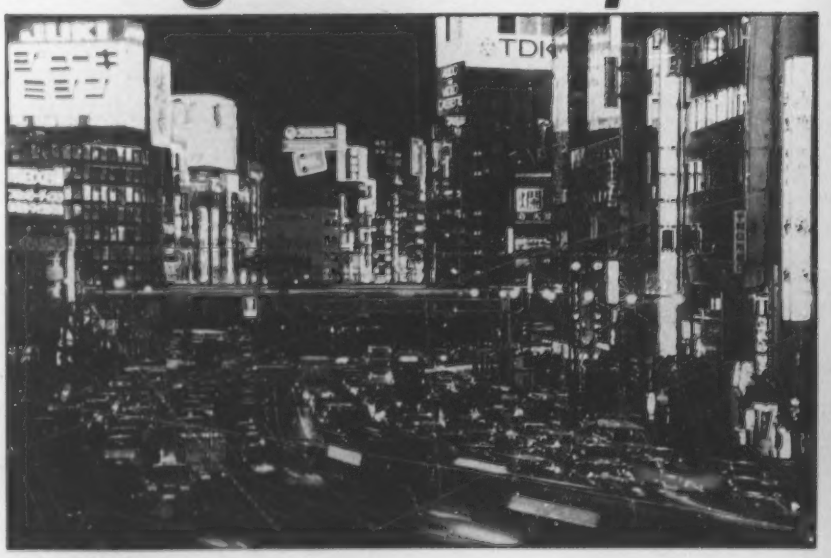
Securities firms still get about 70% of revenue from commissions, and 30% of commission income stems from margin trading, she added.

That in turn leads to increased portfolio turnover; last year, margin trading doubled.

But the surge in institutional buying has caused the relative impact of margin trading to decrease to less than 20% of total market activity, Ms. Cabot noted.

The Big Four still dominate total trading because they have picked up new institutional business from "tokkin" funds and investment trusts.

*Continued on page 34*



*Institutional investment managers are expected to play an increasingly important role during the next five years in the Tokyo market, the financial capital of Japan and home of the "Big Four" Japanese securities firms.*

# The most . . .

*Continued from page 31*

Co., Los Angeles. The fund, which invests in Chile, Brazil, Jordan, Mexico and several Southeast Asian markets, rose 60% to 70% between mid-1986 and Sept. 30. Investors, including representatives of the IFC, are on the board and take part in market decisions.

Investors and researchers acknowledge the trials of Third World investing but are bullish for the long term.

Just because a country has severe debt problems doesn't mean its market will do poorly. Mexico, the Philippines and Argentina have done extremely well despite their problems, said Walter P. Stern, chairman of the investment committee of Capital Research & Management.

"The markets are more risky, but commensurate with that we hope for more return. They're less perfect by definition than developed markets. Whenever there are imperfect markets, there should be value."

The top-performing emerging markets this year have been Mexico, Taiwan, South Korea, Malaysia, Thailand, Greece and the Philippines, according to the IFC Emerging Markets Data Base.

In dollar terms, the Mexican market index rose 134% in the first six months of this year. The market's capitalization has nearly quadrupled from its $6 billion level in January, more from price appreciation than new inflows, although capital outflows in Mexico have been reversed this year.

Korea's index rose 61% and Taiwan's rose 87%. Brazil's index was down 59% for the six months. The Brazilian market is so volatile its plunge was interrupted by a 20% rise in only two weeks in late spring, according to the IFC.

"The Philippines was the flavor of the month a few months ago but the latest coup attempt has cooled it off. In my view, the big daddy of emerging markets is going to be China, and the way to play that is through Hong Kong" by investing in such companies as **Hopewell Holdings**, which builds power stations and major highways in China, said Lester Sturgess, senior vice president, James Capel & Co., New York.

"If Hong Kong's reabsorption into China is as good as we hope, Hong Kong's relationship to Peking will be like New York's relationship to Washington," he said.

Executives at Hoare Govett Inc., New York, believe South Korea has all the factors a promising Third World market should have: political stability, export-led growth and good control of inflation, unemployment and the money supply. The firm also is bullish on Brazil because its inflation has fallen, it has control over its economic policy, political stability, a wealth of natural resources and a capitalist mentality, said Christopher J. Curwen, vice president-international equities.

"We believe Asia has been the fastest-growing market for 10 years and think that will continue. Where there's high GNP growth, there's a favorable environment for strong corporate growth. That drives stock markets," said Ms. Luckyn-Malone of the Scudder New Asia Fund.

Country funds often are the only vehicle through which foreigners may invest in a given market.

The Templeton Emerging Markets Fund Inc., however, does not invest in country funds. It buys companies listed on major stock exchanges, as long as they conduct at least 50% of their business in the Third World. Such companies include **Antofagasta Holdings PLC**, a London-listed company that operates a railroad, mines and copper processing plants in Chile, and **Ocean Wilsons PLC**, another London-listed company that operates tugboats along the coast of Brazil and owns a truck dealership there.

Templeton's low-turnover, bottom-up approach is well suited to investments in Third World markets.

"If you were top-down, you could easily eliminate most countries (we invest in) because the macroeconomic picture looks so bad," said Mark Mobius, president of the fund. He only looks at macroeconomic factors insofar as they affect a company's earnings.

Templeton International, Fort Lauderdale, Fla., which runs the New York Stock Exchange-listed closed-end mutual fund from Hong Kong, plans to launch a similar fund in Europe for institutions.

In addition to research demands, Mr. Mobius said the fund requires special attention to back-office problems, especially in markets like Chile, where its global custodian, Chase Manhattan Bank, New York, has no custodial relationship as yet.

"We find ourselves doing a lot of work the custodian should be doing. We push (banks), get them moving, overcome legal hurdles to getting into a country," Mr. Mobius said.

The Templeton fund was established as a closed-end fund "because we don't think it's fair for them to get into an open-end mutual fund and not be able to get out. We have to approach it as a long-term investment. Liquidity isn't there and there are strict foreign exchange controls. Getting money out may be difficult," said Mr. Mobius.

Despite the enormous gains in some emerging markets, Grantham, Mayo, Van Otterloo & Co. International, Boston, which uses quantitative approaches, is deterred from investing in the Third World because of the lack of reliable company data.

"We're not yet willing to put work into it until we're sure it will be worth it for the long term," Margaret McGetrick, portfolio manager. "Right now, most markets are too closed to foreigners. To directly invest in Brazil, you have to be approved by the Brazilian authorities, create a fund of at least 10 companies, invest evenly in each company and invest for a certain amount of time. You also must be associated with a Brazilian fund. After cutting through those restrictions, you're free to deal with inflation and the market going down." ■

# Institutions . . .

*Continued from page 31*

And stock prices still can be manipulated through "rescue campaigns" when customers are sitting on margin losses, sometimes in concert with other firms.

But institutional fund managers are boosting their influence on the market. With the recent flood of new money under management, investment managers are forming study groups to determine economic trends and market strategy. Those groups can have a larger influence than the Big Four, Ms. Cabot said.

Consensus buying dominates the fund manager networks, she explained. The groups are most active after a significant correction. Managers avoid individual responsibility through consensus buying, and that enables everyone to participate in market gains.

But the impact of this policy wanes after managers achieve a "reasonable profit," Ms. Cabot said.

But international portfolio management techniques are becoming more widely accepted. This trend is bolstered as Japanese portfolio managers join foreign firms but remain with their study groups, thus introducing both outside investment ideas and new strategies to their peers, she said.

Speculator groups also can have a significant impact on the market for specific stocks, sending some through dramatic run-ups but also through unnerving crashes, Ms. Cabot said.

While the returns can be spectacular, the risks for outsiders do not justify the returns, she added.

Stocks bolstered by rumors performed better than the overall market during the past year, according to a study by Sanyo, but failed to return as well as the 50 best performing stocks, suggesting "hot information" might not be the best. ■

# Wickes' way . . .

*Continued from page 45*

payments.

"They are aware these are a pain in my side," he said of the banks with surcharges.

He said the surcharge is one negotiating item as Wickes considers consolidating lockbox banks. He said Charlotte is becoming a better site for lockboxes. "Atlanta may or may not be part of the total picture as we move forward," he added.

Also, the company is considering moving payment of its payroll taxes to Continental Illinois and another bank Mr. King declined to identify. He said Wickes would stop making the payments to five banks serving as collection agents. He declined to identify the banks.

He said the negotiations focused on the two banks' willingness to share some of the float they receive from the payments. In return, Wickes would consolidate its tax payments with the two banks.

He said Wickes, like all companies, makes payments with immediately available funds. The banks, however, have one day of use of the funds before turning the payments over to the government.

Although Wickes centralizes collection and disbursement, it decentralizes among its 70 units the information content of its cash and working capital management operations. Its working capital control is accomplished by weekly review of actual cash receipts and expenditures of each of its units, all done by computer. "We try to eliminate work with paper as much as possible," he said.

In the analysis, Mr. Lesar said he and his staff compare the actual cash flow to each unit's annual budget as well as its latest four-month forecast, updated monthly. The analysis points out any notable variances, enabling the company to make such adjustments as reducing purchases if sales have fallen more than expected.

"The company has structured itself to be cash driven," Mr. Lesar added, "and it's the ultimate product of the cash flow reports.

"It forces the units to focus on working capital" and its impact on cash, he said. ■

# Alcoa . . .

*Continued from page 45*

First Boston Co. and Salomon Brothers Inc., both based in New York, manage Alcoa's domestic paper program.

"We're in the process of launching a Eurocommercial paper program by year end, if the market is right," Ms. Ambrose said.

As for the rate Alcoa expects to pay, she said, "We hope it will be similar (to the domestic rate). But we want to have a presence in Europe as well."

She said the company is willing to wait for better Euromarket conditions. "There are recent indications that rates haven't been attractive."

The company's domestic paper is rated P-2 by Moody's Investors Service Inc., New York, and A-2 by Standard & Poor's Corp., New York.

She said Alcoa's domestic program accounts for virtually all the company's short-term borrowing.

In May, Alcoa sold $150 million in 6¼% Euroconvertible debentures at par, said Cynthia Holloway, manager-financing services.

She said she believed the sale was Alcoa's only recent debt issue in the overseas market.

The convertible issue, managed jointly by Credit Suisse First Boston, Morgan Stanley International, London, and Salomon Brothers International Ltd., London, was sold with a conversion premium of about 21%.

ers, whose assets were placed in the active equity total, might be seen by some clients as semipassive, or at least a less-risky type of active manager.

"Sponsors probably feel a lot more comfortable with a well-defined product," said Larry Davanzo, general partner of Wilshire Associates, Santa Monica, Calif., on the quants' popularity.

Of the active equity total, $289 million went to quantitatively oriented firms. The biggest chunk of that was a $225 million account to be managed by Geewax, Terker & Co., Phoenixville, Pa., for Unisys Corp., Detroit.

Sam DeKinder, executive vice president of DeMarche Associates, Kansas City, Mo., said he has seen a lot of interest in large-capitalization growth stock managers. He added active management's outpacing of index funds might indicate that those investors who wanted to index already have done so.

On the bond side, $6.3 billion went into index funds, with $6 billion of that being Manufacturers Hanover Investment Corp.'s new account for the California State Teachers' Retirement System, Sacramento.

Believed to be the largest bond indexation move ever, it is only a temporary one — the system will keep the money in the index fund for several months while it makes arrangements to bring the money in-house.

Active bond accounts drew in $568 million during the quarter, while dedicated bond portfolios attracted $159 million. Interest in dedicated bond portfolios, a hot investment strategy a few years ago, dropped off as interest rates dropped; this $159 million may not indicate a resurgence of popularity — about one-third of it was just going from one dedication manager to another.

Balanced management showed some popularity, particularly for small and middle-market funds, with $309.1 million being allocated to balanced accounts.

One very large fund, the $9.6 billion British Rail pension fund, London, also reported balanced manager selections, but these were not included in the balanced total because the accounts are largely in British securities. The managers were hired in January, but not reported until July. The hirings were part of the fund's move to external from internal management.

Selected by British Rail for balanced accounts were Mercury Warburg Investment Management, with $2.4 billion; Morgan Grenfell Investment Management, Robert Fleming Investment Management and Prudential Portfolio Managers, $1.2 billion each; Philips & Drew Fund Management, $800 million; and Martin Currie Investment Management, $400 million.

Real estate and international also were popular asset classes during the quarter. Real estate, like bond indexing, benefited from one large public fund account. Of the $764.2 million reported for real estate managers, $400 million went to Copley Real Estate Advisors, Boston, for the Washington State Investment Board, Olympia.

Real estate really hasn't experienced a surge of interest, just ongoing popularity, consultants said. Several months ago, investors were worried about the effects of tax reform on real estate prices; now, they appear to be thinking that already has been reflected in the pricing, said Ron Surz, principal of Becker, Burke Associates, Chicago.

Of the $669.2 million that went into international and global strategies, $630.7 million went to active managers and $38.5 million to index funds. International investing remains popular for diversification, Mr. Surz said.

Mr. DeKinder added pension funds, especially public ones, are far more willing to consider international than they were a few years ago. Performance also is a factor.

"Even with the recognition the Pacific Basin and the Japanese stocks may be fairly valued, if not overvalued, other marketplaces have continued to show attractive rates of return relative to domestic equity," he said.

Another means of diversification was investing in oil and gas. Cherokee Resources Inc., Palo Alto, Calif., attracted $87 million, with at least six tax-exempt investors participating. Cherokee Resources was formed to buy defaulted energy loans, secured by producing oil and gas properties, from the Federal Deposit Insurance Corp. and banks.

Tactical asset allocation attracted $285 million, all in accounts with Mellon Capital Management Corp., San Francisco. Venture capital drew $136 million: $99 million was from the State of Connecticut Trust Funds, Hartford, to Bigler Investment Management Co. ■

### Positions Available

**SENIOR PORTFOLIO MANAGER**
**U.S. SECURITIES**

Well established global asset management firm seeks a senior U.S. Portfolio Manager for its int'l clients. Minimum 4-5 years experience managing U.S. equities; solid analytical background would be a plus. We offer competitive remuneration. Please send your resume in confidence to:

**Personnel Dept.**
**NIKKO & Associates, Inc.**
**350 Park Avenue**
**New York, NY 10022**

**DIRECTOR**

The Louisiana State Employees Retirement System, a two billion dollar pension fund in the State of Louisiana, offers a challenging career opportunity as Director for an individual with a Bachelors degree (business related field desirable), MBA preferred, and at least 5 years of diverse management experience preferably in pension plan administration. This is an upper level unclassified state government administrative position which will directly report to the Board of Trustees. Exposure to advanced automated data processing systems and public sector administrative experience is highly desirable. Salary commensurate with experience from $50,000 to $75,000 plus fringe benefits. Qualified candidates are encouraged to submit resumes to:

**LSERS**
**P.O. Box 44462**
**Baton Rouge, LA 70804-4462**
No later than December 1, 1987.

**INVESTMENT RESEARCH**

Career opportunity with highly successful private investment management firm for individual with BA Accounting/Math. Ideal candidate is Lotus 1-2-3 fluent, has a strong accounting analysis skill, high work ethic, and is challenged by the opportunity to analyze public companies. Relevant experience a ...t will train. Send resume to:

**P&I Age, Box 658**
**...ns & Investment Age Classified**
**220 E. 42nd Street**
**...w York, NY 10017**

**...ESEARCH**

...brokerage firm ...st to work in... ...wing pre...

**EXECUTIVE DIRECTOR**

**for large midwestern public pension fund**—nearly 40,000 members and $2.5 billion of assets. The successful applicant will supervise all aspects of the fund operations including accounting, benefit calculations, and investments, and will report directly to the board of trustees. Salary negotiable. Reply by Nov. 10 1987 to:

**P&IA Box 656**
**Pensions & Investment Age**
**220 E. 42nd Street**
**New York, NY 10017**

**MERGER/ACQUISITION SPECIALIST**

Chairman of publicly owned health care company is seeking an experienced and agressive individual to assit him in acquisitions of business development. MBA and experience is required. Excellent opportunity. Respond to:

**Chairman**
**Continental Health Affiliates**
**900 Sylvan Avenue**
**Englewood Cliffs, NJ 07632**

**MONEY MANAGER**

Money Manager, New York Area, with $25 million under management seeks to share space and/or research with money manager of similiar size. Respond to:

**P&I Age, Box 660**
**Pensions & Investment Age**
**220 E. 42nd St.**
**New York, NY 10017**

### Positions Available

**RETIREMENT SYSTEM INVESTMENT SERVICES COORDINATOR.** The New York State Retirement Systems have an immediate opening for a Retirement System Investment Services Coordinator in Albany, New York. The Retirement Systems currently manage approximately $39 billion in investment assets. Candidate must have strong technical, communications and supervisory skills. Reporting to the Director of Accounting, the successful candidate must meet the following minimum qualifications: • Bachelor's Degree or Advanced Degree in Accounting • Certified Public Accountant • Seven years experience in analysis of accounts and preparation of financial statements, including a proven background in investment accounting using an on-line, real time EDP system, and audit experience associated with investment accounting. At least one year's experience must be as a manager in this area. • An advanced accounting degree may be substituted for one year of non-managerial experience. • Only experience in a large CPA firm or on the staff of a large financial institution, such as a bank, insurance company, investment trust or pension fund will be considered qualifying. Full benefits package available. This position is being established for an 18 month period at an annual salary range of $47,000-$50,000. Send resumes and salary history to: **Director of Accounting, New York State Retirement System, Gov. Smith Building, Albany, New York 12244** by November 23, 1987. All replies held strictly confidential.

**ADMINISTRATOR - EMPLOYEE BENEFIT PLANS**

Large San Francisco Bay Area based multi-employer, Taft-Hartley Benefit Funds seek strong Administrator for top position of in-house administrative operation.

The individual selected for this challenging position must have minimum of five years experience in benefits administration at senior management level and working knowledge of budgeting, financial reporting, accounting systems and computer applications. Exceptional managerial and administrative skills, coupled wth excellent verbal and written communication skills essential.

The diverse duties of this position include:

- administration of 3 defined benefit and 2 defined contribution pension plans, and 2 health and welfare plans for 43,000 participants;
- working closely with the Board of Trustees and all levels of management in direction and supervision of 150 staff members;
- cooperation and coordination of effort with Fund attorneys, actuaries, accountants, consultants, investment managers and other professionals;
- preparation of budget, project, cash flow reports relating to operation of Administrative Office;
- preparation of materials for accounting analysis, cost effectiveness and cost containment as requested by professionals;
- familiarity with applicable federal and state regulation requirements.

Successful candidate will be provided with quality work environment, outstanding benefits program and excellent salary. For confidential consideration, send resume, professional references and salary history to:

**Employee Benefit Fund Administrator**
**Suite 1406, 41 Sutter Street**
**San Francisco, CA 94104**
EOE M/F

### Request For Proposals

**The New York City Comptroller invites proposals from growth style equity advisors to manage the assets of New York City Retirement Systems (approximately $50 to $100 million per account). The advisors should have at least matched the growth style manager median as measured by Callan Associates' database and have proven ability to handle large investment sums (minimum $750 million under management). Detailed requirements are set out in a Request for Proposals. Copies may be obtained by writing:**

**Robert Pam**
**Office of the Comptroller of the City of New York**
**Municipal Building, Room 701, New York, New York 10007**
**Or call (212) 669-2014. Proposals must be received by 10:00 p.m. Monday, November 2, 1987.**

# GEIC turns . . .

*Continued from page 3*
equivalents during the second quarter of 1987, according to a report to be released Oct. 26 by the Employee Benefit Research Institute, Washington, and the Federal Reserve Board.

In addition to its 15% in private investments, the GE pension fund, which accounts for roughly two-thirds of the $32 billion managed by General Electric Investment Corp., invests 49% in publicly traded equities, 21% in publicly traded bonds and 15% in cash. GEIC manages the remaining one-third in excess corporate cash and mutual funds for employee savings plans and corporate funds.

International stock and bond investments represent 6% of the pension fund, which is about 98% internally managed.

GE gradually will raise investments in enhancement arenas as those markets become ripe for investment.

"Our strategy is to continue to increase our investments in enhancement arenas because we feel total investment returns will be more in private areas over the long term than in publicly traded stocks and bonds. But we don't force markets; if we don't like real estate, we'll stay out," said Dale F. Frey, GE's vice president-investments and treasurer and chairman of the board of GEIC.

Of the enhancement arenas, 60% is mostly domestic real estate equity with some debt; 30% is private placements and 10% is venture capital. The GE pension fund recently participated in debt and equity private placements for **Mattel Inc.**, a toy manufacturer, and **Health-Tex**, a children's clothing manufacturer. There is no precise target for private investments, "but I would start thinking about a cutoff if it started approaching one-third of assets," given funding obligations, he said.

For investments in publicly traded securities, the fund uses a variety of systematic approaches including a Standard & Poor's 500 stock index core portfolio and dividend discount model and low price-earnings quantitative approaches.

It also uses futures and options with the core strategy.

The fund is divided into subfunds that use various approaches. Most GEIC portfolio managers do their own research; Mr. Frey, who joined the fund in 1984, believes that is the most efficient way to generate research. Mr. Frey has been with GE for 30 years.

While he did not provide specific returns, he said most of GE's equity funds have surpassed the S&P 500 stock index in the past several years. The bond portfolio has exceeded the Shearson Lehman Government/Corporate bond index return "for many, many years." The bond portfolio has done well because the managers have been able to rapidly shift maturities to take advantage of yield curves and select appropriate bond sectors such as mortgage-backed, industrial and Treasury bonds.

International equity returns were in the 55% to 60% range in each of the past two years vs. the Morgan Stanley Capital International Europe Australia Far East index's compound annualized 63.2% return for the two years ended Dec. 31, 1986.

While Mr. Frey is optimistic about private markets, he is becoming defensive about public stock markets.

"I think the (U.S.) market is high enough that you ought to be taking profits and have some cash. We have more (cash) than we had in the last three to four years," he said.

"With the prices of most stocks it's difficult to find value but, on the other hand, supply-and-demand forces are unlike anything we've seen in the past. There is a shrinking equity market due to corporate buybacks and takeovers, yet Japanese money and other foreign money is pouring in."

To a Japanese investor, U.S. stocks look like the best bargain in town especially when compared with Japanese stocks, he said.

But Mr. Frey doesn't expect any significant correction: "I think the U.S. (bull) market could continue a while longer but prudence would say you should not be fully invested and bond market maturities should be shorter rather than longer."

Most bonds in GE's portfolio have maturities of five to seven years.

About 60% of equities are invested in non-core, non-quantitative approaches such as active growth, value and special situations.

Through arbitrage — effectively owning the index when it is cheaper than the underlying stocks — the fund's S&P 500 stock index fund, which represents 25% to 30% of equities, has been able to beat the return of the index by 10 to 30 basis points last year and so far this year. The S&P returned 18.7% in 1986.

GE does not use portfolio insurance because it's too costly given the fund's size, he said, but it does use futures and options frequently.

"One advantage of an S&P fund is that we get out of the equity market by shorting the index, selling the stocks in a matter of hours with no market impact and without having to go through the agonizing decision of what to sell," Mr. Frey said.

But quantitative approaches, like other active approaches, are not always in favor.

"Our performance has been hurt this year by systematic low p/e approaches. A lot haven't worked in this kind of market. You have to go into (systematic approaches) very humbly and cautiously because there aren't any free lunches. We're not foolish enough to think we'll stumble across a computer model that will always win in all markets."

Fund officials are thinking about investing in indexed bonds or international equities as core strategies.

While the officials aren't averse to external managers, GE only has 12, almost all for international investments.

"It doesn't make economic sense to build all of (a fund's) international capabilities in-house. You need outside contacts in other countries," he said.

Mr. Frey declined to identify the managers, but according to the 1987 Money Market Directory, they include Capital Guardian Trust Co., Los Angeles; Fidelity International Investment Advisors, Boston; Fidelity Management & Research Co., Boston; G.T. Capital Management, San Francisco; Grantham, Mayo, Van Otterloo & Co. International, Boston; Morgan Grenfell Investment Services Ltd., London; Nomura Capital Management, New York; Rowe Price-Fleming International Inc.; Oxford Partners, Stamford, Conn. (venture capital); Hill Samuel Investment Advisers Ltd., Minneapolis; and ABD International Management Corp., New York.

Marsh & Cunningham Inc., Boston, which recently invested a small amount in Brazil on behalf of GE and another fund, also is a manager (*P&I Age*, Aug. 10).

"In international, we'd feel comfortable with 10% to 15% but it's a mistake to simply set a percentage because there'll be times that it's right to be international and a time not to. We have the flexibility to move in and out of markets as we feel we should," Mr. Frey said.

International equities have increased nearly tenfold in four years, to between $820 million and $840 million from $90 million in 1983. Of the current total, $400 million is run internally.

Staff members "are given a significant amount of flexibility and freedom to make decisions quickly . . . We're not tied up in a big, bureaucratic process. I think that's what distinguishes us from the rest of the world."

GE is no newcomer to private market and other alternative investments. It was one of the first and largest funds to enter real estate 15 to 20 years ago, venture capital six years ago, international about four years ago and indexing and other systematic approaches three years ago.

The job of Mr. Frey and his direct staff is to come up with broad strategies of asset allocation, industry weightings and the kinds of portfolios to have in place. Stock selection decisions are left to portfolio managers. There are 40 investment professionals at GEIC.

Directly reporting to Mr. Frey are trustees Art Bahr, senior vice president in charge of equities; John Myers, senior vice president in charge of fixed-income and private areas; Alan Lewis, senior vice president and counsel; and J.E. Bonhiverd, senior vice president in charge of finance. The company's oversight committee reviews major asset allocation shifts.

The GE pension fund includes close to $3 billion in retirement assets from RCA Corp., which is owned by GE. While the two companies' plans are separate, the funds are mostly commingled for management purposes. Both companies' retirement plans were overfunded as of the end of 1986. ■

# Borrowers . . .

*Continued from page 1*
tion of total volume will be swap-related," said William S. Broeksmit, a vice president at Merrill Lynch Capital Markets, New York.

But in a bear market, issuers rely on interest rate swaps to give them a cost of capital that is lower than the rate investors are getting, he said.

In the generic interest rate swap, a fixed-rate payer and a floating-rate payer exchange interest payments until the liability matures. The interest rate swap allows issuers to obtain capital from the lowest cost sources and convert those liabilities into the optimal form.

"In January and February, given where rates were, companies were not interested in interest rate protection because they did not see the need," said Avram Stein, a vice president in Chase Manhattan Bank's financial products group. "Now concern about interest rates has heightened to the point where they are saying, 'We have to protect ourselves.' "

The esoteric interest-management tools developed by Wall Street and the money-center banks are less available to companies with a low profile in the capital markets. If a company is not showered with presentations by bankers, "you've got to do your own bird dogging," said Robert B. Whittridge, treasurer of the Savin Corp., Stamford, Conn.

Of course, some companies don't need those tools as much as others.

"Many clients who did a lot of borrowing earlier in the year are able to sit back right now and be very opportunistic in this market," said Alan D. Schwartz, head of corporate finance at Bear, Stearns & Co., New York. "Other clients feel more pressure as they add commercial paper while the cost of borrowing goes up."

Although investment and commercial bankers have plenty of interest-rate management tools at their disposal, they freely acknowledge they can't turn a bear into a bull.

"If we're lucky, when rates go up 200 basis points we'll be able to save them 20 basis points on the new rate," Mr. Schwartz said.

"There's no such thing as money for nothing," said Michael S. Rulle, managing director at Shearson Lehman Brothers Inc., New York.

While strategies involving interest rate swaps and caps are complex, others, like issuing convertible debt to control interest expense, are relatively straightforward.

The simplest strategy of all — doing nothing — also is an option for corporate financial officers. But sitting on the sidelines for too long carries its own risks in a bearish bond market.

"If you don't react in advance and you wait until it (rates go up) happens, then you're obviously behind the pack," said Richard J. Clout, vice president in charge of worldwide borrowings at General Motors Acceptance Corp., Detroit. Because GMAC expected rates would rise during the summer, it substantially satisfied its 1987 funding requirements by the end of July, Mr. Clout said.

But sitting on the sidelines has emerged as the favored strategy among many issuers, according to Salomon Brothers Inc. Weekly Credit Monitor data on debt issuance volume.

While the monthly average of corporate bond issuance in 1986 was $14.1 billion, the monthly average for the first nine months of 1987 was $12.1 billion. Domestic corporate bond issuance in September, August and July was $8.7 billion, $7.9 billion and $12.9 billion, respectively.

Corporate issuers had good reason to slow their pace. The average yield of new corporate debt issues was 8.89% in February 1987, but 11.038% in September, according to data supplied by IDD Information Services Inc., New York. That figure, which excludes mortgage- and asset-backed securities, stood at 11.362% through Oct. 9.

Source: Shearson Lehman Brothers Inc., New York

Rates at these levels are stalling the push toward balance sheet restructuring that gained impetus as rates fell during the middle 1980s.

While the monthly average volume of straight debt calls in 1986 was $3.4 billion, the figure for the first nine months of the year was $2.9 billion, according to the Oct. 5 issue of Financing and Market Perspectives, a Merrill Lynch Capital Markets publication. The volume of straight debt calls stood at $836 million in September, $2.1 billion in August and $2.5 billion in July.

"The drop in calls of high-coupon debt and increasing rates on new borrowings are driving interest payments up again," the publication noted Sept. 21.

Almost $27 billion of outstanding bonds with coupons of at least 12% were callable in the beginning of October, said Robert A. Schwartz, a senior financial economist at Merrill Lynch.

The decline in call volume is likely a temporary development, he said: "I think there is a sense of urgency on the part of corporations to refund these issues before rates get out of hand."

As rates escalate, an increasing number of corporate financial executives reach the "give up" stage, according to a debt syndicate official at Bear, Stearns who asked to remain unidentified.

"Some treasurers have come to the point, now that the market has backed up 250 basis points, that they are going to issue now because rates are going higher."

Current rates should be considered in an historical context, said Robert G. Scott, a managing director at Morgan Stanley & Co. Inc., New York.

Although the 30-year Treasury is nearly 10%, that security had a 15.5% yield in 1981, Mr. Scott said, noting current rates may seem worse then they actually are.

Intermediate-term fixed-rate debt is clearly preferable to the lower-coupon floating-rate debt available through commercial paper, Mr. Scott said: "I believe that over the next 24 months, floating-rate debt will average out to be more expensive than fixed-rate debt."

Although fixed-rate debt is now relatively expensive, some relief can be found.

Convertible debt, for example, is a good option for some issuers, said Gerry McGrath, a managing director at Prudential-Bache Securities Inc., New York. "For those people who have to finance and whose stock price is at or near all-time highs, and if they want to raise a good sum of money, the convertible market is quite attractive."

Shearson's "Treasury lock" insulates issuers from rising rates if there is a delay in making an offering, said Mr. Rulle, a managing director at the firm. Although the product protects issuers from an upward move in rates, it penalizes them if Treasury rates move below the target coupon.

Puts can shave basis points off a debt issue, but the strategy can backfire if investors exercise this option, said Mr. Schwartz of Bear, Stearns. Exercise of the put option defeats the issuers plan to lock up a cost of funds at a favorable fixed rate.

Liabilities denominated in Australian or New Zealand currency as well as debt issues attached to currency or commodity warrants also can lower the cost of financing, said Mr. Rulle. Issuers display a greater interest in these products when rates escalate, he said. ■
